THE BUDGET

OF THE

UNITED STATES GOVERNMENT

FOR THE FISCAL YEAR
ENDING JUNE 30

1959

UNITED STATES
GOVERNMENT PRINTING OFFICE
WASHINGTON : 1958

JAN 24 1958

INTRODUCTION

Pursuant to the provisions of the Budget and Accounting Act (31 U. S. C. 1-24) and other applicable laws, the budget for the fiscal year 1959 contains the President's recommendations for the work program and financial program of the Government for the 12 months beginning July 1, 1958, and ending June 30, 1959. It also presents comparable information for the fiscal years 1957 (actual) and 1958 (partly actual and partly estimated).

The material in the budget covers both groups of funds administered by agencies of the Government—Federal funds (owned by the Government), and trust and deposit funds (held in trust or in suspense by the Government), although only the Federal funds are included in the computation of the budget surplus or deficit.

ARRANGEMENT OF THE BUDGET

The budget document consists of the President's budget message and four parts which contain summary tables, detailed data, and special analyses.

In the budget message (pp. m4 through m56), appear the general statement of the President's financial program and an outline of his major recommendations.

Part I of the document (pp. 1 through 8) contains five summary tables. Each of these tables is designed to bring together in one or two pages some overall aspect of the Federal budget.

Part II (pp. 9 through 824) contains the detail of the budget for Federal funds, including various types of tables and schedules, explanatory statements of the work to be performed and the money needed, and the text of the language proposed for enactment by Congress on each item of authorization. Also included is material on a few trust funds which require congressional action. This part of the budget begins with four statements (tables 6 through 9) which supplement the tables of part I. The remainder

of part II is arranged in chapters reflecting the organization of the Government.

Part III (pp. 825 through 875) contains a summary table on trust and deposit funds, and detailed schedules and explanatory statements on the various trust funds.

Part IV (pp. 877 through 955) contains special analyses of budget data and Federal programs. These analyses supplement material appearing in other parts of the budget. Some of these give details for certain summary figures appearing in part I—for example, a classification of budget receipts by source, and a classification of budget expenditures according to functions and sub-functions. Several of the other special analyses in part IV contain materials which present different groupings or classifications of data.

An appendix, printed separately, contains more detailed information on personal services by grade and title.

The budget for the municipal government of the District of Columbia is also printed separately and the main volume of the budget contains detail only for the Federal payments and loans to the District.

EXPLANATORY STATEMENTS

Introductory statements at the beginning of each part give further explanations as follows:

Pages 2-3—Types of funds; basis of stating receipts and expenditures; concept of budget surplus or deficit; types of new obligational authority; certain budget classifications.

Pages 10-12—Operation of Federal funds and format of material printed for most accounts and funds in part II.

Page 826—Operation of trust and deposit funds covered by part III.

Page 878—Coverage of the special analyses printed in part IV.

Detail will not necessarily add to totals, because of rounding.

BUDGET MESSAGE OF THE PRESIDENT

To the Congress of the United States:

The budget for the fiscal year 1959 which I am transmitting with this message reflects the swiftly moving character of the time in which we live. It is clearly a time of growing opportunity as technology and science almost daily open wholly new vistas to all mankind. Yet it is also a time of growing danger. The progress of the Soviets in long-range missiles and other offensive weapons, together with their continuing rejection of a workable disarmament, compels us to increase certain of our defense activities which we have only recently expanded many fold.

We know that we are sturdy today in the many strengths that keep the peace. This budget reflects our determination to remain so in the future.

This budget reflects another determination—that of adhering to those principles of governmental and fiscal soundness that have always guided this administration—economy in expenditures, efficiency in operations, promotion of growth and stability in a free-enterprise economy, a vigorous Federal-State system, concern for human well-being, priority of national security over lesser needs, revenues adequate to cover expenditures and permit debt reduction during periods of high business activity, and revision and reduction of taxes when possible.

To meet the responsibilities imposed on us by world conditions and by the fiscal principles to which we adhere, the budget for 1959 contains recommendations to provide:

(1) An immediate increase for 1958 of \$1.3 billion in spending authority for the Department of Defense, and a further increase of \$2.5 billion in 1959 over 1958, to be applied principally to accelerate missile procurement, to strengthen our nuclear retaliatory power, and to spur military research and development programs;

(2) A resulting increase of \$2.8 billion in estimated 1959 expenditures over 1957 for missiles, nuclear armed or powered ships, atomic energy, research and development, science and education, plus a further provision of \$0.5 billion for defense purposes, if needed; in addition, authority to transfer up to \$2 billion between military appropriations, in order to take prompt advantage of new developments;

(3) A decrease of \$1.5 billion in 1959 expenditures below 1957 for other military arms and equipment and aircraft of declining importance, in favor of the newer weapons;

(4) Curtailments, revisions, or eliminations of certain present

civil programs, and deferments of previously recommended new programs, in order to restrain nonmilitary spending in 1959 and to provide the basis for budgetary savings of several billion dollars annually within a few years;

(5) Continuation of present tax rates to help achieve a balanced budget in 1959.

I believe that this budget adequately provides for our Federal responsibilities in the year ahead.

The estimated budget totals for the current fiscal year and for the fiscal year 1959 are compared with actual results of earlier years in the following table:

BUDGET TOTALS

[Fiscal years. In billions]

	1956 actual	1957 actual	1958 estimate	1959 estimate
Budget receipts.....	\$68.1	\$71.0	\$72.4	\$74.4
Budget expenditures.....	68.5	69.4	72.8	73.9
Budget surplus (+) or deficit (-).....	+1.6	+1.6	-.4	+1.5
New obligational authority.....	63.2	70.2	¹ 74.4	72.5

¹ Includes \$6.6 billion of anticipated supplemental requests.

Defense, science, and the budget.—Americans are determined to maintain our ability to deter war and to repel and decisively counter any possible attack. Today we possess military superiority over any potential aggressor or aggressors. Every American should clearly understand that the vast defense programs undertaken during the past several years have greatly advanced our military preparedness and developed and harnessed impressive new scientific achievements. We have sharply increased the numbers of scientists and engineers assigned to top priority defense programs. We have expanded many fold the expenditures for the development of missiles, both defensive and counteroffensive. We have accelerated development of advanced guidance systems, new fuels, and heat-resistant materials. We have greatly enlarged our network of warning devices and communications.

Our longer-range ballistic missile development, in particular, has long had the highest national priority. The result is striking. Whereas in 1953 we spent only \$1 million on these programs, we spent \$1 billion in 1957 and will spend more in 1958 and still more in 1959.

Our defenses are strong today, both as a deterrent to war and for use as a crushing response to any attack. Now our concern is for the future. Certain elements of our defense program have reached the point where they can be further accelerated. I will transmit to the Congress, immediately, a supplemental appropriation request of

\$1.3 billion for the Department of Defense for the fiscal year 1958. Further increases in new obligational authority are requested for the fiscal year 1959. The recommended authority for the military functions of the Department of Defense is \$39.1 billion, which is \$0.6 billion more than was requested in last year's budget for 1958 and \$3.8 billion more than the amount the Congress has thus far enacted for 1958. Spending for military functions of the Department of Defense in 1959 is estimated to total \$39.8 billion.

The development of longer-range ballistic missiles, construction of missile sites and detection systems, and other missile programs including guided missile ships will be substantially augmented. The total expenditures for missile research, development and procurement, for guided missile ships, and for missile-related construction will be \$4.3 billion in 1958 and \$5.3 billion in 1959, compared with \$3 billion spent in 1957, \$1.7 billion in 1956, and \$1.2 billion in 1955. Commencing in 1958, we will procure a number of new missiles which have been recently developed and have now become operational.

As an indispensable part of our efforts to maintain an adequate defense, the budget recommendations for 1959 call for continued contributions to the efforts of free world nations to promote the collective defense and economic growth. The Soviet threat to freedom is far more than military power alone. Poverty and ignorance, and the despair, fear, and unrest that flow from them, have always been enemies to liberty. The Communists well know this and unceasingly exploit these factors to extend their influence and control. This Soviet economic assault on freedom is rapidly growing. Conquest by this route is no less menacing to us and other free nations than conquest by military force. We must, accordingly, vigorously advance our programs to assist other peoples in their efforts to remove poverty and ignorance. As we succeed in these military and economic efforts, our own freedom and security are strengthened, and the prospects for peace are improved.

Scientific and research efforts throughout the Nation must be expanded. This is a task not only for the Government but also for private industry, foundations, and educational institutions. The Government, on its part, will increase its efforts in this area. Supplemental appropriations for 1958 will be requested for the National Advisory Committee for Aeronautics and the National Science Foundation, as well as the Department of Defense. For 1959, new programs to promote education in science are being recommended and basic research activities are being generally expanded.

Changes in emphasis.—Total Government expenditures (1) for all procurement to equip our forces and those of our allies with weapons, ships, planes, and missiles, (2) for atomic energy, and (3) for

all scientific research and education will be approximately \$21.1 billion in 1958 and \$21.6 billion in 1959, compared with \$20.5 billion in 1957.

Within these totals for procurement and science, we have gradually but substantially changed our emphasis. This administration's continuing attention in recent years to new concepts of defense is shown by the fact that more than 75% of the total funds for procurement in the 1959 budget and 1958 supplemental requests is programed for new types of equipment which had not been developed in the fiscal year 1955 or were not being bought in production quantities in that year—the first full year following the Korean conflict. In 1953, missiles alone took less than 2 cents of each dollar spent for major procurement; in 1957, missiles took about 15 cents of every procurement dollar; and in 1959 will take about 24 cents.

The greatly increased firepower of modern weapons and the continuing increase in efficiency permit a further reduction in the numbers of military personnel. Procurement of older types of weapons and equipment is also being reduced. Other defense expenditures will be reduced by closing installations that are outmoded or are of limited use, and by tightening maintenance standards, procurement practices, and supply management.

PURPOSE OF BUDGET EXPENDITURES

Budget authorizations and expenditures.—As a result of the increases in our key protection programs recommended in this budget for the current fiscal year and the coming fiscal year, total new obligational authority and budget expenditures for each of these

years will be larger than in 1957—even though it is recommended that certain other programs, both defense and civil, be retarded or reduced.

Total appropriations and other forms of new obligational authority recommended for the fiscal year 1959 amount to \$72.5 billion. This is \$4.7 billion more than has been enacted for 1958 and \$2.3 billion more than for 1957. In addition, \$6.6 billion of supplemental authorizations are estimated for the current year, 1958, for the Department of Defense, Commodity Credit Corporation, Export-Import Bank, and other agencies, as summarized in table 3 of part I of this budget document.

Budget expenditures in the fiscal year 1959 are estimated to be \$73.9 billion. This is \$1.1 billion more than now estimated for 1958 and \$4.5 billion more than in 1957.

Not all of the obligational authority enacted for a fiscal year is spent in the same year. Amounts of authority enacted in prior years but which have not yet been spent and are carried forward from one fiscal year to the next are called unexpended balances. These balances are not cash on hand, but represent authority to draw on future receipts of the Treasury in order to pay bills.

The total balances of appropriations to be carried forward at the end of the fiscal year 1959 are estimated to be \$39.9 billion. Of this amount 78% will have been obligated; that is, already committed.

The largest part of the unexpended balances of appropriations is in the Department of Defense, reflecting the long time which necessarily elapses between the placing of orders for complex military equipment and delivery and final payment. It is estimated that \$32.1 billion will be carried forward by that Department at the end of 1959, of which \$24.4 billion will have been obligated.

Budget receipts.—Although higher than in previous years, the current estimate of receipts for the fiscal year 1958 is somewhat smaller than earlier expectations, reflecting readjustments currently taking place in our economy following the rapid growth of the past several years. It now appears that 1958 budget receipts will not exceed \$72.4 billion, although they will be well above 1957 receipts of \$71 billion. A combination of increased defense expenditures and decreased receipts in the revised estimates for the current fiscal year results in an estimated budget deficit of \$0.4 billion.

There are strong grounds to support my confidence that the expansion of our economy will soon be resumed, bringing higher levels of receipts with present tax rates. The acceleration of defense efforts already under way, the increasing pace of activity in a number of programs involving State and local as well as Federal expenditures, the rapid pace of technological advance and its application by American industry, the expanding needs and desires of our growing popula-

tion, and Government policies designed to facilitate the resumption of growth are among the major factors that justify this confidence. While there are many uncertainties in forecasting results 18 months in advance, our best estimate at this time of budget receipts for 1959 is \$74.4 billion. This would produce a balanced budget with a surplus of \$0.5 billion in 1959.

SOURCE OF BUDGET RECEIPTS

With relatively minor exceptions, present tax rates have not been changed since 1954 when a program of tax reduction and reform was enacted, saving taxpayers nearly \$7.5 billion annually. If the Congress follows my recommendations, I believe that we shall be able to do what is required for our defense efforts and meet the basic needs of our domestic programs without an increase in tax rates. To maintain present rates, I recommend that tax rates on corporation income and certain excises, which under existing law are scheduled for reduction next July 1, be extended for another year.

We shall continue our efforts to assure that no one can avoid paying his fair share of the country's total high tax burden. Pending legislation (H. R. 8381), which was developed jointly by the Treasury Department and the House Committee on Ways and Means to remove unintended tax benefits and hardships, should be enacted with a few modifications. The Treasury Department will continue to review the operation of the tax laws and make recommendations for such additional changes as are needed to close loopholes.

There are certain technical tax revisions which will give substantial benefits to small business, with a minimum loss of revenue and with

no changes in tax rates. These revisions will be set forth in the Economic Report. They are based on the work of the Cabinet Committee on Small Business.

Debt limit.—A debt limitation serves as a proper reminder of the importance of operating economically in discharging the responsibilities placed by the Constitution and the statutes on the executive branch. However, the present limit of \$275 billion is too restrictive in view of rising defense expenditures and of the need for more flexibility to permit efficient and economical debt management.

Therefore, I will recommend that the present limit be revised upward temporarily through the fiscal year 1959. There should be an adequate margin to take care of any unexpected developments and to give the Treasury some much-needed flexibility in conducting its financing during this coming period.

Trust funds.—The total budget expenditures and receipts discussed thus far exclude funds held in trust by the Government. Budget totals are important indicators of fiscal policy and are a major determinant of changes in the public debt. However, to measure more fully the scope of all Federal Government activities and their impact on the national economy it is necessary to consider the trust funds as well as the budget funds.

In the fiscal year 1959, the expenditures of the trust funds will rise by an estimated \$1.2 billion, compared with an increase of only \$0.2 billion in their receipts. Payments for the highway program are estimated to increase \$0.6 billion to \$2.5 billion and benefits under the old-age and survivors insurance program will also increase \$0.6 billion to \$8.7 billion. These payments will help contribute to economic stability during the coming period and will also aid in the long-run growth of the economy.

TRUST FUNDS

[Fiscal years. In billions]

	1957 actual	1958 estimate	1959 estimate
Trust receipts.....	\$14.4	\$16.4	\$16.6
Trust expenditures.....	13.0	15.2	16.4
Trust accumulations.....	1.4	1.2	0.3

Receipts from and payments to the public.—A consolidation of budget and trust funds which eliminates interfund payments and noncash transactions shows that the total Federal payments to the public in the fiscal year 1959 will be \$1.8 billion more than in 1958. Payments to the public in 1959 will be \$0.6 billion less than receipts

from the public. Additional details on this consolidation are presented in special analysis A of the budget document.

FEDERAL GOVERNMENT RECEIPTS FROM AND PAYMENTS TO THE PUBLIC

	1957 actual	1958 estimate	1959 estimate
Receipts from the public.....	\$82.1	\$85.1	\$87.3
Payments to the public.....	80.0	84.9	86.7
Excess of receipts over payments.....	2.1	0.2	0.6

ANALYSIS OF MAJOR PROGRAMS AND BUDGETARY ISSUES

For purposes of summarization and discussion, budget expenditures are grouped into the categories of protection, civil benefits, interest and general government.

Expenditures for major national security and for international affairs and finance, which together make up the category of "protection," will require 64% of estimated total 1959 budget expenditures. The \$47.1 billion estimated to be spent on protection in the fiscal year 1959 is more than in any year since 1955.

An estimated 22% of budget expenditures in 1959 will be for civil benefit programs. These programs are grouped under the headings: labor and welfare; commerce and housing; veterans services and benefits; agriculture and agricultural resources; and natural resources. The estimated \$16.4 billion to be spent on civil benefits in 1959 is \$0.6 billion less than the comparable amount for the current year.

The estimate of 1959 expenditures for interest is \$7.9 billion, the same as in 1958. Expenditures for general government will require an estimated \$1.4 billion in 1959, also about the same as in 1958.

BUDGET EXPENDITURES AND AUTHORIZATIONS BY PURPOSE

[Fiscal years. In billions]

Purpose	Budget expenditures			Recommended new obligational authority for 1959
	1957 actual	1958 estimate	1959 estimate	
Protection.....	\$45.2	\$46.3	\$47.1	\$45.9
Civil benefits.....	15.1	17.0	16.4	16.0
Interest.....	7.3	7.9	7.9	7.9
General government.....	1.8	1.4	1.4	1.4
Allowance for proposed legislation and contingencies.....		0.2	1.1	1.3
Total.....	69.4	72.8	73.9	¹ 72.5

¹ Compares with new obligational authority of \$70.2 billion for 1957 and \$74.4 billion for 1958.

The budget also includes estimated expenditures of \$1.1 billion for the fiscal year 1959 as an allowance for proposed legislation and contingencies not included in the categories above. Within this allowance \$500 million is estimated specifically for defense contingencies, \$339 million is estimated for proposed pay adjustments for postal and other civilian employees not in the Department of Defense, and \$300 million is for other contingencies. The cost of proposed pay adjustments for military and civilian personnel of the Department of Defense is included in the estimates for that Department.

PROTECTION

Our security is an integral part of the security of the entire free world. In addition to strengthening our own defenses, we must improve the effectiveness of our partnership with our allies. This requires a greater pooling of scientific resources, a freer exchange of technological information, and closer military cooperation. Preliminary steps to accomplish these objectives were taken at the recent Paris meeting of the North Atlantic Treaty Organization.

This budget reflects coordinated plans for strengthening our own and allied defenses. The composition of free world forces, and the equipment with which they are provided, must be designed for the needs of an era of increasingly destructive weapons with far-reaching range. Our Government's research and development will be generally expanded with particular emphasis on developing and improving missiles both for defensive and for counteroffensive purposes.

An effective system of military security requires closer economic cooperation through trade, investment, loans, and technical assistance with nations throughout the free world so that they can develop their resources and raise their living standards. To the degree that this economic cooperation strengthens the internal stability and ability of those nations to preserve their independence, the cause of a just and lasting peace will be advanced.

PROTECTION, INCLUDING COLLECTIVE SECURITY

[Fiscal years. In billions]

Function	Budget expenditures			Recom- mended new obligational authority for 1959
	1957 actual	1958 estimate	1959 estimate	
Major national security programs.....	\$44.4	\$44.9	\$45.8	\$44.3
International affairs and finance.....	0.8	1.5	1.3	1.6
Total.....	45.2	46.3	47.1	45.9

MAJOR NATIONAL SECURITY

New obligational authority recommended for major national security programs for 1959 is \$44.3 billion, compared to \$41.0 billion estimated for 1958 and \$41.3 billion enacted for 1957.

Expenditures for these programs are estimated to be \$45.8 billion in the fiscal year 1959, \$1 billion more than in 1958 and \$1.4 billion more than in 1957. Increases are anticipated for the military functions of the Department of Defense and for atomic energy development. Expenditures for military assistance and defense support will be about the same as in the current year, but appropriations will increase to finance the lead-time for newer-type weapons. Expenditures for the stockpiling of strategic and critical materials and for the defense production expansion program will decline.

Department of Defense, Military Functions.—To accelerate the adaptation of our defenses to changing conditions, a request for supplemental appropriations of \$1.3 billion for the Department of Defense in the fiscal year 1958 is being transmitted to the Congress. The result will be to increase total new obligational authority for 1958 for the military functions of the Department of Defense to \$36.6 billion. A further increase of \$2.5 billion is recommended for the fiscal year 1959, bringing the total for that year to \$39.1 billion.

It is essential that we be able promptly to modify and accelerate programs when and as important discoveries or technological developments in weapons indicate such action to be desirable. To accomplish this end, the budget includes a contingency reserve of \$500 million for defense purposes only. It also proposes that the Congress authorize the President to transfer up to \$2 billion between appropriations available for military functions of the Department of Defense. This transfer authority is important and I will not hesitate to use it.

I have already discussed the urgent problem of reorganization of the Department of Defense in the State of the Union message. In the interest of the taxpayer, improved operating and fiscal controls must accompany larger appropriations.

Expenditures in 1958 are now estimated to be \$38.9 billion compared with the original 1958 budget estimate of \$38 billion. Estimated expenditures for 1959 are \$39.8 billion, an increase of \$0.9 billion over the current estimate for 1958, \$1.3 billion higher than in 1957, and \$4 billion more than in 1956.

These increased appropriations and expenditures are necessary for a speedup in the adjustment of military strategy, forces, techniques, and organization to keep pace with the rapid strides in science and technology. Since the end of the Korean conflict, new weapons systems of vastly increased combat effectiveness have been provided for our military forces, while numbers of military units and personnel

¹ Includes \$1,270 million of anticipated supplemental requests.² Does not include \$500 million for defense purposes shown in the budget under allowance for proposed legislation and contingencies.

have been gradually reduced. We can expect new developments at an ever-increasing pace.

The rapidly changing character of the military program is strikingly evident when the weapons and equipment we propose to buy in 1959 are compared with those bought as recently as 1955—the first full fiscal year after the Korean conflict.

There is hardly a production model aircraft on the Air Force's proposed list for procurement with 1959 funds that was included in its 1955 program. All the fighters and bombers proposed for procurement with 1959 appropriations will be capable of supersonic speeds and of using guided missiles and nuclear weapons. Of the \$1.5 billion of aircraft, engines, and aeronautical equipment proposed to be bought by the Navy in 1959, about 80% will be for models which had not reached the point of being bought in production quantities in 1955.

Even in the new field of missile technology, there will be a very marked shift of emphasis from the earlier, initial weapons systems to the much more advanced systems of the future. The longer range ballistic missiles—Atlas, Titan, Thor, Jupiter, Polaris—only one of which was beyond the technical study stage 2½ years ago, will account for nearly half of the missile program for 1959. For the total missile program, about 90% of the dollars planned for procurement in 1959 are for weapons which were not in production in operational quantities in 1955.

Most of the ships in the proposed 1959 construction program are entirely new types not to be found in the 1955 shipbuilding list. These include guided missile destroyers and the first nuclear-powered frigate. The first three ballistic missile submarines for the fleet are included in the 1958 supplemental request.

Fully half of the proposed 1959 program of military construction is for facilities for the Strategic Air Command and for weapons systems and equipment which will have been brought into operational use since 1955.

Research and the operation of facilities for research, development, and testing of missiles will take a much greater proportion of the research and development budget in 1959 than in 1955. In the 4 fiscal years 1956–59, roughly \$20 billion of research and development, procurement, military personnel, and construction funds will have been programed for the research, development, test, and evaluation of new weapons systems to bring them to operational status.

Programs requiring greater emphasis.—The budget provides funds for a still greater expansion of the swiftly progressing intercontinental and intermediate range ballistic missile programs. The Jupiter and Thor intermediate range ballistic missiles are being placed in produc-

tion. Work on the Atlas intercontinental ballistic missile will be accelerated.

Funds are also provided to speed up the operational availability of the Polaris intermediate range ballistic missile and the first three submarines designed to employ this weapon.

Expansion and further improvement of the continental defense early warning network will be undertaken and construction of a new ballistic missile detection system started, including the necessary facilities for communication with the North American Defense Command and the Strategic Air Command.

This budget includes funds for accelerating the dispersal of Strategic Air Command aircraft to additional bases and for the construction of "alert" facilities. The readiness of these retaliatory forces must be measured in minutes. Not only must planes be kept constantly in the air, but also additional combat air crews must be able to take off almost instantly upon receipt of warning of an impending enemy attack. Takeoff time will be appreciably shortened by constructing additional runways, fueling stations, and quarters for the crews at the runway. Within the total appropriations for the fiscal years 1958 and 1959, about \$0.5 billion is provided for the dispersal and increased readiness of the Strategic Air Command.

Funds are provided for an expanded research and development effort on military satellites and other outer space vehicles, and on anti-missile missile systems, to be carried out directly under the Secretary of Defense. An increase is also included for basic and applied research in other areas.

Antisubmarine warfare capabilities will be increased to counter potential enemy submarine threats.

While greater attention is given in this budget to the foregoing areas, conventional warfare capabilities of all the military services are also being improved. For example, funds are provided to initiate production of new models of small arms and ammunition, standardized for use by all members of the North Atlantic Treaty Organization.

Military and civilian pay.—With the development of new weapons systems, the technical proficiency demanded of military personnel has increased tremendously. Personnel trained at great expense in the operation and maintenance of these modern weapons must have greater incentives to remain in service. For present and long-range efficiency and for greater equity, the military pay system must be recast. Minimizing the present large turnover in military personnel will reduce the percentage of men in training and add to the percentage of men assigned to combat missions.

The funds provided in this budget for military personnel are based on achieving these objectives and on making the changes in pay rates

effective on July 1, 1958. The funds for the Department of Defense also include an allowance to cover its share of the cost of the revision in the pay structure for classified civilian employees recommended in the general government section of this message.

The revisions proposed are an adaptation of the principles recommended by the Advisory Committee on Professional and Technical Compensation in its report of May 8, 1957. The principles for military pay call for rewarding proficiency and merit and for stimulating career motivation. Attainment of these desirable goals requires elimination of the current longevity system in which a man of lower rank can receive more pay than one of higher rank, and the substitution of a system which would: (1) add two pay grades for both officers and enlisted personnel; (2) widen the pay differentials between grades by means of substantial increases for the senior officer and senior enlisted grades; and (3) establish uniform entering pay rates for each grade.

Actions for economies.—The programs and pay adjustments described above will be costly. Beyond the reduction of \$1.5 billion for procurement of aircraft and conventional weapons from 1957 to 1959, it is necessary that every possible economy be effected in other defense activities to help offset the increased costs of the high priority programs. This means, among other things, that we must eliminate programs and facilities no longer needed and make sure that we have no needless duplication.

All forces, units, and activities are being reexamined to determine whether or not they will still be needed as modern weapons, improved techniques, and new organizations come into being. Any activity of the services not making an essential contribution to a military mission must be eliminated.

As with our active-duty forces, the size, mission, and organizational structure of our reserve components must be shaped to meet the requirements of modern warfare. They must be designed to augment the active-duty forces quickly and efficiently. Our reserve personnel programs will give greater emphasis to quality and readiness than to quantity.

The Department of Defense is now operating a very large number of installations and bases in the continental United States and overseas. Some of these installations involve use of costly or extensive facilities for activities that could be performed more economically at other locations. As the Department of Defense continues to adopt modern weapons and revised organizations, some of these stations will become unnecessary. On the other hand, dispersal of the retaliatory forces will require some additional bases and increased costs.

Closing down and disposing of installations not definitely required for the combat forces or for their supply and distribution systems will help make funds available to support the new stations. Keeping nonessential installations in operation, thereby diverting personnel and funds from our true defense requirements at the expense of our combat capabilities, poorly serves our defenses and the general public.

All facilities and activities which are retained will be continually evaluated to prevent extravagance and wastefulness in operation and maintenance. The Department of Defense, in collaboration with the Treasury, Bureau of the Budget, and General Accounting Office, is also engaged in improving financial management in the operation and maintenance activities and other areas.

The supply and distribution activities of the armed services must also be further streamlined. The Department of Defense is now making a comprehensive review of procurement practices and inventory management. Emphasis is being placed upon techniques for coordinating defense supply systems so that they will be oriented to support adequately the increasing numbers of new weapons and avoid oversupply for older weapons.

In the interest of holding procurement costs to a minimum, I recommend that the Renegotiation Act be extended.

Development and control of atomic energy.—Expenditures by the Atomic Energy Commission in the fiscal year 1959 will increase to \$2,550 million, \$250 million more than estimated for 1958, which in turn was \$310 million over 1957. These increases reflect our determination both to increase the tempo of progress in achieving a greater nuclear military capability and to press ahead in our successful development of the peaceful applications of atomic energy.

From year to year we have hoped that success would finally crown our efforts to reach an international agreement which would permit, if not general disarmament, at least some reduction in the production of nuclear armaments. Again we find ourselves in a situation that leaves us no choice but to test and produce further quantities of such armaments for the defense of the free world. The substantial increase in the availability of uranium concentrates and the expanded capacity of the Atomic Energy Commission's production plants will result in greater production and larger operating expenditures in 1959.

During the last several years, the Atomic Energy Commission's research and development in both peaceful and military applications of atomic energy have grown rapidly to the highest levels ever attained. Continuing emphasis will be given to basic research, and construction will continue on four additional high-energy particle accelerators in the multibillion electron-volt range.

Applied research and development activities will be increased in 1959 and concentrated on those aspects which appear most likely to result in reaching technical goals. In particular, there will be continuing emphasis on naval and other military nuclear propulsion reactors, and on the more promising approaches to development of reactors to produce safe and economic electrical energy for civilian use.

Stockpiling and defense production expansion.—Expenditures for stockpiling and expansion of defense production are estimated to be \$565 million in 1958 and \$422 million in 1959. The stockpile objectives on all but a few scarce materials will be substantially completed under contracts now in force. In October 1957, an advisory committee was established to work with the Office of Defense Mobilization on a study of stockpiling policies and programs in the light of current concepts of war and defense.

The Defense Production Act of 1950 has provided much of the basic authority required to bring about needed expansion of production capacity, to provide controls over the use of scarce materials, and to initiate other measures essential to enhance our military strength. It should be extended another 2 years beyond its present expiration date of June 30, 1958. I do not now anticipate any specific new programs which will require financial assistance under this legislation, but accelerated research and development in certain military programs may require further expansion of production potentials for key materials. The authority to set priorities and allocate materials, currently being used for critical materials for direct military and atomic energy procurement, will continue to be needed.

Mutual security program.—Soviet ambition poses a threat to the free countries that takes several forms: open armed attack, internal subversion, and economic domination. Mutual security helps to meet all forms of this threat. For the fiscal year 1959, I am recommending new obligational authority of \$3,940 million for the mutual security program. Expenditures are estimated to be \$3,868 million.

Two portions of the mutual security program—military assistance and defense support—are primarily related to our military defense effort and, therefore, are discussed in this section of the message. The other portions of the mutual security program, while they contribute to security and defensive strength, are primarily designed to promote the economic development and political stability of less developed countries. They are discussed in the international affairs and finance section of this message. The two parts of the mutual security program are combined in the following table:

MUTUAL SECURITY PROGRAM				
[Fiscal years. In millions]				
Function and program	Budget expenditures			Recommended new obligational authority for 1959
	1957 actual	1958 estimate	1959 estimate

Total, mutual security.....	3,950	3,749	3,868	¹ 3,940

¹ Compares with new obligational authority of \$3,807 million for 1957 and \$2,764 million for 1958.

Mutual security, military assistance.—The nature of military assistance varies by country and area, taking into account military need, technological abilities, and division of defense responsibility among the United States and other countries. Countries which have received military assistance maintain for the common defense of the free world the equivalent of 200 army divisions, and some 23,000 aircraft and 2,300 naval vessels. From 1950 through 1957 our assistance has augmented by about 17% the total defense expenditures of these countries.

In Europe, this assistance is programed according to the defensive strategy for the whole North Atlantic Treaty Organization.

Military assistance for certain other countries, particularly in the Middle East and Asia, will continue to give special emphasis to the threat of internal subversion while also contributing to the deterrence of foreign attack.

In addition to missiles and other advanced weapons, the military assistance program provides for necessary conventional equipment, supplies, construction, and training for ground, sea, and air defense of friendly countries.

Continuing efforts are being made to maintain the forces needed for international defense purposes at the lowest possible cost. The strength of forces in assisted countries has been and will continue to be reviewed to insure that our support is related to current military requirements and technology. We are financing military equipment wherever possible on a basis of sales for cash and credit rather than by grants.

Recommended new obligational authority for military assistance in the fiscal year 1959 is \$1,800 million. To fulfill probable needs growing out of agreements at the recent NATO meetings, an additional amount of up to \$200 million for procurement of more missiles and other new equipment is covered by the allowance for proposed legislation and contingencies for the fiscal year 1958. Expenditures for military assistance in 1959, which will be made primarily from obligational authority enacted in previous years, are estimated to be \$2,200 million, the same amount estimated for 1958.

I firmly believe that the current United States outlay for protection would have to be substantially larger were it not for the military assistance program which enables other countries to contribute more to collective defense. Without our military assistance program the same degree of protection might not be obtainable at any cost.

Mutual security, defense support.—Our military assistance is extended to many countries that are maintaining collective defense forces beyond their economic means. Therefore, we supply economic assistance under the appropriations for defense support so that these countries can provide for their defense forces and at the same time maintain economic and political stability.

New obligational authority of \$865 million is requested for defense support. Expenditures in 1959 are estimated at \$885 million or \$60 million below the estimate for 1958.

In determining these amounts, account has been taken of the most effective use of local currencies obtained as counterpart for assistance dollars and from sales of surplus United States farm products. The local currencies, which are in addition to dollar grants, are used to help channel the countries' own economic resources to the most desirable objectives. However, these currencies cannot replace the dollars needed for materials and equipment that must be imported, mainly from the United States.

INTERNATIONAL AFFAIRS AND FINANCE

The major objective of our international economic policies and programs is to help build the free world's economic strength in the interest of mutual well-being and the maintenance of peace. Ex-

panded production, improved efficiency, and greater economic progress for ourselves and other peoples of the free world will depend to a considerable extent on an increase in the flow of international trade and investment. To aid in this worldwide objective and at the same time to expand our markets abroad and thus create new jobs at home, I am recommending the extension with broadened authority of the Reciprocal Trade Agreements program. I am also recommending an expansion of the lending authority of the Export-Import Bank, an increase in new obligational authority for developmental and technical assistance under the mutual security program, and the authorization of funds to assist in the completion of the Inter-American Highway.

International affairs and finance are estimated to require \$1.3 billion of expenditures in the fiscal year 1959, \$156 million less than in 1958. The decline reflects primarily the fact that in 1958 the Export-Import Bank has made a substantial disbursement under a previously authorized loan to the United Kingdom.

Total.....	832	1,468	1,312	1,615

¹ Compares with new obligational authority of \$1,131 million for 1957 and \$3,292 million (including \$2 billion of anticipated supplemental authorizations for Export-Import Bank) for 1958.

Reciprocal trade.—In order to pay for imports of goods and services from the United States other countries must be able to export to us. Progress for them and for us will receive its greatest impetus by development of the most favorable fields of production coupled with a gradual but steady reduction of unjustifiable trade barriers. We welcome the proposed European common market and free trade area as steps toward these broad goals.

We live in a world of economic, no less than political, interdependence. As the greatest producer, consumer, and exporter in the world, the United States must be a dependable market for foreign goods if mutually beneficial trade is to grow and prosper. The Reciprocal Trade Agreements Act should be extended for 5 years beyond its expiration date of June 30, 1958, with certain new authority for the President to negotiate gradual and selective tariff reductions. Legislation should also be enacted to authorize United States membership in the Organization for Trade Cooperation to improve the administrative efficiency of our trade agreements with other countries. To provide coordinated Cabinet level direction of this program at home, I have recently established the Trade Policy Committee under the chairmanship of the Secretary of Commerce.

In addition, I recommend that the Congress delete a rider which in past years has been attached to the Defense Appropriation Act and which virtually prohibits normal competitive bidding by other countries on many defense contracts. The rider is clearly inconsistent with policies designed to expand international trade and makes our heavy defense costs even more burdensome.

Export-Import Bank.—The Export-Import Bank has had a steadily increasing role in promoting United States exports and imports and in financing economic development projects abroad through loans to United States and foreign firms and to foreign countries. Since the Bank requires repayment in dollars, its loans for economic development are made for projects that will earn or save dollars for the borrowing country, or for projects in countries with adequate prospects of earning dollars from other sources. It is now estimated that the lending authority provided the Bank in 1955 will be entirely committed sometime during 1959. To assure continuity in the Bank's operation and to provide for possible emergencies, I am requesting \$2 billion in new obligational authority to expand the Bank's lending capacity. This new authorization should be made available before the end of the current fiscal year.

Nonmilitary mutual security.—While strengthened trade legislation and additional lending authority for the Export-Import Bank will help substantially in promoting world commerce and economic de-

velopment, these actions are insufficient in themselves to accomplish our international objectives.

Few national desires are stronger today than the wish of the peoples of less developed countries to improve their living standards. It is our national policy to encourage and assist this aspiration. As a country blessed with great natural resources, modern industry, and high productivity, we recognize the compelling humanitarian reasons for helping less fortunate people abroad as we help them at home.

The progress of some less developed countries will be dangerously slow without outside help, despite their best efforts. The people of these countries are conscious of the technological advances made and the levels of living enjoyed beyond their borders, and are understandably impatient for similar achievements. If Western help is unavailable or inadequate, these countries may become dependent upon the Communist bloc. We are concerned that they strengthen their independence and find prospects for improved living standards within a free society. It is my earnest hope that other free governments will also enlarge their efforts in advancing the development, trade, and well-being of less developed countries.

In addition, without economic progress, military security may prove illusory. People who see little improvement in their economic conditions may question the value of the freedom that our mutual defense efforts are intended to preserve. The events of the cold war reemphasize the importance of our helping to insure that peoples of less developed countries have faith in their future.

For these various reasons, it is critically necessary to carry forward our development loans, technical assistance, and other special types of assistance under the mutual security program.

Mutual security, development loan fund.—In many cases, urgent needs for economic development in less developed countries cannot be financed by the Export-Import Bank or by other sources such as the International Bank for Reconstruction and Development or private institutions. To meet such needs for financing economically and technically sound projects, the development loan fund was authorized in the Mutual Security Act of 1957. Loans from this fund may be made on less stringent terms than Export-Import Bank or other such loans, with repayments in local currencies as well as dollars.

Projects are now being considered and negotiations are being started with a number of countries which will result in the commitment of an appreciable volume of loans by the end of the fiscal year 1958. To make possible the continuation and expansion of such development loans, I am requesting provision of \$625 million in new obligational authority for 1959, as authorized by the Congress in basic legislation last year.

Mutual security, technical cooperation.—Because of technical assistance extended under the mutual security program, millions of people today are better off than before and productivity has been significantly increased. For example, disease has been lessened in many countries as people have been taught water purification techniques. Illiteracy has been greatly reduced. Farmers in many countries have learned how to diversify crops and improve livestock strains.

This budget requests \$164 million of new obligational authority in 1959 to carry forward the United States program of technical assistance and also to provide for our joining with other nations to increase the financial resources of the United Nations program of technical assistance. This increase will help to broaden the scope of multilateral cooperation through a new program for regional surveys of resources and for regional training institutes approved last December by the United Nations General Assembly. I am convinced of the need for our own technical assistance program and I am equally convinced of the need for multilateral technical assistance programs, in which our contribution is multiplied by the funds and experts of many nations.

Mutual security, special and other assistance.—The budget for the mutual security program provides for certain additional special activities, such as support vital to the stability of a number of friendly countries not covered by other categories of aid, our contributions to the United Nations International Children's Fund, and our refugee programs.

It is obviously impossible to predict today all of the problems which the free world will face during 1959. In order to help meet the emergencies that experience shows inevitably arise, I believe it necessary that a special contingency fund again be provided in the mutual security appropriation. For this purpose, \$200 million is recommended for 1959.

Diplomacy, informational and cultural programs, and exchange of persons.—Greater understanding among nations, on a people-to-people as well as a government-to-government basis, is a necessary part of our efforts to remove the misunderstandings that hinder disarmament, the building of a safeguarded peace, and the strengthening of freedom. It is especially important that Americans and peoples who have recently gained, or are approaching, independence come to appreciate each other's problems and aspirations. It is similarly important that Americans and Eastern Europeans renew the contacts that once were an important strand in friendly international relations.

The budget recommends \$183 million in new obligational authority in 1959 for the conduct of foreign affairs, primarily for the operation

of the Department of State. This amount includes provision for additional foreign service posts in Africa and for the strengthening of consular, economic, and political work in the Middle East and the Far East. New obligational authority requested for the United States Information Agency, and for exchange of persons, cultural presentations, and international trade fairs amounts to \$139 million; within this total, there is provision for more exchanges of leaders, scientists, and students with Eastern Europe and other areas.

I wish here to call attention specifically to the need for a supplemental appropriation for the Brussels Fair. Congressional action on this important activity last year left United States participation badly hampered in comparison with programs of other nations, especially the Soviet Union. I consider this item of particular importance to our country and urge the Congress to expedite its approval.

CIVIL BENEFITS

The bulk of the Federal Government's budget expenditures for domestic programs is classified under five broad categories—labor and welfare, commerce and housing, veterans services and benefits, agriculture and agricultural resources, and natural resources. These benefits take various forms, such as grants to State and local governments, direct benefit payments to individuals, loans, public works, research, and other public services.

BUDGET EXPENDITURES AND AUTHORIZATIONS FOR CIVIL BENEFITS

[Fiscal years. In billions]

Function	Expenditures			Recommended new obligational authority for 1959
	1957 actual	1958 estimate	1959 estimate	
Labor and welfare.....	\$3.0	\$3.4	\$3.6	\$3.6
Commerce and housing.....	1.5	2.1	1.6	2.1
Veterans services and benefits.....	4.8	5.0	5.0	5.0
Agriculture and agricultural resources.....	4.6	4.9	4.6	3.8
Natural resources.....	1.3	1.5	1.5	1.4
Total.....	15.1	17.0	16.4	¹ 16.0

¹ Compares with new obligational authority of \$18.6 billion for 1957 and \$20.4 billion for 1958.

Total expenditures for civil benefits in the fiscal year 1959 are estimated to be \$16.4 billion. New obligational authority is reduced from an estimated amount of \$20.4 billion in 1958 to \$16 billion in 1959.

Under present conditions, I am not recommending enactment at this time of certain legislation now pending in the Congress for new programs which I have previously advocated. For example, instead

of general aid for construction of schoolrooms, I am now recommending a broad temporary program of aid to education which is largely science-oriented. I am also deferring proposals for some other grant programs and for certain new public works projects.

I am also making recommendations to reduce some programs, to curtail expansion in others, and to transfer greater responsibility from the Federal Government to State and local governments or to private individuals or enterprises. All of these recommendations, in addition to being required by sound public policy, will help to hold expenditures in future years to prudent levels.

Some of the changes in legislation which I am recommending apply to three general types of activities—grants-in-aid, credit, and special services for which charges should be made.

Grants-in-aid.—In the past 25 years, the number of grant-in-aid programs conducted by the Federal Government has increased many fold. Federal expenditures and the amount of taxes levied at the national level have correspondingly increased.

As I have repeatedly emphasized, the continued vitality of our federal form of government requires that, to the maximum extent possible, primary responsibility for public programs be shouldered by that level of government most familiar with local problems and most responsive to them. We must exercise the utmost restraint in assigning new programs and responsibilities to the Federal Government, and we should continuously search out those programs and activities now carried on at the national level that can and should be handled by the States or localities.

Prudent limitation of Federal activities cannot alone meet the whole problem of overcentralization. The continued strength of our federal system also depends upon reinforcing the administrative and fiscal ability of the States to carry out their responsibilities. Accordingly, I suggested at the Governors' Conference at Williamsburg, Va., in June of 1957, that an action group be established to make recommendations on this and other aspects of the problem. A Joint Federal-State Action Committee consisting of 10 governors and of representatives of the executive branch of the Federal Government was subsequently created.

The initial progress report of this Committee, made last month, recommends complete transfer of two programs to the States together with the simultaneous relinquishment of a portion of the local telephone service tax which the Federal Government now collects. These programs are vocational education and the construction of waste treatment facilities. Legislative proposals to carry out these and future recommendations of the Committee will be transmitted to the Congress. An orderly readjustment requires time for action by both

the Congress and the State legislatures. Consequently, the effect of the proposed transfers on expenditures and revenues of the Federal Government will occur beginning in 1960. The report also recommends increasing the degree of State responsibility in three other programs: urban renewal planning; natural disaster relief; and regulating and promoting peaceful uses of atomic energy, particularly for health and safety.

Cooperation of this nature is a highly desirable and, in my judgment, a long overdue experiment in public administration and finance. The success of the venture depends upon further cooperation among the executive branch, the Congress, the governors, the legislative bodies of the States, and the local governments involved. As for this administration, I can say that the executive branch is eager, as well as willing, to do its part to insure that success.

Federal credit programs.—From a few small beginnings, Federal programs for making direct loans, purchasing mortgages, and insuring or guaranteeing private loans have multiplied greatly over the past quarter century. As shown in special analysis E in this budget document, new commitments for a great variety of specific credit requirements in the fiscal year 1959 are estimated at \$16.5 billion, predominantly for housing and agricultural programs. About three-quarters of these commitments are for guaranties and insurance of private loans, which usually do not require significant budget expenditures. However, net budget expenditures for direct loans and mortgage purchases will amount to an estimated \$1.4 billion in 1959.

On June 30, 1957, the total amount of outstanding private loans guaranteed or insured in whole or in part by the Federal Government amounted to \$55.9 billion. This is expected to increase to \$65.9 billion by the end of the fiscal year 1959. In addition to these privately financed loans, the amount of direct loans outstanding on June 30, 1957, was \$17.5 billion, compared to \$20.3 billion expected as of June 30, 1959.

In order that Government credit programs will make a maximum contribution to economic growth and stability, this administration has placed special emphasis upon achieving a more consistent policy among them. For this purpose, it is necessary that such programs: (1) charge adequate interest rates on all new loans; (2) substitute private financing for Government loans and mortgage purchases wherever possible; and (3) be subject to effective budgetary control.

In many cases, present legislation sets maximum interest rates that do not permit the Treasury or the lending agencies to cover present costs. At my request, legislation has been submitted to the Congress requiring that, insofar as consistent with the purposes of each program, all costs of future loans be paid by the borrowers who

benefit from the loans. Such legislation, by removing or reducing hidden subsidies, would make a significant contribution toward better budgeting.

Loans or mortgage purchases by the Federal Government should be available only if private financing cannot be obtained on reasonable terms. In several important areas Federal guaranties or insurance have encouraged greater participation by private lenders and reduced reliance on direct Government loans. Legislation should be enacted to authorize other Federal lending programs to substitute guaranties or insurance of private loans to the maximum feasible extent. Moreover, for all loan guaranty programs, the Government should be authorized to permit interest rates high enough to attract private lenders. I suggest that all limitations or ceilings placed on interest rates be reviewed, and that authority be provided to vary the rates for guaranteed or insured loans in line with market conditions and under proper safeguards.

A few Federal credit programs and a few other enterprise activities, as well, are not now subject to budgetary review and audit control. I again recommend that the Government Corporation Control Act be amended to provide for such review and control over all Government corporations authorized to use Federal funds.

Charges for special services.—When the Government provides a service conferring a special quasi-commercial benefit on identifiable individuals or groups above and beyond the benefits to the public generally, I believe it should charge the beneficiaries for the special service, rather than place the full burden of cost on the general taxpayer.

This principle has been put into practice in the financing of the new highway program through the payment of excise taxes by highway users into a highway trust fund. The forest and public lands highway programs of the Department of Commerce, however, are still financed from general revenues. Since most of these highways are on one of the Federal-aid systems, I recommend that their financing be transferred to the trust fund. Legislation will also be recommended to provide for payment from the trust fund of the expenses incurred by the Treasury in collecting taxes going into the trust fund, similar to the present practice of paying for the costs incurred by the Department of Labor in determining wage standards for highway contracts.

In the field of aviation, the Federal Government provides a wide range of special services benefiting private users of the airspace. As I have previously pointed out, it is increasingly appropriate that these users pay their fair share of the costs. As first steps toward this end, this budget proposes that a tax of 3½ cents a gallon be levied on jet fuels and that taxes on aviation gasoline be increased to 3½ cents a

gallon from the present 2 cents, with increases of $\frac{3}{4}$ cent per year for 4 years in both taxes up to 6½ cents a gallon. The receipts from taxes on aviation gasoline, which now go into the highway trust fund, should be kept in the general revenues to help finance the operations of the airways.

Legislation should also be enacted to raise patent fees, and to charge employers of longshoremen for the costs of administering disability compensation. Recommendations elsewhere in this message to adjust postal rates and authorize more adequate interest rates on Government loans also will serve to reduce unnecessary subsidies to special groups.

In addition to the above specific recommendations, all Government agencies have recently been instructed at my direction to prepare legislative proposals generally designed to remove present restrictions or limitations on their authority (1) to recover full cost to the Government of services that provide special benefits to individuals or groups and (2) to obtain a fair market value for the use or sale of federally owned resources or property.

By enactment of the legislation proposed in this budget and of other proposals which I shall make from time to time, we can move closer to the ultimate goal of an equitable system of fees and charges throughout the Government.

LABOR AND WELFARE

Expenditures for labor and welfare, including the education and basic research programs classified under this heading, are estimated to be \$3.6 billion in the fiscal year 1959, \$200 million more than for the current year. The increase is primarily for scientific research and education programs. Previous recommendations for new programs, such as general aid for school construction, are being deferred.

A large portion of the expenditures for labor and welfare programs consists of grants-in-aid to States and local governments, and cannot be reduced without changes in basic authorizing legislation. At this time, I am proposing revisions in the legislation governing five of these grant programs which will lead to some small reductions in the Federal budget for the fiscal year 1959, and to some larger reductions in later years. Under these proposals, the proportion or amount of Federal participation would be reduced for schools in federally affected areas, for hospital construction, and for public assistance. I am also recommending action on legislation relating to revenues so the States can assume responsibility beginning in 1960, and Federal aid can cease, for vocational education and waste treatment plant construction. Continuing work by the Joint Federal-State Action Committee, as well as thoroughgoing reappraisals by Federal agencies on their own

initiative, should lead to further recommendations for reducing grant-in-aid programs in future years, with the States assuming more of the responsibility for these activities and themselves collecting more tax revenues to finance them.

¹ Compares with new obligational authority of \$3,189 million for 1957 and \$3,571 million for 1958.

Science, research, and education.—In the face of Soviet challenges, the security and continued well-being of the United States depend, as never before, on the extension of scientific knowledge. Our technological progress requires a higher level of support for basic scientific research from both private and public sources. It also demands a growing supply of highly trained manpower—scientists, engineers, teachers, and technicians.

To this end, I am recommending an expanded program for the National Science Foundation and a new program for the Department of Health, Education, and Welfare. These programs will be closely coordinated. The Foundation is promoting science education and training primarily through grants to universities or fellowships to individuals. The program for the Department of Health, Education, and Welfare will strengthen our general educational base, complement

the activities of the National Science Foundation, and be channeled mainly through grants to States.

This budget proposes appropriations of \$140 million for the National Science Foundation in 1959, more than three times the amount currently authorized. To permit immediate action in stepping up the Foundation's activities, the budget also includes a supplemental appropriation of \$10 million for 1958.

These recommendations will enable the National Science Foundation to proceed vigorously in expanding support for basic research. Of the 1959 appropriation, \$58 million, double the 1958 amount, is provided for research grants, for research facilities and equipment, and for related activities.

Assistance to basic research is provided also in physical sciences by the Bureau of Standards and in life sciences by the National Institutes of Health. Expenditures included in other parts of the budget for basic research by the Atomic Energy Commission, the National Advisory Committee for Aeronautics, and the Department of Defense will be higher than in the current year. Most of the expenditures will be for research projects carried on by university scientists and, as a byproduct, will contribute importantly to the education of graduate students.

The second major part of the National Science Foundation program is to help meet the need for improving and extending science education. The 1959 budget for the Foundation provides \$82 million, including \$3 million of administrative expenses, for this purpose, or about five times the present amount. Most of this is for expansion of programs which have proved their worth in improving high school and college science education. These programs include (1) action to interest able students in science careers, (2) measures to improve the methods of teaching and the content of courses in mathematics and science and to give supplementary training to college and high-school teachers, and (3) provision for fellowships to highly qualified college graduates and scientists for advanced study in science and mathematics.

I am recommending that legislation be enacted to authorize a temporary program for the Department of Health, Education, and Welfare to provide grants to help stimulate the State, local, and private action necessary to meet certain critical educational needs. The major objective of this new program will be to provide matching grants to strengthen State departments of education and local school systems, particularly in the administration and teaching of science and mathematics. The new grant program will also foster improvement of general education through grants to States or educational institutions to extend testing and counseling services for young people, provide college scholarships for outstanding high-school graduates,

strengthen graduate schools, expand the teaching of foreign languages, and improve the adequacy and reliability of educational statistics.

These recommendations for the National Science Foundation and the Department of Health, Education, and Welfare are designed to meet our most urgent needs for support of science, to aid in the identification and encouragement of talent, and to strengthen our teaching staffs. In planning these programs, account has been taken of several important considerations.

First, more effective utilization of available scientists and engineers is the most immediately productive attack on existing shortages in these fields. Action to achieve this is a responsibility of private employers and organizations as well as governmental agencies.

Second, the basic responsibility for science education and training as well as for conduct of research in our country depends primarily on non-Federal support, and requires a thorough understanding of the problem by all our citizens and their wholehearted support. Therefore, I strongly recommend that this Federal participation in the Nation's educational processes be limited to 4 years (allowing additionally for the completion of scholarships granted within these 4 years), and be considered as an emergency stimulant to encourage the States and local communities to bring their educational systems up to date in the light of our modern scientific age. The proposed Federal assistance is carefully designed to insure against any possible domination by the Federal Government of our educational system, which must continue to be locally controlled and operated in accordance with our American tradition.

Third, we must accept the fact that scientists are not trained overnight and science students do not become skilled scientists in a year. New programs in these fields must continue in most instances for a number of years to achieve concrete results. With full awareness of our tradition of not involving the Federal Government in the Nation's public educational processes, this stimulation I have proposed must not be so overemphasized that the programs cannot be later carried on by those who must continue to carry the responsibility—the local school districts, universities, and industry.

Fourth, the needs of our free society cannot be met by improving science and technology alone. The national needs require the development through a strong general educational system of a vast number of aptitudes and skills. Every community in our country should do its level best and if possible more than is now being done to provide better education for the growing number of students. A good deal of improvement in our teaching methods and standards and greater use of our present facilities can be achieved by acquainting the boards of education, superintendents, teachers, parents, and pupils with the needs the country faces.

Fifth, specialized programs must not be allowed to upset the important balance needed in a well-rounded educational program which must insure progress in the teaching of all areas of learning.

Schools in federally affected areas.—The Federal Government has a responsibility for aiding school districts when it creates serious financial problems for them. It has recognized this responsibility in the past by providing grants to help build and operate schools in districts where enrollment is swelled by Federal activities. Experience with these programs, however, suggests that they should be modified; many of the communities for which grants have been made no longer have problems as acute as those suddenly generated by the migration of workers and families to them during the Korean crisis.

In view of the continued maintenance of a substantial defense establishment with shifting locations, authority for grants for construction and operation of schools should be extended, but the assistance should be restricted to instances where the Federal personnel both live and work on Federal property. However, grants for operation of schools on behalf of people living on taxable property should be gradually reduced during an adjustment period, and then terminated.

Labor and manpower.—Rapid technological developments and constant changes within the economy create complex manpower problems. This budget provides increased grants to the States to handle unemployment compensation claims promptly and to maintain an effective employment service system. The budget also recommends funds for the Department of Labor to carry forward its efforts to help labor and management meet the demand for technicians and skilled workers which accompanies the demand for scientists and engineers.

I again recommend the enactment of legislation to improve the welfare of working men and women. In this field, recommendations are already before the Congress for legislation to assure equal pay for equal work, to revise the laws governing hours of work on Federal construction projects, to extend the coverage of the minimum wage, and to improve the coverage of unemployment compensation. I will make proposals in a special message to the Congress concerning amendments to the legislation on labor-management relations and the registration and safeguarding of union as well as welfare and pension funds.

Health and hospital programs.—Expenditures for health programs have increased sharply since 1955. In 1959 the increase will be largely for construction programs already underway. New obligational authority for health activities is being reduced, principally with respect to construction of hospitals. This will not materially affect the planned level of obligations and expenditures for hospital grants in the fiscal year 1959, because prior-year appropriations are available

and will be used. New obligational authority of \$75 million is recommended for the fiscal year 1959.

The authorizing legislation for hospital construction grants will expire on June 30, 1959. In view of the progress already made toward meeting community hospital requirements for general beds, the Federal program should be modified to meet only the most urgent needs, with emphasis on specialized needs.

The Congress should take action on legislation under which the Federal Government can help the medical and dental schools to build teaching, as well as research, facilities to help meet medical and dental manpower needs.

Social and economic security programs.—Nine out of ten workers are covered under the old-age, survivors, and disability insurance programs, and three out of five are insured against unemployment. These benefits are financed through trust funds supported by special employment taxes. Retirement and survivors insurance is provided as well through trust funds covering railroad workers, Federal civil service employees, and veterans. Many individuals are also eligible under prescribed conditions for public assistance, veterans pensions, military retirement, or other benefits financed from general appropriations in the Federal budget. Of the estimated \$22 billion in total expenditures from budget and trust funds for labor and welfare programs and for veterans services and benefits, an estimated \$10 billion will be for old-age benefits.

The rapid growth of Federal programs for maintaining individual or family incomes, and the numerous piecemeal liberalizations in the applicable laws, suggest the need for appraising these activities as a whole. The Advisory Council on Social Security Financing is studying some of the problems of retirement and disability insurance financing, and this budget includes funds for other basic studies. In the meantime, technical provisions of the old-age, survivors, and disability insurance legislation should be simplified and the paperwork burden on employers should be lessened by enactment of consolidated annual wage reporting for both income tax and social security payroll tax purposes.

Although Federal old-age, survivors, and disability insurance provides an increasing share of economic security for the aged, the dependent, and the disabled, the Federal Government's expenditures for public assistance continue to mount because of the successive amendments increasing the Federal matching share. These programs are now well established and the individual States have gained experience as to appropriate levels of assistance. In line with my belief that the States should have greater responsibility for programs of this nature, proposals will be sent to the Congress for modernizing the formulas for public assistance with a view to gradually reducing Fed-

eral participation in its financing. This legislation should be made effective starting in 1960 to assure that the States will have adequate opportunity to adjust their finances and their programs, thus preventing an adverse impact on needy recipients.

The railroad retirement system is a self-financed retirement and social insurance program operated by the Government for the convenience of the railroad workers and industry. The financing of this system is far from sound on an actuarial basis. I reiterate my earlier recommendations that the Congress take steps to increase employer and employee contribution rates sufficiently to correct this inadequate long-term financing.

Legislative action is also needed to place on a sound basis the financing of Federal contributions to the railroad retirement account for time which railroad workers have spent in military service. The Comptroller General has reported that under existing law the Federal Government has appropriated to this fund over \$300 million more than the probable actual cost of benefits which will ultimately be paid, based on credits for time spent in military service. The Government should be charged only for the actual cost of benefits as they are paid. At the same time that the Government has been making overpayments to the railroad retirement account, it has been incurring a liability to the old-age and survivors insurance trust fund for similar military service credits. In equity to all concerned, I recommend that overpayments to the railroad retirement account be recovered and applied to meet general budget liabilities to the old-age and survivors insurance trust fund for military service benefits.

COMMERCE AND HOUSING

Net expenditures for commerce and housing programs, in the aggregate, are expected to decline from \$2.1 billion in the fiscal year 1958 to \$1.6 billion in 1959. The principal reductions arise from proposed legislation to provide more adequate postal rates and from termination under existing law of the authority of the Veterans Administration to make direct loans for housing. Some other expenditures will increase substantially as the result of authorizations made in prior years. The major increases are in the Housing and Home Finance Agency for mortgage purchases and college housing loans, and in the Department of Commerce for improvement of the Federal airways.

I repeat my recommendation of last year for the prompt enactment of appropriate authority under which communities with basic problems of persistent unemployment can be assisted in their solution. Extension of the Export Control Act is recommended. Prompt enactment of legislation to control advertising on the interstate highway system is also recommended.

¹ Does not include \$160 million for pay adjustments shown in the budget under allowance for proposed legislation and contingencies.

² Compares with new obligational authority of \$3,852 million for 1957 and \$4,026 million for 1958.

* Less than \$500,000.

Postal service.—In every year since the close of World War II, the postal service has incurred large deficits. These deficits have placed heavy and unfair burdens on the taxpayers, to the special advantage of large users of the mails. Even with the improvements in efficiency in the last few years, expenditures needed in 1959 to provide the minimum requirements for postal service under present legislation will exceed receipts by an estimated \$684 million.

The reasons for these chronic deficits are clear. In the quarter century since 1932, postal costs have more than doubled. On the other hand, postage rates for letters and publications are almost identical today with those 25 years ago, and rates for advertising matter have been increased by only 38%. Only parcel post, which is required by law to pay its way, has had rate increases commensurate with cost increases. Meanwhile postal volume has almost tripled. Every expansion in volume at today's postal rates tends to add to the deficit passed on to the general taxpayers.

In meeting this problem the Post Office Department has made effective use in recent years of the management practices successfully developed by private industry. The organization and methods of the Department have been modernized and its administration decentralized in order to meet local needs more promptly and efficiently. Obsolete postal buildings are being replaced or renovated. An aggressive research program has been initiated. Specialized motor vehicles, mail-sorting machines, and other new equipment are being developed and installed. These will provide better service to the public at lower operating cost.

On the other hand, further increases in certain costs in 1959 and later years are expected. An amount of \$25 million has been included in the Post Office Department budget to provide for recent and pending increases in charges by railways for transportation of mail. The general allowance for proposed legislation and contingencies also includes \$160 million to cover the estimated costs of postal pay increases recommended to become effective July 1, 1958, as part of the general policy on employee pay.

In view of present and prospective postal deficits, legislation to authorize adequate postal rates has become one of the most urgent items of unfinished business before the Congress. The House of Representatives has already approved changes in rates for letters, publications, and advertising mail which would add materially to present revenues, but still leave a large deficit. To provide revenues which will more adequately meet present needs, the pending legislation should be amended, primarily by establishing a 5-cent letter rate on all except local letters. This is more than the 4-cent rate I recommended last year for both local and other letters, but it is needed to take account of the pay increase and other higher costs.

The recommendations I am making should result in a net increase in postal revenues of about \$700 million in the fiscal year 1959. With the postal pay adjustments which are being recommended, the postal deficit will still be substantial.

Legislation now before the Congress should be enacted to authorize the liquidation of the Postal Savings System. In view of the growth of federally insured private savings institutions and the availability of U. S. savings bonds, this system has become unnecessary. Its use has been declining and its termination will free Post Office staff for other duties.

Housing and community development.—Last year our population increased by 3 million people; before another decade passes it will exceed 200 million. Almost 60% of our people work and live in the 174 metropolitan areas and within these areas most of the growth has been in the suburbs. The rapid growth of our population and its increasing concentration in urban and suburban areas have created unprecedented problems for both industry and government in helping achieve the goal of a decent home and a suitable living environment for every American family.

Private industry and State and local governments have the basic responsibility for helping families meet this goal. The Federal Government can help best by guaranteeing loans, encouraging the private market for housing obligations, and by making limited grants to State and local public agencies. We must avoid unnecessary reliance on direct Federal financing. Such financing not only burdens the taxpayer but, more important, by discouraging private financing, limits the total amount of housing activity. To increase the effectiveness of Federal aids, important revisions are proposed in this budget.

Under the Housing Acts of 1949 and 1954, the Urban Renewal Administration makes loans and grants to help remove or prevent the slums which obstruct the orderly development of our cities. In July 1957, 178 federally supported urban renewal projects in 122 cities were actually in process of clearance and redevelopment, and plans were underway for 254 more projects in these and 142 other cities. By the end of the first decade of the program in 1959, over 600 projects will be either completed or in the planning or development stages.

Now that this important program is well underway throughout the Nation and the gains to participating communities have become well recognized, I believe the time has come when States and local communities should assume a share of the administrative responsibilities and financial costs more nearly commensurate with the benefits which their citizens receive. To this end I am recommending a fivefold program.

First, in the future the local communities should share in the costs of planning from the start. In the past, in most instances, the Federal Government advanced all the money required for planning projects, and the local share was paid only if and when projects based upon these plans went forward. The substitution of this cost-sharing formula for the previous advances will encourage more careful programing of individual projects and will mean fewer cases in which projects are abandoned after significant Federal outlays.

Second, I strongly support the recommendation of the Joint Federal-State Action Committee that each State establish a special agency for urban development, housing, and metropolitan planning to assume, as soon as possible, the financial responsibility for local planning of urban renewal projects. Adoption of this recommendation will be a constructive first step toward increasing the role of the States in this program and should ultimately permit the Federal Government to withdraw from supervision and review of planning.

Third, on all projects initiated in 1960 and later years, the States and localities should be required to provide an increasing share of the cost of buying and clearing the land and other net project costs. The present formula under which the local agency pays for one-third and Federal capital grants pay for the remaining two-thirds of the net project cost should be changed by providing for annual reductions, so that by the fiscal year 1962 the Federal Government would contribute not more than 50% of the cost of local projects. In the interim, the State legislatures will have an opportunity to decide the extent of their future participation and the local communities can likewise adjust their own financial planning.

Fourth, the Federal Government should give positive assurance concerning this program to the States and the cities by authorizing funds now for 1959 and each of the 5 succeeding years. Specifically an additional \$200 million for capital grants should be provided in the fiscal year 1959. Since over \$50 million in unused authority for capital grants will remain at the beginning of 1959, more than \$250 million will be available for grants in that year. For 1960, \$250 million should be authorized with a Federal participation of 60% of net project costs. For 1961, the amount should also be \$250 million but the Federal share should be 55%. For 1962-64, the amount should be \$200 million annually with the Federal share 50%. With the change in the statutory formula, the reduced Federal grants will support a generally larger urban renewal program.

Fifth, consideration should be given to authorizing the Urban Renewal Administration to help local public agencies finance non-residential urban renewal projects which do not require Federal capital grants by guaranteeing obligations issued to finance such projects. In many communities, the increased property taxes obtain-

able from this type of redevelopment are so substantial that private financing should be obtained without ultimate net cost to the Federal Government.

Capital grants are only part of the present and prospective requirements for Federal support for the urban renewal program. It is estimated that in 1959 the Federal National Mortgage Association will make commitments of \$250 million for the purchase of federally insured mortgages on housing in urban renewal areas and on housing for families displaced by this and other government programs. The amount of these mortgage purchase commitments arises partly from the statutory requirement that all purchases by the Association be made at par—considerably above the prices which private lenders would be willing to pay. As I have previously urged, this requirement should be repealed. With more realistic mortgage prices, it should be possible to restore the incentive for private financing originally intended under the Housing Act of 1954 and thus avoid the necessity for additional large amounts of new obligational authority to finance purchases of mortgages under this program and under programs for armed services and cooperative housing. Even without par purchases, however, the Association will require \$90 million of new obligational authority in 1959 to purchase mortgages which are not currently acceptable to private lenders. As urban renewal receives greater local support, these mortgages should become increasingly attractive for private financing, and hence the present special assistance program for them should be looked upon as a temporary stimulant only.

An estimated 81,000 families will be displaced from their homes in 1959 by urban renewal projects, highway construction, and other governmental (primarily State and local) action. Most of these families can afford standard housing available in the private market, and, if necessary, they can obtain insured mortgages which are eligible for purchase by the Federal National Mortgage Association. To make this program effective in high cost areas, the maximum amount of a mortgage that can be insured should be increased from \$10,000 to \$12,000 for single-family homes. The Public Housing Administration has authority to meet anticipated requests from local public agencies for loans and contributions to support the needed housing for families of lower income. To assure orderly provision of such units, the time limits governing this authority need to be extended beyond present expiration dates.

With the expiration in July 1958 of the special loan guaranty benefits for veterans of World War II and of the direct housing loan program for all veterans, the Federal Housing Administration again becomes the only Federal agency providing comprehensive insurance or guaranties of private housing credit. At my request, the Congress

last year liberalized the terms under which Federal Housing Administration mortgages were insured, making broader benefits available for the general public, including veterans. To strengthen further the mortgage insurance and guaranty programs, I shall recommend legislation to revise ceilings on interest rates and to remove discount controls which now discourage private financing of military housing and certain other FHA-insured mortgages and which prevent many veterans of the Korean conflict from using their continuing loan guaranty benefits. To make the liberal terms of insured mortgages available for larger and better houses, the maximum mortgage amount on owner-occupied housing should be increased to \$30,000. To provide more effective financing aids for housing built for the elderly, the special provisions in existing programs should be liberalized and consolidated into a separate rental housing program for elderly persons. Finally, to give continuing assurance to home buyers, builders, and lenders of the availability of mortgage insurance, an additional \$3 billion per year should be authorized in the maximum permissible dollar amount of outstanding FHA-insured mortgages during each of the next 5 fiscal years.

To meet the increased needs for college housing arising from soaring enrollments, Federal loans to colleges should be entirely for essential dormitories and faculty housing, and should no longer be made for student unions and other less essential facilities. Private financing should be encouraged by (1) replacing the subsidized interest rates required by the present statute with rates in no event less than the Government's costs, (2) authorizing Federal guaranties of college housing obligations which do not have Federal tax exemption, and (3) prohibiting direct loans where private funds are available on reasonable terms. In addition, new obligational authority of \$200 million is needed for the fiscal year 1959.

Water transportation.—Our maritime legislation, originally enacted in 1936, is being reviewed with the aim of reducing future Government subsidies to the minimum amount consistent with the national interest. For example, it appears that the replacement period for ships receiving operating subsidies might well be extended from the present 20-year period to 25 or more years. This review will include the laws governing both construction and operating subsidies to determine what changes, if any, are needed. To the extent that changes are desirable, appropriate recommendations will be made.

Promotion of aviation.—New obligational authority and expenditures for promotion of aviation will again increase substantially under the 1959 budget, primarily to expand the capacity of the Federal airways to accommodate the rapid growth of air traffic and the new types of high-speed aircraft soon to be in operation. The Civil Aeronautics

Administration will require \$230 million to operate and maintain the airways system and to enforce air safety regulations and \$175 million for procurement of new airways facilities. The amounts for facilities in 1959 and later years will be less than would otherwise be needed because of the recently completed arrangements for sharing facilities and data with the Department of Defense. New obligational authority of \$35 million is requested for the Airways Modernization Board, recently established to undertake needed research and development on improvement of air traffic control and navigation facilities. At the same time supplemental appropriations of \$12 million are requested for the fiscal year 1958 and new obligational authority of \$107 million for 1959 to permit the National Advisory Committee for Aeronautics to expand its research and development activities dealing with basic problems involved in the flight of aircraft, ballistic and guided missiles, and space vehicles.

To pay a substantial part of the cost of operating the airways system, I am recommending increased taxes on aviation fuels. I also think we should redouble our efforts to find ways and means to reduce and ultimately eliminate all subsidies for airlines.

Small business.—The Small Business Administration has been providing extensive financial and technical assistance to small businesses, as well as disaster loans to businesses and homeowners, under temporary authority expiring July 31, 1958. The experience of its first 4½ years has demonstrated the importance of these programs. Accordingly, I recommend that the limitation on the life of the Administration be removed and that new obligational authority of \$53 million be provided. Including the proceeds from the increasing repayments on earlier loans, this will provide \$161 million for new direct loans, participating loans, and other aids to small business during the fiscal year 1959. As mentioned earlier, certain tax revisions to aid small business should be enacted.

Civil defense.—Our civilian defenses must be further strengthened through joint Federal-State action. To carry out this purpose, recommendations were transmitted to the last session of the Congress to provide for greater Federal sharing with the States of costs of civil defense personnel and administration and for placing added responsibility on the Federal Government for civil defense. New obligational authority of \$26 million is provided in the budget for the first-year cost of this legislation, which has been approved by the House of Representatives and is pending in the Senate.

Expenditures for activities designed to promote the defense of the civilian population against nuclear attack are estimated to be about the same in the fiscal year 1959 as in the current year. The question of a shelter program is under consideration and tests of various types

of shelters are continuing. The budget provides for extending and improving the attack warning system, and for expanding research and training in civil defense problems. These increases will be offset by a temporary suspension of procurement of medical supplies.

The structure of Federal organization for the planning, coordination, and conduct of our nonmilitary defense programs has been reviewed, and I have concluded that the existing statutes assigning responsibilities for the central coordination and direction of these programs are out of date. The rapid technical advances of military science have led to a serious overlap among agencies carrying on these leadership and planning functions. Because the situation will continue to change and because these functions transcend the responsibility of any single department or agency, I have concluded that they should be vested in no one short of the President. I will make recommendations to the Congress on this subject.

VETERANS SERVICES AND BENEFITS

Expenditures for Federal services and benefits to veterans in the fiscal year 1959 are estimated to be \$5 billion. This amount is \$219 million greater than expenditures in 1957, but \$22 million lower than the estimate for the current year. The expenditures estimated for 1959 reflect the cost of increases in disability compensation rates enacted in the past session of Congress and a steady growth in non-service-connected pension caseloads. On the other hand, reductions which exceed the increases in compensation and pensions will result from a decline in the readjustment needs of veterans of the Korean conflict and from economies in operations.

VETERANS SERVICES AND BENEFITS

[Fiscal years. In millions]

Program or agency	Budget expenditures			Recommended new obligational authority for 1959
	1957 actual	1958 estimate	1959 estimate	
Readjustment benefits:				
Education and training.....	\$774	\$729	\$626	\$625
Loan guaranty and other benefits.....	73	93	93	93

Other services and administration (Veterans Administration and others).....	175	171	162	160
Total.....	4,793	5,034	5,012	¹ 4,996

¹ Compares with new obligational authority of \$4,870 million for 1957 and \$5,013 million for 1958.

In addition to these programs financed from regular appropriations, large veterans insurance operations are carried on through the trust funds reported in part III of the budget. Payments and dividends of \$682 million are expected to be disbursed to veterans and their survivors from these insurance funds in the fiscal year 1959.

Under existing laws, our country is faced in the long run with large and increasing expenditures for veterans programs. While a further decline in readjustment benefits may be expected during the next several years, costs for pensions for needy veterans will increase sharply. These pensions meet needs not related to the veteran's period of service, but rather to the hazards to health and income that generally grow with increasing age. Fundamental changes have taken place in our society in the last several decades which require us to reconsider the laws providing veterans benefits and services which now overlap other growing public benefit and welfare programs. As I indicated last summer, a message on veterans affairs will be sent to the Congress at an early date. In that message there will be set forth for the consideration of the Congress recommendations for specific adjustments and improvements in the compensation, pension, and related programs which will enable us to discharge our national responsibilities to veterans with the greatest possible equity to all concerned.

The budget makes provision for new obligations of \$50 million during 1959 for construction, modernization, and repair of hospital and domiciliary facilities. However, substantial unobligated balances of prior-year appropriations reduce the need for new appropriations for construction purposes to \$9 million. The general operating expenses of the Veterans Administration will be reduced more than 5% in the coming year because of numerous administrative improvements and declining workloads in the readjustment benefits programs.

AGRICULTURE AND AGRICULTURAL RESOURCES

Expenditures for agriculture and agricultural resources have amounted to over 30% of the Federal expenditures for civil benefits in the fiscal years 1956 and 1957 and are estimated to take almost as large a proportion in 1958. This compares with a little over 20% in 1953 and 1954. In this budget, I am recommending important revisions in our price support, conservation, and rural credit programs to place them on a sounder long-term basis with less reliance on the Federal Treasury. These revisions will result in only moderate reductions in budget expenditures in the fiscal year 1959, but should result in more significant reductions in 1960 and later years.

AGRICULTURE AND AGRICULTURAL RESOURCES

Total, agriculture and agricultural resources.....	4,582	4,924	4,601	13,849

¹ Compares with new obligational authority of \$5,298 million for 1957 and \$6,393 million (including \$2,187 million of anticipated supplemental authorizations) for 1958.

Estimated expenditures in 1959 are \$4.6 billion, the same as in 1957, but \$0.3 billion less than in the current year. The anticipated decline is primarily in the operations of the Commodity Credit Corporation. Total new authority to incur obligations requested for agriculture and agricultural resources in 1959 is \$3.8 billion. This amount includes \$1.8 billion to restore the capital of the Corporation for price support losses realized in the fiscal year 1957; those losses were reflected in budget expenditures in 1957 and prior years.

Price supports and related programs.—Expenditures for price supports and other programs to stabilize farm prices and farm income have averaged more than \$3.5 billion per year during the last 3 fiscal years. Under present farm laws these expenditures are likely to continue at high levels. Our system of price supports has tended to price key farm commodities as if they were scarce, stimulating continued production in excess of the quantities that existing markets can take at these prices. Controls have not been effective in reducing overall agricultural production, despite the severe restrictions they impose on farmers' freedom to produce and market. As a result, the Government has become the market for huge quantities of agricultural commodities, and our surplus disposal operations have been greatly expanded both at home and abroad. Present agricultural policy, therefore, places a heavy burden on taxpayers and complicates our foreign-trade relations.

A technological explosion is occurring on American farms as can be seen from the fact that production per farm worker has doubled in the last 15 years. A new dimension in farm policy has been created which makes it virtually impossible to curtail agricultural output with the type of controls acceptable in our society. Under these circumstances, farm products are likely to continue to be abundant, and we cannot successfully continue with present obsolete legal formulas governing acreage allotments and price supports.

I shall send to the Congress shortly a special message recommending certain changes in existing legislation that will permit the Secretary of Agriculture to establish price supports for basic crops consistent with the increased productive capacity of our agriculture. These measures could not begin to have a significant effect in freeing the farm economy from Government controls before 1960 under a program of gradual adjustment of production to normal market demands.

Titles I and II of the Agricultural Trade Development and Assistance Act of 1954 expire on June 30, 1958. Although sales of surplus agricultural commodities for foreign currencies under title I of this act do not provide a solution to the basic problem of adjusting agricultural production, they have proved to be an important temporary method of coping with problems arising out of the longtime accumulation of surplus agricultural commodities. This budget proposes extension of titles I and II of this act for 1 additional year, with an increase from the present \$4 billion to \$5.5 billion in the authorization for the Commodity Credit Corporation to incur costs and losses under title I. Such an authorization does not constitute new obligational authority, but the resulting costs and losses necessitate new obligational authority in future years to reimburse the Corporation. The budget includes, therefore, an anticipated 1958 supplemental appropria-

tion of \$1.3 billion to reimburse the Corporation for the 1957 program. The operations of title I of this act and the uses of the foreign currencies are summarized in the Department of Agriculture chapter of part II of the budget.

Both the acreage reserve and the conservation reserve programs of the soil bank have been helpful in diverting cropland from the production of agricultural commodities that are in excess supply. After careful consideration, however, I believe that more material and lasting benefits per dollar spent, both in reducing production of surplus crops and in obtaining enduring conservation of the Nation's agricultural resources, will be achieved under the conservation reserve program. This budget, therefore, proposes termination of the acreage reserve program at the end of the 1958 crop year, and recommends a conservation reserve program of \$450 million for the 1959 calendar year, an increase of \$125 million above the program for 1958.

I also recommend that the special school milk program be extended after its present expiration date of June 30, 1958, that the National Wool Act be extended, and that legislation be enacted to require a greater sharing by the States in the costs of disaster relief assistance to farmers.

Agricultural conservation program.—The budget includes \$235 million in new obligational authority to finance cost-sharing payments to farmers in the fiscal year 1959 for conservation practices performed during the 1958 crop year. These payments were authorized by the 1958 agricultural appropriation act. I am recommending that a program level of \$125 million be authorized for the 1959 crop year. This amount, together with other public efforts in support of soil and water conservation, will permit cost-sharing payments for the more permanent soil and water conservation practices that are needed to maintain an adequate agricultural resource base. Those practices which are a part of usual and required annual farming methods or which return immediate benefits to the farm are properly the responsibility of the farmer, rather than of the Government. Thus, the appropriation required for the fiscal year 1960 can be reduced to approximately \$125 million.

Agricultural credit programs.—The budget includes a new authorization of \$206 million for loans to electrification and telephone borrowers. Over the years the Rural Electrification Administration programs have done much to enrich the lives of our rural families, and have contributed greatly to the advance of rural America and our country's economy generally. The increased use of power requires additional generating capacity and heavier transmission and distribution facilities

to meet the growing needs for electricity in rural areas. Approximately one-half of REA electric power now goes to rural industrial and nonfarm residential consumers, and in the future these nonfarm users will account for a larger share of the increasing demands. This situation, together with the present state of development of rural electric cooperatives, clearly indicates that it would be in the public interest to broaden the sources of capital from which the REA system may obtain the financing necessary for continued growth and adequate service to consumers. Therefore, legislation will be proposed (1) to assist both electric and telephone borrowers to obtain financing from private sources where the security is adequate and the loans can be repaid within a reasonable time, and (2) as previously mentioned in this message, to adjust interest rates on future loans for all loan programs to meet the Government's costs.

Disbursements for direct loans under the loan programs of the Farmers' Home Administration, exclusive of farm housing loans, are expected to amount to \$231 million in the current fiscal year. This budget recommends a reduction of the authorization for these direct loans to \$175 million for 1959. The Farmers' Home Administration will continue to assist farmers in arranging operating loans from other sources. Also, legislation will be proposed to encourage private investors to make more insured real estate loans.

Utilization research.—During the past year, the Commission on Increased Industrial Use of Agricultural Products made a report to me and to the Congress which emphasizes the importance of research on utilization of farm products. Our present research on industrial uses of farm products is, therefore, being expanded as a step in carrying out some of the Commission's recommendations. Appropriations recommended for 1959 provide \$19 million for domestic utilization research, and, to the extent feasible, steps will be taken to make available to the Department in the fiscal year 1959 up to an additional \$5 million of foreign currencies, obtained from the sale of surplus agricultural commodities, to contract for utilization research abroad. The research financed by foreign currencies will be directed toward increasing acceptance and use of our farm commodities and their products in foreign markets. Together with the amounts provided for the Forest Service (classified under natural resources) \$26 million is estimated to be available for utilization research.

The Department will continue to review its research activities, particularly in farm production, with the objective of placing increased emphasis on utilization research wherever this is feasible. Studies are proceeding to determine the most effective organizational arrangements for conducting this research within the Department.

NATURAL RESOURCES

The 1959 budget recommendations for natural resource programs contemplate the greatest possible economy in the use of Federal dollars, with due regard to the effectiveness of these programs in contributing to national security and long-term economic growth.

This budget contemplates curtailing some programs and stretching out construction on certain public works projects where this can be done without impairing the value of investments previously made. At the same time, there will be necessary increases in expenditures for public works, because of the many commitments made for projects started in previous years. Total Federal expenditures for natural resources will increase \$35 million over the current year. These expenditures are estimated to be \$1.5 billion in the fiscal year 1959, of which about \$1 billion will be for the development of water resources.

There should be increased financial participation by State and local agencies and private interests in conservation and development programs. Such participation multiplies the effectiveness of Federal Government expenditures for these programs. In particular, there should be a uniform and consistent basis of local sharing of the costs on all projects involving flood control which produce identifiable benefits to local groups.

NATURAL RESOURCES

[Fiscal years. In millions]

Mineral resources.....	62	63	56	51
General resource surveys and other.....	38	43	47	46
Total.....	1,296	1,457	1,492	¹ 1,446

¹ Compares with new obligational authority of \$1,355 million for 1957 and \$1,439 million for 1958.

Many of the resource programs yield financial receipts, most of which come from sale of power and timber and from mineral leases on the public lands and the Outer Continental Shelf. These receipts are estimated to be \$859 million in the fiscal year 1959. The estimated expenditures for 1959 include shared-revenue payments of \$78 million of these receipts to States and counties.

Water resources.—The construction activities of the Corps of Engineers and the Bureau of Reclamation for flood control, navigation, irrigation, water supply, and power projects will be limited in 1959 to orderly continuation of work started in prior years. For the fiscal years 1956, 1957, and 1958, a total of \$210 million was provided as the first-year appropriations for starting 407 new projects having an estimated total cost of \$4.5 billion. As a result, expenditures for these two agencies in 1959 will be higher than in any of the 5 preceding years and will increase further in 1960. We should not at this time add to this extremely high level of commitments by starting any new projects in 1959.

Construction on 309 water resources projects which these agencies will have underway in 1958 will go forward in 1959 as economically as possible. Expenditures for maintenance and operation of present facilities in 1959 will be at levels which will provide reasonable protection of the Federal investment.

In the interest of sound and efficient water resources programs in coming years, funds have been provided to continue investigations and advance planning and to assemble basic data for future projects.

In accordance with my earlier recommendations, both Houses of the Congress have had under consideration legislation which would authorize the sale of revenue bonds by the Tennessee Valley Authority. I hope that action on appropriate legislation will be speedily concluded in order that the Tennessee Valley Authority may be in a position to meet approved needs for new generating facilities, with the Congress still retaining budgetary control of the program. This budget includes, under proposed revenue-bond legislation, \$125 million to finance the construction of additional power generating units.

INTEREST AND GENERAL GOVERNMENT

Interest expenditures of \$7.9 billion, predominantly on the public debt, will account for 11% of budget expenditures in the fiscal year 1959.

Expenditures for general government, primarily for central administrative costs not classified among the other major activities, will be held to about the 1958 level despite increases in workload accompanying the normal growth of population. The estimated total expenditures in 1959 of \$1.4 billion are less than 2% of the total budget.

INTEREST

The estimated interest payments in 1959 will be about the same as in 1958. During the past several years, market rates of interest have been steadily increasing until recent months, reflecting the heavy competition for savings to finance record levels of capital investment. These higher rates have meant corresponding increases in the budget cost of refinancing the large volume of maturing Government obligations. With recent changes in interest rates, however, no further increase in payments for 1959 is now estimated.

INTEREST

[Fiscal years. In millions]

Item	Budget expenditures			Recommended new obligational authority for 1959
	1957 actual	1958 estimate	1959 estimate	
Interest on the public debt.....	\$7,244	\$7,800	\$7,800	\$7,800
Interest on refunds of receipts.....	57	61	62	62
Interest on uninvested funds.....	6	6	7	7
Total.....	7,308	7,867	7,869	7,869

Apart from fluctuations in rates, the level of interest payments is determined by the size and composition of the public debt. The only sound long-run method of reducing this cost is to balance the budget, economic conditions permitting, and apply the surplus revenues to reducing the debt.

GENERAL GOVERNMENT

If we are to retain in Government service the highly skilled and able civilian employees who contribute so much to the Nation's strength, it is clear that certain revisions are needed in the statutory pay structures for these employees, as well as for military personnel. My proposals for such revisions, to be effective July 1, 1958, and for other civilian personnel legislation, will be submitted to the Congress at an early date.

This budget includes in the 1959 allowance for proposed legislation and contingencies \$160 million to meet the cost of pay revisions for postal employees and \$179 million for employees in all other agencies except the Department of Defense. The budget for the Department of Defense, the Government's largest employer, makes allowance for its share of the additional cost.

While the adjustments which will be proposed under the Classification Act will affect rates of pay at all levels, they will have as a primary objective more adequate compensation for those whose present salary

is substantially less than their responsibilities. Salary rates for junior and intermediate scientific and managerial grades should be more nearly competitive with non-Federal rates. Pay relationships in the middle and upper grades should be revised to provide greater incentive for those who assume increased responsibilities and demonstrate their proficiency in discharging them. Statutory limitations on the number of positions in the highest pay grades should be removed altogether, to permit more reasonable salaries for scientists and executives carrying heavy burdens of leadership and decision. Structural revision of the postal pay system has already been substantially accomplished but a general pay increase under that system is now appropriate.

Last year I recommended a program of hospitalization and medical insurance for Government employees. In view of the priority given to recommended pay adjustments, I propose that this health insurance program be postponed.

To carry out the recommendation of the Hoover Commission for improving career opportunities and effectiveness in the civil service, legislation should be enacted to authorize the training of Government employees outside as well as within the agencies in which they are employed. Legislation should also be enacted to provide for each employing agency to bear its share of the cost of accident compensation benefits.

GENERAL GOVERNMENT

[Fiscal years. In millions]

Program or agency	Budget expenditures			Recom- mended new obligational authority for 1959
	1957 actual	1958 estimate	1959 estimate

Total.....	1,789	1,377	1,403	² 1,362

¹ Includes Government payment to the civil service retirement and disability fund. Starting in 1958, this payment was allocated among all employing agencies.

² Compares with new obligational authority of \$1,833 million for 1957 and \$1,368 million for 1958.

*Less than \$500,000.

In order to meet the most pressing needs for new Federal buildings, the authority of the General Services Administration and the Post Office Department to enter into lease-purchase contracts should be extended.

I have been advised by the Attorney General that section 601 of Public Law 155, 82d Congress, concerning certain real estate transactions, reflects the exercise of legislative authority not warranted by the Constitution and that it is therefore unconstitutional. I recommend immediate repeal of this provision.

In furtherance of the invitation extended by the United States to hold the Eighth Olympic Winter Games in this country in 1960, I recommend that the Congress authorize the expenditure of not more than \$4 million to assist in the construction of adequate facilities for the games and to defray the costs of providing assistance to the games by elements of our Armed Forces.

Legislation now pending before the Congress to place Government appropriation requests on an accrued expenditure basis should be enacted, in accordance with the recommendations of the Hoover Commission. This is a businesslike approach and it is hoped that the opposition that developed in the past will be withdrawn as a result of further study and modifications in the way the procedure is to be applied. Likewise, efforts to achieve economy in Government would be greatly helped by legislation authorizing an item veto. This legislation would change the present situation under which every appropriation bill must be approved or disapproved as a whole, regardless of the merits or demerits of its individual items.

Last year, the Congress enacted legislation to cover some of my most urgent proposals for amending the immigration laws. I urge that legislation on my remaining proposals be promptly enacted.

I recommend again that the Congress enact suitable legislation providing for home rule in the District of Columbia. Under any such system the citizens of the District should be authorized to elect local officials, to vote in Federal elections, and to have a delegate in the House of Representatives.

I also recommend that the Congress complete action on appropriate legislation admitting Hawaii and Alaska into the Union as States.

Americans have a tradition of uniting in action when their freedoms and welfare are threatened. We do not shirk our clear responsibilities when new challenges arise.

I feel confident that this budget expresses the way in which the American people will want to respond to the promises and dangers of

the dawning age of space conquest. New dimensions must be added to our defenses, and outmoded activities must be discarded. Closer international cooperation is vital in a world where great distances are losing their meaning. As we devote more of our efforts and resources to these compelling tasks, we will have to limit our demands for less essential services and benefits provided by the Federal Government.

Our response must rise above personal selfishness, above sectional interests, above political partisanship. The goal of lasting peace with justice, difficult though it may be to achieve, is worth all of our efforts. We must make the necessary sacrifices to attain it. Our own people demand it and the nations of the world look to us for leadership.

DWIGHT D. EISENHOWER.

INTRODUCTION TO PART I

Part I of the budget contains five summary tables. Each of these tables is designed to bring together in one or two pages some overall aspect of the Federal budget.

TYPES OF FUNDS

A basic distinction is made between Federal funds on the one hand, and trust and deposit funds on the other.

The *Federal* (Government-owned) funds are of four types as follows:

The *general* fund is credited with receipts which are not earmarked by law for a specific purpose, and is charged with expenditures that are payable from appropriations (except appropriations of earmarked receipts) and those payable from borrowing. Both in number of items and in amounts, most of the Government's business is transacted through the general fund.

Special funds are those which are established to account for receipts that are earmarked by law for a specific purpose. They exclude the funds which carry on a cycle of operations for which there is continuing authority to use the receipts (as described in the next paragraph). Some special funds are subject to annual appropriation by Congress. Others are automatically available under the laws which created the funds.

Public enterprise (revolving) funds are those which finance a cycle of operations, in which the expenditures generate receipts coming primarily from the public and available for continuing use. They include nearly all of the Government corporations, the postal fund, and various unincorporated enterprises.

Intragovernmental revolving and management funds (including *consolidated working* funds) are those which are created to facilitate financing operations within and between Government agencies. They consist of two types—*intragovernmental revolving* funds which finance a cycle of operations, like public enterprise funds but with receipts primarily from within the Government; and *management* funds which permit the pooling of advance payments from two or more appropriations to carry out certain activities.

The other funds, for which the Government serves in a fiduciary capacity, are of two types—*trust* funds and *deposit* funds. They are explained in the introduction to part III.

BUDGET RECEIPTS, EXPENDITURES, AND SURPLUS OR DEFICIT

The budget totals and the budget surplus or deficit relate only to the Federal funds, and exclude trust and deposit funds. Tables 1, 2, and 3 are therefore limited to transactions of the Federal funds.

Basis of stating budget receipts.—Table 1 includes a summary of budget receipts. Budget receipts represent the total received for the general fund and the special funds, less (a) refunds of receipts and (b) transfers to trust fund receipts in the four cases where the law provides an indefinite appropriation to a trust fund in an amount equal to certain tax receipts. Gross receipts and the deductions are itemized in special analysis B of part IV.

Internal revenue and customs receipts are stated on the basis of collections reported by collecting officers. Other receipts are reported on the basis of confirmed deposits.

Basis of stating budget expenditures.—Tables 1 and 2 include information on budget expenditures. Such expenditures cover the general fund, the special funds, the public enterprise funds, and the intragovernmental revolving and management funds. Expenditures for the public enterprise funds and for the intragovernmental funds are included in the totals on a *net* basis—that is, their collections are deducted from gross expenditures and the results are the net expenditures. Interagency payments and reimbursements to appropriations are also netted; that is, to avoid double counting they are treated only as expenditures of the agency whose appropriation or fund is ultimately bearing the charge. Some incidental reimbursements from outside the Government to appropriations are similarly netted out of expenditure figures.

Under the *checks-issued* basis which is used, expenditures are reported for the fiscal year in which the checks are issued, regardless of when the obligation was incurred or when the goods and services were received. Modifications in this basis are made as follows: (a) Where payment is made in cash instead of by check, the cash payment is an expenditure; (b) where payment is made by the issuance of bonds or by an increase in their redemption value, instead of by the issuance of checks, such an issuance or increase is an expenditure; and (c) interest on the public debt, other than increases in the redemption values of savings bonds, is reported on an accrual basis.

Debt and investment transactions.—Receipts never include money obtained from borrowing by any type of Federal fund. Nor are borrowings considered as a deduction in arriving at budget expenditures. Similarly, retirement of debt is always excluded from budget expenditure figures of all types of Federal funds. The purchase of U. S. Government securities, and redemptions or sales thereof, are also excluded from expenditure and receipt figures.

Eliminations from both receipts and expenditures.—Certain transfers from one fund to another are eliminated from budget receipts and expenditures. This is done to avoid inflating both sides of the budget. Payments to the general fund of earnings and dividends on capital of revolving funds, and the return of such capital to the general fund are the items so excluded.

Budget surplus or deficit.—The budget surplus or deficit shown in table 1 represents the difference between the *budget receipts* and *budget expenditures* of a given year. Cash balances, appropriation balances, and surpluses and deficits of previous years are not a part of the calculation.

NEW OBLIGATIONAL AUTHORITY

Table 3 summarizes the new obligational authority—the total of authority becoming available in a given fiscal year for entering into new obligations.

The obligation basis.—Expenditures can be made only pursuant to appropriations or other specific authority granted by Congress. Government agencies are generally permitted by law to incur obligations requiring the future

payment of money only when they have an appropriation or other specific authority to do so. Congressional action on the budget must therefore include authority to cover *obligations* expected to be incurred within the fiscal year, rather than to cover only the *expenditures* which are expected to be made during that year in payment of obligations.

Types of new obligational authority.—There are three basic types of new obligational authority: Appropriations, contract authorizations, and authorizations to expend from debt receipts. In addition, there are sometimes reappropriations and reauthorizations.

Appropriations are authorizations to make expenditures from the general fund of the Treasury or from the various special funds. In some cases the authority to incur obligations has previously been granted in the form of contract authorizations; in such cases, the appropriation to permit the payment of such obligations is said to be to *liquidate contract authorizations* and it is not a part of new obligational authority. In all other cases appropriations confer authority both to incur new obligations and to pay for them.

Contract authorizations are authorizations to incur obligations prior to the enactment of an appropriation. A contract authorization does not in itself permit the spending of money; hence it must be followed by an appropriation to permit payment of the contracts and other obligations thus incurred.

Authorizations to expend from debt receipts are authorizations to incur obligations and make expenditures from borrowed money. Such authorizations may take these forms: (a) Authorizations for the Treasury to make public debt receipts available to a given agency or enterprise, often in exchange for notes of the enterprise; (b) authorizations for a Government-owned corporation to borrow directly from the public; and (c) cancellation of notes which have been issued by a Government enterprise and are held by the Treasury, where the cancellation has the effect of permitting further expenditures to be made (through restoring previously used authority to borrow from the Treasury).

Reappropriations and reauthorizations are actions to continue available part or all of the unused balances of prior appropriations or authorizations which would otherwise expire. When the authorizations thus continued had been previously granted for current operations of the year, the continuation of their availability into a new year constitutes new obligational authority.

Distinction between permanent and current authorizations.—Some new obligational authority is *permanent*, but most is *current*. The permanent items are those under which additional sums become available from time to time under action previously taken by the Congress; no further action is required each year. Most permanent authorizations are in force until repealed; a few are in effect for only a few years as specified in the law. The current authorizations are those enacted by Congress in or immediately preceding each fiscal year.

PROPOSED FOR LATER TRANSMISSION

Tables 1, 2, and 3 identify in separate columns the portion of receipts, new obligational authority, and expenditures which are anticipated under proposed legislation and supplemental budget items under existing

legislation. Such items are not provided for in the appropriation text included in this budget, but will be formally transmitted to the Congress later. Such estimates include, in addition to the various items which are identified in part II, an "allowance for proposed legislation and contingencies" to cover items which cannot be foreseen now but which will be transmitted later when definite amounts can be determined and the needs can be more specifically identified. Congressional action upon this allowance will be requested later, not at a single time nor as a single lump-sum item, but in the form of a number of specific appropriations for individual items.

The items estimated herein, for both 1958 and 1959, but planned for formal presentation to the Congress later, appear in the budget under the heading "Proposed for later transmission."

EFFECT ON THE DEBT

Table 4 gives details regarding the effect of each year's operations upon the public debt. The budget surplus or deficit is not the only factor which causes a change in the public debt. The amount necessary to borrow or available to repay is also influenced by: Changes in cash balances; the result of trust fund transactions; the use of borrowing directly from the public (not Treasury borrowing) as a means of financing budget expenditures of certain enterprises (and the repayments of such borrowing as an application of public enterprise fund receipts); and the change in the amount of checks outstanding and other items in process of clearance through the accounts.

CONSOLIDATED STATEMENT

Table 5 brings together the total financial plan for the Government—the budget figures for Federal funds and the estimates for trust and deposit funds—for 1959; and it presents a consolidated statement of receipts from and payments to the public. The statement not only eliminates interfund payments, but also brings in certain transactions of Government-sponsored enterprises which are not otherwise reflected in the budget, converts to a cash basis those expenditures which are made in the form of debt issuances (or increases in the redemption value of debt), and eliminates noncash receipts resulting from seigniorage. Details on a 3-year basis and further explanations are given in special analysis A of part IV.

CLASSIFICATIONS

Receipts are classified in tables 1 and 5 by *source*, a classification which is set forth in detail in special analysis B of part IV.

Expenditures and new obligational authority are classified in two ways in the part I tables. A classification by *function* is used in tables 1 and 5 and the first part of table 3; groups transactions according to broad governmental purposes; subcategories of this classification as applied to Federal funds are set forth in special analysis C. A classification by *agency*, used in table 2 and the second part of table 3, shows transactions by major organizational units of the Government, with most agencies that are independent of the ten executive departments being grouped together. The main entries in this classification correspond to "chapters" in part II of the budget and to the way in which part III is organized.

INTRODUCTION TO PART II

Part II contains the details of the budget for Federal funds, including various types of tables and schedules, explanatory statements of the work to be performed and the money needed, and the text of the language proposed for enactment by Congress on each item of authorization. Included herein is also material on a few trust funds which require congressional action.

This part of the budget begins with 4 statements (tables 6 through 9) which supplement the tables of part I. The remainder of part II is arranged in chapters reflecting the organization of the Government.

Each chapter begins with a summary narrative statement, and certain summary tables. These are followed by detailed material for each appropriation or fund.

SUMMARY TABLES AND THEIR CONTENTS

SUMMARIES OF AUTHORIZATIONS AND EXPENDITURES

Listing of accounts.—A principal table for each chapter shows the new obligational authority and budget expenditures by appropriation account and fund. The listing is arranged by bureau or comparable organization unit and, for each such unit, is divided into several sections: Current authorizations (other than for public enterprise and intragovernmental funds), permanent authorizations, public enterprise and intragovernmental funds, and supplemental items proposed for later transmission.

Authorizations by type.—Forms of new obligational authority other than appropriations are set forth under the applicable appropriation titles, identified by separate line entries. A recapitulation at the end of the account listing shows the authorizations divided between current and permanent and classified by type. In this recapitulation new obligational authority for public enterprise and intragovernmental funds is classified with other authority of the same type. The figures are carried forward into a governmentwide summary in table 7.

Classification by function.—Functional code numbers appear in a separate column of the chapter listings, indicating the category in the functional table (special analysis C of part IV) where each item has been included.

Transactions of public enterprise funds.—An appended table in each chapter is used for public enterprise funds. It shows the gross expenditures, the receipts from operations, and the budget expenditures (the difference between the two other figures). The figures for gross expenditures and for receipts are derived from the detailed business-type budget statements, which show expenditures and receipts on an accrual basis with a single adjustment (on either the expenditure or receipt side but not both) for the conversion from an accrual to a checks-issued basis (net). The figures from the chapters are totaled in table 9.

SUMMARIES OF BALANCES CARRIED FORWARD

An analysis of unexpended balances for each chapter shows for each account the balances of budget authorizations carried forward at start and end of the past, current, and budget years. These balances are summarized in table 8.

Many budget authorizations are available for obligation for only 1 year, but some are available for longer periods of time or without time limit. In the case of those which are for a specific period of time, unobligated balances are written off at the end of that time, but obligated balances remain available indefinitely to pay outstanding obligations lawfully incurred.

In the case of salaries and wages, travel, and like items, the lag between obligations and expenditures is usually no more than a few weeks or a few months. In the case of construction, major procurement, certain research contracts and similar items, the lag between obligations and expenditures may be 1 or 2 years or even longer.

Balances are not in the form of cash, but are book-keeping authority for the incurring of obligations or the making of expenditures, for which cash must be provided at the time the expenditures occur.

The unobligated balance for each account or fund represents the difference between the unexpended balance and the net obligations outstanding. Net obligations represent the unpaid obligations (both those which have accrued into liabilities and those which are undelivered or unperformed), less the accounts receivable and intragovernmental orders for services or materiel which have been accepted but have not yet become receivables.

RELATIONSHIP OF TRANSACTIONS AND BALANCES

The total amount available—new obligational authority plus balances brought forward and adjustments—is shown on the last of the chapter summary tables, together with the expenditures and other disposition made of the amounts available. The body of the table is arranged to “flow” from start to end of the year; obligations incurred, net, are shown for reference at the end.

Similar information, but arranged to place obligations incurred within the sequence of the table’s flow, is summarized for the Government as a whole in table 6.

Writeoffs, restorations, and other adjustments in availability.—Writeoffs of unused balances of authorizations occur in four ways: (a) rescissions by act of Congress; (b) the automatic lapsing of unobligated balances when an appropriation expires for purposes of obligation; (c) the return of capital and transfer of dividends from revolving funds to the general fund; and (d) adjustments in the obligated balances of expired accounts due to the payment of obligations in smaller amounts than anticipated or to the amendment or cancelling of obligations.

Restorations of balances previously written off occur in the case of expired accounts when the balances left for payment of old obligations are insufficient to cover them, due to payments in larger amounts than anticipated, the amendment of obligations, or the discovery of previously unrecorded items.

Obligations incurred, net.—The obligations incurred are stated on a gross basis in the detailed schedules, but are summarized on a net basis, consistent with the method of stating budget expenditures and new obligational authority. Thus, the summary figures are based on total obligations incurred less reimbursements to appropriation accounts, revenues and other receipts of revolving funds, and recoveries of prior obligations.

Authority for expenditures.—Expenditures for the budget year are broken down on two tables in each chapter summary into those coming out of new obligational authority of the same year and those coming out of balances, etc. It is generally assumed that prior year balances available in commingled accounts will be obligated before the new authorizations are obligated, and that expenditures will reflect the liquidation of those obligations on the basis of previous experience. In the case of revolving funds it is assumed that budget authorizations are expended in an amount equal to the sums placed in the fund during the year, and that, if all of the authorization is not placed in the fund at once, it is moved to the fund and expended on a first-in, first-out basis.

FORM OF DETAILED MATERIAL

For each appropriation and fund, the budget includes certain detailed material, as follows: (1) appropriation language, if applicable; (2) a schedule of program and financing; (3) a narrative statement on program and performance; (4) a schedule of object classification. An exception occurs in the case of certain permanent appropriations and other older appropriation accounts on which only a residual balance remains; such accounts of a bureau or independent agency are often combined into a single presentation instead of having detailed schedules.

In the case of revolving funds, there are usually three additional schedules, covering (5) the sources and application of funds; (6) revenue, expense, and retained earnings; and (7) financial condition.

APPROPRIATION LANGUAGE

The language proposed for inclusion in the 1959 appropriation acts is printed at the head of each item requiring action by Congress, except for those items which are not formally recommended at this time but will be proposed for later transmission. The language of the 1958 appropriation acts is used as a base. Following the language are citations to relevant laws and the appropriation act from which the text is taken, as in this example:

SALARIES AND EXPENSES

For necessary expenses of the Internal Revenue Service, including purchase (not to exceed one hundred for replacement only) and hire of passenger motor vehicles; and services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), and of expert witnesses at such rates as may be determined by the Commissioner; \$325,500,000: *Provided, That not to exceed \$200,000 of the amount appropriated herein shall be available for expenses of instruction and facilities for the training of employees by contract, subject to such regulations as may be prescribed by the Secretary of the Treasury.* (5 U. S. C. 132; title 26 U. S. C.; Treasury-Post Office Appropriation Act, 1958.)

Appropriated 1958, \$325,500,000 Estimate 1959, \$325,500,000

Roman type shows the text used in the 1958 appropriation acts. Italic type indicates proposed new language. Brackets enclose material which it is proposed to omit.

SCHEDULE OF PROGRAM AND FINANCING

This schedule consists of two parts. In the section for program by activities, obligations are broken down by purpose, program, or project. This breakdown, especially tailored for each agency and account, reflects the particular duties and responsibilities for which the money is used. The financing section shows the appropriation provided and other means of financing the program, and the disposition of amounts not used during the year. Only two of the possible entries are illustrated here:

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
1. Rulings, technical planning, and special technical services.....	\$4,632,770	\$5,260,124	\$5,065,524
2. Collection of revenue.....	128,836,522	134,331,036	135,793,886
3. Audit of tax returns.....	106,701,706	113,576,377	114,323,311
4. Tax fraud and special investigations.....	15,738,885	16,743,738	16,862,034
5. Alcohol and tobacco tax regulatory work.....	23,181,034	24,274,554	23,712,856
6. Taxpayer conferences and appeals.....	9,771,076	11,046,227	11,059,022
7. Legal services.....	7,043,800	7,998,096	7,988,780
8. Inspection.....	4,096,635	4,419,834	4,365,434
9. Statistical reporting.....	1,847,329	2,513,167	2,346,867
10. Executive direction.....	3,634,552	4,083,586	3,954,086
Total obligations.....	305,484,309	321,246,759	325,500,000
Financing:			
Unobligated balance no longer available.....	265,691	1,253,241	-----
Appropriation (new obligational authority).....	305,750,000	325,500,000	325,500,000

Obligations refer to orders placed, contracts awarded, loan agreements made, and services received during the year, regardless of the time of payment. Appropriations or other obligational authority must be provided by the Congress before obligations can be incurred.

SCHEDULE OF PROGRAM AND FINANCING—COST BASIS

Where the data are available in the accounting system, cost-type budgets are presented. In such cases, the figures opposite the activity entries are the value of goods and services consumed in carrying out the program, in the case of operating costs; and they are the value of capital assets received, in the case of capital outlay programs. The program portion of a typical cost-type budget looks like this:

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
Operating costs:			
1. System operation and maintenance.....	\$503,946	\$670,000	\$664,000
2. Power contracts and rates.....	73,771	100,000	91,000
3. General administration.....	298,304	310,000	300,000
Total operating costs.....	966,021	1,080,000	1,055,000
Deduct depreciation (not requiring funding).....	97,120	80,000	80,000
Net operating costs, funded.....	868,901	1,000,000	975,000
4. Relation of costs to obligations:			
Obligations incurred for costs of other years, net.....	9,423	-----	-----
Total program (obligations).....	878,324	1,000,000	975,000

In those cases where the program is principally for procurement or public works, additional columns are often shown to make a more complete presentation. The financing section of a cost-type budget schedule is the same as for any other schedule.

The relation of costs to obligations is usually summarized in one or two lines on this schedule, but is amplified further in an additional text table inserted in the narrative statement of program and performance which follows. A typical schedule on the relation of costs to obligations is as follows:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year:				
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received).....	\$45,790	\$47,291	\$60,000	\$50,000
Accrued annual leave (leave earned but not taken by employees, charged to activity costs) (—).....	-119,157	-111,235	-123,944	-113,944
Total selected resources at end of year.....	-73,367	-63,944	-63,944	-63,944
Selected resources at start of year.....	-----	73,367	63,944	63,944
Obligations incurred for costs of other years, net.....	-----	9,423	-----	-----

NARRATIVE STATEMENT OF PROGRAM AND PERFORMANCE

The work planned and services proposed to be carried out are described briefly in a narrative statement for each appropriation or fund. Where practicable the narrative statement indicates the expected accomplishment in relation to the financial estimates, and it gives some measures of program and performance. Headings in the statements usually agree with the categories in the statement of program by activities.

In the case of permanent appropriations and revolving funds, the narrative statements set forth the financing arrangements, including the source of the money and the statutory basis for the earmarking of receipts.

SCHEDULE OF OBJECT CLASSIFICATION

There is shown for each account a summary of personal services and a classification of the obligations according to a uniform list of objects.

The object classes, numbered from 01 to 16, reflect the nature of the things or services purchased, regardless of the purpose or the nature of the program for which they are used.

Permanent positions are those of a full-time nature which are of indefinite duration. Some are filled by persons with temporary appointments. The "number of

employees at end of year" represents the number of (a) full-time and regularly scheduled part-time employees in pay status on the last work day in June, and (b) intermittent employees who work at any time during June. This is the basis for reports of the Civil Service Commission.

Object Classification

	1957 actual	1958 estimate	1959 estimate
Total number of permanent positions....	52,571	52,444	51,931
Full-time equivalent of all other positions.....	1,395	1,587	1,587
Average number of all employees.....	53,181	52,570	52,264
Number of employees at end of year.....	51,364	50,775	50,590
Average GS grade and salary.....	6.7 \$5,180	6.9 \$5,257	7.0 \$5,399
01 Personal services:			
Permanent positions.....	\$263,415,474	\$265,445,665	\$266,859,431
Positions other than permanent.....	5,771,611	4,747,665	4,747,665
Other personal services.....	1,631,424	2,311,227	2,311,227
Total personal services.....	270,818,609	272,504,557	273,918,323
02 Travel.....	8,357,621	8,635,289	8,255,138
03 Transportation of things.....	1,573,013	1,655,909	1,655,909
04 Communication services.....	5,878,732	5,944,412	5,944,412
05 Rents and utility services.....	1,544,946	2,369,406	1,845,983
06 Printing and reproduction.....	7,526,140	7,773,516	7,773,516
07 Other contractual services.....	3,364,038	3,113,514	3,113,514
08 Supplies and materials.....	3,253,188	3,375,247	3,369,247
09 Equipment.....	2,325,560	1,746,492	1,746,492
11 Grants, subsidies, and contributions.....		16,485,687	17,234,741
13 Refunds, awards, and indemnities.....	674,959	510,000	510,000
15 Taxes and assessments.....	164,612	132,730	132,730
Total obligations.....	305,484,309	324,246,759	325,500,000

Average grades and salaries are computed arithmetically. Thus the average salary sometimes falls outside the salary range of the average grade.

STATEMENT OF SOURCES AND APPLICATION OF FUNDS

For all revolving funds, there is shown a presentation of funds applied and provided, other than the investment of Government capital in the fund, borrowings, and the repayment of capital and dividends.

The statement generally reflects revenues and expenditures on an accrual basis; an adjustment is made for changes in selected working capital (current assets, other than cash and inventories for sale or manufacture, less current liabilities) in either section of the statement as appropriate. Because of such an adjustment, the gross expenditures shown on the statement, less the receipts from operations, equals budget expenditures on a checks-issued basis, as in the following example:

Sources and Application of Funds (Operations)

	1957 actual	1958 estimate	1959 estimate
Gross expenditures (funds applied):			
Purchase of equipment.....	\$85,850	\$109,000	\$200,000
Expense:			
Purchase of raw materials.....	3,341,289	3,671,196	3,810,000
Other expense.....	7,227,907	8,537,853	8,987,043
Donation of working capital assets.....	8,892		
Increase in selected working capital.....			632,870
Total gross expenditures.....	10,664,028	12,318,049	13,629,913
Receipts from operations (funds provided):			
Sales of goods and services.....	10,177,190	12,628,500	12,907,500
Proceeds from sale of equipment.....	4,235	1,500	1,500
Decrease in selected working capital.....	73,043	230,998	
Total receipts from operations.....	10,254,468	12,860,998	12,909,000
Budget expenditures.....	409,560	-542,949	720,913

Because the statement is built on the basis of transactions which affect working capital, it excludes depreciation, losses on loans, and other "nonfund" transactions.

STATEMENT OF REVENUE, EXPENSE, AND RETAINED EARNINGS

For revolving funds there is also presented a statement of revenue and expense, computed on an accrual basis, and the resulting net income or loss for the year. This statement is usually on a full accrual basis, including sums for depreciation, provisions for losses on receivables, etc. Where a fund consists of several programs, revenue and expense may be identified for each; otherwise they are shown only for the fund as a whole, as here illustrated:

Revenue, Expense, and Retained Earnings

Operating income or loss (-):			
Revenue.....	\$11,231,889	\$13,378,500	\$13,657,500
Expense.....	11,493,564	13,238,810	13,659,090
Net operating income or loss (-).....	-261,675	119,690	-1,590
Nonoperating income or loss (-):			
Proceeds from sale of equipment.....	4,235	1,500	1,500
Net book value of assets sold (-).....	-15,025		
Net gain or loss (-) from sale of equipment.....	-10,790	1,500	1,500
Net income or loss (-) for the year.....	-272,465	121,190	
Analysis of retained earnings or deficit:			
Retained earnings or deficit (-), beginning of year.....	157,285	-120,612	578
Adjustments not affecting selected working capital (-).....	-5,432		
Retained earnings or deficit (-), end of year.....	-120,612	578	578

The statement includes an analysis of the retained earnings or the cumulative deficit. This analysis shows any additions to earnings, other than net income for the year, any charges made against retained earnings, and the balance of profits kept in the enterprise as of the end of the year (whether in the form of cash, inventories, other current assets, or fixed assets).

STATEMENT OF FINANCIAL CONDITION

For each revolving fund there is presented a balance sheet of assets, liabilities, and investment of the Government at the close of the year, as in this example:

Financial Condition

	1957 actual	1958 estimate	1959 estimate
Assets:			
Cash with Treasury.....	\$1,740,638	\$2,283,587	\$1,562,674
Accounts receivable, net.....	115,960	98,500	111,113
Inventories:			
Raw materials.....	2,028,365	1,840,561	1,840,561
Finished goods.....	283,649	262,505	262,595
Deferred charges.....	74,318	43,984	13,651
Land, structures and equipment, net.....	7,102,094	6,871,099	6,027,194
Total assets.....	11,344,934	11,400,326	10,717,788
Liabilities:			
Current.....	2,682,660	2,844,810	2,194,220
Government investment:			
Non-interest-bearing capital:			
Start of year.....	9,014,334	8,782,886	8,554,938
Donations in or out (-), net.....	-3,167		
Depreciation not recoverable from operations (-).....	-228,281	-227,948	-231,948
End of year.....	8,782,886	8,554,938	8,322,990
Retained earnings or deficit (-).....	-120,612	578	578
Total Government investment.....	8,662,274	8,555,516	8,323,568

The balance sheet excludes any balances of appropriations or borrowing authorizations which have not yet been paid into the revolving fund. The section on investment of the Government is divided into three subsections as appropriate: (a) the interest-bearing capital, (b) the non-interest-bearing capital, and (c) the retained earnings.

Because the balance sheet is on an accrual basis, it does not reflect the obligations incurred which have not yet matured into liabilities, nor does it reflect unfilled customer orders received and available as a basis for obligation in the case of intragovernmental revolving funds. Therefore, there is appended to the balance sheet a schedule which shows the unobligated balances, relating them to the unexpended balances and showing the computation of the net obligated balance as in the following example:

Status of Certain Fund Balances

	1956 actual	1957 actual	1958 estimate	1959 estimate
Unexpended balance:				
Cash.....	\$2,150,198	\$1,740,638	\$2,283,587	\$1,562,674
Obligated balance, net:				
Current liabilities.....	2,720,937	2,682,660	2,844,810	2,194,220
Unpaid undelivered orders.....	268,184	533,663	538,610	485,000
Accounts receivable, net (-).....	-143,848	-115,960	-98,500	-111,113
Unfilled customers' orders (-).....	-1,485,591	-1,423,292	-1,698,322	-1,008,748
Total obligated balance.....	1,350,682	1,677,071	1,586,598	1,559,359
Unobligated balance.....	790,516	63,567	696,989	3,315

LIBRARY OF CONGRESS

The Library of Congress, established in 1800, is not only the library of the Congress itself, but is also the principal general library of the United States Government. The Library's first obligation is to the Congress; the second, to other agencies of the Government; and the third, to other libraries, scholars, investigators, and the general public. Its collections are comprehensive and varied, and include outstanding collections of books, periodicals, newspapers, documents of the national governments of the world, literature in the Oriental languages, etc., and manuscripts, maps, music, motion picture films, sound recordings, prints, and photographs. In addition to maintenance of the collections and the rendering of the general and basic services connected therewith, including the Legislative Reference Service, certain specialized functions are performed; registration of copyrights, catalog card distribution, and the service of books in raised characters and talking books to the blind. In terms of these broad fields of activity

LIBRARY OF CONGRESS—Continued

In addition to funds appropriated annually by Congress, there are also available a number of gift and trust funds, and working funds.

Estimates for the physical equipment, maintenance, and operation of the Library buildings are carried under the request of the Architect of the Capitol.

Current authorizations:

SALARIES AND EXPENSES

Salaries and expenses: For necessary expenses of the Library of Congress, not otherwise provided for, including development and maintenance of the Union Catalogs; custody, care, and maintenance of the Library Buildings; special clothing; and expenses of the Library of Congress Trust Fund Board not properly chargeable to the income of any trust fund held by the Board; [**\$5,875,000**] **\$6,154,408**. (2 U. S. C. 131-166; 5 U. S. C. 150; 17 U. S. C. 1-215; 20 U. S. C. 91; 28 U. S. C. 921; 31 U. S. C. 588, 589; *Legislative Branch Appropriation Act, 1958*.)

Appropriated 1958, **\$5,875,000**

Estimate 1959, **\$6,154,408**

*Includes \$118,479 for activities previously carried under "Salaries and expenses," Copyright Office, Library of Congress. The amounts obligated in 1957 and 1958 are shown in the schedule as comparative transfers.

Appropriation (new obligational authority)	5,310,593	5,875,000	6,154,408

Personal services and incidental expenses for basic operations are financed from this appropriation.

1. *Acquisition of library materials.*—The development of the Library's collections is planned; materials are procured by purchase, gift, exchange, copyright deposit, transfer, and official deposit; and materials are selected for addition to the permanent collections. The objective for 1959 is to continue improvement in acquisitions procedures and in exchange relations with institutions in the more important areas of the world. The collections totaled 36,118,639 items as of June 30, 1957, and consisted of 11,057,773 books and pamphlets; 15,469,572 manuscript pieces, and 9,591,294 maps, pieces of music,

reels of microfilm, photographs, and other miscellaneous items. Of the items received, about 1,000,000 are added to the permanent collections annually. Those received from various sources in 1957 and estimated for 1958 and 1959 are as follows:

Description	1957 actual	1958 estimate	1959 estimate
Purchase	518,221	550,000	650,000
Deposit by virtue of law:			
Copyright	356,263	361,607	366,951
Other	550,468	550,000	550,000
Transfer from Federal agencies	2,517,324	2,250,000	2,250,000
Official donation from State and local agencies	109,175	100,000	100,000
Exchange	455,844	450,000	450,000
Gift from individual and unofficial sources	796,031	1,000,000	1,000,000
Total	5,303,321	5,261,607	5,266,951

2. *Organization of the collections.*—Library materials are cataloged, classified, marked, and arranged; Library of Congress catalogs and the main National Union Catalog (card catalog) are maintained; special collections are organized for use; and binding operations are controlled. The objectives for this activity in 1959 are the cataloging of a larger number of the materials received during the year particularly those in Oriental languages; handling receipts of special materials and organizing them for use on a current basis; and improved cataloging methods and procedures to assure the usefulness of the collections.

Selected performance data for 1957 and estimated for 1958 and 1959 (not including processing activities performed by the Reference Department and the Law Library) are as follows:

Description	1957 actual	1958 estimate	1959 estimate
Volumes fully cataloged and added to the classified collection	139,942	165,000	175,000
Items otherwise organized for use (without full cataloging)	14,077	40,000	40,000
Cards filed in catalogs	1,466,847	1,800,000	1,800,000
Volumes bound	70,146	74,500	74,500
Items repaired, cleaned, mounted, etc.	194,928	194,000	195,000
Cards filed in the National Union Catalog and its supplements	1,120,066	1,200,000	1,300,000

3. *Reader and reference services.*—Books and other library materials are provided within and without the Library, reference and bibliographic assistance is rendered, and custody of the collections is maintained. The objectives for 1959 include adequate and improved service to readers during the 52 hours of full service and the 26 hours of limited service weekly; service in the New Senate Office Building; and improved organization of material through the preparation of bibliographies, checklists, indexes, and other finding aids. The workload in all major activities is expected to increase in 1958 and 1959, as follows:

Description	1957 actual	1958 estimate	1959 estimate
General reader and reference service:			
Books and pamphlets served	1,258,508	1,300,000	1,300,000
Other units of material served	615,605	675,000	675,000
Units issued on loan	200,935	210,000	215,000
Reference inquiries answered	457,789	475,000	480,000
Reference letters	64,735	70,000	75,000
Law library reader and reference service:			
Books and pamphlets served	325,478	350,000	365,000
Reference inquiries answered	74,770	78,000	80,000

4. *Maintenance and protective services.*—A staff of 191, including 82 part-time charwomen, preserves, cleans, and maintains the two library buildings, collections, and grounds; operates telephone switchboards, elevators, check stands, and motor vehicles; procures and maintains furniture, office supplies, housekeeping materials, and miscellaneous equipment; assigns space; and operates the receiving and stockrooms. The guard force staff of 76 is necessary to prevent fire and theft, to maintain order, and to provide regular inspections of all areas in both buildings in which is assembled one of the greatest accumulations of national treasures in the world.

The Copyright Office is responsible for recording copyright claims, assignments and renewals, for supplying copyright information to the public, for collecting and accounting for copyright fees, and for printing complete and indexed catalogs for each class of copyright entries. The office is conducted as a business operation. The amount requested for personal services is substantially counterbalanced by fees received for services rendered as indicated in the table which follows. In addition, the value of books and other library materials deposited in accordance with the Copyright Act and transferred to the Library of Congress is credited to the copyright operation. The income and costs for 1957 and estimates for 1958 and 1959 are as follows:

	1957 actual	1958 estimate	1959 estimate
Income:			
Fees applied.....	\$892,612	\$906,001	\$919,390
Estimated value of materials deposited.....	542,389	550,525	558,661
Total income.....	1,435,001	1,456,526	1,478,051
Costs:			
Salaries.....	1,088,140	1,127,372	1,120,442
Other costs.....	88,522	145,283	153,614
Total costs.....	1,176,662	1,272,655	1,274,056

The program and performance under each of the activities described are predicated on an estimated 232,581 copyright registrations during 1959, an estimated 229,104 during 1958, and an actual 225,807 during 1957.

1. *Receiving and accounting for applications, etc.*—Materials received by the Copyright Office are assembled and routed; accounts are maintained for all moneys received; records relating to the registration of copyrights are filed; and materials are deposited in accordance with the Copyright Act. Performance data are as follows:

	1957 actual	1958 estimate	1959 estimate
Registrations.....	225,807	229,194	232,581
Mail received and dispatched.....	518,189	525,961	533,733

2. *Examining copyright applications.*—All applications and deposits are examined before issuance of registration certificates or recording of documents to determine whether the provisions of the Copyright Act have been satisfied. Performance data are as follows:

	1957 actual	1958 estimate	1959 estimate
Cases and documents examined.....	290,467	294,824	299,181
Registrations and recordation of documents.....	233,941	237,450	240,959

3. *Indexing and cataloging materials received.*—The Register of Copyrights is required to print complete and indexed catalogs of all items registered. The catalog entries prepared by the Copyright Office are made available in part to the Library for its general operations. Registrations cataloged are shown under No. 1 above.

4. *Reference services.*—The Copyright Office makes available to the public, information concerning the provisions of the Copyright Act, including procedures, policies, and rulings; information concerning registrations is furnished on a fee basis. Obtaining compliance with registration requirements is also part of this activity. Performance data are as follows:

	1957 actual	1958 estimate	1959 estimate
Titles searched.....	55,489	56,321	57,153
Letters and search reports written.....	24,123	24,485	24,847

5. *Printing the catalog of copyright entries and bulletins of decisions.*—Catalogs for each class of copyright entries and bulletins of copyright decisions are printed and made available to the public.

6. *General supervision and legal services.*—The work includes legal services relating to the status and improvement of copyright law in its foreign as well as domestic aspects.

The Legislative Reference Service prepares research reports, digests, etc., in answer to inquiries from Members and committees of Congress.

1. *Research and analysis.*—The Legislative Reorganization Act of 1946 lists 19 specific fields of congressional concern in which top-level research by senior specialists is authorized. These correspond in general to the spheres of committee activity. The following 12 fields are now covered by one or more senior specialists: International trade, international affairs, taxation and fiscal policy, American government and public administration, conservation, American public law, labor, engineering and public works, agriculture, price economics, social welfare, and transportation and communications. Available to the Members and committees are also the preparation of charts, translations, reading lists, information in report form or otherwise, and answers to spot reference inquiries. In 1957, a total of 60,443 congressional inquiries was answered. Since 1950, the average annual increase in the number of inquiries has been 5.5%. The total of inquiries for 1958 is estimated at 64,500; and for 1959, 67,000.

2. *Preparation of indexes and digests.*—The Digest of Public General Bills covered 9,232 bills and resolutions

during the Eighty-fifth Congress, first session. It is expected that there will be as many bills to be covered during the Eighty-sixth Congress, first session. The preparation of analytical and name indexes to an increasing number of committee hearings is to be continued.

3. *Reference files, bibliographic and congressional reader service.*—Reference files, containing clippings, pamphlets, and documents are maintained as the basis for reply to the majority of inquiries; researchers are supplied with bibliographic and reference tools; selective and comprehensive bibliographies are prepared for Members and committees of Congress; and reader services are provided by the congressional reading room. During 1957, a total of 70,324 reference file items was processed, 11,763 bibliographic entries prepared, 39,531 published items acquired and processed, and 3,455 readers served.

The card division sells copies of the Library's printed catalog cards and publications. It maintains a stock of over 130,000,000 catalog cards representing some 3,200,000 titles, and fills orders from approximately 9,000 regular subscribers—mostly libraries—in the United States and abroad. In 1957, about 97% of this appropriation was recovered in the form of receipts from card and publica-

tion sales. Receipts of \$1,441,000 were deposited in miscellaneous receipts of the Treasury in 1957. The objectives for 1959 are meeting the increased demand for catalog cards and maintaining a reasonable level of service and economy, the continued expansion of the National Union Catalog, and the printing of cards for books in Chinese and Japanese.

1. *Supplying cards for the Library of Congress.*—The number of cards supplied to the Library of Congress in 1957 was 4,087,673; estimated for 1958, 4,200,000; and for 1959, 4,500,000.

2. *Supplying cards for other libraries.*—The number of cards sold in 1957 was 26,953,659; estimated for 1958, 28,300,000; and for 1959, 29,700,000.

3. *Preparation, printing, and distribution of publications related to cataloging.*—These publications are an integral part of the cataloging activities of the Library of Congress and include the Classification Schedules, lists of Subject Headings, Rules for Descriptive Cataloging, Cataloging Service Bulletins, and similar publications.

4. *Preparation, printing, and distribution of the National Union Catalog.*—This catalog (a cumulative author list) is issued monthly and cumulated quarterly and annually. Subscribers also receive issues of Motion Pictures and Filmstrips (quarterlies with annual cumulation), and Music and Phonorecords (issued on a 6-month basis and annual cumulation). There were 956 paid subscriptions for all issues in calendar year 1957, and it is estimated that there will be 970 subscriptions for 1958 and 1,000 for 1959. It is anticipated that 400 copies of the 1957 issue will be sold in 1958 and the same number in 1959.

5. *Preparation, printing, and distribution of the Subject Catalog.*—This catalog is issued in 3 quarterly volumes with an annual cumulation. There were 384 paid subscriptions for calendar year 1957. It is estimated that there will be 400 paid subscriptions in 1958 and about 410 in 1959.

INCREASE OF THE LIBRARY OF CONGRESS

GENERAL INCREASE OF THE LIBRARY

General increase of the Library: For expenses (except personal services) necessary for acquisition of books, periodicals and newspapers, and all other material for the increase of the Library, \$320,000, to continue available during the next succeeding fiscal year. (2 U. S. C. 131, 132, 132a; Legislative Branch Appropriation Act, 1958.)

Appropriated 1958, \$320,000

Estimate 1959, \$320,000

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
Purchase of books and other library materials (total obligations).....	\$304,765	\$336,908	\$320,000
Financing:

Recovery of prior year obligations.....	-188		
Unobligated balance carried forward.....	16,908		
Appropriation (new obligational authority).....	300,000	320,000	320,000

This appropriation constitutes the only means of acquiring regular domestic trade publications (except for copyright deposits) and many foreign trade publications, both current and noncurrent, from approximately 100 countries or areas. The publications acquired by purchase constitute a most important part of the Library's acquisitions although they represent only a small portion of the material received annually. The objectives for 1959 are to continue at the present level the acquisition of selected important foreign newspapers and periodicals; the acquisition of important materials from critical areas; the direct purchase of selected current titles on microfilm as an economy measure in lieu of binding; and the microfilming of deteriorating materials as a necessary preservative measure.

Appropriation (new obligational authority).....	1,067,481	1,125,000	1,355,000

The division for the blind is responsible for administering a national program to provide reading material for the blind of the United States, Territories, and insular possessions. It has two closely related operations.

1. *Procurement and distribution.*—It provides books in embossed characters, and talking books with their associated reproducers. The books are distributed through 28 regional libraries which assume responsibility for their custody and circulation. The reproducers are distributed through 55 State agencies. The maintenance and procurement of these books is shown in the following table:

Description	1957 actual	1958 estimate	1959 estimate
Talking books purchased:			
(a) New titles.....	174	184	220
(b) Old titles rerecorded.....	22	10	10
Embossed books purchased: Titles.....	142	142	147
Talking book machines:			
Purchased.....	7,000	8,000	9,600
Repaired.....	1,571	3,600	3,600
Salvaged—scrapped.....	5,500	3,000	3,000
Records replaced.....	3,761	3,700	3,700

Objectives for 1959 include the procurement of more titles of books, of more copies of the popular titles, of a sufficient number of machines to equip newly registered blind readers and to replace scrapped machines, and continuation of the quality inspection program of books and machines and of research in sound reproduction and Braille printing.

2. *Cataloging, reference, and training services.*—Catalogs of talking and Braille books are prepared and maintained, including a Union Catalog of Hand Copied Books in Braille which brings together a record of holdings of all libraries. The Division also maintains a unique collection (about 25,000 volumes) of books in Braille not available elsewhere for loan in the United States. As one of the regional libraries, it services the blind (approximately 6,000 readers) of the District of Columbia and of Maryland, Virginia, North Carolina, and South Carolina. During the period 1946 to 1956 the number of readers throughout the country requiring catalogs from which to select reading matter has grown from 30,088 to 58,197 and circulation from 801,797 units (volumes or containers) to 1,451,090. During the period 1947–57, readers served by the Library of Congress regional library for the blind increased from 2,001 to 6,432, and the number of volumes circulated from 36,643 to 86,916. The number of readers and circulation are expected to continue to increase in 1958 and 1959. Inquiries are received concerning library and related services available to the blind. Individuals throughout the Nation who are interested in transcribing or proofreading Braille are trained and those qualified are certified.

Public Law 85-308, approved September 7, 1957, removed the \$1,125,000 ceiling on the authorized appropriation.

Financing: Appropriation (new obligational author- ity).....			50,000

Public Law 85-147, approved August 16, 1957, authorizes an appropriation of \$720,000 to remain available until expended to arrange, index, and microfilm the papers of the Presidents of the United States in the collections of the Library of Congress to preserve their contents and to make them more readily available for research. It is proposed to start this program in 1959 on a plan which calls for completion of the entire program in about 8 years. The objectives for the first year will be the determination of the best plan for arranging and indexing the papers, to begin the preparation of an index, prepare a small segment of the papers for microfilming, and initiate the actual microfilming.

ADMINISTRATIVE PROVISIONS

Appropriations in this Act available to the Library of Congress for salaries shall be available for expenses of investigating the loyalty of Library employees; special and temporary services (including employees engaged by the day or hour or in piecework); and services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a).

Not to exceed ten positions in the Library of Congress may be exempt from the provisions of appropriation Acts concerning the employment of aliens during the current fiscal year, but the Librarian shall not make any appointment to any such position until he has ascertained that he cannot secure for such appointments a person in any of the categories specified in such provisions who possesses the special qualifications for the particular position and also otherwise meets the general requirements for employment in the Library of Congress.

Appropriations in this Act available to the Library of Congress shall be available, in an amount not to exceed \$11,000, when specifically authorized by the Librarian, for expenses of attendance at meetings concerned with the function or activity for which the appropriation is made. (Legislative Branch Appropriation Act, 1958.)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

NOTE.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriation as follows:

"Research and development," Department of the Air Force.
"Research and development," Department of the Army.
"Research and development," Department of the Navy.
"Salaries and expenses," National Science Foundation.
"International educational exchange activities," Department of State.
"Oliver Wendell Holmes devise fund."

The work programs of the Office of the Superintendent of Documents are of a service nature, and hence there is no control over the volume of work which is required by law.

1. *Sales distribution.*—Government publications are

purchased from the Public Printer to be placed on sale. Acquisition costs are paid from sales receipts; hence no appropriation is required for printing sales copies. By law, the sale price is set at the cost of manufacture plus 50%. At the end of each year, excess receipts from sales not required for purchasing additional publications are turned into the Treasury Department as miscellaneous receipts. For 1957, earnings from the actual sale of publications amounted to \$2,900,312. It is estimated that earnings for 1958 will be \$3,100,000 and \$3,300,000 for 1959. These earnings more than cover the appropriation required to finance the sales program.

A proportionate share of the overhead costs which accrue to the Government Printing Office revolving fund, amounting to approximately \$500,000 annually, is not financed from appropriated funds but is recovered from the purchasers of Government publications. The number of sales orders has been steadily increasing, and in the last 10 years the volume of orders and the dollar value of publications sold has more than doubled. The current public interest in the Government's publishing program points to a continuing increase in the volume of orders.

2. *Distribution for other agencies and Members of Congress.*—The Superintendent of Documents maintains mailing lists, including the list for the Congressional Record, and performs mailing operations upon the request of any Government agency without reimbursement. Mailing services for farmers' bulletins, soil surveys, and other publications which are allocated to Members of Congress on a quota basis are also provided.

3. *Depository library distribution.*—Upon request, 1 copy of every Government publication is supplied to more than 570 libraries which are designated depositories for Government publications.

4. *Cataloging and indexing.*—This activity covers the preparation and distribution of catalogs and indexes of all publications issued by the Federal Government, the principal series being the Monthly Catalog of United States Government Publications and the Numerical List and Schedule of Volumes.

5. *Relation of costs to obligations.*—The year-end balances of unpaid undelivered orders are as follows: 1956, \$3,847; 1957, \$3,744; 1958, \$3,744; 1959, \$3,744.

The Government Printing Office executes orders for printing, binding, and blankbook work, placed by Congress and the various departments and independent establishments of the Federal Government and furnishes, on order, blank paper, inks, and similar supplies. Operations are subject to the authority of the Joint Committee on Printing (44 U. S. C.).

A separate appropriation, "Printing and binding," has been established to pay for authorized printing and binding for the Congress; printing, binding, and distribution of the Federal Register; and printing and binding of Government publications authorized by law to be distributed without charge to the recipients (67 Stat. 330).

All work for Government agencies other than the above is done on a reimbursable basis and financed through this fund. Receipts from sales of publications by the Super-

intendent of Documents are deposited to the revolving fund, and the cost of these publications is paid therefrom. All profits accruing from these transactions are deposited in the Treasury of the United States and credited to miscellaneous receipts (44 U. S. C. 63).

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate

GENERAL PROVISIONS

SEC. 102. No part of the funds appropriated in this Act shall be used for the maintenance or care of private vehicles.

SEC. 103. Whenever any office or position not specifically established by the Legislative Pay Act of 1929 is appropriated for herein or whenever the rate of compensation or designation of any position appropriated for herein is different from that specifically established for such position by such Act, the rate of compensation and the designation of the position, or either, appropriated for or provided herein, shall be the permanent law with respect thereto: *Provided*, That the provisions herein for the various items of official expenses of Members, Officers, and Committees of the House, and Clerk Hire for Members shall be the permanent law with respect thereto: *Provided further*, That the provisions relating to positions and salaries thereof carried in H. Res. 533 of the Eighty-fourth Congress and H. Res. 28, 126, and 165 of the Eighty-fifth Congress shall be the permanent law with respect thereto: *Provided further*, That the provisions of H. Res. 144 of the Eighty-fifth Congress shall be the permanent law with respect thereto.

SEC. 104. No part of any appropriation contained in this Act shall be paid as compensation to any person appointed after June 30, 1935, as an officer or member of the Capitol Police who does not meet the standards to be prescribed for such appointees by the Capitol Police Board: *Provided*, That the Capitol Police Board is hereby authorized to detail police from the House Office, Senate Office, and Capitol Buildings for police duty on the Capitol Grounds.

SEC. 105. The appropriations, authorizations, and authority with respect thereto in this Act shall be available from July 1, 1957, unless otherwise provided, for the purposes provided in such appropriations, authorizations, and authority. All obligations incurred during the period between June 30, 1957, and the date of enactment of this Act in anticipation of such appropriations, authorizations, and authority are hereby ratified and confirmed if in accordance with the terms hereof. **](Legislative Branch Appropriation Act, 1958.)**

THE JUDICIARY

In accordance with the provisions of the Budget and | judiciary is prepared by that branch of the Government Accounting Act of 1921, as amended, the budget for the | and is printed in the budget document without revision.

This item is not subject to the approval of the Judicial Conference.

The Court of Customs and Patent Appeals has exclusive jurisdiction in appeals from judgments of the Customs Court in all cases involving the construction of law and facts respecting classification of merchandise and rate of duty imposed thereunder, and all appealable questions as to laws and regulations governing the collection of customs revenues. Its decisions are final unless taken to the Supreme Court on writs of certiorari.

The court also has exclusive jurisdiction of appeals from the Tariff Commission on questions of law only, in the matter of unfair practices in import trade, and appellate jurisdiction from decisions of the Patent Office in patent and trademark cases, except those involving equity.

This item is not subject to the approval of the Judicial Conference.

The Customs Court has exclusive jurisdiction in civil actions brought under regular tariff laws, internal revenue laws relating to imported merchandise, customs simplification acts, and provisions set forth in various reciprocal trade agreements. In these cases the court interprets the

law and facts respecting classification of merchandise and rate of duty to be imposed thereon. It also has both original and appellate jurisdiction in cases involving questions as to value of imported merchandise.

The United States Court of Claims has jurisdiction of all cases involving claims against the United States (except in pension suits) instituted upon constitutional grounds or under Federal law or regulations, all claims arising out of any contract with the Federal Government and its agencies, and claims for the refund of taxes. It

also has general jurisdiction to hear and determine claims for damages other than tort actions, provided the claimants would have the right to sue in law or equity, if the United States were not immune to such suits. It has jurisdiction in suits against the United States by contractors dissatisfied with the findings and decisions of contracting agencies under terminated war contracts, and jurisdiction concurrent with that of the courts of appeals to review district court decisions in cases involving tort actions. It has authority to review the decisions of the Indian Claims Commission on appeal from that Commission. It is also given jurisdiction in special act cases referred to the court by either House of Congress.

The court continues to carry a heavy load of cases, but it has been able to dispose of the cases which are ready to be heard as expeditiously as the Department of Justice can process them. No material change in program is planned for 1959.

The statutory salaries of all active United States circuit and district judges, the justices and judges of the Supreme Court and circuit courts of Hawaii, and all justices and judges who have retired or resigned in pursuance of law are payable from this appropriation. Provision also is included under this item for the payment of annuities to the seven living widows of Supreme Court justices pursuant to 68 Stat. 918 and a matching contribution by the Government to the judicial survivors annuity fund equal to the amounts required to be made by the participating judges (28 U. S. C. 376).

Salaries were paid to an average of 384 judges in 1957. The appropriation for 1958 will provide for the salaries of 380 although on July 1, 1957, there were actually 385 judges on the rolls and the number is expected to increase during the year to about 396. It is estimated that it will be necessary to provide for the salaries of 403 judges in 1959 due to the upward trend in the number of retired judges in evidence recently. A supplemental appropriation for 1958 is proposed for later transmission.

The primary and appellate jurisdictions of the courts of the United States are vested in the 94 district courts and 11 courts of appeals. Provision for the salaries of the administrative and legal aides required to assist the judges in the conduct of hearings, trials, and other judicial functions and to man the component offices of the courts including the Federal Probation System is made under this heading.

¹ The number of civil cases filed, excluding the District of Columbia, increased from 64,362 in 1956 to 66,279 in 1957. The reduction in the total number of cases received is due to a statute effective Sept. 17, 1956, requiring divorce and domestic relations cases in the District of Columbia to be filed in the municipal court instead of in the district court.

Appropriation (new obligational authority).....	4,410,000	4,250,000	4,988,000

Grand and petit jurors who serve in the Federal courts are paid statutory fees and expenses, as are jury commissioners. United States commissioners are primarily committing magistrates and are paid fees for their services.

The amount of service and the compensation of jurors depends mainly on the number of jury trials requested by the parties to civil and criminal cases in the United States courts. The earnings of commissioners are directly related to the volume of cases presented by Federal law enforcement officials.

The call for juries is expected to increase moderately as the general activities of the courts continue to be heavy and efforts to reduce backlogs are intensified.

Under recently enacted legislation increasing the fees for services of jurors and commissioners payments to them are expected to increase substantially. A supplemental appropriation for 1958 is proposed for later transmission.

Unobligated balance no longer available.....	34,177		
Appropriation (new obligational authority).....	2,721,800	2,780,000	3,098,300

Under the statutes and administrative regulations promulgated thereunder the expenses of travel and subsistence incurred by the judges, officials, and supporting personnel of the courts in attending sessions of court or transacting other official business are paid from this appropriation. Provision is also made for the cost of supplying, equipping and maintaining their offices and libraries, and for the incidental expenses of operating the 11 courts of appeals and 94 district courts of the United States.

The prospective increase in the number of retired judges rendering judicial service, the proposed expansion of the probation system and clerks' offices to cope with rising caseloads, and the general increase in the cost of services and facilities for the courts require a substantially larger appropriation in 1959 than for 1958 for the impersonal expenses of operating the courts. A supplemental appropriation for 1958 is proposed for later transmission.

This office is responsible, under the supervision and direction of the Judicial Conference of the United States, for providing for the administration of the United States courts. The principal functions are providing administrative staff and services for the courts; examining the state of the dockets of the various courts and compiling and publishing statistical information concerning the business transacted by the courts; the administration of the probation and bankruptcy systems; and the general business affairs of the courts.

The estimates for 1959 provide for an expansion of the program concerned with statistical studies and the examination and survey of court dockets and for transferring from the Department of Justice the function of examining judicial offices. It is planned to develop new procedures and means to relieve the serious congestion existing in a number of courts; propose changes to lighten the constantly mounting caseload of the Federal courts generally; cope with the rapidly rising number of bankruptcy cases; and to meet the heavier administrative and fiscal work incident to the growing judicial establishment.

The district courts of the United States are constituted courts of bankruptcy and invested with original jurisdiction at law and in equity in proceedings brought under the bankruptcy statutes. This jurisdiction primarily is exercised through referees appointed by the several district courts. Their compensation and expenses are paid from special funds created by payments of fees and charges by parties to the proceedings. The present system is self-sustaining and no general tax dollars are involved in its operation.

A marked and steady rise in the number of new cases filed with the referees has occurred in recent years. The number of cases filed in 1957 was 73,761, 11,675 more than

in 1956. It is estimated on the basis of current trends that new cases filed in 1958 and 1959 will total 85,000 and 95,000, respectively. Provision for more referees and additional service by the present referees will be necessary to cope with the rising caseloads forecast for the current and ensuing fiscal years. As a result, a supplemental appropriation for 1958 is proposed for later transmission.

Office and other expenses of referees, including compensation of clerical employees, are payable upon authorization of the director of the administrative office of the United States courts. Workload data appear under the account for salaries of referees. In order to process the anticipated increase in volume of cases it is necessary to expand the referees' staffs and their facilities in 1959. A supplemental appropriation for 1958 is proposed for later transmission.

SALARIES OF JUDGES

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
Salaries (total obligations).....		\$300,000	
Financing:			
Proposed supplemental appropriation.....		300,000	

Under existing legislation, 1958.—A supplemental appropriation of \$300,000 is anticipated to provide for the salaries of the increased number of Federal judges now on the payroll. The number of retired and resigned judges went up in 1957 to 63 from 54 the year before and to 71 on September 30, 1957. The payroll for all judges on that date totaled 391 although the appropriation available provides for only 380. The overall number is expected to go even higher to an average of 396 for the year or 16 above the number provided for currently.

FEES OF JURORS AND COMMISSIONERS

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
Fees, expenses, and costs (total obligations).....		\$675,000	
Financing:			
Proposed supplemental appropriation.....		675,000	

Under existing legislation, 1958.—A supplemental appropriation for 1958 is anticipated to cover increased costs for jurors and commissioners as follows: (1) \$150,000 for jury fees and costs due to increased use of juries in 1958 beyond currently available funds; (2) \$400,000 to meet increased fees payable under Public Law 85-299 which became effective September 7, 1957; and (3) \$125,000 to meet increased fees payable to United States commissioners pursuant to Public Law 85-276, effective as of September 2, 1957.

COURTS OF APPEALS, DISTRICT COURTS, AND OTHER JUDICIAL SERVICES—Continued

Proposed for later transmission—Continued

TRAVEL AND MISCELLANEOUS EXPENSES

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
Miscellaneous expenses (total obligations).....		\$59,000	
Financing:			
Proposed supplemental appropriation.....		59,000	

Under existing legislation, 1958.—A supplemental appropriation of \$59,000 is anticipated to cover mounting costs, estimated at \$14,000, for printing records in cases appealed to the Supreme Court by poor persons who are unable to bear such costs, and the increase of almost 17% over last year in the cost of lawbook-upkeep services amounting to \$45,000.

SALARIES OF REFEREES

(Indefinite special account)

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
Salaries (total obligations).....		\$65,000	
Financing:			
Proposed supplemental appropriation.....		65,000	

Under existing legislation, 1958.—The continuing increase in the number of bankruptcy cases being filed is expected to make it necessary to submit a request for supplemental funds for additional services of referees in 1958 of \$65,000.

EXPENSES OF REFEREES

(Indefinite special account)

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
Miscellaneous expenses (total obligations).....		\$75,000	
Financing:			
Proposed supplemental appropriation.....		75,000	

Under existing legislation, 1958.—A supplemental appropriation of \$75,000 is anticipated for expenses of referees, including salaries of clerical employees, in order to process the larger number of bankruptcy cases currently being filed.

GENERAL PROVISIONS—THE JUDICIARY

SEC. 302. Sixty per centum of the expenditures for the District Court of the United States for the District of Columbia from all appropriations under this title and 30 per centum of the expenditures for the United States Court of Appeals for the District of Columbia from all appropriations under this title shall be reimbursed to the United States from any funds in the Treasury to the credit of the District of Columbia.

SEC. 303. The reports of the United States Court of Appeals for the District of Columbia shall not be sold for a price exceeding that approved by the court and for not more than \$6.50 per volume. (*Judiciary Appropriation Act, 1958.*)

EXECUTIVE OFFICE OF THE PRESIDENT

The new obligational authority recommended for 1959 for compensation of the President and for staff assistance in the White House offices and in the several agencies of the Executive Office is approximately the same as the 1958 amount with two exceptions: (1) an increase of \$206,000 to enable the Office of Defense Mobilization to discharge more effectively its responsibilities of coordinating emergency planning by all Federal agencies, and (2) an increase of \$125,000 for special projects.

About 36% of the recommended 1959 budget for the Executive Office is for the Bureau of the Budget, which is the staff arm of the President responsible for working on governmentwide problems such as organization, accounting, statistics, and legislative reference, as well as for preparation and review of the budget. The White House staff and various special projects account for 30%, and the Office of Defense Mobilization for 20%.

The Bureau assists the President in the discharge of his budgetary, management, and other executive responsibilities.

1. *Office of accounting.*—Direction is given to programs for improving accounting and financial management in the executive agencies, in collaboration with the General Accounting Office and the Treasury Department.

2. *Office of budget review.*—Budget instructions and procedures are developed, review of agency estimates is coordinated, and the budget document is prepared.

3. *Office of legislative reference.*—Proposed legislation and agency reports on pending legislation, enrolled bills, and proposed Executive orders and proclamations are reviewed for the President.

4. *Office of management and organization.*—Programs and plans are developed for improved Government organization and procedures, and guidance is provided in the work of the Bureau to improve agency management and operations.

5. *Office of statistical standards.*—Proposed agency reporting plans and forms are reviewed, and the Government's statistical activities, coverage, and methods are coordinated and improved.

6. *Program divisions.*—Agency programs, budget requests, and management activities are examined, appropriations are apportioned, proposed changes in agency functions are studied, and agencies are assisted in the improvement of their administration. Responsibility for this work with respect to particular agencies is divided among five divisions: (a) commerce and finance, (b) international, (c) labor and welfare, (d) military, and (e) resources and civil works.

1. *Policy coordination.*—The National Security Council advises the President regarding national security policies. Also, the Central Intelligence Agency is under the direction of the Council. Members of the Council are the President, the Vice President, the Secretary of State, the Secretary of Defense, the Director of the Office of Defense Mobilization, and, as directed by the President, other high officials. Staff services for the Council's policy coordination activities are financed from this appropriation.

2. *Operations coordination.*—The Operations Coordinating Board was established in 1953 to advise, when directed by the President, with the responsible executive agencies to assist in coordinating implementation of national security policies approved by him on the Council's recommendation. The Board is composed of the Under Secretary of State, the Deputy Secretary of Defense, the Director of Central Intelligence, the Director of the United States Information Agency, one or more representatives of the President, and, as necessary, officials of other agencies. In 1957 and prior years, staff services for the Board's operations coordination activities were financed

1. *Direction of defense mobilization program.*—The Office coordinates all mobilization activities of the executive branch of the Government, including production, procurement, manpower, health, stabilization, transportation, protection of facilities important to the national defense, telecommunications, and control of electromagnetic radiation. The Director advises the President concerning policies and programs respecting the coordination of military, industrial, and civilian mobilization, and

whenever he has reason to believe that imports threaten to impair the national security. The Director is responsible for policies and programs for the acquisition and storage of materials for the national stockpile. In 1959, the agency will begin financing the full-time staffs (consisting of 2 people each) of the Regional Mobilization Committees in 8 cities to provide for better coordination of the emergency planning by Federal agencies.

2. *Interdepartmental Radio Advisory Committee.*—The Committee assists the Director in the allocation of radio frequencies to Government stations and the coordination of governmentwide telecommunications policies.

GENERAL PROVISIONS

DEPARTMENTS, AGENCIES, AND CORPORATIONS

SEC. 201. Unless otherwise specifically provided, the maximum amount allowable during the current fiscal year, in accordance with section 16 of the Act of August 2, 1946 (5 U. S. C. 78), for the purchase of any passenger motor vehicle (exclusive of buses and ambulances), is hereby fixed at \$1,500 except station wagons for which the maximum shall be \$1,950: *Provided, That such amounts may be exceeded by the net extra cost, not to exceed \$300, of any special features or equipment which, while affecting the operation of the vehicle as a passenger carrying vehicle, are required to render it suitable and safe for the carrying out of criminal law enforcement or police type activities by the Departments of the Treasury, Interior, and Justice, upon certification by the head of the agency concerned, with respect to each*

purchase requisition that such special features or equipment are essential for the proper performance of such activities.

SEC. 202. Unless otherwise specified and during the current fiscal year, no part of any appropriation contained in this or any other Act shall be used to pay the compensation of any officer or employee of the Government of the United States (including any agency the majority of the stock of which is owned by the Government of the United States) whose post of duty is in continental United States unless such person (1) is a citizen of the United States, (2) is a person in the service of the United States on the date of enactment of this Act who, being eligible for citizenship, had filed a declaration of intention to become a citizen of the United States prior to such date, (3) is a person who owes allegiance to the United States, or (4) is an alien from the Baltic countries lawfully admitted to the United States for permanent residence: *Provided, That for the purpose of this section, an affidavit signed by any such person shall be considered prima facie evidence that the requirements of this section with respect to his status have been complied with: Provided further, That any person making a false affidavit shall be guilty of a felony and, upon conviction, shall be fined not more than \$4,000 or imprisoned for not more than one year, or both: Provided further, That the above penal clause shall be in addition to, and not in substitution for, any other provisions of existing law: Provided further, That any payment made to any officer or employee contrary to the provisions of this section shall be recoverable in action by the Federal Government. This section shall not apply to citizens of the Republic of the Philippines or to nationals of those countries allied with the United States in the current defense effort, or to temporary employment of translators, or to temporary employment in the field service (not to exceed sixty days) as a result of emergencies.*

SEC. 203. Appropriations of the executive departments and independent establishments for the current fiscal year, available for expenses of travel or for the expenses of the activity concerned, are hereby made available for living quarters allowances in accordance with the Act of June 26, 1930 (5 U. S. C. 118a), and regulations prescribed thereunder, and cost-of-living allowances similar to those allowed under section 901 (2) of the Foreign Service Act of 1946, in accordance with and to the extent prescribed by regulations of the President, for all civilian officers and employees of the Government permanently stationed in foreign countries: *Provided, That the availability of appropriations made to the Department of State for carrying out the provisions of the Foreign Service Act of 1946 shall not be affected hereby.*

SEC. 204. No part of any appropriation for the current fiscal year contained in this or any other Act shall be paid to any person for the filling of any position for which he or she has been nominated after the Senate has voted not to approve the nomination of said person.

SEC. 205. No part of any appropriation contained in this or any other Act for the current fiscal year shall be used to pay in excess of \$4 per volume for the current and future volumes of the United States Code Annotated, and such volumes shall be purchased on condition and with the understanding that latest published cumulative annual pocket parts issued prior to the date of purchase shall be furnished free of charge, or in excess of \$4.25 per volume for the current or future volumes of the Lifetime Federal Digest.

SEC. 206. Funds made available by this or any other Act for administrative expenses in the current fiscal year of the corporations and agencies subject to the Government Corporation Control Act, as amended (31 U. S. C. 841), shall be available, in addition to objects for which such funds are otherwise available, for rent in the District of Columbia; services in accordance with section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); and the objects specified under this head, all the provisions of which shall be applicable to the expenditure of such funds unless otherwise specified in the Act by which they are made available: *Provided, That in the event any functions budgeted as administrative expenses are subsequently transferred to or paid from other funds, the limitations on administrative expenses shall be correspondingly reduced.*

SEC. 207. No part of any funds of or available to any wholly owned Government corporation shall be used for the purchase or construction, or in making loans for the purchase or construction of any office building, without specific authority in law therefor, primarily for occupancy by any department or agency of the United States Government or by any corporation owned by the United States Government.

SEC. 208. During the current fiscal year, the provisions of Bureau of the Budget Circular A-45, dated June 3, 1952, shall be controlling over the activities of all departments, agencies, and corporations of the Government: *Provided, That said circular may be amended or changed during such year by the Director of the Budget with the approval of the chairman of the Committee on Appropriations of the House of Representatives: Provided further, That the Bureau of*

DEPARTMENTS, AGENCIES, AND CORPORATIONS—Continued

SEC. 209. Pursuant to section 1415 of the Act of July 15, 1952 [66 Stat. 662] 31 U. S. C. 724), foreign credits (including currencies) owned to or owned by the United States may be used by Federal agencies for any purpose for which appropriations are made for the current fiscal year (including the carrying out of Acts requiring or authorizing the use of such credits) and for liquidation of obligations legally incurred against such credits prior to July 1, 1953, only when reimbursement therefor is made to the Treasury from applicable appropriations of the agency concerned: *Provided*, That such credits received as exchange allowances or proceeds of sales of personal property may be used in whole or part payment for acquisition of

【SEC. 210. Hereafter, any appropriation required to be apportioned pursuant to section 3679 of the Revised Statutes, as amended, may be apportioned on a basis indicating the need for a supplemental or deficiency estimate of appropriation to the extent necessary to permit payment of such pay increases as may be granted those employees (commonly known as wage-board employees) whose compensation is fixed and adjusted from time to time in accordance with prevailing rates (5 U. S. C. 1082 (7)).】 (*General Government Matters Appropriation Act, 1958.*)

FUNDS APPROPRIATED TO THE PRESIDENT

The 1959 budget includes \$3,949 million for several programs of the Government for which new obligational authority is granted directly to the President, who may designate officials or agencies to act for him in carrying out the activities involved. The amount for these various activities is \$1,143 million more than in 1958, primarily because of the increase recommended for the mutual security program. The 1959 request for this program is \$3,940 million, compared with a total availability in 1958 of \$3,528 million which includes authority to use \$764 million of unobligated prior year funds.

Military assistance and defense support.—Expenditures for military assistance to friendly nations abroad will not change significantly in 1959. It is expected that delivery of missiles will begin, while delivery of conventional weapons will start to decline. The request of \$865 million for defense support in 1959 is \$140 million more than the total availability in 1958; the increase is mainly for Far Eastern and Middle Eastern countries, which account for about 90% of the program.

Economic and technical development.—New obligational authority recommended for 1959 for international economic and technical development is \$350 million more than total availability in 1958. A large part of the increase is to provide the development loan fund with sufficient working capital to meet an anticipated sharp rise in loan commitments; \$625 million is requested for this purpose in 1959 compared with \$300 million appropriated for 1958, the year in which the fund started.

The budget also provides increases for technical cooperation (mainly for a larger United States contribution to the United Nations technical assistance program), for participation in worldwide malaria eradication, and for contingencies. Provision is also made for a number of other special activities, such as the United States contribution to the United Nations children's fund.

Foreign information and exchange.—New obligational authority of \$7.6 million is recommended for the President's special international program for 1959, compared with \$15.1 million for 1958. The program for 1959 includes (1) about 35 cultural presentation projects, such as

overseas tours of orchestras and theatrical, musical, dance, and sports groups; (2) participation in 18 trade fairs and exhibitions, including exhibits in Eastern Europe and adjacent areas.

Expansion of defense production.—No new obligational authority for 1959 is included in the budget for the expansion of defense production. Borrowing from the Treasury up to a limit of \$2.1 billion is authorized under present law. This program encourages the expansion of production capacity for materials needed for defense—mainly by means of loans, purchase contracts, and commitment contracts to purchase output if not sold by the producer in the open market. To provide authority for new activities that may be necessary in connection with the parts of the defense program which are being accelerated, extension of the Defense Production Act for 2 years beyond its present expiration date of June 30, 1958, is being requested.

Expenditures, chiefly for purchases of defense materials, are estimated to increase from \$130 million in 1957 to \$370 million in 1958, reflecting the softening of private markets for minerals and metals, which has caused producers to exercise their option under earlier contracts which committed the Government to purchase. Aluminum, copper, and titanium comprise the major portion of the materials delivered under such contracts. The budget contemplates a tapering off of such deliveries in 1959 as contracts expire. Budget expenditures in 1959 are therefore estimated to decrease by \$98 million to \$272 million.

The defense production expansion program is carried on in close coordination with the program of the General Services Administration for stockpiling strategic and critical materials.

Disaster relief.—The budget includes no request for new obligational authority for 1959 to provide assistance to State and local governments in the relief of damage and suffering caused by natural disasters. In 1958, \$25 million was appropriated for this purpose. It is estimated that \$18.1 million will be available for obligation in 1959 from appropriations enacted in prior years.

Unobligated balance brought forward....	-22,774,372	-13,122,907	-18,122,000
Unobligated balance carried forward....	13,122,907	18,122,000	
Appropriation (new obligational authority).....	6,000,000	25,000,000	

This program provides for a coordinated effort by the Federal Government to assist States and their political subdivisions affected by major disaster when they are unable to cope with the situation physically or financially.

Responsibility for the administration of this program is delegated to the Federal Civil Defense Administration. Disaster relief operations of the entire Federal Government are coordinated and funds are made available to affected areas and to reimburse Federal agencies for disaster operations. State and local civil defense organizations are active in disaster operations and receive valuable operational training as a result. Funds appropriated in 1958 are considered adequate for 1959 operations under this program.

Major disaster areas proclaimed by the President and allocation of funds made to States for 1957 are:

Under section 304 (b) of the Defense Production Act of 1950, designated agencies are authorized with Presidential approval to incur obligations of \$2.1 billion on a probable ultimate net cost basis for the purpose of making loans and procuring critical materials in furtherance of the defense effort. The obligations are financed by borrowings from the Treasury. The 1951 amendments to the act permit commitments in excess of \$2.1 billion so long as estimated probable ultimate net cost and outstanding working capital do not exceed this amount at any one time. Programs undertaken must be certified as essential to the national defense by the Office of Defense Mobilization. As of June 30, 1957, that Office had authorized programs having a gross value of \$8,297 million which required certification of borrowing authority to cover working capital requirements and the estimated net cost to the Government. Of the \$8.3 billion, gross transactions of \$2.2 billion remained to be completed, and \$0.5 billion remained to be placed under contract.

CERTIFICATIONS AS OF JUNE 30, 1957

[In thousands]

General Services Administration.....	\$1,265,633
Treasury Department.....	230,615
Department of Agriculture.....	64,735
Department of the Interior.....	33,048
Export-Import Bank of Washington.....	35,244
Total certifications.....	1,629,275
Unused authorizations.....	470,725
Total.....	2,100,000

Of the \$1,629.3 million certified, \$962.7 million is required to cover the estimated probable ultimate net cost and \$666.6 million is required for working capital to cover materials inventories, loans and advances to contractors. The working capital estimate has assumed a resale of materials to the stockpile. However, further sales to the stockpile are temporarily deferred pending receipt and

EXPANSION OF DEFENSE PRODUCTION—Con.

REVOLVING FUND, DEFENSE PRODUCTION ACT—Continued

analysis of the report of the Office of Defense Mobilization committee recently established to review the Government's stockpiling. Should it be indicated that sales to the stockpile should be revised downward, there is a possibility that an increase in the \$2.1 billion borrowing authority will be necessary.

Extension of the Defense Production Act is being requested for 2 years beyond its present expiration date of June 30, 1958. While no specific new programs are proposed at this time, certain changes in military programs may result in urgent needs for research, development, and expansion of productive capacity requiring assistance under the act.

General Services Administration.—Borrowing authority of \$1,265,633,000 has been certified as of June 30, 1957, to finance the expansion of productive capacity for strategic metals and minerals and machine tools. This amount includes \$863,259,000 for probable ultimate net cost of specific programs of which \$678,276,000 is for metals and minerals programs, \$69,900,000 for machine tool programs, and \$115,083,000 for Treasury interest, custodial, and administrative expenses. It also includes \$402,374,000 of working capital required for carrying inventories for which no sale is now foreseen.

The bulk of the Defense Production Act expansion programs have been contracted for and physical expansion completed. The plants are in production and the contracts are now in the administration phase with the major problems being receipt, custody, and eventual disposition of the materials. Future deliveries of materials under the contracts are expected to be substantial but will depend upon economic and business conditions. For instance the decline in price of copper is resulting in the exercise of options granted under floor price contracts. Also the easing in industrial demand for nickel and aluminum is resulting in substantial deliveries to the Government. The exercise of option rights by contractors is being carefully examined with a view to reducing deliveries to the Government as far as possible within the terms of the contracts whenever procurement priority levels have been attained.

A summary of transactions involving strategic minerals and metals (including work-in-process inventory) under this fund follows:

(In millions)

	1957 actual	1958 estimate	1959 estimate
Inventory—July 1.....	\$567.1	\$679.6	\$1,032.2
Deliveries during year.....	216.6	417.4	281.4
Total available for sale.....	783.7	1,097.0	1,313.6
Sales during year:			
To national stockpile.....	51.8	7.4	-----
To industry.....	50.2	65.5	34.4
Total sales.....	102.0	72.9	34.4
Losses on sales (profits).....	2.1	(8.1)	(6.9)
Inventory—June 30.....	679.6	1,032.2	1,286.1
Total dispositions and June 30 inventory.....	783.7	1,097.0	1,313.6

Major Defense Production Act programs administered by General Services Administration are as follows:

1. Domestic purchase programs designed to increase domestic production by fixed incentive prices available to all domestic producers of materials such as beryl, mica, mercury, and manganese.

2. Basic expansion programs to increase mining or refining capacity of such materials as aluminum, copper,

nickel, and fluorspar by offering guaranteed markets under specific contracts and for specific projects.

3. Research and pilot plant programs to develop new processes for economic recovery of low grade domestic ores and for developing new processes for producing new materials, such as titanium or synthetic mica.

4. A program for the production of nickel from the Government-owned Nicaro nickel plant.

5. A program for expansion of machine tool producing capacity by (a) installing under lease Government-owned machine tools in the plants of private producers, (b) placing pool order contracts for general purpose machine tools to be activated in the event of a future emergency.

6. A program to "round out" capacity to produce steam turbines and turbine gears by installing machinery and equipment in plants of private contractors.

The expansion of the Government-owned nickel plant in Cuba, which was authorized by the Office of Defense Mobilization and cleared with the Joint Committee on Defense Production, has been completed at a cost of less than \$37 million. After a break-in period, it is expected that the enlarged plant will produce nickel at a rate of 50 million pounds per year.

In addition, the General Services Administration certifies defense loans to the Treasury Department or the Export-Import Bank of Washington and makes recommendations with respect to tax amortization certificates. The Administration also has been delegated responsibility for the basic materials development program previously carried on by Foreign Operations Administration and its successor, the International Cooperation Administration in certain countries of Europe, Near East, and Africa.

A total of \$7,315.8 million in gross value of contracts has been entered into by General Services Administration under Defense Production Act authority. Of this amount a total of \$5,314.4 million has been completed as measured by procurement, guaranteed production, completion of facilities, completed research, etc. The balance of \$2,001.4 million will mature as follows:

(In millions)

1958.....	\$534.2
1959.....	413.3
1960.....	371.5
After 1960.....	682.4

A large part of the maturing contracts is represented by contingent Government commitments for aluminum, copper, nickel, titanium, and manganese. The extent to which options will be exercised will depend upon industrial demand for aluminum, nickel, and titanium and upon the price fluctuations in copper and manganese.

Cumulative loss from resale of commodities and from expenses incurred amounted to \$175.9 million as of June 30, 1957. The probable ultimate net cost of activities completed, including the losses on valuation or expected resale of commodities in inventory, was estimated at \$609.7 million as of June 30, 1957.

Department of Agriculture.—The purchase, management, and resale of agricultural commodities, except forest products, are carried out by the Commodity Credit Corporation, which is reimbursed from this fund for the net costs involved. The Secretary of Agriculture has been allocated borrowing authority for this purpose.

During 1957, the Corporation continued the management of inventories of castor beans and American-Egyptian cotton acquired under programs initiated in prior years. The castor oil and nearly all of the American-Egyptian cotton inventories had been disposed of by June 30, 1957. The remainder of the cotton will be sold during

1958. However, it is contemplated that a small amount of castor beans will remain in the inventory of the Commodity Credit Corporation beyond June 30, 1959.

Net realized losses on purchase and resale operations amounted to \$4,454,291 during 1957 and is estimated at \$555,762 and \$67,335 during 1958 and 1959, respectively. During 1958 the Secretary of Agriculture will reimburse the Commodity Credit Corporation in the amount of \$11,697,700 for the net costs of the 1953 castor bean and oil and American-Egyptian cotton programs. These payments constitute the net budgetary expenditures under this fund.

In addition to purchase and resale operations, the Secretary of Agriculture may recommend to the Office of Defense Mobilization the certification of certain loans for increasing plant capacity to process or store agricultural commodities. No loans were certified during 1957 and none are expected to be certified during 1958 and 1959.

Department of the Interior.—Operations within the Department of the Interior with regard to the expansion of defense production have been limited to the encouragement of exploration for strategic and critical minerals and metals. As of June 30, 1957, the Office of Defense Mobilization had extended to the Defense Minerals Exploration Administration borrowing authority in the amount of \$34,000,000. In August 1957 the amount was increased to \$38,800,000. From the beginning of the program through June 30, 1957, Defense Minerals Exploration Administration had entered into 1,055 contracts in which the Government's share of estimated costs amounted to \$31,304,152 as against total estimated costs of \$50,893,072.

Defense Minerals Exploration Administration had certified, as of the end of June 1957, 304 discoveries on projects involving contract amounts of \$18,243,151, of which the Government's share is \$11,515,012. As of June 30, 1957, a total of \$9,212,413 of Government funds had been spent on these certified projects. If production takes place on these projects within a 10-year period, some part, at least, of the Government funds advanced will be repaid under a royalty arrangement.

Treasury Department.—The function of making and administering loans to domestic private business enterprises under the authority of section 302 of the Defense Production Act of 1950, as amended, was assigned to the Secretary of the Treasury by Executive Order 10489, dated September 26, 1953. Applications for loans are considered upon certification for essentiality by the Office of Defense Mobilization or General Services Administration. Net loan certifications were \$204,560,068 on June 30, 1957, against which actual borrowings from the Treasury amounted to \$167,890,000.

There were no new loans authorized under this authority in 1957 and none are anticipated for 1958 or 1959. Loans outstanding on June 30, 1957, totaled \$180,233,536. In addition, there was \$24,326,532 in undisbursed commitments, of which \$18,326,532 represented commitments to participate in loans made by banks wherein disbursement of Treasury funds is deferred.

Loans and commitments outstanding are disposed of to private financial institutions and investors whenever possible.

Export-Import Bank of Washington.—Pursuant to section 311 of Executive Order No. 10480 of August 15, 1953, which superseded Order No. 10161, the Export-Import Bank, with funds provided under section 304 of the Defense Production Act of 1950, as amended, is responsible for making and administering all loans under

section 302 of the act, upon receipt of certificates of essentiality issued by the Director of Defense Mobilization or the General Services Administrator, where the expansion, development, or production so financed is carried on in foreign countries.

No certifications were received and no new loans were authorized by the bank during 1957. It is contemplated that there will be no additional certifications to the Export-Import Bank in connection with these operations.

Loans outstanding on June 30, 1957, totaled \$36.5 million, and are expected to be \$27.4 million by June 30, 1959. All undisbursed loan obligations were liquidated by June 30, 1957.

Relation of costs to obligations.—The relationship is derived by year-end balances and applicable adjustments as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate

[MUTUAL SECURITY]

The mutual security program promotes the foreign policy, security, and general welfare of the United States by assisting other free world nations to maintain and

increase their military and economic strength. It is conducted under the Mutual Security Act of 1954, as amended. Responsibility for execution of the program has been delegated by the President to the Secretaries of State and Defense. The Secretary of State has been delegated responsibility for general coordination.

The mutual security program takes four principal forms. *Military assistance* includes military end items, supplies, training, construction, and research. *Defense support* is essential economic assistance such as food, raw materials and machinery, to countries supporting military forces beyond their unaided capabilities. *The development loan fund* is designed to stimulate economic development by providing capital on a loan basis. Unlike the military assistance and defense support programs, the fund is not programed on a country basis for presentation to Congress; in contrast, projects submitted by eligible countries are reviewed and approved on their economic and financial merits within the funds made available by Congress. *Economic, technical, and other assistance* includes special assistance, contingency funds, technical cooperation, and contributions to the United Nations and other international agencies for voluntary multilateral programs.

From 1957 and 1958 appropriations, about \$456 million is being used to pay for surplus agricultural commodities which are sold in the recipient countries. Local currency proceeds from these and other defense support commodities are used for local requirements of the mutual security program such as troop support and economic development.

Substantial unexpended balances are required because of the time necessary for the procurement and delivery of equipment and for implementing complex economic projects. A steady decline in unexpended balances for military assistance over the past several years has been partially offset by an increase for other portions of the program. The development loan fund, in particular, because it is designed to finance long-range development, will tend to accumulate unexpended balances.

Although the 1958 appropriation represents a substantial decrease from the 1957 level, the unobligated balances of approximately \$761 million continued available in 1958 resulted in a much smaller decrease in the actual program obligation level.

Appropriations required in 1959 to finance the mutual security program under existing and proposed legislation appear later in this chapter.

Current authorizations:

[For expenses necessary to enable the President to carry out the provisions of the Mutual Security Act of 1954, as amended, to remain available until June 30, 1958 unless otherwise specified herein, as follows:]

MILITARY ASSISTANCE

[Military assistance: For assistance authorized by section 103 (a) to carry out the purposes of title I, chapter 1 (including administrative expenses as authorized by section 103 (b), which shall not exceed \$23,500,000 for the fiscal year 1958), \$1,340,000,000, to remain available until December 31, 1958; and in addition not to exceed \$538,800,000 of unobligated and unreserved balances of funds heretofore made available for purposes of section 103 (a) and section 104 are continued available until December 31, 1958 for the purposes of section 103 (a);] (*Mutual Security Appropriation Act, 1958.*)

Appropriated 1958, \$1,340,000,000

Appropriation (new obligational authority).....	2,017,500,000	1,340,000,000	-----

The military assistance program is designed to increase the mutual security of the free world by contributing to the development, maintenance, and training of modern military forces, which deter external aggression, lessen the chances of internal subversion, and protect valuable overseas bases. Forty-five foreign countries are receiving grant aid under the military assistance program, and many other countries are eligible to buy modern military equipment on liberal credit terms. Many of these countries have joined with the United States in regional and bilateral defense arrangements, such as the North Atlantic Treaty Organization and the Southeast Asia Treaty Organization, which are basic to this Nation's security.

Foreign forces supported by the program are numerically much greater than the United States Armed Forces, and provide striking power, depth in reserves, and flexibility which this Nation's forces alone cannot provide. Because it is imperative that these forces keep pace with rapid changes in weapon technology, missiles and other advanced weapons are being increasingly emphasized,

commensurate with their supply availability, allies' technical capabilities, and the nature of the threat.

Functionally, the military assistance program consists of: (1) military materiel and supplies for the buildup, maintenance, and modernization of allied forces; (2) training and advisory services to allied military personnel; (3) the U. S. contribution to jointly financed international military facilities and activities, especially in the NATO area; (4) assistance to allies in the research and development of advanced weapons; and (5) operating and administrative expenses.

Grant aid operations—1. *Common item orders*.—A large percentage of materiel is procured through orders placed in the military services for common procurement with similar items in the service programs. Such orders constitute a reservation of funds, from which the service is entitled to reimbursement upon delivery of the items ordered. The obligations estimated for 1959 represent only reimbursements to the military services for deliveries made and not the funds reserved under this program. A schedule relating "reservations" to the appropriations of the military services appears at the end of the Department of Defense—Military Functions chapter.

2. *Other materiel programs*—(a) *Offshore procurement*.—Through 1957, the United States placed orders abroad for approximately \$2.8 billion of military assistance requirements. This program assists in building a defense production base abroad.

(b) *Navy shipbuilding in the United States*.—Due to special restrictions applying to Navy ship construction, this element of the overall materiel program is accounted for separately. The program has decreased from the 1957 level because the buildup phase is nearing completion and because of a proposed shift in emphasis from new construction to ship loans.

(c) *Direct procurement in the United States*.—Included are supplies and military hardware of a type not used by the U. S. military services. The reduction from the 1957 level is due to a change in accounting definitions; in 1957, civilian-type supplies such as fuel, uniform material, and medicines were included in this activity, but beginning in 1958, these items are included in common item orders.

3. *Supply operations*.—Included are packing, handling, and transportation costs, and the cost of repairing and rehabilitating excess equipment either ordered from the military services or scheduled for redistribution from one country to another.

4. *Training*.—Only by modern, efficient, and intensive training can the materiel supplied under military assistance be effectively utilized. With the increasing utilization of complex electronics and missiles in the program, requirements for additional and specialized training increase concurrently.

5. *Administration*.—The administrative expenses of the military assistance advisory groups and the departmental costs of the program are included.

6. *Contributions to international military headquarters and agencies*.—Included are the assessments levied against the United States in accordance with cost-sharing agreements for support of NATO and SEATO.

7. *Contributions to construction of facilities in other countries*.—Construction of military and logistical facilities under the jointly financed NATO infrastructure program and military construction in certain non-NATO countries are continuing requirements.

8. *Research and development*.—This program is intended to accelerate research and development by our allies of

advanced weapons and to combine U. S. weapon technology with their productive capability.

9. *Other activities.*—These include support for UN forces in Korea and nutrition surveys.

Reimbursable military sales operations.—Under section 103 (c) of the Mutual Security Act, repayment made within 3 years for military assistance sales, not to exceed \$175 million, can be credited to current appropriations and shall be available until expended. The common item order reservation procedures apply to these transactions.

Offshore procurement.—Foreign currencies of approximately 13 countries are used for military materiel and services procured abroad for the mutual defense of the United States and friendly nations. The currencies available under sections 502 and 402 of the Mutual Security Act are transferred from the consolidated foreign currency schedule under "Economic, technical, and other assistance" below. Other currencies, generated by the sale of agricultural surplus commodities under the Agricultural Trade Development and Assistance Act of 1954, are allocated to the Department of Defense for this activity.

Defense support is economic assistance designed primarily to enable a country to raise and support military forces for the common defense without reducing already low living standards. In general, the level of defense support is intended to be sufficient to prevent economic retrogression, political instability, deterioration of morale or other conditions which might adversely affect the military effort.

Defense support contributes to the current requirements of food, fertilizers, industrial raw materials, fuels, and essential machinery of countries supporting military forces beyond their economic capabilities. Defense support also contributes to internal price stability and the foreign exchange position of the recipients. Commodities are normally sold in commercial markets for local currency which in turn is utilized for military budget support and for essential economic projects. Approximately one-fourth of the defense support program has been surplus agricultural commodities.

(a) *Europe and Africa.*—Defense support is provided to Spain, Morocco, Libya, and Ethiopia, all of which have granted the United States base rights of strategic importance.

(b) *Near East and South Asia.*—The continuation of tensions, the further evidence of Soviet imperialistic designs, and the strategic and economic importance of the area provide a strong case for effective defensive forces and economic stability. Greece, Turkey, Iran, and Pakistan, all involved in regional defense pacts with the United States, are receiving assistance in 1958.

(c) *Far East.*—A large proportion of defense support is allocated to seven Far East countries—Korea, Taiwan, Vietnam, Cambodia, Laos, Thailand, and the Philippines—which maintain military establishments beyond their own unaided capabilities. These forces provide an important deterrent to Communist aggression around the Pacific rim.

Unobligated balance no longer available.....	17,843,750		
Appropriation (new obligational authority).....	639,370,000	435,183,000	

1. *Development assistance.*—This assistance is designed to promote economic development and to contribute to economic and political stability in countries not receiving military assistance. Beginning in 1958, requirements of this type are either classified as "3. Special assistance" or covered under the development loan fund, with one exception: development assistance programed in 1957, but not implemented, has been extended into 1958. No funds are being requested in 1959.

2. *Technical cooperation.*—This program provides for the interchange of knowledge, experience, techniques, and skills with the people of the less-developed areas of the world to help them carry out their economic development and strengthen their freedom. Teaching, training, and exchange of information are carried out in such fields as industry, mining, agriculture, labor, education, health, sanitation, public administration, transportation, and community development. Supplies and equipment are provided only to the extent necessary to support effective teaching and demonstration. Aid is provided bilaterally, in programs administered by the International Cooperation Administration, and multilaterally, by contribution to the technical assistance program of the Organization of American States and to the United Nations expanded technical assistance program. The bilateral programs are coordinated with the multilateral to achieve balanced country and regional programs and prevent duplication of effort.

3. *Special assistance.*—This is a new category of assistance created by the Mutual Security Act of 1957. It is intended to provide (1) assistance which may not meet the criteria of defense support or the development loan fund; and (2) a reserve fund for economic, political, and military contingencies. Assistance of the first type mentioned is programed for specific countries such as Tunisia, Jordan, Israel, Bolivia, and Guatemala or for specific activities such as malaria eradication and Hungarian refugees.

4. *Other programs.*—Several miscellaneous activities are authorized by the Mutual Security Act. Contributions for refugee and migrant programs are made to the Intergovernmental Committee for European Migration, United Nations Refugee Fund, and the United Nations Work and Relief Agency. An escapee program, conducted under U. S. auspices, provides care and maintenance for refugees

from Iron Curtain countries. The United States contributions to the United Nations Children's Fund are included. Ocean freight is paid for supplies shipped abroad by nonprofit relief agencies. Administrative expenses of nonmilitary mutual security programs and for control of East-West trade are provided. The atoms-for-peace program, undertaken in 1957, is continued. Funds appropriated in 1956 are still available for Asian regional economic development projects.

Loans.—The International Cooperation Administration and predecessor agencies have been authorized, by several laws, to make loans to friendly nations. Those made from the development loan fund and under authority of the Agricultural Trade and Development Assistance Act are shown in schedules elsewhere in the budget.

The following table reflects the loans made from current mutual security obligational authority and related foreign currencies in millions of dollars and dollar equivalents:

	1957 actual	1958 estimate	1959 estimate
Loan obligations incurred:			
United States currency	234	103	---
Foreign currency	89	---	---
Loan disbursements made:			
United States currency	51	220	125
Foreign currency	43	80	30
Loan principal repayments (U. S. currency)	16	24	34
Interest collections:			
United States currency	41	42	41
Foreign currency	---	---	6

These loans are usually in the form of a line of credit, extended as a part of the aid program for a country. Procurement authorizations or project agreements constitute the obligations; payments against those obligations are considered to be loan disbursements under the agreements.

The status of the loans at the end of the respective fiscal years is:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Loans outstanding	1,872	1,950	2,226	2,347
Interest past due	1	2	4	7
Undisbursed loan obligations	214	443	246	91
Unobligated authority	50	50	---	---

Authorization to expend foreign currency receipts (adjusted)	212,475,811	540,893,483	470,867,500

Foreign currencies of approximately 44 countries are available for economic, technical, and other assistance under the acts as cited below.

Sec. 502, Mutual Security Act of 1954.—Mutual security appropriations were made available by Congress in 1954 to purchase surplus agricultural commodities in this country for sale abroad to friendly countries for their currencies. The foreign currencies received from the sale of these surplus agricultural commodities are used for mutual security program objectives in accordance with agreements reached with each government.

Sec. 402, Mutual Security Act of 1954.—Mutual security appropriations have been made available by Congress since 1955 to purchase surplus agricultural commodities in this country for sale abroad to friendly countries for their currencies. The foreign currencies received from the sale of these commodities to friendly countries can be used only for the purposes for which the dollar funds were originally appropriated.

Sec. 505 (a), Mutual Security Act of 1954.—Under the terms of this section, mutual security may be furnished on a reimbursable basis, repayable with foreign currency. Reimbursements by Burma have been utilized for the benefit of Pakistan.

Agricultural Trade Development and Assistance Act of 1954.—Foreign currencies, generated by the sale of agricultural surplus commodities under this act, are allocated to the International Cooperation Administration to finance the purchase abroad of goods and services for other friendly countries, to promote balanced economic development and trade among nations and to promote multilateral trade and economic development.

[Funds appropriated under each paragraph of this Act (other than appropriations under the head of military assistance), including specified amounts of unobligated balances, and amounts certified pursuant to section 1311 of the Supplemental Appropriation Act, 1955, as having been obligated against appropriations heretofore made for the same general purpose as such paragraph, which amounts are hereby continued available (except as may otherwise be specified in this Act) for the same period as the respective appropriations in this Act for the same general purpose, may be consolidated in one account for each paragraph.]

[GENERAL PROVISIONS]

[SEC. 102. No part of any appropriation contained in this Act shall be used for publicity or propaganda purposes within the United States not heretofore authorized by the Congress.]

[SEC. 103. Payments made from funds appropriated herein for engineering fees and services to any individual engineering firm on any one project in excess of \$25,000 shall be reported to the Committees on Appropriations of the Senate and House of Representatives at least twice annually.]

[SEC. 104. Pursuant to section 1415 of the Supplemental Appropriation Act, 1953, and in addition to other amounts made available pursuant to said section, not to exceed the equivalent of \$300,000 of foreign currencies or credits owed to or owned by the United States shall remain available until expended, without reimbursement to the Treasury, for liquidation of obligations incurred against such currencies or credits prior to July 1, 1953, pursuant to authority contained in the Mutual Security Act of 1951, as amended, and Acts for which funds were authorized by that Act and, hereafter, foreign currencies generated under the provisions of this Act shall be utilized only for the purposes for which the funds providing the commodities which generated the currency were appropriated.]

[SEC. 105. None of the funds provided by this Act nor any of the counterpart funds generated as a result of assistance under this or any other Act shall be used to make payments on account of the principal or interest on any debt of any foreign government or on any loan made to such government by any other foreign government; nor shall any of these funds be expended for any purpose for which funds have been withdrawn by any recipient country to make payment on such debts: *Provided*, That to the extent that funds have been borrowed by any foreign government in order to make a deposit of counterpart and such deposit is in excess of the amount that would be required to be deposited pursuant to the formula prescribed by section 142 (b) of the Mutual Security Act of 1954, as amended, such counterpart may be used in such country for any agreed purpose consistent with the provisions of such Act.]

[SEC. 106. Except for the appropriations entitled “Special assistance, general authorization” and “Development loan fund”, not more than 20 per centum of any appropriation item made available by this Act shall be obligated and/or reserved during the last month of availability.]

【SEC. 107. None of the funds made available by this Act shall be used to carry out the purposes of the first sentence of section 400 (c) of the Mutual Security Act of 1954, as amended.】

【SEC. 108. The appropriations and authority with respect thereto in this Act shall be available from July 1, 1957, for the purposes provided in such appropriations and authority. All obligations incurred during the period between June 30, 1957, and the date of enactment of this Act in anticipation of such appropriations and authority are hereby ratified and confirmed if in accordance with the terms hereof.】

【SEC. 109. The Congress hereby reiterates its opposition to the seating in the United Nations of the Communist China regime as the representative of China, and it is hereby declared to be the continuing sense of the Congress that the Communist regime in China has not demonstrated its willingness to fulfill the obligations contained in the Charter of the United Nations and should not be recognized to represent China in the United Nations. In the event of the seating of representatives of the Chinese Communist regime in the Security Council or General Assembly of the United Nations,

the President is requested to inform the Congress insofar as is compatible with the requirements of national security, of the implications of this action upon the foreign policy of the United States and our foreign relationships, including that created by membership in the United Nations, together with any recommendations which he may have with respect to the matter.】 (*Mutual Security Appropriation Act, 1958.*)

Beginning in 1958, the Mutual Security Act authorized a development loan fund to make loans, credits, or guaranties to nations, organizations, persons, or other entities to encourage the economic development of friendly nations. The fund is to be administered so as to support and encourage private investment and enterprise and is not to compete with private investment capital or the activities of the Export-Import Bank and the International Bank for Reconstruction and Development. Before making any loan, the management of the fund considers the availability of financing from other free world sources and ascertains the soundness and feasibility of the activity to be financed.

The basic financial terms and conditions for the operation of the fund are determined by a loan committee consisting of the Deputy Under Secretary of State for Economic Affairs, acting as chairman, the Director of the International Cooperation Administration, and the Presi-

dent of the Export-Import Bank. The fund is administered by a manager appointed by the President.

Budget program.—Loan commitments for development purposes will begin in 1958, but guaranties and deferred participation loans are not expected to be undertaken until 1959. Obligations by the fund will increase in 1959 to \$500 million, most of which will be funded from 1959 appropriations proposed for later transmission.

Financing.—An appropriation of \$300 million was provided in 1958. The request for appropriations for 1959 is shown under "Proposed for later transmission." Repayments of interest and principal may be either in dollars or foreign currencies.

Operating results.—Although the revenue of the fund will be in both dollars and foreign currencies it is anticipated that the major portion will be in foreign currencies. The fund presently bears no administrative expenses and no allowance has been established for losses.

In order to encourage American industrial investment abroad, the Mutual Security Act, as amended, authorizes the issuance of \$500 million of guaranties against non-commercial risks. These risks are (1) inconvertibility of local currency receipts from investment, (2) loss of investment resulting from expropriation or confiscation, and (3) loss from war damage. The insurance, which may have a maximum term of 20 years, is available in any country with which the United States has agreed to institute the guaranty program. Thirty-six countries (plus their overseas dependencies) now participate. War damage coverage authorized in 1956 is now available for new investments in four countries which have signed the agreement. Extensions of existing agreements with a number of interested countries to include this coverage are being negotiated.

Budget program.—Total guaranties for 1959 are estimated at \$120 million, but since the program is on a fractional reserve basis, total obligations for 1959 are estimated at \$27.6 million.

Financing.—Congress provided \$37.5 million of public debt authority in 1957. An additional \$2.5 million of such authority was restored by the sale of foreign currencies generated under the informational media guaranty program.

Operating results.—The fund bears no expenses. Administrative expenses are paid from mutual security, economic, technical and other assistance funds allocated to the International Cooperation Administration. No guaranties have had to be fulfilled. Fees collected through June 30, 1957, are \$2 million and are carried forward as retained earnings.

Proposed for later transmission:**MILITARY ASSISTANCE****Program and Financing**

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
Military assistance (total obligations).....	-----	-----	\$750,000,000
Financing:			
Unobligated and unreserved balance transferred from "Military assistance" (see above).....	-----	-----	—25,000,000
Balance carried forward: Reserved (69 Stat. 438).....	-----	-----	1,075,000,000
Proposed supplemental appropriation.....	-----	-----	1,800,000,000

Under existing and proposed legislation, 1959.—Appropriations of \$1,800 million are anticipated in 1959 to finance military assistance programs already authorized or to be authorized under legislation to be proposed.

DEFENSE SUPPORT**Program and Financing**

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
Defense support (total obligations).....	-----	-----	\$865,000,000
Financing:			
Proposed supplemental appropriation.....	-----	-----	865,000,000

Under proposed legislation, 1959.—Appropriations of \$865 million are anticipated in 1959 to finance defense support programs under legislation to be proposed.

ECONOMIC, TECHNICAL, AND OTHER ASSISTANCE**Program and Financing**

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
Economic, technical, and other assistance (total obligations).....	-----	-----	\$653,928,000
Financing:			
Unobligated balance transferred from "Economic, technical, and other assistance" (see above).....	-----	-----	—3,928,000
Proposed supplemental appropriation.....	-----	-----	650,000,000

Under existing and proposed legislation, 1959.—Appropriations of \$650 million are anticipated in 1959 to finance economic, technical, and other assistance programs already authorized or under legislation to be proposed. In addition, it will be requested that 1958 unobligated balances, estimated at \$3,928,000, be continued available in 1959.

DEVELOPMENT LOAN FUND**Program and Financing**

	APPROPRIATED FUNDS, 1959 estimate	Foreign currencies (in dollar equivalents), 1959 estimate	Total, 1959 estimate
Program by activities:			
Operations (total obligations).....	\$400,000,000	-----	\$400,000,000
Financing:			
Amounts becoming available:			
Proposed supplemental appropriation.....	625,000,000	-----	625,000,000
Interest on loans.....	130,000	\$1,170,000	1,300,000
Fees for guaranties issued.....	500,000	-----	500,000
Total amounts becoming available.....	625,630,000	1,170,000	626,800,000
Unobligated balance carried forward.....	—225,630,000	—1,170,000	—226,800,000
Financing applied to program.....	400,000,000	-----	400,000,000

Under existing legislation, 1959.—Additional supplemental appropriations of \$625 million are anticipated in 1959 to finance the development loan fund. It is estimated that \$100 million of unobligated balances will also be available to the fund in 1959.

PRESIDENT'S SPECIAL INTERNATIONAL PROGRAM**Current authorizations:****PRESIDENT'S SPECIAL INTERNATIONAL PROGRAM**

For expenses necessary to enable the President to carry out the provisions of the "International Cultural Exchange and Trade Fair Participation Act of 1956", [\$12,400,000, of which \$6,500,000 shall be available for the Universal and International Exhibition of Brussels, 1958] including uniforms or allowances therefor, as authorized by law (5 U. S. C. 2131), \$7,600,000, to remain available until expended: *Provided*, That not to exceed a total of [\$25,000] \$65,000 may be expended for representation.

[For an additional amount for the "President's special international program", including uniforms or allowances therefor, as authorized by law (5 U. S. C. 2131), \$2,745,000, to remain available until expended: *Provided*, That the amount made available under this head in the Departments of State and Justice, the Judiciary, and Related Agencies Appropriation Act, 1958, for United States

participation in the Universal and International Exhibition of Brussels, 1958, is increased from "\$6,500,000" to "\$7,045,000".] (70 Stat. 778; Departments of State and Justice, the Judiciary, and Related Agencies Appropriation Act, 1958; Supplemental Appropriation Act, 1958.)

Appropriated 1958, \$15,145,000

The purpose of this fund is to strengthen the ties which unite us with other nations by demonstrating the cultural interests, developments, and achievements of the people of the United States, and the contributions being made by the United States economic and social system toward a peaceful and more fruitful life for its own people and other people throughout the world.

The Director of the United States Information Agency serves as coordinator of the following activities:

1. *Artistic and athletic presentations.*—The Department of State administers this program, which supports outstanding American cultural attractions appearing abroad. This support is necessary primarily because of high international transportation costs and presentation at places where commercial revenues are inadequate to cover operating expenses. Approved projects, with itineraries reaching all areas of the world, numbered 30 for 1957, and are estimated at 38 during 1958, and 35 during 1959.

2. *Trade fairs and exhibitions.*—The Department of Commerce administers this program, which finances United States exhibitions plus commercial and labor missions at important international trade fairs and similar exhibitions. Authorizations for 1957 and 1958 provided for United States participation in 24 and 17 trade fairs, respectively. A major exhibit in Moscow, U. S. S. R., for which a supplemental appropriation was made in 1958, will not be held until 1959. Funds requested in 1959 will provide for 18 trade fairs and exhibits.

3. *Universal and International Exhibition of Brussels.*—The Department of State, through a United States Commissioner General, is using these funds to finance a major United States exhibit and related activities in the Universal and International Exhibition of Brussels, 1958. This exhibition will be the first major world's fair since the New York World's Fair of 1939-40, and will include national exhibits from approximately 50 countries plus a number of international organizations. It is estimated that 35 million persons will visit the exhibition.

NOTE.—Balances brought forward at the beginning of 1957 are stated at agreement rates. They differ from balances shown in the 1958 budget, in which they were stated at market rates.

Title 1 of the Agricultural Trade Development and Assistance Act of 1954 authorizes the sale of up to \$4 billion of surplus agricultural commodities to friendly nations for their currencies, with reasonable precautions neither to displace United States sales for dollars nor to disrupt unduly world commodity prices. The Commodity Credit Corporation finances the costs. The foreign currencies generated by these sales may be used (a) to help develop new markets for United States agricultural commodities, (b) to purchase strategic and critical materials, (c) to procure military materiel and services for the common defense, (d) to purchase goods and services for other friendly nations, (e) to promote balanced economic development and trade among nations including loans to American and foreign business firms abroad, (f) to pay United States obligations abroad, (g) to make loans to promote multilateral trade and economic development abroad, (h) to finance international education exchange activities, (i) to translate and publish books and other publications abroad, and (j) to aid American-sponsored schools, libraries, and binational centers overseas.

Most of the currencies are used without charge to appropriations; some are sold to appropriations, and the proceeds of such sales go to the Commodity Credit Corporation. A lump-sum appropriation is recommended to reimburse the Commodity Credit Corporation for its losses which are not made up through such sales.

As of June 30, 1958, it is estimated agreements will have been signed calling for deposits of sales proceeds totaling \$2.7 billion. This will represent the market value of commodities and ocean transportation in which the Commodity Credit Corporation investment will be approximately \$4 billion. No estimates are included in this schedule for sales agreements that may be signed under the proposed legislation increasing title I authorizations by \$1.5 billion. Subsidiary schedules on currency uses are presented in the chapters of the Departments of State, Defense, and Agriculture, the General Services Administration, the United States Information Agency, and under "Military assistance," "Defense support," and "Economic, technical, and other assistance" in the funds appropriated to the President chapter.

INDEPENDENT OFFICES

The total recommended new obligational authority for the 47 independent agencies and 10 historical and memorial commissions for 1959 is \$8,211 million, a decrease of \$1,746 million from the estimated 1958 total. The decrease largely reflects the fact that an expansion in the lending authority of the Export-Import Bank of Washington requested for 1958 will not recur in 1959. The largest increases in new obligational authority from 1958 to 1959 are for the National Science Foundation and the Atomic Energy Commission.

Expenditures of independent agencies in 1959 are estimated to be \$8,272 million. This amount is a decrease of \$172 million from 1958.

Development and control of atomic energy.—New obligational authority recommended for the Atomic Energy Commission in 1959 is \$2,418 million, an increase of \$56 million over the amount provided for 1958. Expenditures are estimated to increase from \$2,300 million in 1958 to \$2,550 million in 1959.

The increases in both new obligational authority and expenditures are almost entirely for operating expenses. Larger quantities of raw uranium concentrates will be received as mills come into being under prior contracts. Substantial growth in production of advanced nuclear weapons is planned. The effort to develop reactors for civilian atomic power and for military propulsion will be expanded, accompanied by emphasis on such civilian power problems as reactor safety and waste disposal. Research in the physical and life sciences will go forward at the higher levels recently attained, with increases to explore more fully the problems inherent in radioactive hazards.

New obligational authority of \$120 million for construction in 1959, together with available balances from appropriations provided in previous years, will result in construction expenditures of \$240 million in 1959, \$20 million more than in 1958. Improvements are planned in production facilities for fissionable materials and weapons. Construction will also proceed on experimental reactors for power and propulsion, on supporting facilities for reactor development, and on four high energy particle accelerators.

International economic and technical development.—The Export-Import Bank anticipates that its commitments for development loans in 1959 will remain high, but that exporter loans and loans for the purchase of agricultural commodities will be somewhat lower than in 1958. This decline is expected to be accompanied by an increased willingness of private institutions to finance exports.

Gross budget expenditures of the Bank in 1959 for disbursements on loans, operating expenses, and interest on money borrowed from the Treasury are estimated to be \$562 million. After deducting estimated receipts from collections of interest and principal, net budget expenditures are \$57 million. This is less than the net expenditures of \$400 million estimated for 1958, primarily because a large credit against pledged securities is being disbursed to the United Kingdom in 1958.

The budget proposes legislation to authorize an increase

of \$2 billion in the Bank's lending authority in 1958. New lending authority was last provided in 1955.

Foreign information and exchange activities.—In 1959, the United States Information Agency will expand its operations in the Middle East and Africa, intensify efforts to reach the peoples of the Soviet Union and its satellites, and undertake some general strengthening of press, radio, motion picture, and information center activities. The Agency intends also to reach large new audiences by improving facilities of the Voice of America. Major relay base construction projects will be advanced toward completion and existing facilities modernized. Recommended new obligational authority for the Agency in 1959 is \$110 million, \$13.8 million more than for 1958.

Veterans' services and benefits (summary).—The recommended new obligational authority for the Veterans Administration for 1959 is \$4,968 million, approximately the same as for 1958. Of the total, 79.5% is for cash payments to veterans for compensation, pensions, and readjustment benefits; 16.4% is for hospital and medical services; and the remainder is for administration and miscellaneous programs.

Veterans' education, training, and other readjustment benefits.—Average enrollment of veterans of the Korean conflict in education and training is declining from a peak of 574,000 in 1957 to an estimated 460,000 in 1959. Training allowances will also be paid to a few veterans of World War II and to an estimated 7,000 war orphans. As the number of veterans receiving these benefits declines, expenditures are estimated to drop from \$729 million in 1958 to \$626 million in 1959.

Expenditures for other readjustment benefit programs are approximately at last year's level. The average number of disabled veterans receiving vocational rehabilitation is estimated to be 12,800 in 1959, compared with 16,635 in 1957. Veterans of World War II will no longer be eligible to apply for loan guaranties after July 25, 1958. Obligations and expenditures in 1959 for payment of claims and acquisition of properties on which loans have been defaulted are estimated to be \$82 million, most of which will later be recovered from sale of properties. The defaulted loans are a small proportion of the \$24 billion of guaranties estimated to be outstanding at the end of 1959.

Veterans' compensation and pensions.—The budget provides for compensation payments of \$2 billion for service-connected disability and death in an estimated average of 2,447,000 cases in 1959. While the average number of cases is declining slowly from a peak of 2,465,000 in 1956, the total amount of payments will increase because of legislation which raised benefit rates for living veterans by 10% to 30% effective October 1, 1957. The estimated net increase from 1958 to 1959 is \$30 million.

Pensions for non-service-connected disability and death are being paid in a steadily larger number of cases, primarily because of the advancing age of World War I veterans. The average caseload in 1959 is estimated to be 1,352,000, compared with 1,248,000 in 1958. Estimated payments of \$1.1 billion are \$96 million more than in 1958.

A supplemental appropriation of \$256 million is anticipated for 1958 to cover the estimated requirements for compensation and pensions in excess of the amounts appropriated.

Veterans' hospitals and medical care.—The new obligational authority of \$707 million requested for 1959 anticipates that inpatient care will be provided for a daily average of 110,900 patients in Veterans Administration hospitals. Approximately two-thirds of the patients are receiving care for conditions not connected with military service. The number of patients in tuberculosis hospitals has been declining as a result of the use of new drugs. In addition to its hospitals, the Veterans Administration operates domiciliary homes with an estimated 16,600 residents in 1959; it will also pay for an average of 3,000 patients per day in other hospitals and for half the cost of caring for 9,200 veterans in State soldiers' homes.

The budget also provides new obligational authority of \$75.8 million for 1959 for operation of outpatient clinics and for fees to doctors or dentists where clinics are not available. Both the medical and dental outpatient programs are declining but over 2 million visits are estimated for 1959.

New obligational authority of \$9 million is recommended for construction, modernization, or repair of facilities in 1959. Total obligations, however, are expected to be considerably higher because balances of appropriations from prior years will be used. Construction will be started on a 500-bed general hospital to replace an existing hospital, and funds are provided for planning replacement projects at three other hospitals.

Insurance and other veterans' services and administration.—Payment of insurance claims resulting from extra-hazardous conditions of military service, and of indemnities to survivors of persons who died in service or within 120 days after discharge during the period 1951 to 1956, are estimated to be \$52 million in 1959. Additional insurance operations for policies issued since 1951, which are conducted through revolving funds, are estimated to result in \$12 million net receipts. New obligational authority requested for general operating expenses of the Veterans Administration is \$12 million less than in 1958, continuing the reductions made in each of the past several years because of lower workloads and introduction of better methods.

Promotion of science, research, museums, and education.—New obligational authority of \$140 million is recommended for the National Science Foundation for 1959, \$90 million more than the 1958 funds appropriated which includes a proposed supplemental appropriation of \$10 million. An increase is also recommended for the Smithsonian Institution for its scientific research and museum activities.

Of the total 1959 request for the National Science Foundation, \$58 million, more than twice the comparable 1958 amount, is for grants to (1) support basic research projects in universities and other nonprofit institutions, (2) assist in the construction and maintenance of specialized research facilities in such fields as astronomy, biology, electronic computation and nuclear physics, and (3) improve the collection and dissemination of scientific data from both domestic and foreign sources. The balance, \$82 million, will provide for more than a fivefold expansion over 1958 in activities for education in the sciences. These funds are for grants to universities and other organizations to (1) develop improved curricula for

high school and college science and mathematics courses, (2) increase the number of supplementary training institutes for school and college faculties, (3) interest more young people of ability to undertake careers in science, and (4) provide more opportunities for highly qualified college graduates and research investigators to undertake further graduate study.

Conservation and development of land and water resources.—Construction of the United States share of the St. Lawrence Seaway will be substantially complete by the end of 1959 and will be financed during that year from borrowing authority provided in previous years. The Seaway is to be opened to 14-foot-draft traffic by July 1, 1958, and to 27-foot-draft traffic in the spring of 1959. Related hydroelectric power facilities are being constructed by the New York State Power Authority and the Ontario Hydroelectric Power Commission.

Legislation is proposed to permit the Tennessee Valley Authority to finance construction of new power facilities by the sale of revenue bonds, as required to meet increasing power needs of the area. Including this proposal, the new obligational authority of \$142 million recommended for the Tennessee Valley Authority for 1959 is \$129 million more than in 1958. The 1959 request also includes funds for construction underway and for research and development activities. Most of the operating expenses of the Authority are met from its revenues, principally from the sale of power and of fertilizer materials.

Promotion of aviation.—Supplemental appropriations recommended for the National Advisory Committee for Aeronautics in 1958 and new obligational authority recommended for 1959 will provide for an immediate expansion of research and development activities looking toward solutions of problems involving the flight of aircraft, ballistic and guided missiles, and space vehicles. This program is closely coordinated with those of the Department of Defense.

The budget includes new obligational authority of \$35 million for the Airways Modernization Board for 1959. This is more than double the amount provided for this agency in 1958, the year it was established. Increased emphasis is being placed on research and development to meet the needs of civil and military aviation for improved air traffic control and navigation facilities.

Other aids to business.—New obligational authority of \$52.8 million is recommended to carry on the business and disaster loan programs and the procurement and technical assistance programs for small business in 1959. Legislation to extend the Small Business Act beyond its present expiration date of July 31, 1958, and to remove the limitation on the life of the Small Business Administration is recommended.

The volume of new business loans of the Small Business Administration is expected to continue in 1959 at about the 1958 rate. New obligational authority and net expenditures are estimated to decline sharply in 1959, since repayments of principal available for relending are accelerating as the volume of outstanding loans increases.

Regulation of commerce and finance.—The budget provides increased funds in 1959 for the Interstate Commerce Commission, Federal Communications Commission, Securities and Exchange Commission, and Federal Trade Commission in recognition of the increases in their regulatory workload and the need to strengthen their enforcement activities.

Civil defense.—The budget provides for the first year cost of legislation authorizing Federal grants to match State and local expenditures for personnel and administration and for certain other needs of the overall civil defense effort. This legislation has been approved by the House of Representatives and is pending in the Senate.

Recommended new obligational authority for the Federal Civil Defense Administration in 1959 under existing legislation is below that for 1957. This results from suspension of procurement for the stockpile of emergency supplies and equipment. Plans are underway to develop a master survival resource plan to serve as the basis for future stockpiling. In the interim, needed rehabilitation

of certain stockpiled items, primarily blood plasma, will receive attention. The budget provides for extending the attack warning system to additional key target areas and to a nationwide network of radio stations. Research concerned with shelter design and testing, radiological defense, and warning and communications will be increased. Training programs, particularly on radiological defense, will be expanded, and two new resident training centers will be established.

Many Government agencies carry on activities which are part of the entire civil defense effort. The budgetary requests for these activities are included in the budgets of the respective agencies.

The Airways Modernization Board was established by the Airways Modernization Act of 1957 to conduct research and development on facilities required to modernize the national air traffic control and navigation system to meet the growing needs of civil and military aviation. The Departments of Commerce and Defense have carried on work in this area in the past. As authorized by the act, this work is being transferred to the Board during 1958. Systems and devices developed by the Board will be installed and used by both the Civil Aeronautics Administration, which is responsible for operation of the Federal airways system, and the Department of Defense.

The 1959 estimate is for an accelerated research and development program aimed primarily at increasing the traffic handling capacity of the Federal airways to accommodate efficiently and safely the air traffic forecast for the future. Work on this program will be performed largely by contract with private firms.

1. *Operations analysis.*—These projects will be directed mainly at analyzing present airways systems, measuring their performance, and identifying bottlenecks, as a basis for research and development to meet future requirements.

2. *Systems analysis.*—These projects include theoretical studies of the effectiveness and feasibility of existing and proposed airways systems and components, including traffic control procedures, navigation aids, communications, and radar. These analyses will make use of an electronic air traffic simulator to be ordered in 1958. Funds to complete construction of this device are included in the 1959 estimate.

3. *Systems experimentation.*—These projects cover the actual flight testing of new equipments, procedures and other parts of proposed airways systems. The principal expense in 1959 will be for the establishment of a test center.

4. *Component development.*—These projects include research and development on new kinds of electronic and other equipment and facilities necessary to increase the capacity and efficiency of the airways system. Work will be continued in 1959 on the development of a device to process and display aircraft position and other control information in traffic control centers. Work will also be done to develop improved air navigation systems, traffic control radar, communications, and other airways facilities.

AMERICAN BATTLE MONUMENTS COMMISSION**Current authorizations:****SALARIES AND EXPENSES**

For necessary expenses, [as authorized by the Act of June 26, 1946 (36 U. S. C. 121, 123-132, 138), as amended by the Act of July 25, 1956 (70 Stat. 640)] *not otherwise provided for, of the American Battle Monuments Commission*, including the acquisition of land or interest in land in foreign countries; purchase and repair of uniforms for caretakers of national cemeteries and monuments outside of the United States and its Territories and possessions; not to exceed \$65,000; \$70,000 for expenses of travel; rent of office and garage space in foreign countries; purchase (one for replacement only) and hire of passenger motor vehicles; and insurance of official motor vehicles in foreign countries when required by law of such countries; \$1,250,000: *Provided*, That where station allowance has been authorized by the Department of the Army for officers of the Army serving the Army at certain foreign stations, the same allowance shall be authorized for officers of the Armed Forces assigned to the Commission while serving at the same foreign stations, and this appropriation is hereby made available for the payment of such allowance: *Provided further*, That when traveling on business of the Commission, officers of the Armed Forces serving as members or as secretary of the Commission may be reimbursed for expenses as provided for civilian members of the Commission: *Provided further*, That the Commission shall reimburse other Government agencies, including the Armed Forces, for salary, pay, and allowances of personnel assigned to it. (36 U. S. C. 121, 123-132, 138; 70 Stat. 640; 71 Stat. 344; General Government Matters Appropriation Act, 1958.)

This is the 10th year of a construction program of United States military cemeteries in foreign countries and memorials to commemorate the services of the American Armed Forces in World War II at 15 locations in foreign countries. The Commission estimates that by June 30, 1958, all cemeteries will be 100% completed, memorials 88.6%. The program, including memorials on the east and west coasts of the United States, should be completed by August 1, 1959, except for the Hawaiian memorial.

No additional funds are requested for fiscal year 1959 since the unobligated balance is sufficient to complete the program.

ATOMIC ENERGY COMMISSION

Current authorizations:

OPERATING EXPENSES

For necessary operating expenses of the Commission in carrying out the purposes of the Atomic Energy Act of 1954, as amended, including the employment of aliens; rental in or near the District of Columbia; services authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); purchase of equipment; purchase, maintenance, and operation of aircraft; publication and dissemination of atomic information; purchase, repair, and cleaning of uniforms; purchase of newspapers and periodicals (not to exceed \$5,000); \$6,000; official entertainment expenses (not to exceed \$30,000); not to exceed \$3,700,000 \$3,850,000 for expenses of travel, including expenses of attendance at meetings of organizations concerned with the function or activity for which this appropriation is made; reimbursement of the General Services Administration for security guard services; not to exceed \$46,100,000 \$46,800,000 for personal services; purchase (not to exceed four hundred and [sixty] thirty-five for replacement only, including [two] one at not to exceed \$3,500 [each]) and hire of passenger motor vehicles; \$2,215,470,000 \$2,288,000,000, together with the unexpended balances, as of June 30, [1957] 1958, of prior year appropriations made available under this head to the Atomic Energy Commission, and, in addition, any moneys (except sums received from disposal of property under the Atomic Energy Community Act of 1955 (42

ATOMIC ENERGY COMMISSION—Continued

Reappropriation	63,137,269	37,932,221	10,000,000

¹ Includes capital outlay for equipment: 1957, \$57,398,823; 1958, \$72,327,000; 1959 \$80,547,000.

The Commission procures raw materials; manufactures special nuclear materials and atomic weapons; develops improved weapons; conducts research and development aimed at generation of atomic power, including power from controlled thermonuclear reactions, and protection of health against possible hazards arising from atomic energy operations; conducts investigations in the physical and life sciences related to atomic energy; establishes and enforces regulations for civilian uses of atomic energy; promotes industrial participation in atomic energy development for peaceful purposes; encourages scientific and industrial progress through the dissemination of information under

the terms of the Atomic Energy Act of 1954, as amended; and participates in programs of international cooperation in peaceful applications of atomic energy.

The program is administered in the field through 10 major offices. Most of the Commission's activities are carried on in Government-owned facilities by industrial concerns and educational institutions, operating under contracts. Coordination with the armed services is achieved through the Military Liaison Committee of the Department of Defense.

Net program costs in 1959 are estimated at \$2,324.2 million, or 8.6% greater than the estimated 1958 net costs of \$2,139.9 million, and 36.4% greater than actual net costs of \$1,704.3 million for 1957. The upward trend reflects mainly larger scale procurement of raw materials and expanded production of nuclear weapons. Other increases occur in the efforts to develop varied types of atomic weapons, in military and civilian power and propulsion reactor development, in research in the biological and medical fields, and for isotope development.

In 1959, the net program costs exceed obligational requirements; the difference is represented by costs financed from obligations of other years, net. The converse is true in 1957 and 1958, when obligations exceed net program costs, the difference being reflected as obligations incurred for costs of other years, net. The obligations for operating expenses in 1959 total \$2,298 million compared to \$2,240.6 million in 1958 and \$1,773 million in 1957.

1. *Raw materials*.—Uranium ores and concentrates are procured from domestic and foreign sources for processing in the production facilities of the Commission. Substantial additional tonnages of concentrates will be obtained from United States producers and from Canada in 1959, with minor decreases from other foreign sources reflecting increased allocations to other countries. Resource evaluation will continue in the development of data on uranium reserves.

2. *Special nuclear materials*.—Uranium concentrates are processed into feed materials from which (a) plutonium is produced in the reactors at Hanford, Wash., and Savannah River, S. C., or (b) the isotope uranium-235 is extracted in plants at Oak Ridge, Tenn., Paducah, Ky., and Portsmouth, Ohio. As production of feed and special nuclear materials increases, the gains in output will be accompanied by lower unit processing costs. Work will continue on process improvement to reduce production costs, increase yields, and improve the quality of products.

3. *Weapons*.—This program encompasses the production of weapons; the design, development, and testing of new weapon types; and the storage, maintenance, and custody of stockpiled weapons. Expanded production facilities will be in operation and production of weapons will increase.

4. *Reactor development*.—This program includes primarily the development of (a) civilian power reactors, including associated work on reactor safety, spent fuel reprocessing, and waste disposal; (b) commercial ship reactors; (c) power and propulsion reactors for a variety of military requirements; and (d) experimental devices to control thermonuclear reactions. Also included is the operation of the National Reactor Test Station at Arco, Idaho. The costs by major category are:

Category:	1957 actual	1958 estimate	1959 estimate
Civilian power reactors.....	\$54,291,286	\$90,800,000	\$97,700,000
Civilian power supporting effort.....	22,247,363	26,922,000	26,600,000
Commercial ship reactors.....	875,198	1,750,000	3,700,000
Army package power reactors.....	2,875,555	5,756,000	5,600,000
Naval propulsion reactors.....	71,662,530	86,844,000	87,000,000
Aircraft propulsion reactors.....	68,875,126	65,300,000	66,600,000
Controlled thermonuclear project.....	10,734,745	23,550,000	25,500,000
All other.....	34,988,975	33,854,000	38,300,000
Total reactor development	266,550,778	334,776,000	351,000,000

The Commission's civilian power reactor program provides a foundation of technical knowledge through a program of research and development on promising reactor concepts; design, fabrication, and operation of power reactor experiments; the development of experimental reactors; and development of prototype power plants usually on a cooperative basis with industry. Through the cooperative arrangements program, the Commission provides financial aid in the development of full-scale power reactors built by private industry and public power bodies. This aid provides a basis for a privately financed nuclear power industry.

To provide broad support primarily for civilian power reactor projects, the Commission's programs include general research and development on materials, moderators, control techniques, fuel elements, spent fuel reprocessing, and waste disposal systems, and reactor safety. Some of this work is also applicable to military reactor development.

The Commission's program for 1959 includes the continuation of work to develop atomic powerplants for use in commercial vessels, and particularly for the nuclear-powered merchant ship now in construction.

In the military reactor programs, efforts will be continued to develop reactors to meet requirements of the Department of Defense. These include propulsion reactors for submarines, surface combatant ships, military aircraft, missiles, and transportable plants for the generation of heat and electric power at remote military installations. Many of the advances in military reactor development contribute significantly to the civilian power program.

Development work looking toward control of thermonuclear reactions will continue at a substantial level in 1959.

The Commission also operates the National Reactor Testing Station in Idaho, including two test reactors which provide irradiation services for the Commission's programs and for private industry on a reimbursable basis.

5. *Physical research.*—Basic and long-range investigations in the fields of physics, mathematics, chemistry, and metallurgy are undertaken to provide an ever-expanding fund of theoretical and practical knowledge in fields related to nuclear energy. Approximately 90 particle accelerators, ranging in energy from several thousand electron-volts to several billion electron-volts, are utilized in the program. Approximately 65% of the cost of research is for work done in Commission laboratories and 35% is for work contracted to about 100 universities and other independent institutions.

6. *Biology and medicine.*—Research is conducted on the effect of radiation on living things. It includes investigations of the biological effects of nuclear explosions, and the development of methods for minimizing exposure to radioactive materials of all kinds and for minimizing and protecting against the injurious effects of radiation. Support is given to the development of methods for utilizing radioactive materials for human welfare, and to the diagnosis and treatment of human diseases, such as cancer. The comprehensive study of permissible levels of exposure to radioactive contamination from all causes is given special emphasis. Standards are established to insure that the Commission's activities are conducted with safety to both employees and the public.

The major portion of the research is carried on at 16 laboratories which are owned by or operated for the Commission and the remainder, approximately 500 projects, is supported in more than 200 universities, colleges, hospitals, and independent laboratories. The program

includes the operation of 4 facilities in the United States devoted to cancer research and 2 laboratories in Japan for the determination of the long-term effects of atomic bombs on the population.

7. *Training, education, and information.*—This activity includes operation of special schools; granting of fellowships for graduate students; assistance to high schools, colleges, and universities; and dissemination of technical information, including participation in international conferences and exhibits on nuclear science and technology; and development of beneficial uses of radioisotopes.

Four schools will be operated in 1958 and 1959: The International School of Nuclear Science and Engineering at the Argonne National Laboratory, the Oak Ridge School of Reactor Technology, the Oak Ridge Institute of Nuclear Studies, and the new Puerto Rico Training Center.

Under the fellowship program, approximately 150 college graduates will receive assistance for graduate studies in nuclear energy technology. Other fellowships to be offered include 170 in radiological physics, 8 in industrial hygiene, and 11 in industrial medicine.

Assistance to schools to provide for educational programs in atomic energy will be continued. Grants will be made to universities to help them acquire reactor training equipment, teaching aids, demonstration apparatus, and special laboratory equipment. University summer courses in general radiobiology will be made available to high school science teachers, and special faculty training in reactor technology for university faculty members will be provided.

To broaden the dissemination of information on matters relating to atomic energy, the Commission operates the Technical Information Service and the American Museum of Atomic Energy at Oak Ridge, maintains libraries, performs translation services, and conducts tours with traveling atomic energy exhibits. At the request of the Department of State, the Commission is planning and preparing the United States technical presentation, including an exhibit, for the 1958 International Conference on Peaceful Uses of Atomic Energy to be held at Geneva, Switzerland, in September 1958. The Commission will also arrange in 1959 for nuclear exhibits at other selected foreign conferences and exhibitions in order to demonstrate United States technology.

It is planned to initiate in 1959 a program to provide for additional development of practical applications for use of radioisotopes in medicine, agriculture and industry. The Commission will participate in research and development projects with industrial and research organizations to exploit the practical application of radioisotopes and applied radiation to industrial products, processes, and manufacturing methods. Isotope training institutes will be established at selected non-profit industrial, research or educational institutions to accelerate training of industrial and State radiation protection personnel in radioisotope techniques and precautions for their safe use. Assistance will be provided to industry to encourage installation of needed reactor capacity for isotope production by private industry.

8. *Communities.*—The Commission operates 3 towns—Oak Ridge, Tenn., Richland, Wash., and Los Alamos, N. Mex.—with an estimated total population in 1959 of 71,000, and provides limited community services at other locations. Legislation has been enacted to terminate Government ownership and operation of Oak Ridge and Richland; the 1959 estimates are based on anticipated disposal of a major portion of Atomic Energy Commis-

ATOMIC ENERGY COMMISSION—Continued

Current authorizations—Continued

OPERATING EXPENSES—Continued

sion-owned real estate by the end of 1959 with resultant reductions in requirements for property maintenance and in revenues. The estimates also include costs associated with the disposal program and provide for assistance payments to the community hospital at Richland which has been transferred to a private nonprofit organization. Since real estate revenues normally exceed operating costs by a substantial amount, the loss in revenue as a result of property sales together with the costs of disposal will result in an estimated excess of costs over revenues of \$3.5 million in 1959. This relation between costs and revenues, which are included under revenues applied, is indicated in the following table:

	1957 actual	1958 estimate	1959 estimate
Revenues.....	\$18,987,959	\$15,243,000	\$11,473,000
Operating costs, including AEC cost related to disposal.....	17,777,637	17,921,000	15,000,000
Excess of revenues over costs.....	1,210,322	---	---
Excess of costs over revenues.....	---	2,678,000	3,527,000

9. *Program direction and administration.*—The costs of general management, supervision of program operations, the negotiation and administration of contracts, the establishment and enforcement of regulations for civilian uses of atomic energy, including the issuance of licenses, and other related administrative activities performed by Commission personnel represent 2% of total program costs in 1959 compared to 2.1% in 1958. The budget provides for no increase in personnel in 1959. The increase of \$1.9 million provides for salaries and travel and other costs for a whole year for personnel added in 1958, as well as operating costs at the Germantown headquarters for a full year including eight months occupancy of the additional wing now under construction.

10. *Security investigations.*—The Atomic Energy Act of 1954 requires background investigations of those persons proposed for access to restricted data of the atomic energy program. The number of full background investigations to be completed is estimated at 27,205 for 1959, compared with 32,451 for 1958 and 35,492 for 1957.

11. *Other costs.*—In furthering the objectives of the Atomic Energy Act of 1954 concerning the utilization of atomic energy for peaceful purposes, the Commission furnishes materials and services to industrial organizations and other private parties apart from those which it provides normally for its own basic programs. Costs for these are incurred only upon the request of others. Charges made for such products and services are included under "Revenues applied" as a reduction in determining the appropriations required. The items included are:

	1957 actual	1958 estimate	1959 estimate
Costs of products sold.....	\$4,717,615	\$6,096,000	\$4,686,000
Costs of services performed.....	1,901,988	2,041,000	2,001,000
Total other costs.....	6,619,603	8,137,000	6,687,000

12. *Revenues applied.*—Revenues are obtained from services performed and the sale and lease of products, including lease and sale of nuclear materials, produced as a part of the Commission's own basic program (primarily the operation of the Atomic Energy Commission-owned communities and housing and the sale of special nuclear materials and related products) and from products and services for which costs are incurred only upon the request of others and are included under "Other costs." The items included are:

	1957 actual	1958 estimate	1959 estimate
Sale of source and special nuclear materials and related products.....	\$2,151,857	\$4,493,000	\$4,085,000
Income from lease and consumption charges for special nuclear materials.....	248,111	969,000	1,627,000
Income from research hospitals.....	352,797	353,000	353,000
Income from training, education and information.....	463,510	418,000	255,000
Income from communities.....	18,987,959	15,243,000	11,473,000
Income from products sold and services performed at request of others:			
Products sold.....	8,476,434	10,081,000	7,863,000
Services performed.....	2,424,692	1,669,000	1,659,000
Miscellaneous income.....	1,468,490	1,649,000	2,405,000
Total revenues.....	34,573,850	34,875,000	29,720,000

13. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year:				
Inventories and items on order:				
Inventories (goods unconsumed by activities).....	\$135,869,660	\$161,331,583	\$180,127,000	\$185,519,000
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received).....	559,198,115	600,073,299	685,319,211	653,760,211
Advances (payments for goods and services on order not yet received).....	474,753	714,108	---	---
Collateral funds and other deposits (insurance collateral, employee benefit and annuity funds, merchandise deposits with vendors and miscellaneous deposits).....	21,890,000	24,099,000	21,499,000	21,499,000
Total selected resources at end of year.....	717,432,528	786,217,990	886,945,211	860,778,211
Selected resources at start of year (—)	---	—717,432,528	—786,217,990	—886,945,211
Costs financed from obligations of other years, net (—)	---	---	---	—26,167,000
Obligations incurred for costs of other years, net.....	---	68,785,462	100,727,221	---

The increase in unpaid undelivered orders in 1958 over 1957 results primarily from the general rise in program levels and the execution of certain long-term contracts with industry under the power reactor cooperative arrangements program. The decrease in 1959 below 1958 is attributed primarily to the costing of long-term contracts for materials procurement and cooperative power arrangements with industry.

From this appropriation the Commission constructs plant and facilities for its production, research, and supporting operations. Since the Atomic Energy Act of 1954 requires statutory authorization of appropriations for plant acquisition and construction, obligations are estimated in 1959 only for projects for which appropriations have already been authorized. No new appropriation is requested at this time because the \$65.3 million of unobligated balances brought forward from prior years is more than sufficient to cover the \$53.4 million of obligations for these projects. The remaining \$11.9 million is to be applied against 1959 obligational requirements of projects included in the anticipated authorization of appropriations for which a supplemental will be transmitted later (see below).

Excluded from the total estimate column and from the 1959 estimated cost column are amounts for projects for

which authorizations will be sought for 1959 but which have not yet been received.

Set forth below is information on the various activities in terms of obligations incurred.

1. *Facilities for raw materials.*—With the exception of the Commission's processing mill at Monticello, Utah, all United States mills for the processing of uranium ores are privately owned. Obligations in 1957 and 1958 are for the construction of access roads to uranium mines and miscellaneous supporting facilities.

2. *Facilities for special nuclear materials.*—Under this activity obligations are provided in 1957 and 1958 for additions, modification and improvements to (a) the feed materials plants located at Fernald, Ohio, Weldon Springs, Mo., and St. Louis, Mo.; (b) the gaseous diffusion plants located at Oak Ridge, Tenn., Paducah, Ky., and Ports-

ATOMIC ENERGY COMMISSION—Continued

Current authorizations—Continued

[PLANT ACQUISITION AND CONSTRUCTION]—Continued

mouth, Ohio, and (e) the production facilities located at Hanford, Wash., and Savannah River, S. C.

3. *Facilities for weapons.*—This activity includes the construction of facilities for the production of weapons, for the storage of completed weapons, and for the development and engineering of new weapon types.

4. *Facilities for reactor development.*—This activity includes the construction of laboratory buildings for fundamental engineering work on reactor concepts and materials, facilities for the housing of reactor experiments, civilian power experimental reactors generating electrical energy or producing over 10,000 kilowatts of heat, and prototype reactors for civilian and military purposes.

Obligations in 1957 and 1958 are primarily for (a) experimental reactors for the Commission's civilian power program; (b) prototype power reactors as part of the cooperative arrangements program between the Commission and industry; (c) facilities to support the development of improved reactor, chemical separations, and waste disposal systems, and to provide other general support; (d) continued support for the first merchant ship reactor; (e) test facilities connected with military aircraft and missile nuclear propulsion; and (f) land based prototypes and support facilities for the naval propulsion program.

Obligations in 1959 are for the completion of certain previously authorized projects, including (a) experimental reactors for the Commission's civilian power program, (b) buildings to house advanced experimental devices for controlling thermonuclear reactions, and (c) certain classified projects.

5. *Facilities for physical research.*—Large research machines and laboratory buildings are constructed to further research in physics, chemistry, and metallurgy. The major portion of the obligations in 1957 and 1958 are for the completion of three ultra high energy particle accelerators in the multibillion electron-volt range which will assist in obtaining new knowledge about the atomic nucleus and the elementary particles. One of these is being built at Princeton, N. J., one at Cambridge, Mass., and another, larger than any now existing, at the Brookhaven National Laboratory, Upton, Long Island. The 1958 estimates also cover the design of another multibillion electron-volt accelerator, the sixth in the United States, at the Argonne National Laboratory, Lemont, Ill., and research facility improvements at University of California Radiation Laboratory, Argonne National Laboratory, and Brookhaven National Laboratory. The 1959 obligations provide for the first phase of construction on the multibillion electron-volt accelerator at the Argonne National Laboratory authorized in 1958.

6. *Facilities for biology and medicine.*—Under this activity, research facilities are built for atomic energy research in the fields of medicine, biology, and biophysics. The new research hospital at the Brookhaven National Laboratory, initiated in 1956, will be completed in 1958. A mammalian radiation injury and reclamation area will be provided at the Oak Ridge National Laboratory, Tenn., in 1958.

7. *Facilities for training, education, and information.*—Obligations in 1958 are for construction of a nuclear training center in Puerto Rico.

8. *Facilities for communities.*—Community facilities are constructed in the Commission-operated towns of Rich-

land, Wash., Oak Ridge, Tenn., and Los Alamos, N. Mex. Obligations in 1957 and 1958 are primarily for a new community hospital at Oak Ridge, municipal facilities in Oak Ridge and Richland connected with the community disposal program, and for additional housing and schools at Los Alamos. Obligations in 1959 are for an additional water well at Los Alamos, N. Mex.

9. *Facilities for administration.*—Obligations in 1957 and 1958 are mainly for the construction of the new headquarters building at Germantown, Md. Other obligations for these years provide for improvement or conversion of administrative facilities.

10. *Relation of costs to obligations.*—The year-end balances of unpaid undelivered orders are as follows: 1956, \$304,692,468; 1957, \$305,033,062; 1958, \$426,930,160; and 1959, \$253,611,160. The changes in unpaid undelivered orders result from the fact that obligations lead costs and tend to fluctuate more rapidly than costs. The large increase in obligations in 1958 is only partially costed in 1958, with the result that a larger amount of unpaid undelivered orders are carried into 1959. In 1959, obligations shown in this account decline sharply, and costs and unpaid undelivered orders also decline; however, additional 1959 construction obligations for the Atomic Energy Commission are shown under "Proposed for later transmission."

GENERAL PROVISIONS

Any appropriation available under this or any other Act to the Atomic Energy Commission may initially be used subject to limita-

tions in this Act during the fiscal year [1958] 1959 to finance the procurement of materials, services, or other costs which are a part of work or activities for which funds have been provided in any other appropriation available to the Commission: *Provided*, That appropriate transfers or adjustments between such appropriation shall subsequently be made for such costs on the basis of actual application determined in accordance with generally accepted accounting principles.

Not to exceed 5 per centum of any appropriation herein made to the Atomic Energy Commission may be transferred to any other such appropriation, but no such appropriation shall be increased by more than 5 per centum by any such transfers, and any such transfers shall be reported promptly to the Appropriations Committees of the House and Senate.

No part of any appropriation herein made to the Atomic Energy Commission shall be used to confer a fellowship on any person who advocates or who is a member of an organization or party that advocates the overthrow of the Government of the United States by force or violence or with respect to whom the Commission finds, upon investigation and report by the Civil Service Commission on the character, associations, and loyalty of whom, that reasonable grounds exist for belief that such person is disloyal to the Government of the United States: *Provided*, That any person who advocates or who is a member of an organization or party that advocates the overthrow of the Government of the United States by force or violence and accepts employment or a fellowship the salary, wages, stipend, grant, or expenses for which are paid from any appropriation contained herein shall be guilty of a felony and, upon conviction, shall be fined not more than \$1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penal clause shall be in addition to, and not in substitution for, any other provisions of existing law.

[The appropriations, authorizations, and authority with respect thereto in this Act shall be available from July 1, 1957, for the purposes provided in such appropriations, authorizations, and authority. All obligations incurred during the period between June 30, 1957, and the date of enactment of this Act in anticipation of such appropriations, authorizations, and authority are hereby ratified and confirmed if in accordance with the terms hereof, and the terms of Public Law 85-78, Eighty-fifth Congress, as amended.] (42 U. S. C. 2011; Atomic Energy Commission Appropriation Act, 1958.)

ALLOCATIONS RECEIVED FROM OTHER APPROPRIATIONS

NOTE.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows:

"Ships and facilities," Department of the Navy.
 "Research and development," Department of the Navy.
 "Aircraft and related procurement," Department of the Navy.
 "Shipbuilding and conversion," Department of the Navy.
 "Government in occupied areas," Department of State.
 "Operation and maintenance," Department of the Army.
 "Army industrial fund."
 "Military construction, Army."
 "Research and development," Department of the Army.
 "Procurement and equipment and missiles, Army."
 "Operations," Federal Civil Defense Administration.
 "Surveys, plans, and research," Federal Civil Defense Administration.
 "Operation and maintenance," Department of the Air Force.
 "Research and development," Department of the Air Force.
 "Military construction, Air Force."
 "Aircraft and missile support," Department of the Air Force.
 "Aircraft and missile procurement," Department of the Air Force.
 "Mutual Security," funds appropriated to the President.

Public enterprise funds:

DEFENSE PRODUCTION GUARANTIES

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
Operating costs: Administrative expense (total obligations).....	\$767	\$1,000	\$1,000
Financing:			
Amounts becoming available: Revenues and receipts: Guaranty and commitment fees.....	145,119	104,214	65,347
Unobligated balance brought forward....	196,951	341,303	444,517
Total amounts available.....	342,070	445,517	509,864
Unobligated balance carried forward....	—341,303	—444,517	—508,864
Financing applied to program.....	767	1,000	1,000

Guaranties are given on loans made by private sources to facilitate performance of defense production contracts.

Loans may be purchased by the Government if necessary to keep financing in effect; however, the Atomic Energy Commission has not yet been required to do this. Administrative expenses are paid out of guaranty fees.

In 1957, guaranties of 75% to 95% were in force. At the beginning of 1957 credit amounting to \$10,299,147 was available to four borrowers; at year end \$8,063,779 was available to three borrowers. It is estimated that in 1958 and 1959 guaranties will be in force on five loans for which the total amount of credit available to the borrowers at the end of each year will be \$6.4 million and \$3.7 million, respectively.

Net earnings are retained to meet possible future losses (50 U. S. C. app. 2061-2166).

Financing:			
Unobligated balance transferred from "Plant acquisition and construction" (see schedule above).....			—11,929,000
Proposed supplemental appropriation.....			120,000,000

Under proposed legislation, 1959.—New obligational authority in the amount of \$120 million will be requested in a supplemental transmission after congressional consideration of the Commission's request for authorization of appropriations. Available unobligated balances have been applied in determining the appropriation to be requested. Of the \$131.9 million of total obligations anticipated, \$84.8 million is expected to be proposed for improvements and additions to existing production plants which will increase production and safety and decrease unit costs, and for additional weapons production and development facilities. Proposed also are \$20 million for construction of a naval land-based prototype reactor suitable for use in a destroyer, \$19.2 million for other

facilities connected with reactor development, \$4.2 million for other research and development facilities, and \$3.7 million for a variety of other projects. Costs against the \$131.9 million total obligations will spread over several years; only \$23 million in costs is estimated for 1959, resulting in unpaid undelivered orders in the amount of \$108.9 million at the end of 1959.

1. *Design, specifications, and supervision.*—Plans for the new headquarters installation are to be completed in calendar year 1958.

2. *Construction of building.*—Contracts for construction are to be awarded during 1958 under funds appropriated in prior years totaling \$54,500,000. The installation is expected to be ready for occupancy in 1961.

3. *Construction of roads.*—Up to \$8,500,000 of the \$54,500,000 is available to the Department of the Interior, the Department of Commerce, and the National Capital Planning Commission for extension of the George Washington Memorial Parkway to the headquarters site. Construction of the parkway extension was begun in 1956 and is expected to be complete in 1959.

Appropriation (adjusted)	17,437,045	18,300,000	18,420,000

1. *Recruiting and examining.*—Most appointments in the competitive civil service are made under the open competitive merit system through examinations held by the office of the Commission and its boards of examiners, made up of agency personnel operating under the supervision and direction of the Commission. Appointments through such competitive examinations will accord career or career-conditional status. While total new hires in Government will be fewer in 1959 than in 1957 or 1958, the number of competitive placements is expected to increase as the amount of direct agency hiring continues

to decline. Physically handicapped persons are given special placement attention. Veterans are aided in securing the benefits to which they are entitled. An employees' incentive awards program is conducted to stimulate the development of new and improved methods and ideas.

	1957 actual	1958 estimate	1959 estimate
<i>Production count</i>			
Examinations announced by—			
The Commission	11,755	10,400	9,000
Boards of examiners	14,784	15,900	17,700
Total	26,539	26,300	26,700
Applications processed by—			
The Commission	712,026	648,400	559,100
Boards of examiners	1,023,420	1,053,200	1,233,500
Total	1,735,446	1,701,600	1,792,600
Placements made by—			
The Commission	103,261	97,400	81,100
Boards of examiners	157,666	159,600	185,900
Total	260,927	257,000	267,000

2. *Investigation of character and fitness for employment.*—The Commission conducts most of the investigations required for security determinations of persons being employed in sensitive positions and fitness investigations of all persons entering nonsensitive positions. The Commission also conducts other investigations connected with appeals and the merit system.

	1957 actual	1958 estimate	1959 estimate
<i>Production count</i>			
National agency check and inquiry cases	334,243	301,000	301,000
Limited security investigations	6,354	6,800	6,875
Other personal investigations	5,961	7,140	6,840

3. *Inspections and classification audits.*—The Commission inspects agency personnel operations to insure compliance with civil service laws and regulations and to stimulate improvement in personnel practices. It also conducts classification surveys to insure compliance with classification standards.

4. *Administration of the retirement systems.*—Administering the Civil Service Retirement Act and other benefit acts involves adjudicating annuity, death, benefit, refund, and service credit claims as well as maintaining the control accounts for the fund and making payments to annuitants and other claimants. Public Law 854, approved July 31, 1956, liberalizing benefits under the Retirement Act, has resulted in substantial increases in the volume of work processed.

	1956 actual	1957 actual	1958 estimate	1959 estimate
<i>Production count</i>				
Annuity and death claims	64,909	80,621	87,200	93,490

Inquiries answered	192,332	224,203	219,600	232,560

5. *Developing programs and standards.*—The Commission develops programs, devises tests, issues standards and regulations, and proposes legislation to improve the Federal personnel system for both competitive and noncompetitive positions.

6. *Regulatory, appellate, and advisory functions.*—These consist of the formulation of rules and regulations, hearing and taking action on appeals, and the administration of the political-activities statutes.

8. *Relation of costs to obligations.*—The year-end balances' of unpaid undelivered orders are as follows: 1956, \$136,795; 1957, \$101,042; 1958, \$100,000; 1959, \$100,000.

INVESTIGATIONS OF UNITED STATES CITIZENS FOR EMPLOYMENT BY INTERNATIONAL ORGANIZATIONS

[Investigations of United States citizens for employment by international organizations:] For expenses necessary to carry out the provisions of Executive Order No. 10422 of January 9, 1953, as amended, prescribing procedures for making available to the Secretary General of the United Nations, and the executive heads of other international organizations, certain information concerning United States citizens employed, or being considered for employment by such organizations, including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), [\$491,800] \$383,000: *Provided*, That this appropriation shall be available for advances or reimbursements to the applicable appropriations or funds of the Civil Service Commission and the Federal Bureau of Investigation for expenses incurred by such agencies under said Executive order: *Provided further*, That members of the International Organizations Employees Loyalty Board may be paid actual transportation expenses, and per diem in lieu of subsistence authorized by the Travel Expense Act of 1949, as amended, while traveling on official business away from their homes or regular places of business, including periods while en route to and from and at the place where their services are to be performed: *Provided further*, That nothing in sections 281 or 283 of title 18, United States code, or in section 190 of the Revised Statutes (5 U. S. C. 99) shall be deemed to apply to any person because of appointment for part-time or intermittent service as a member of the International Organizations Employees Loyalty Board in the Civil Service Commission as established by Executive Order 10422, dated January 9, 1953, as amended. (*Independent Offices Appropriation Act, 1958.*)

1. *Investigations.*—The Civil Service Commission and the Federal Bureau of Investigation have been conducting investigations of United States citizens considered for employment in international organizations of which the United States Government is a member. In 1959 the Commission will take over most of the investigations which formerly were conducted by the Federal Bureau of Investigation. The reports of these investigations are forwarded to the International Organizations Employees Loyalty Board of the Civil Service Commission which makes advisory determinations under the loyalty standard. The advisory determinations are transmitted, through the Secretary of State, to the Secretary General of the United Nations or the executive heads of other international organizations.

2. *Relation of costs to obligations.*—The year-end balances of unpaid undelivered orders are as follows: 1956, \$30,090; 1957, \$19,796; 1958, \$21,300; 1959, \$31,700.

Program by activities:			
Payment of Government share of retirement (total costs—obligations).....	\$525,000,000		
Financing:			
Appropriation (new obligational authority).....	525,000,000		

Beginning in July 1957, agencies pay to the fund an amount equal to deductions from employees' salaries—6.5% of the covered payroll. Since the total of these receipts exceeds the payments from the fund, no governmentwide appropriation is received for 1959.

Financial statements of the civil service retirement and disability fund are printed in part III of the budget.

Object Classification

This fund finances on a reimbursable basis, full field security investigations performed at the request of other departments and agencies of the Government (66 Stat. 107). The capital of the fund consists of \$4 million appropriated in 1952.

Budget program.—Because work on some investigations will be started in one fiscal year and completed in another, work-in-process is recognized as an asset of the fund. Agency estimates of investigations to be requested in 1958 and 1959 as compared to 1957 experience are presented below. In addition, the table relates estimated workload receipts to estimates of production, average positions, and unit costs.

CASELOAD, AVERAGE POSITIONS, AND UNIT COSTS

	1957 actual	1958 estimate	1959 estimate
On hand, beginning of year.....	11,199	6,788	4,788
Received.....	46,984	36,000	38,750
Total workload.....	58,183	42,788	43,538
Processed.....	51,395	38,000	38,250
On hand, end of year.....	6,788	4,788	5,288
Average positions.....	1,512	1,425	1,375
Unit cost.....	\$239	\$260	\$260

The estimated increase in costs for 1958 and 1959 results to a great extent from the contributions to the retirement fund beginning in July 1957.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year:				
Advances.....	\$50,860	\$65,629	\$60,000	\$50,000
Work-in-process.....	477,926	120,699	359,099	396,599
Unpaid undelivered orders.....	37,645	61,582	50,000	50,000
Deferred charges.....	177			
Total selected resources at end of year.....	566,608	256,910	469,099	496,599
Selected resources at start of year (—).....		—566,608	—256,910	—469,099
Costs financed from obligations of other years, net (—).....		—309,698		
Obligations incurred for costs of other years, net.....			212,189	27,500

CIVIL SERVICE COMMISSION—Continued

Program by activities:			
Investigation and study of civil rights matters (total obligations).....			\$750,000
Financing:			
Appropriation (new obligational authority).....			750,000

The Commission on Civil Rights is responsible for investigating allegations made that citizens are being deprived of their right to vote by reason of their color, race, religion, or national origin; collecting information concerning legal developments constituting a denial of equal protection of the laws under the Constitution; and appraising laws and policies of the Federal Government on equal protection of the laws. The Commission's final report to the President and Congress is due by September 9, 1959. The Commission ceases to exist 60 days after submission of its final report.

The Export-Import Bank is a Government-owned corporation which facilitates the financing of exports and imports. To do this it participates in or guarantees credits extended by U. S. exporters, commercial banks, and other financial institutions to foreign purchasers of exports from the United States. It makes direct loans to finance U. S. exports and imports. It also insures certain exports against risks of war and expropriation. At present, the total amount of loans, guaranties, and insurance which the Bank may have outstanding at one time is \$5 billion (12 U. S. C. 635).

As the following table shows, it is estimated that the Bank's uncommitted lending authority will be reduced to \$300 million by the end of 1958 and will be virtually exhausted by the end of 1959.

¹ Reserved for insurance.

To finance future operations as well as to maintain a prudent current reserve of authority to meet emergencies which may arise, legislation will be requested in 1958 to raise the limit on the Bank's lending and borrowing authority by \$2 billion. This request is shown below in a separate schedule.

The Bank's policy is to extend credit only when private capital is unavailable. It encourages private participation in the credits extended. Loans generally are made only for specific transactions or projects. No loan is made unless the Directors believe it has reasonable assurance of repayment.

Budget program—Development project loans.—A major portion of the Bank's assistance for the exportation of U. S. materials, equipment, and services continues to be in the form of medium and longer term credits for development projects abroad. These loans not only finance export sales, but lay the foundation for expanded future trade as foreign economies become stronger. It is estimated that 86 loans will be authorized or guaranteed by the Bank during 1959 to finance exports for such projects abroad involving power, agriculture, transportation, and industrial development.

Exporter loans.—Credits requested by exporters are authorized on a case-by-case basis to assist U. S. manufacturers and exporters to sell abroad on deferred payments. Such loans authorized in 1957 included credits to finance a wide range of capital goods shipped to countries throughout the world.

The Bank has continued to establish credit lines for individual exporters of capital equipment. The recipient of such a line knows in advance of new foreign sales how much assistance he will be able to obtain for such sales as are made on credit, provided that the Bank's criteria on the type of export and the credit standing of the importer are met.

Emergency foreign trade loans.—From time to time the Bank is called upon to provide financial assistance to meet emergency situations adversely affecting normal trade between the United States and another country. Such loans may take the form of lines of credit to a foreign central bank or other bank or financial institution to provide dollar exchange for a wide range of United States exports, credits to fund commercial arrearages resulting from dollar exchange difficulties, or credits to assist in financing purchases in the United States required for reconstruction abroad following a national disaster. In 1957 a \$500 million credit was authorized to the United Kingdom, secured by collateral, to meet, if needed, dollar requirements for goods and services to be obtained in the United States. The estimate of emergency credits for 1958 is \$60 million. Emergency credits in 1959 will be financed out of the \$2 billion increase in authority proposed for later transmission.

Substantial emergency credits to European countries were disbursed during the years immediately following World War II. Payments of principal and interest on these loans are being received promptly.

Loan principal repayments in the year.....	116.4	122.0	\$128.5
Loans outstanding June 30.....	1,430.7	1,618.7	1,490.2

Insurance.—Besides its lending operations, the Bank insures against the risks of war and expropriation the

property of United States exporters which is held abroad on consignment awaiting sale. A total of 759 policies were issued by the Bank in 1957 covering 183,637 bales of cotton valued at \$31,574,812. It is estimated that policies covering cotton to a value of \$15,000,000 will be issued in 1959.

Other operations.—Beginning in 1958, the Bank will make loans in certain foreign currencies to private firms for economic development and trade expansion. The foreign currencies will become available as part of the proceeds of U. S. surplus agricultural commodity sales abroad (71 Stat. 345).¹

The Bank also serves as administering agent for mutual security loans and guaranties against currency transfer risk and expropriation authorized by the International Cooperation Administration and for defense production loans made by the Office of Defense Mobilization. It also acts as collecting agent for the Treasury on the debt settlement agreement with the Federal Republic of Germany.

Administrative expenses.—The limitation proposed by the Bank to cover its needs for administrative expenses in 1959 is \$2,055,000, an increase of \$155,000 over 1958. In addition, foreign currencies equivalent to \$200,000 are requested to cover costs incurred abroad in making loans of foreign currencies to private firms (71 Stat. 345).¹

Operating results and financial condition.—During the coming fiscal year the net income of the Bank is expected to amount to \$65.1 million, of which \$22.5 million will be paid to the Treasury as a dividend, and the remainder added to the Bank's retained earnings. Net investment of the Government in the corporation is expected to be \$3,185.5 million at the end of 1959, consisting of \$1 billion in capital stock, \$1,637.6 million of borrowings from Treasury, and \$547.9 million of retained earnings, available for future contingencies.

It is anticipated that the Bank's loan disbursements and other payments will exceed loan collections and other receipts by \$399.9 million in the current fiscal year. However, in the budget year 1959 heavy repayments of short term commodity loans will reduce the net budget expenditure to \$57 million.

¹ These foreign currencies are set forth in detail in special schedules below.

Reorganization Plan No. 2 of 1954 relating to the liquidation of the Reconstruction Finance Corporation transferring certain foreign bonds, notes, and securities to the Export-Import Bank, became effective as of close of business June 30, 1954.

Liquidating proceeds of these assets are paid to the Treasury, and are not available for future borrowing. Revenue and receipts are estimated to amount to \$7,839,911 in 1958 and \$6,419,604 in 1959, thereby reducing the net investment of the U. S. Government to \$15,063,660.

Assessments based upon estimated administrative expenses are collected from agencies in the farm credit system, are appropriated to this special fund account, and are made available for administrative expenses. Obligations are incurred within fiscal year limitations under "Limitation on administrative expenses, Farm Credit Administration."

LIMITATION ON ADMINISTRATIVE EXPENSES, FARM CREDIT ADMINISTRATION

Not to exceed [\$2,200,000] \$2,125,000 (from assessments collected from farm credit agencies) shall be obligated during the current fiscal year for administrative expenses. (12 U. S. C. 636; Department of Agriculture and Farm Credit Administration Appropriation Act, 1958.)

The Administration supervises a coordinated agricultural credit system of farm credit banks and associations which make credit available to farmers and their co-operatives.

Provision is made for supervision and examination of: 12 Federal land banks (wholly farmer-owned); 13 banks for cooperatives (mixed ownership); 12 Federal intermediate credit banks (mixed ownership); the Federal Farm Mortgage Corporation (wholly Government-owned); 1,030 national farm loan associations; and 497 production credit associations. Also, these credit agencies are furnished such services as assistance in financing and investments, custody of collateral for bonds and debentures, credit analysis, development of appraisal standards and policies, preparation of reports and budgets, and development and distribution of information on farm credit.

The Corporation is in liquidation. It financed Land Bank Commissioner loans until July 1, 1947, and assisted Federal land banks in their financing.

Budget program.—As of June 30, 1955, the Corporation liquidated its remaining loans through bulk sale to the Federal land banks in exchange for non-interest-bearing notes to be collected over a 10-year period. Its only remaining activity was the disposal of reserved mineral interests which were transferred to the Department of the Interior on September 6, 1957, pursuant to Public Law 760, approved September 6, 1950.

Financing.—All of the \$200 million investment of the Government has been repaid to Treasury. In addition, authority of the Corporation to issue corporate bonds was eliminated in 1958.

Operating results and financial condition.—The retained earnings of the Corporation at the end of 1959, after making dividend payment to the Treasury of \$2.2 million, are expected to be \$5.7 million. Payments will continue to be made to the Treasury until final liquidation.

The production credit corporations were merged in the Federal intermediate credit banks as of January 1, 1957, pursuant to the Farm Credit Act of 1956 (70 Stat. 659). The act also provided for transfer to the banks of all of the corporations' assets and liabilities, except their investments in production credit associations which were transferred to Farm Credit Administration. Provision is made for retirement of the banks' Government capital and for eventual ownership by the production credit associations.

Budget program.—The Federal intermediate credit banks will continue their agricultural loan and discount activities, and will provide the production credit associations with necessary supervision and services, a function formerly performed by the production credit corporations.

Operations for the first half of 1957 result in budget transactions; operations for the last half of 1957, all of 1958, and the first half of 1959 (as mixed-ownership corporations) will result in trust transactions; and operations for the last half of 1959 will result in trust deposit transactions. The makeup of the Government equity at the time of the change is shown in the statement of financial condition.

The banks discount agricultural loans for and lend funds to production credit associations and other financing institutions, and supervise the associations.

Administrative supervision of the 497 production credit associations covers all phases of their lending activities including an annual credit examination of loans, and pro-

vides for review and advisory service relating to business management.

Operating costs.—Administrative expenses were \$1,624,295 for the first 6 months of 1957. These expenses were paid from corporate funds and were subject to limitation. The amount set forth above does not include expenses estimated at \$32,495 for the first half of 1957, which were not recorded as expenditures on the books until the last half of 1957. In addition, the supervisory costs assessed by the Farm Credit Administration were \$293,965; these costs were paid from corporate funds but were not included as administrative expenses of the banks subject to limitation.

Operating costs included \$13,992,200 interest paid or accrued on collateral trust debentures and notes payable to commercial banks and others.

Capital outlay.—The banks discounted agricultural loans for and lent funds to production credit associations and other financial institutions in the amount of \$1,077,528,433 during the first half of 1957.

Financing.—The banks financed their lending operations principally through the sale of their consolidated collateral trust debentures in the investment markets, and by other borrowings. The United States assumes no liability for the debentures or other such borrowings. During the first 6 months of 1957 the banks issued \$519,450 of debentures and borrowed \$105,175,000 from commercial banks. No credit bank may have outstanding borrowings in an amount exceeding 10 times its surplus and paid-in capital.

Relation of costs to obligations.—Year-end balances of unpaid undelivered orders are as follows: 1956, \$44,019; 1957, \$32,495.

Budget program.—The Federal intermediate credit banks will continue their agricultural loan and discount activities, and will provide the production credit associations with necessary supervision and services, a function formerly performed by the production credit corporations.

Operating costs.—Administrative expenses are estimated at \$1,693,000 for the first 6 months of 1959, and \$3,375,000 for 1958; actual expenses for the last half of 1957 were \$1,605,138. These expenses are paid from corporate funds and are subject to limitation until January 1, 1959. The amount set forth above does not include unrecorded expenses of \$39,597 at June 30, 1957, which were not recorded as expenditures on the books until 1958. It is estimated that such expenses will be \$40,000 at June 30, 1958, and \$40,000 at December 31, 1958. In addition, the supervisory costs assessed by the Farm Credit Administration are estimated at \$309,800 for the first half of 1959 and \$619,700 for 1958, and were \$344,211 for the last half of 1957; these costs are paid from corporate funds but are not included as administrative expenses of the banks subject to limitation.

Operating costs include interest paid or accrued on collateral trust debentures and notes payable to commercial banks and others, estimated at \$21,298,000 for the first 6 months of 1959 and \$38,122,000 for all of 1958; these costs were \$15,641,954 during the last half of 1957.

Capital outlay.—It is estimated that the banks will discount agricultural loans for and lend funds to production credit associations and other financial institutions in the amount of \$1,172,239,000 during the first 6 months of 1959 and \$2,364,849,000 during 1958. Loans and discounts during the last half of 1957 were \$1,208,963,443.

Financing.—The banks finance their lending operations principally through the sale of consolidated collateral trust debentures in the investment markets, and by other borrowings. The United States assumes no liability for the debentures or other such borrowings. It is estimated that the banks will issue \$612,300,000 of debentures and will borrow \$137,700,000 from commercial banks during the first 6 months of 1959 and will issue \$1,370,600,000 of debentures and will borrow \$310,750,000 from commercial banks during the entire year 1958. During the last 6 months of 1957 the banks issued \$690,750,000 of debentures and borrowed \$189,000,000 from commercial banks. No credit bank may have outstanding borrowings in an amount exceeding 10 times its surplus and paid-in capital.

Relation of costs to obligations.—Year-end balances of unpaid undelivered orders are as follows: 1956, \$32,495; 1957, \$39,597; 1958, \$40,000; 1959, \$40,000.

Operating results and financial condition.—Net income of \$1,149,200 is estimated for the first half of 1959. This

amount will be retained in undistributed earnings until the end of the fiscal year, at which time the earnings for the entire year will be distributed in accordance with section 206 (a) of the Farm Credit Act of 1956 by transfer to the reserve account, payment to Treasury as franchise tax, and payment to the associations and other financial institutions as patronage refunds.

By January 1, 1959, it is estimated that the Government-owned capital will be reduced from \$87,405,000 (at the time of the merger) to \$78,271,790. The net worth position of the system will not be decreased as private capital interest will be increased during the period by \$10,124,015, consisting of \$8,742,190 acquired by the production credit associations by cash subscriptions required by the act and \$1,381,825 acquired by the associations and other financing institutions as patronage refunds. It is estimated that retained earnings which remain with the operating fund will amount to \$64,830,885 at December 31, 1958.

Net cash transactions will be transferred from this fund into a deposit fund of Treasury on Jan. 1, 1959.

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

NOTE.—Obligations incurred under allocations from other appropriations are shown in the schedules of the parent appropriation "Mutual security," funds appropriated to the President.

MIXED-OWNERSHIP CORPORATIONS

BANKS FOR COOPERATIVES

The banks for cooperatives make loans to finance the operations of farmers' cooperatives. The banks' capital funds are from the Agricultural Marketing Act Revolving Fund and from borrowing farmers' cooperative associations (12 U. S. C. 1134). The Farm Credit Act of 1955 provides for eventual ownership of the banks by farmers' cooperatives and the retirement of the U. S. Government investment.

FEDERAL CIVIL DEFENSE ADMINISTRATION

This Administration prepares national civil defense plans as an integral part of the total program for defense of the United States against enemy attack. The Administration provides guidance to States and/or their political subdivisions, maintains operational capability, including attack warning and communications systems, makes financial contributions to States and political subdivisions for civil defense purposes, and maintains stockpiles of medical, engineering, and radiological defense equipment and supplies.

For 1959, major civil defense effort will be devoted to developing an effective radiological defense, and to programs for strengthening the capacity of Government at all levels to survive and operate in an emergency.

Current authorizations:

OPERATIONS

【Operations:】 For necessary expenses, not otherwise provided for, in carrying out the provisions of the Federal Civil Defense Act of 1950, as amended (50 U. S. C., App. 2251–2297), including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); reimbursement of the Civil Service Commission for full field investigations of employees occupying positions of critical importance from the standpoint of national security; expenses of attendance at meetings concerned with civil defense functions; reimbursement of the General Services Administration for security guard services; not to exceed \$8,000; \$10,000 for the purchase of newspapers, periodicals, and teletype news services; not to exceed \$750,000; \$920,000 for expenses of travel and not to exceed \$6,000 for emergency and extraordinary expenses to be expended under the direction of the Administrator for such purposes as he deems proper, and his determination thereon shall be final and conclusive; \$17,000,000; \$19,400,000. (Independent Offices Appropriation Act, 1958.)

Appropriated 1958, \$17,000,000

Estimate 1959, \$19,400,000

2. *Planning and intelligence.*—Planning assumptions are developed which reflect the capability of enemy weapons technology, and the likelihood and probable means of attack. Intelligence on modern weapons and enemy capability is obtained from Federal security agencies and evaluated for its implications in the development of long-range plans, and representation is provided on national security planning groups.

3. *Research and development.*—Important areas to be covered in 1959 include: Warning and communications; radiological defense; shelter design and testing; health and medical; and damage assessment. The research program is primarily carried out through contracts with other Federal agencies, universities, and industry. The program is administered under this appropriation; the

actual research contracts are financed under the "Research and development" appropriation.

4. *Warning and operations plans.*—A nationwide attack warning system extending from Air Force control centers to State and local control points is provided. The survival planning program is administered and operational plans are developed. Operational functions which should be delegated to other Federal agencies are identified, and the overall delegation program is coordinated. Natural disaster assistance is coordinated. As a result of a program begun in 1958 and planned for completion in 1959, the Federal Government will install and operate an attack warning system for the Washington, D. C., area. Funds are provided in 1959 for extending the attack warning system to additional key-target areas and to a nationwide network of radio stations, and for the procurement of equipment for rapid computation of warning times. Funds are also provided in 1959 for installation of an emergency radio network connecting the regional offices and national headquarters; and the installation of cryptographic facilities in regional offices.

5. *Resources and requirements.*—Operational plans are developed to manage post-attack resources including manpower, food, water, medicine, transportation, communications and essential physical facilities. Plans are designed to insure that essential civilian requirements are met, physical facilities essential to the basic economy are re-established, and the facilities and resources of Federal agencies, national relief organizations, and State and local governments are properly utilized.

6. *Education and training.*—Training methods, materials, and devices are developed and made available to State and local organizations. Information on weapon effects, and preventive measures that may be taken for survival are provided to the general public. Instructional and informational material covers such subjects as protection against fallout, conelrad, rumor and panic, mutual aid, shelter, emergency action, first aid, and police and fire training, all designed to provide the necessary knowledge for survival in the event of nuclear attack. In 1959, the Administration will expand the training program and will stress emergency planning by local, State, and Federal government, especially in the area of radiological defense. To accommodate the increased student load two new training schools will be opened in 1959 to be located near large population centers. About 15,500 people have completed one or more basic civil defense courses. An additional 1,700 persons will be trained in 1959.

7. *Specialized liaison.*—Educational and promotional activities are carried out with industry, labor, religious, and women's groups.

8. *General administration and stockpile operations.*—In addition to centralized administrative services, this activity also finances stockpile management. Determination of items to be stockpiled is made by other units within FCDA; costs of stockpile items are financed under the "Emergency supplies and equipment" appropriation; and the warehouses are operated by other Federal agencies.

9. *Field operations.*—Civil defense plans are made available to the States and localities through the seven regional offices. Close working relationships are developed with State and local officials. Field staff will be further strengthened in 1959 to provide greater assistance to States and localities, particularly in the area of radiological defense.

Material and equipment not normally available, or not present in quantities needed to cope with conditions caused by enemy attack, are stockpiled in strategic locations. These supplies and equipment are stored under the following criteria: (1) Minor storage locations of approximately 10,000 to 15,000 square feet are used for pre-positioning hospitals, medical supplies, and radiological instruments; (2) major storage locations of approximately 50,000 square feet are used in support of one or more target areas; and (3) general reserve storage locations of from 100,000 to 500,000 square feet are used in support of wide geographical regions. Government-owned and controlled installations are used where possible.

Through 1958, approximately \$219 million of supplies and equipment had been stockpiled in 43 warehouses.

During 1959, procurement of new items for the stockpile will be suspended pending the development of an integrated resource plan covering all essential civilian survival needs. Activities under this program will be directed primarily toward the reprocessing of overage blood plasma procured in prior years and an accelerated program to pre-position emergency hospitals procured through 1957.

1. *Survival planning.*—The program of studies leading to survival plans for States and metropolitan areas will be completed in 1958. Plans are being developed for 45 States, including the principal metropolitan areas.

2. *Research.*—This activity provides for increased research and development of civil defense systems and equipment through contracts with other Federal agencies, universities, industry, and other private institutions.

(a) *Warning and communications.*—This covers research and development in civil defense warning and communications equipment including voice sound systems, home warning devices, and low frequency radio transmission.

(b) *Radiological defense.*—The objective of this program is the development of a national radiological defense system which would include prediction, monitoring, shelter, countermeasures, reclamation procedures and decontamination.

(c) *Engineering and nuclear testing.*—This program provides for development of shelter designs for blast and fallout protection and the field testing of prototype shelters.

(d) *Health and medical.*—Research in health and medical problems such as mass immunization techniques, decontamination and protection of food and water supplies, blast biology studies, and shelter habitability studies is carried out.

(e) *Damage assessment.*—This provides for participation in national bomb damage assessment system.

Civil defense funds of States and their political subdivisions are matched for selected types of civil defense equipment.

During the years 1952 through 1957, Federal obligations under this program amounted to approximately \$65 million. All States have participated in the program. Of the total funds administered under the program, approximately 46% have been used to enable States and localities to establish adequate emergency warning and communications systems. Another 23% of these funds have been utilized for the purchase of medical supplies and equipment.

This fund finances the procurement of civil defense materials toward which contributions to the States are authorized on a matching fund basis. The fund is reimbursed for purchases from the Federal contributions appropriation and from funds provided by the States (65 Stat. 61).

Funds in the amount of \$5 million were appropriated in 1951 to establish the operating principal of this fund. In 1958, \$3.5 million of this principal, no longer required for operations, is being returned to the Treasury.

Proposed supplemental appropriation			26,000,000

Under proposed legislation, 1959.—Recommendations for amendment of the Federal Civil Defense Act were transmitted to the last session of the Congress. The proposals were substantially approved by the House of Representatives (H. R. 7576) and are now pending before the Senate. These proposals include a program for Federal matching of State and local civil defense personnel and administrative costs as well as provide for other needed improvements in the overall civil defense effort. A supplemental appropriation of \$26 million is anticipated, to be distributed among the various appropriations which will be augmented by the new legislation.

FEDERAL COAL MINE SAFETY BOARD OF REVIEW**Current authorizations:****SALARIES AND EXPENSES**

[Salaries and expenses:] For necessary expenses of the Federal Coal Mine Safety Board of Review, including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), \$70,000. (30 U. S. C. 475, 477; 66 Stat. 709; Department of the Interior and Related Agencies Appropriation Act, 1958.)

Coal-mine operators, affected by orders issued by Federal coal-mine inspectors, may appeal to the Board for annulment or revision of, and temporary relief from such orders. Hearings are held, applications determined, and findings and orders of the Board are made public.

During 1957, the Board heard and determined 3 cases requiring 7 days of hearings. It is estimated that there will be approximately 100 to 125 orders subject to appeal to the Board in 1958 and 1959.

The Federal Communications Commission regulates wire and radio communications in interstate and foreign commerce, including the rates and services of communications common carriers. A basic Commission objective is to achieve maximum benefits to the public from the use of the radio spectrum. Increases proposed for 1959 are primarily to handle workload resulting from expanding use of radio and television and technical advances in communications.

1. *Applied technical research and frequency allocation.*—This activity provides the Commission with the basic information for determining the best utilization of the radio spectrum.

2. *Broadcast activities.*—Standard broadcast (AM), frequency modulation (FM), Television (TV), and other related services are licensed and regulated by the Commission. Pertinent data are shown in the following table:

	1956 actual	1967 actual	1958 estimate	1959 estimate
Stations regulated ¹	4,352	4,647	4,915	5,233

FM.....	424	153	200	240
TV.....	266	425	415	465

¹ As of June 30 of each year.

3. *Safety and special radio services.*—Aviation, police, marine, amateur, and other nonbroadcast uses of radio are licensed and regulated. Pertinent data follows:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Stations regulated ¹	174,964	215,955	257,170	308,097
License applications received.....	170,506	186,025	204,601	228,487

¹ As of June 30 of each year—excluding amateur.

4. *Field engineering and monitoring activities.*—Field employees inspect radio stations, give operator examinations, collect engineering data, monitor the spectrum, and determine the location of lost ships, aircraft, and illegal sources of radio emission.

5. *Common carrier activities.*—The Commission regulates the rates and practices of communications common carriers; considers proposed mergers and acquisitions of properties, extensions and reductions in service, construction of facilities, and applications for use of radio in communication services.

6. *Executive, staff, and service activities.*—This activity includes adjudicatory functions of the Commission.

The Corporation insures accounts of depositors in insured banks up to \$10,000. As of June 30, 1957, the deposit insurance fund for the protection of depositors amounted to \$1.8 billion or 1.51% of all insured deposits, which amounted to approximately \$118.9 billion on that date. No tax funds are used in its operations. Its expenses are paid and the fund is accumulated from assessments paid by insured banks and from income on investments in obligations of the U. S. Treasury. However, the Corporation is authorized to borrow from the Treasury, not to exceed \$3 billion outstanding at any one time, as required for insurance purposes. No borrowings under this authorization have been made to date and none are anticipated in 1958 or 1959.

FEDERAL HOME LOAN BANK BOARD

The Federal Home Loan Bank Board formulates policies and supervises the operations of the 11 Federal home loan banks, the system of Federal savings and loan associations and the Federal Savings and Loan Insurance Corporation.

The expenditure programs of the Federal Home Loan Bank Board and the Federal Savings and Loan Insurance Corporation are presented as business-type budgets. Section 2 of Public Law 895, approved July 3, 1948, provides that all expenses of the Division of Examinations, Federal Home Loan Bank Board shall be considered nonadministrative. All expenses of the Division of Examinations are defrayed from fees charged against and collected from the institutions examined.

The estimated net administrative expenses of the Federal Home Loan Bank Board are paid from assessments against the 11 Federal home loan banks, the Division of Examinations, and the Federal Savings and Loan Insurance Corporation.

The three-member Board supervises the Federal home-loan bank system, the system of Federal savings and loan associations and the Federal Savings and Loan Insurance Corporation (12 U. S. C. 1421 et seq., 1461 et seq., and 1464 et seq.). Net administrative expenses of the Federal Home Loan Bank Board are paid from assessments against the 11 Federal home-loan banks, the Division of Examinations, and the Federal Savings and Loan Insurance Corporation.

Budget program.—The Board's budget is based on six activities.

1. *Examination and supervision of Federal home-loan banks.*—The Board supervises and examines the operations of the Federal home-loan banks.

2. *Supervision of Federal and State-chartered institutions.*—The financial condition and operations of each insured institution is analyzed and corrective action is instituted when warranted. Supervision of insured institutions operating under State charter is carried on, cooperatively, under arrangements made with the respective State authorities.

3. *Chartering savings and loan associations.*—Federal savings and loan associations are chartered and regulated. In addition, applications of State-chartered associations

for conversion into Federal savings and loan associations are examined.

4. *Examining savings and loan associations.*—Supervisory examinations are made of Federal savings and loan associations, State-chartered associations insured by the Federal Savings and Loan Insurance Corporation, and such uninsured member institutions of the Federal home loan bank system as are not examined by State examiners. Audits are also made of over 80% of all insured associations. Examinations are also made of institutions applying for insurance of accounts and for conversion from a State to a Federal charter when required by the Board. The costs of examinations and audits are assessed against the institutions examined.

5. *Executive direction and staff services.*—This includes formulation of basic policy and the furnishing of staff services that are common to the Board and the insurance corporation.

6. *Administrative services.*—These consist of auditing; accounting; budgetary and financial reporting; internal budget control; fiscal organization and management; and general housekeeping and common operating services, including printing and reproduction work.

The amounts shown in the schedules for the above activities include administrative expenses under annual limitation; nonadministrative expenses under a separate limitation; and certain additional expenses not under limitation. Administrative expenses are estimated to increase from \$1,250,000 to \$1,600,000 reflecting staff increases to meet increasing workload and provision for the payment of rent for the use of Government-owned space. Nonadministrative expenses covering the expenses of examining savings and loan associations are discussed separately below.

Relation of costs to obligations.—The relationship is derived by year-end balances of selected resources as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year:				
Inventories:				
Supplies.....	\$8,210	\$9,191	\$10,100	\$11,110
Postage meter.....	2,555	1,833	1,900	1,900
Unpaid undelivered orders.....	5,451	4,379	5,000	5,500
Total selected resources at end of year.....	16,216	15,403	17,000	18,510
Selected resources at start of year (—).....		—16,216	—15,403	—17,000
Costs financed from obligations of other years, net (—)		—813		
Obligations incurred for costs of other years, net.....			1,597	1,510

Financial condition.—The Board is not incorporated, and has no capital stock. Its assets consist of cash on deposit with the Treasurer of the United States and accounts receivable for the services which it renders. Its liabilities consist essentially of accounts payable.

The division conducts regular periodic and special supervisory examinations of all Federal savings and loan associations, of State-chartered savings and loan associations and other institutions of the savings and loan type which are insured by the Federal Savings and Loan Insurance Corporation, and of noninsured member institutions of the Federal Home Loan Bank System that are not subject to State supervision. The division also examines and analyzes the financial condition of institutions which apply for membership in the system, for insurance of accounts or for conversion from a State to a Federal charter. The institutions examined bear the costs of examination, and the fees charged therefor are calculated to defray all of the operating expenses of the division.

The following table reflects the work of the division:

The Federal home loan banks, together with the building and loan associations and similar institutions which are members of the banks, constitute the Federal home loan bank system, are designed to stabilize and strengthen institutions promoting private thrift and individual home ownership.

The 11 Federal home loan banks obtain their funds from capital stock, issuance of their own obligations, and deposits of member institutions. The capital stock of the banks consists entirely of subscriptions of member institutions. Authority to borrow from the Treasury in the amount of \$1 billion is provided in 12 U. S. C. 1431 (64 Stat. 257). No borrowings have been made to date and none is anticipated in 1959.

The Federal Savings and Loan Insurance Corporation is authorized by title IV of the National Housing Act (12 U. S. C. 1724 et seq.) to insure savings up to \$10,000 in all savings and loan associations which apply and are approved for insurance. The Corporation also may protect investors by extending financial aid to institutions in difficulty through loans, cash grants, or purchases of assets. When an insured institution declared in default is a Federal savings and loan association, the Corporation is appointed as receiver for the purpose of liquidation. The Corporation also may act as receiver for State-chartered institutions declared in default if appointment is tendered by State authority.

Revenue from insurance premiums and interest on investments has been sufficient to meet all insurance losses, operating expenses, dividends on capital stock, and to establish a reserve for insurance losses of \$229.5 million as of June 30, 1957. The Corporation has authority to borrow up to \$750 million from Treasury, but no loans have ever been required. Since the time and size of expenditures for the prevention of default and payment of insurance are unpredictable, estimates of these expenditures are omitted from the financial statements.

The Corporation operates under the supervision and direction of the Federal Home Loan Bank Board, which provides certain administrative services and conducts the examination and supervision of insured institutions. Although the cost of examinations are paid by the institutions examined, the Corporation is assessed for its share of the costs of all services rendered by the Board.

[Dollars in thousands]

	1957 actual	1958 estimate	1959 estimate
Number of insured institutions	3,723	3,850	3,980
Number of insured savers	18,806,000	21,000,000	23,300,000
Insured liability	\$36,704,000	\$41,600,000	\$46,700,000
Assets of insured members	\$42,068,000	\$47,300,000	\$52,700,000
Reserves and undivided profits of insured institutions	\$2,813,000	\$3,200,000	\$3,700,000
Corporation's reserve for insurance losses	\$229,497	\$265,967	\$307,437
Percent of authorization to total income	1.8	1.7	1.7

Budget program.—The budget program comprises five activities.

1. **Underwriting.**—This activity constitutes an analysis and evaluation of the insurance risk in connection with applications for insurance of accounts and other applications submitted pursuant to regulatory requirements. The assets of insured institutions have increased \$10.5 billion or 33.3% in the last 2 years. The increasing interest in insurance of accounts on the part of uninsured institutions, plus the anticipated rate of growth, will in-

FEDERAL HOME LOAN BANK BOARD—Continued**Public enterprise funds—Continued****FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION
FUND—Continued**

crease the insured liability of the Corporation to an estimated \$46.7 billion by June 30, 1959, as compared to \$36.7 billion on June 30, 1957.

2. *Prevention of default and payment of insurance.*—The Corporation not only pays insurance in cases of defaulted institutions, but prevents default wherever possible. Through June 30, 1957, 38 institutions have needed financial assistance from the Corporation. Cash grants in the net amount of \$4.9 million have been made to 28 institutions to prevent default; a grant to 1 institution has been authorized but not disbursed; the assets of 1 institution were purchased and liquidated without loss; certain assets of 1 institution were purchased and are in process of liquidation; and 7 institutions with aggregate assets of \$9.2 million have been placed in liquidation and insurance paid. Total losses since organization amount to \$5.2 million.

3. *Analysis of operations.*—The Corporation maintains a current analysis of the financial condition of member institutions, the flow of savings, and the character and volume of mortgage lending, including selective review of geographical or community areas and phases of operations and certain analyses of trends in the field of thrift and home mortgage finance.

4. *Executive direction and fiscal and other administrative services.*—This covers all fiscal and other administrative services as well as management and direction.

5. *Payment to Federal Home Loan Bank Board for services and facilities.*—The Corporation currently subscribes 41% of the administrative expenses of the Federal Home Loan Bank Board in return for services and facilities provided by the Board.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year:				
Deferred charges.....	\$886	\$1,853	\$1,353	\$953
Accrued annual leave.....	89,787	84,629	90,000	85,000
Unpaid undelivered orders.....		3,245		
Total selected resources at end of year.....	90,673	89,727	91,353	85,953
Selected resources at start of year (—).....		—90,673	—89,727	—91,353
Costs financed from obligations of other years, net (—)....		—946		—5,400
Obligations incurred for costs of other years, net.....			1,626	

Financing.—The Corporation is retiring its original capital stock held by the Secretary of the Treasury at par in amounts equivalent to 50% of annual net income. Of the \$100 million of original capital stock, \$75.2 million has been retired, and with an additional payment of approximately \$18.8 million in 1959 the outstanding stock will be reduced to \$6.0 million. Funds for the retirement of capital stock are obtained through the redemption of United States securities held by the Corporation.

Through June 30, 1957, the Corporation has paid \$42.2 million in lieu of dividends on capital stock. It is estimated that additional payments will be made to the Secretary of the Treasury of \$1.1 million in 1958 and \$0.7 million in 1959.

Operating results and financial condition.—Revenue of the Corporation consists primarily of insurance premiums, admission fees, and interest on investments in Government obligations. Total revenue, since 1934, of \$287,052,953, has been applied as follows:

	Percent	Amount
Expense.....	3.9	\$11,198,346
Insurance losses.....	1.8	5,241,369
Return on capital stock.....	14.7	42,210,212
Legal reserve.....	79.6	228,403,026

Operating expenses for 1959 are estimated at \$1,400,400 consisting primarily of administrative expenses for the Corporation of \$720,000 and \$656,000 for services rendered by the Federal Home Loan Bank Board.

Net income before payment of a return on capital stock for 1959 is expected to be increased by \$9.8 million or 30.3% above the net income for 1957. After providing for an interest payment in lieu of dividends on the capital stock of \$0.7 million for 1959, at a rate determined by the Secretary of the Treasury, the balance of the net income, \$41.4 million, will be retained by the Corporation and credited to its reserve for insurance losses.

The Corporation is required by law to accumulate a reserve of 5% of insured accounts and creditor obligations of insured institutions before collection of premiums may be discontinued. It is estimated that this statutory requirement will amount to \$2.3 billion by June 30, 1959. The insurance reserve as of that date is expected to reach \$307 million or 0.66% of an estimated insured liability of \$46.7 billion.

HOME OWNERS' LOAN CORPORATION FUND

The Corporation was created to provide credit facilities to refinance the mortgages of destitute urban home owners. Its lending authority expired on June 12, 1936, and since that time the Corporation has been dissolved. Liabilities, representing matured bonds held by the public together with accrued interest thereon, totaled \$565,648 at the end of 1957 and are estimated to be reduced to \$435,648 by the end of 1959.

Appropriation (new obligational authority).....	3,305,000	3,550,000	3,695,000

The Service assists labor and management in mediation and prevention of disputes affecting industries engaged in interstate commerce and defense production other than air and rail transportation.

1. *Mediation and conciliation of labor disputes.*—During the last year the number of disputes brought to the attention of the Service was approximately 78,000. About 19,000 were assigned for initial inquiry to determine the progress of the parties toward voluntary settlement and need for Federal mediation assistance. Over 13,000 disputes were mediated and closed during the year. While this was less than the 14,000 closed the previous year, economic and labor conditions indicate that the number of disputes is expected to increase in the next year. It is

also anticipated that the amount of time devoted to individual disputes will also increase.

2. *Presidential boards of inquiry.*—Boards of inquiry may be appointed by the President when, in his judgment, an existing or threatened work stoppage in an essential industry will imperil the national health or safety.

Annual receipts from licenses.....	\$2,091,323	\$1,653,000	\$1,845,000

2. *Regulation and surveys, electric power industry.*—Regulation covers the transmission and sale for resale of electric energy in interstate commerce and the rates, accounts, depreciation practices, certain security issues, disposition of properties, mergers, and the interconnection and coordination of facilities of those public utilities subject to the Commission's jurisdiction. Statistics about the electric utility industry are gathered and published. Pertinent data are:

[By calendar year]

Description	1956 actual	1957 estimate	1958 estimate
Number of public utilities regulated.....	200	200	200
Operating revenues of regulated utilities (in millions).....	\$6,800	\$7,400	\$8,000
Number of utilities reporting for statistical purposes.....	1,300	1,300	1,300
Operating revenues of reporting utilities (in millions).....	\$9,600	\$10,300	\$11,000

3. *Regulation and surveys, natural gas industry.*—Regulation covers the transportation and sale for resale of natural gas in interstate commerce, and the rates, accounts, and depreciation and depletion practices. Certificates of public convenience and necessity are issued to those natural-gas companies subject to the jurisdiction of the Commission. Statistics about the natural-gas industry are gathered and published. There were 107 natural-gas pipeline companies, with operating revenues of \$2.9 billion regulated in calendar year 1956 and approximately 10,000 independent producers. The same number of companies is estimated in 1957 and 1958, the operating revenues estimated for pipeline companies in billions to be \$3.2 in 1957 and \$3.5 in 1958. Other pertinent data are:

Description	1957 actual	1958 estimate	1959 estimate
Certificate applications filed by pipeline companies.....	511	500	500
Certificate applications filed by independent producers.....	1,208	1,200	1,200
Pipeline gas rate cases handled.....	74	83	91
Independent producer gas rate cases handled.....	441	609	669
Total rate filings received.....	7,800	6,900	7,600

4. *Federal project investigation and regulation.*—Of a potential 116 million kilowatts of hydroelectric power in the United States, 26.5 million kilowatts had been developed by Federal agencies and non-Federal interests as of December 31, 1956.

Studies are made of proposed Federal river development projects to determine possibilities for conservation, development, and utilization of potential power resources. Review and approval are required of certain proposed rates for sale of power from Federal projects. Information on the power features of river development projects is furnished to Congress and to Federal and State agencies. In 1957, 103 studies were carried on and it is estimated that there will be 105 in 1958 and 95 in 1959.

5. *International Joint Commission.*—The Commission participates in the International Joint Commission, which adjudicates controversies between the Governments or nationals of the United States and Canada over boundary waters and waters that cross the boundary.

A supplemental appropriation is anticipated for 1958 and appears below.

The Commission has the duty of preserving free competitive enterprise through prevention of monopolistic and unfair trade.

1. *Antimonopoly.*—All types of monopolistic restrictions, including price-fixing conspiracies, boycotting, price discriminations, and illegal mergers and acquisitions are corrected; economic criteria are brought to bear on monopoly problems; and supervision is provided over the operations of associations of American exporters engaged solely in export trade.

2. *Antideceptive practices.*—False and misleading advertising and other deceptive practices are prevented by corrective action, including the affirmative aid of voluntary trade-practice conferences; business and the public are protected from misbranding and nondisclosure of fiber content of manufactured wool products; consumers and merchants are protected from unfair practices with respect to furs and fur products; and the public is protected from dangers inherent in flammable fabrics. In 1959 additional funds are required to provide additional clinical and laboratory testing of drugs, medicines, therapeutic devices, etc.

3. *Executive direction and management.*—These also include the adjudicatory functions of the Commission.

The Foreign Claims Settlement Commission is responsible for the settlement of claims authorized by the War Claims and the International Claims Settlement Acts.

1. *Administration and settlement of—(a) International claims.*—Claims of United States nationals are authorized against Bulgaria, Hungary, Rumania, Italy, and the Soviet Union, including claims for losses arising from war damage, nationalization, and default on governmental debts. Funds totaling about \$45 million derived from the vesting of blocked assets in the cases of Bulgaria, Hungary, and Rumania, and from settlements in the cases of Italy and the Soviet Union will become available as trust funds from which the Treasury will pay such claims. A 5% deduction will be made as an offset against appropriations for administrative expenses for the 4 years of the program. As of June 30, 1957, a total of 2,694 claims had been decided. The balance are to be completed as follows:

	1957 actual	1958	1959	Total	Total amount claimed
Soviet.....	1,620	1,460	1,050	4,130	\$3,583,259,924
Italian.....	239	1,486	521	2,246	28,377,880
Bulgarian.....	146	145	100	391	26,092,799
Hungarian.....	452	673	1,600	2,725	228,111,735
Rumanian.....	237	236	600	1,073	267,466,622
Total.....	2,694	4,000	3,871	10,565	4,133,308,960

(c) *World War II claims.*—The settlement of claims of religious organizations not previously compensable under the War Claims Act was authorized August 6, 1956. Claimants have filed 109 claims asking recoveries totaling \$29,854,337. Final settlements will be made in 1958. Liquidation of this and previous programs under the War Claims Act will continue during 1959 financed by reimbursement from the war claims fund.

2. *Review and development of claims programs.*—Operations included in the President's Reorganization Plan No. 1 of 1954 but not immediately embraced within active claims programs are set out now as a separate activity not charged to specific programs. These involve research, reports, documentation, and similar functions responsive to the requirements of the Congress and of other agencies of the Government concerning past, present, and proposed claims programs and problems.

The General Accounting Office is responsible to the Congress for conducting independent reviews, audits, and investigations of the management and control of the financial transactions of the Government; for the rendition of legal decisions relating to Government fiscal matters; for developing, prescribing, and evaluating accounting systems on a governmentwide basis; for the settlement of certain claims for and against the Government; and for advising and assisting the Congress and Government agencies on matters relating to public funds. During 1957, refunds and collections in the amount of \$64,871,911 were made through these activities.

1-3. *Office of the Comptroller General.*—Executive management of the General Accounting Office is carried out by the Comptroller General who is assisted by the Assistant Comptroller General and staff assistants.

4. *Office of legislative liaison.*—This office assists the Comptroller General in coordinating the various activities of the General Accounting Office with the Congress, its committees, and individual Members.

6. *Claims division.*—All claims by or against the United States are settled in this division except those for transportation items and claims wherein exclusive jurisdiction is conferred by law upon another agency or the courts.

7. *Transportation division.*—This division audits freight and passenger transportation payments for account of the United States and settles claims involving transportation charges. The transportation audit recovered \$47,654,842 during 1957.

9. *Office of the general counsel.*—In addition to preparing decisions and reports on the legality or propriety of proposed obligations and expenditures of the Government, the general counsel and his staff participate in conferences with legislative and administrative officials of the Government on legal matters of a fiscal nature, the sufficiency of proposed legislation, the desirability of new legislation for particular purposes, and render all other required legal services.

10. *Accounting and auditing policy staff.*—This staff develops accounting policy for observance by each agency and for the guidance of audit work performed by General Accounting Office auditors; develops internal auditing objectives and standards for guidance of the executive agencies; reviews and develops, in cooperation with the Treasury Department and the Bureau of the Budget, central accounting and financial reporting processes; reviews agency accounting systems; develops and directs a program of application of modern electronic systems and other advanced methods to accounting operations of the Government; and assists and advises Congress on accounting and auditing policy matters.

11. *Office of staff management.*—This function involves (a) a recruiting program to obtain a high quality professional staff of accountants, auditors, and investigators; (b) a training and professional career development program; (c) exercising, in cooperation with the accounting and auditing divisions, general control over the assignment of the staff; and (d) securing appropriate recognition of the professional character of the accounting and auditing work of the General Accounting Office.

12. *Defense accounting and auditing division.*—This division performs the accounting, auditing, and investigative functions of the General Accounting Office in the Department of Defense. These functions involve the development, review, and evaluation of accounting systems; the evaluation of the performance of the Military Establishment in discharging its financial obligations; and the conduct of investigations of matters relating to the handling of public funds.

13. *Civil accounting and auditing division.*—This division performs the accounting, auditing, and investigative functions of the General Accounting Office in all departments and agencies of the Federal Government, other than those assigned to the defense accounting and auditing division. These functions involve the development, review, and evaluation of accounting systems; the evaluation of the performance of the civil departments and agencies in discharging their financial obligations; and the conducting of investigations of matters relating to the handling of public funds.

14. *Field operations division.*—This division, through 19 regional offices, performs all assigned accounting, auditing, and investigative functions outside the metropolitan area of Washington, D. C.

15. *European branch.*—This branch, with headquarters in Paris, France, performs General Accounting Office functions as they relate to U. S. Government operations in the European area, North Africa, and the Near East. Sub-offices are located in London, England; Frankfurt, Germany; Rome, Italy; and Madrid, Spain.

16. *Far East branch.*—This branch, with headquarters in Tokyo, Japan, performs General Accounting Office functions as they relate to U. S. Government operations in the Far East.

17. *Relation of cost to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year: Inventories and items on order:				
Stores (goods unconsumed by projects) . . .	\$75,308	\$83,430	\$83,480	\$83,480

INDIAN CLAIMS COMMISSION

Current authorizations:

SALARIES AND EXPENSES

[Salaries and expenses:] For expenses necessary to carry out the purposes of the Act of August 13, 1946 (25 U. S. C. 70), creating an Indian Claims Commission, \$177,700, of which not to exceed \$3,600 shall be available for expenses of travel. (71 Stat. 269; Department of the Interior and Related Agencies Appropriation Act, 1958.)

Appropriated 1958, **\$177,700** Estimate 1959, **\$177,700**

Adjudication of Indian claims (total obligations).....	\$130,876	\$167,000	\$177,700
Financing:			
Unobligated balance no longer available.....	1,424	10,700	-----
Appropriation (new obligational authority).....	132,300	177,700	177,700

This independent Commission of three members was created to hear and adjudicate claims, existing before August 13, 1946, of American Indian tribes, bands, or other identifiable groups of Indians residing within the territorial limits of the United States or Alaska. Of the 852 claims filed, 124 have been completed. Payments of awards are dependent upon subsequent appropriations made through "Claims, judgments, and private relief acts" appropriation to the Treasury Department. Through August 1957 these payments totaled \$10,228,348. The existence of the Commission was extended to April 10, 1962, by Public Law 767, approved July 24, 1956.

Appropriation (new obligational authority).....	14,879,696	16,750,000	17,500,000

The Commission regulates carriers engaged in interstate and foreign commerce, including railroads, motor carriers, water carriers, and pipelines.

The increase is requested to handle the continually increasing number of applications for motor-carrier operating authority, improvement in the development of economic and statistical data necessary to regulatory activities, and to provide more adequate level of compliance pertaining to the regulation of railroads and motor carriers.

1. *Regulation of carriers' rates, practices, operating authorities, and finance.*—This work consists of regulating rates, granting operating authorities, approving abandonments of and extensions of railroad lines, financial reorganizations, and rate agreements between carriers.

2. *Compliance.*—Statutes and regulations affecting transportation and carriers are enforced; examinations are made to ascertain that motor carriers and freight forwarders are adequately insured; and surveys are conducted of motor-carrier operating practices to reduce accidents and to promote safety on the public highways.

3. *Supervision and analysis of carrier accounting and statistics.*—Uniform systems of accounts are formulated and policed for all types of carriers; studies are made of operating costs for use in ratemaking; and data maintained for use in making valuations of railroad and pipeline properties and setting up accounts of reorganized companies. Statistics are compiled from carriers' reports and studies are made of operating, financial, and other problems of transportation agencies.

4. *Supervision and interpretation of tariffs.*—Common and contract carriers' tariffs are examined for compliance with Commission's tariff circular rules. Authority is granted to publish rates on less-than-statutory notice, and informal complaints and carriers' requests to pay reparation are handled.

5. *Railroad safety and car service.*—Field staff of the Commission work with carriers and shippers in handling problems of safety and efficient use of equipment in the transportation of passengers and property by railroad. This work includes inspection of safety appliances and signal installations, inspection of locomotives, and enforcing compliance with car-service regulations designed to increase the utilization of railroad rolling stock.

6. *Defense mobilization.*—Under delegation by the Director of Defense Mobilization, emergency mobilization plans and programs for domestic surface transportation, storage, and port facilities are formulated.

7. *Executive and advisory functions.*—These also include the quasi-judicial and quasi-legislative functions of the Commission.

INTERSTATE COMMISSION ON THE POTOMAC RIVER BASIN

Current authorizations:

CONTRIBUTION TO INTERSTATE COMMISSION ON THE POTOMAC RIVER BASIN

【Contribution to Interstate Commission on the Potomac River Basin:】 To enable the Secretary of the Treasury to pay in advance to the Interstate Commission on the Potomac River Basin the Federal contribution toward the expenses of the Commission during the current fiscal year in the administration of its business in the conservancy district established pursuant to the Act of July 11, 1940 (54 Stat. 748), \$5,000. (*Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1958.*)

Appropriated 1958, \$5,000

Estimate 1959, \$5,000

Program and Financing

Appropriation (new obligational authority).....	5,000	5,000	5,000

The Interstate Commission on the Potomac River Basin was created by compact among the four States in the basin, the District of Columbia, and the Federal Government to abate water pollution.

This appropriation represents the Federal Government's pro rata share of the general expenses of the Commission.

The Commission also receives financial assistance from the Public Health Service under the program of grants for water pollution control activities.

NATIONAL ADVISORY COMMITTEE FOR AERONAUTICS—Continued

Current authorizations—Continued

SALARIES AND EXPENSES—Continued

Research and development conducted by the Committee (National Advisory Committee for Aeronautics) is directed at providing the scientific and engineering data necessary for continued improvement in the design and performance of manned aircraft, ballistic and other guided missiles, and their powerplants. The Committee is also conducting investigations concerned with satellites and other space technology. Military problems, including specific problems in the development of particular military projects, are of special concern, and the Committee's program is closely coordinated with related programs of the Department of Defense.

The estimates for 1959 provide for a major augmentation of the Committee's research operations in order to meet the increasingly complex problems of flight under a wide range of as yet little understood conditions. Supplemental funds are being requested for 1958 in order to permit immediate initiation of this expanded effort and are shown at the end of this chapter under the heading "Proposed for later transmission."

The Committee's activities are carried on mainly at its 3 laboratories and 2 flight stations and involve actual flight tests of piloted and pilotless aircraft, experimentation with the aid of wind tunnels and other specialized equipment, and theoretical studies.

1. *Aerodynamic research.*—Research in this field is directed at developing the design characteristics of aircraft and missiles of increased efficiency. Although the problems studied cover flight under a wide variety of conditions (including the relatively low-speed flight of vertical and short-take-off aircraft), increased emphasis has been placed in recent years on flight of manned and unmanned vehicles at hypersonic speeds.

2. *Powerplants research.*—Research on propulsion systems and fuels is conducted to increase the speed, altitude, flight duration, and payload capabilities of aircraft, missiles, and possible space vehicles. Emphasis is currently being placed on turbojet engines of advanced capabilities, rocket engines of new design and utilizing higher energy fuels, and investigation of unconventional systems for propulsion in space.

3. *Aircraft structural research.*—This research, which is concerned with the ability of aircraft, missiles, and possible space vehicles to withstand aerodynamic stresses, is especially concerned with aero-thermo-elastic problems resulting from the temperatures and heating rates encountered at high speeds.

4. *Operating problems research.*—Research in this field is concerned with the study of problems of transport aviation such as turbulence, fire, icing, and noise; and also with safety problems associated with flight beyond the atmosphere.

5. *Headquarters management and coordination.*—This activity provides for central direction of the research programs at all laboratories and research stations.

6. *Relation of costs to obligations.*—The relationship between operating costs and operating program (obligations) is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year:				
Inventories and items on order:				
Stores (goods unconsumed by projects).....	\$1,222,676	\$1,240,878	\$1,284,000	\$1,332,000

Appropriation (new obligational authority).....			14,000,000	35,000,000	26,220,000				

This appropriation provides for the modernization of National Advisory Committee for Aeronautics research and supporting facilities and for the construction of certain additional facilities for conducting research beyond the capabilities of existing equipment.

1. *Langley Aeronautical Laboratory.*—The 1959 estimates provide for the construction of one major new facility for high-temperature research on structures and for utility improvements. Projects against which costs will be incurred in 1959 will be primarily from prior year programs. Additional facilities at this location are being requested in 1958 and are shown at the end of this chapter under the heading "Proposed for later transmission."

2. *Ames Aeronautical Laboratory.*—The 1959 program includes 2 new facilities for hypersonic research and modifications to 1 existing facility. Projects against which costs will be incurred in 1959 will be primarily from prior year programs.

3. *Lewis Flight Propulsion Laboratory.*—Included in the 1959 program are 2 new facilities for hypersonic research and modifications to 4 existing facilities. Projects against which costs will be incurred in 1959 will be primarily from prior year programs.

4. *High-Speed Flight Station.*—Final payments were completed in 1957 for the flight-test facility constructed at this station.

5. *Pilotless Aircraft Station.*—The 1959 program includes certain plant improvements.

6. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year (inventories and items on order):				
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received).....	\$11,032,279	\$18,925,630	\$22,881,343	\$28,831,343
Advances (payments for goods and services on order not yet received).....	175,826	55,713	100,000	100,000

Appropriation (new obligational authority).....	8,951,500	9,384,800	9,985,000

The Board resolves representation disputes and remedies unfair labor practices by employers and unions.

1. *Field investigation.*—Charges of unfair labor practices and petitions for elections to resolve representation disputes are investigated in the regional office in which they are filed. About 87% of the unfair labor practice cases and 77% of the election cases are closed by settlement, dismissal, or withdrawal without the need for public hearing or further formal action. The balance is prepared for public hearing.

Filings of unfair labor practice charges have been increasing and will result in an increase in number of cases

pending at the end of 1958 as compared to the number pending at the end of 1957. Additional funds are provided in 1959 to reduce the pending caseload during 1959 to the 1957 end-of-year level.

2. *Trial examiner hearing.*—Trial examiners conduct public hearings as the basis of findings and recommendations in intermediate reports. In 1957, there were 238 reports issued; for 1958, the estimate is 285; for 1959, 325.

3. *Board adjudication.*—In unfair labor practice cases, the trial examiner's intermediate report becomes the Board order, if no exceptions are filed within 20 days. Exceptions are filed to approximately 80% of these reports and are referred to the Board for decision. In contested representation cases the Board may either order an election to determine the choice of bargaining representative or dismiss the case.

DECISIONS ISSUED BY THE BOARD

	1957 actual	1958 estimate	1959 estimate
Unfair labor practice.....	154	225	350
Representation.....	1,474	1,400	1,375

4. *Securing of compliance with Board orders.*—If the parties do not voluntarily comply with orders, the Board must request the courts to enforce its decision. Most contested decisions involve unfair labor practices. In 1957, there were 54 Board decisions of all kinds requiring court litigation; for 1958, the estimate is 78; and for 1959, 85.

Railroad employee grievances resulting from application of collective bargaining contracts may be brought for settlement to the 36-man board composed of 4 divisions. Each division has an equal number of carrier and union representatives paid by the parties and handles the grievances of a particular type of employee. The appropriation provides clerical assistance to the Board and neutral referees to sit with divisions of the Board when they are deadlocked.

The Foundation supports basic research, education in the sciences, and the interchange of foreign and domestic scientific information. It is also responsible for developing and encouraging pursuit of a national policy for the promotion of basic research and education in the sciences, and for recommending to the President policies for strengthening the Nation's scientific effort. The increased appropriation will provide for support of a greater percentage of meritorious scientific research proposals; for additional facilities for fundamental scientific research; for making the results of research conducted in the United States and abroad more readily available within the scientific community; and particularly for increased emphasis on programs to improve science teaching and to increase the number of highly qualified research scientists in this country. A supplemental of \$10 million is anticipated in 1958.

1. *Support of science*—(a) *Grants and contracts*.—The Foundation supports basic research projects, principally in institutions of higher learning.

GRANTS FOR SUPPORT OF BASIC RESEARCH PROJECTS

	1957 actual	1958 estimate	1959 estimate
Number of grants awarded.....	963	975	2,400

It also supports (1) basic research facilities at universities and other nonprofit institutions in such fields as astronomy, nuclear physics, electronic computation, and biology, (2) collecting, translating, cataloging, and disseminating information on the results of scientific research, and developing improved methods for the exchange of scientific data, and (3) studies of the status of research in the United States and foreign countries.

(b) *Program development, operation and evaluation*.—Includes costs related to developing, administering, and evaluating the above programs in support of science.

2. *Support of scientific manpower*—(a) *Grants and contracts*.—The Foundation supports (1) fellowships to graduate science students, college science faculty fellowships, summer fellowships for high school science and mathematics teachers, and summer study programs for college teaching assistants; (2) summer and academic-year institutes for the training of high school and college teachers of science and mathematics; (3) projects directed toward the improvement of high school and college science and mathematics course content; (4) activities to stimulate interest in and secure improvement of teaching and training at high school and college levels; (5) cooperative

science education activities with scientists and educators of other nations; and (6) maintenance of the National Register of Scientific and Technical Personnel, and studies relating to supply, demand, and utilization of scientific manpower.

(b) *Program development, operation and evaluation*.—Includes costs related to developing, administering, and evaluating the above programs in support of scientific manpower.

Appropriation (new obligational authority)			

This appropriation supports the United States program for the International Geophysical Year, a worldwide scientific undertaking involving concurrent research by more than 50 nations, beginning in 1957. The results of this research ultimately will benefit our international relations, national defense, agriculture, commerce, and industry. This undertaking involves securing and sharing on a multilateral basis scientific data which will assist our own technological advancement in such fields as weather forecasting and control, radio communication, navigation, and upper atmospheric flight.

1. *Geophysical research related to the earth's atmosphere—(a) Basic atmospheric research.*—Research into phenomena observable in the upper atmosphere, including studies of the aurora and airglow, cosmic rays, ionospheric physics, meteorology, and solar activity.

(b) *Earth satellite exploration of the upper atmosphere.*—Sustained observations of scientific phenomena in the region beyond the earth's atmosphere by means of recording and transmitting instruments contained in unmanned earth-circling satellites launched by rocket devices.

2. *Geophysical research related to the planet earth.*—Research into phenomena originating on or within the earth including studies of geomagnetism, glaciology, oceanography, seismology, gravity, and longitude and latitude measurements.

3. *Related scientific support activities.*—Scientific support activities related to the foregoing activities, such as preparation of maps of the Antarctic, communication networks, rocketry, and the center for storage and maintenance of scientific data gathered under the program are included in this activity.

The Oliver Wendell Holmes devise fund was established by 69 Stat. 533 to (1) prepare a history of the Supreme Court of the United States and, if deemed advisable, (2) finance an annual lecture or series of lectures and (3) publish a memorial volume of Justice Holmes' writings.

Interest on the fund, and the principal if necessary, are available for these purposes. The current program is devoted primarily to the preparation of the history of the Supreme Court.

The Board administers the railroad retirement system, financed by employer and employee taxes. This is for administrative expenses of the Board in the operation of this program, and is derived from the railroad retirement trust fund. This system provides annuities for age and disability and benefits for survivors.

1. *Maintenance of earnings accounts.*—Eligibility for and the amount of benefits are based on individual accounts of compensation. This workload fluctuates with the level of employment in the railroad industry, rates of turnover, and similar factors. The costs are shared on a measured basis with the railroad unemployment insurance program.

2. *Processing claims.*—Claims for annuities and benefits are adjudicated and certified for initial payment. The number tends to increase gradually each year, as more railroad workers, their spouses or survivors become entitled. Regular claims dispositions were 133,000 in 1957 and are estimated at 140,200 and 147,800 in 1958 and 1959.

3. *Maintenance of beneficiary rolls.*—Benefit payments must be authorized each month for those persons on the rolls who continue to remain eligible. The number of monthly benefit payments were 7,647,638 in 1957 and are estimated at 8,129,000 and 8,478,000 in 1958 and 1959 and will continue to increase annually.

4. *Hearings and appeals.*—Individuals whose claims for annuities or benefits are disallowed or who dispute the award have the right of appeal. Appeals dispositions were 201 in 1957 and are estimated at 190 in 1958 and 1959.

5. *Actuarial services.*—Actuarial studies and estimates are required by the Railroad Retirement Act to determine the adequacy of the tax rate to establish and maintain a sufficient reserve to meet all future payments.

6. *Administration.*—Except for administrative activities of the retirement program exclusively, the cost of administration is shared between the retirement and the railroad unemployment insurance programs on a measured basis.

The Board conducts renegotiation with contractors to eliminate excessive profits in connection with procurement under the national defense program. All contractors and subcontractors who have any business subject to the act are required to file with the Board. The Board has recovered \$610,330,855 in excessive profits from the date of its establishment through June 30, 1957. The act establishing this requirement expires December 31, 1958, but this will have no effect on the budget of the agency until later years.

1. *Executive direction.*—The Board is responsible for final action in all cases. This includes screening all filings involving renegotiable business over \$1 million and requests for exemption.

2. *Staff operations.*—The headquarters staff furnishes technical advice and assistance to the Board and regional organization.

3. *Renegotiation operations (field).*—The three regional boards conduct renegotiation proceedings and make initial determinations. The field boards make the excessive profit determination in all cases involving less than \$800,000 of renegotiable profits; however, this determination may be appealed to the statutory board. All determinations in cases involving more than \$800,000 renegotiable profits are reviewed by the statutory board.

The Saint Lawrence Seaway Development Corporation, a wholly Government-owned enterprise, is responsible for the construction, operation, and maintenance of that part of the Saint Lawrence Seaway within the territorial limits of the United States (33 U. S. C. 981). Completion of the United States section of the seaway and the related navigation improvements being provided by the Saint Lawrence Seaway Authority of Canada, in conjunction with the power-development works being provided by the Power Authority of the State of New York and the Hydro-Electric Power Commission of Ontario, will afford a 27-foot navigation channel from Lake Erie to Montreal.

Budget program—Capital outlay.—The Corporation's construction program consists of a 10-mile canal, two locks, and navigation channels in the 46-mile International Rapids section of the Saint Lawrence River between Ogdensburg and Massena, and certain channel and related navigation works in the 68-mile Thousand Islands section between Lake Ontario and Ogdensburg.

The total construction cost of the United States share of the seaway, excluding interest during construction, is estimated at \$125.9 million. Work estimated to cost \$103.3 million will be completed by the end of 1958. Additional work to be accomplished during 1959 is estimated to cost \$14.4 million. Principal emphasis will be placed on completion of the 27-foot depth channel in the Cornwall and Thousand Islands areas, and the high-level international highway bridge. The seaway will be 94% complete at the end of 1959, with \$8.2 million, consisting largely of channel work, remaining to be accomplished after 1959.

Operating costs.—The Corporation will begin operating and maintaining the seaway for 14-foot draft traffic after the flooding of the power pool, scheduled for July 1, 1958. The operation of the seaway for full 27-foot draft navigation is scheduled for the spring of 1959.

Operating costs during the period of interim 14-foot draft navigation will be capitalized and included in the toll base. When the seaway is opened for 27-foot draft traffic in 1959, tolls will be assessed and the project will be considered in a regular operation and maintenance status.

Relation of costs to obligations.—The relationship is derived from year-end balances of unpaid undelivered orders as follows: 1956, \$61,999,743; 1957, \$36,871,852; 1958, \$11,292,900; 1959, \$4,560,000.

Financing.—The Corporation is authorized to borrow \$140 million from the Treasury to finance the costs of the

SAINT LAWRENCE SEAWAY DEVELOPMENT CORPORATION—Continued

Public enterprise funds—Continued

SAINT LAWRENCE SEAWAY DEVELOPMENT CORPORATION FUND—Continued

seaway, of which \$92.4 million will have been used by the end of 1958. It is estimated that \$19 million will be used during 1959, leaving a balance of \$28.6 million available to complete the seaway and for initial working capital.

Operating results and financial condition.—The expenses for 1959 are estimated at \$6.7 million of which \$440,000 represents administrative expenses. It is estimated that \$4.6 million of the operating expenses will be capitalized. The balance of \$2.1 million represents regular operating expenses.

Shipping toll revenues in 1959 are estimated at \$1.5 million. These revenues will meet all funded expenses incurred after the seaway is opened for 27-foot draft traffic, including interest charges on the Corporation's borrowings.

Repayment of the Federal investment is scheduled to be accomplished within the statutory 50-year repayment period.

The purpose of the Commission is to protect the interests of the investing public.

1. *Full disclosure provisions.*—Registration statements for the sale of securities and related reports are reviewed to secure compliance with statutory standards of fair disclosure. In 1957, 943 registration statements were filed at a dollar volume of \$14.6 billion, an increase of 12% over 1956. Estimated filings for 1958 and 1959 are 975 and 1,025, respectively, with corresponding increases in dollar volume. Examinations, investigations, administrative proceedings, and proxy contests are also expected to increase in 1959 over 1958.

2. *Prevention and suppression of fraud.*—Suspected fraud, deceit, and manipulation in the sale and trading of securities is prevented or minimized by prompt investigation and through periodic inspection of the accounts of brokers and dealers. In 1957, 512 investigations were opened relating to violations of the securities acts. In 1958 and 1959, it is expected that 525 and 580 investigations, respectively, will be opened. A 2.8-year cycle for the broker-dealer inspection program will provide for 1,535 inspections in 1959.

3. *Supervision and regulation of securities markets.*—National securities exchanges including over-the-counter markets are regulated to maintain equitable principles of trade for the protection of the public investors. Short sales, stabilizing, floor trading, activities of specialists, and odd-lot dealers are subject to Commission regulation.

4. *Regulation of investment and public utility holding companies.*—Financing and other corporate matters of interstate public utility holding companies are regulated. Twenty-two holding company systems with assets of \$11.1 billion comprising 293 companies are registered under the act. Foreign and domestic investment companies are registered and their activities supervised. The assets of registered investment companies have increased from \$2.5 billion in 1941 to \$15 billion in 1957. Forty-nine new investment companies registered under the act during 1957. In 1959, a regular program for the examination of the books and records of investment companies will be initiated.

5. *Corporate reorganizations.*—Independent expert assistance is provided in proceedings under the Bankruptcy Act. On June 30, 1957, the Commission was participating in reorganization proceedings involving 49 debtor corporations with assets of approximately \$476 million. The number of new reorganization petitions filed in Federal

courts increased from 61 in 1956 to 75 in 1957. It is estimated that the number of petitions will increase from 90 in 1958 to 105 in 1959.

6. *Operational and business statistics.*—Statistical and other data are prepared to provide the Commission and the staff with information needed to administer the securities laws and to produce certain financial data from information filed with the Commission as a part of the overall Government statistical and economic program.

The primary purpose of the Selective Service System is effective manpower utilization through classification under the Universal Military Training and Service Act. The System is responsible for supplying men to keep the Armed Forces at their authorized strength and to the extent that their needs are not met by voluntary enlistment. It will be required to supply an estimated 140,000 men for this purpose in 1959 as compared to approximately 130,000 in 1958 and 180,000 in 1957.

1. *National administration.*—The overall administration of the act including planning, training and records management is accomplished by the national headquarters and six regional field offices.

2. *State administration.*—Administration of the act within the several States is the responsibility of the 56 State headquarters operating under the policies determined by national headquarters.

3. *Registration, classification, and induction.*—These functions affecting more than 19,000,000 registrants are accomplished by the over 42,000 uncompensated citizens assisted by about 6,000 clerks at over 4,000 boards. These citizens determine who shall be deferred and for how long in the national interest in agriculture, industry, or other pursuits. They also determine the availability for military service of members of the Standby Reserve.

4. *Special boards.*—(a) *National Advisory Committee on the Selection of Physicians, Dentists, and Allied Specialists.*—This Committee acts in an advisory capacity to the Selective Service System. It is separately administered,

but funds are furnished by the Selective Service System from its appropriation.

(b) *National Selective Service Appeal Board.*—This Board acts on the classification of registrants who have appealed to the President. It is under separate administration but the Selective Service System provides funds for its operation.

The Small Business administration counsels, assists, and protects the interests of small business. In addition, it provides aid to business and homeowners who have suffered losses through natural disasters. Since existing statutory authority expires July 31, 1958, estimates for the 1959 program are included under proposed legislation. If the Congress approves the proposed extension of the basic authority, a request for funds for 1959 will be submitted at a later date.

1. *Procurement and technical assistance.*—The objectives of this activity are (1) to increase the small-business share in Government procurement through assistance to individual small businesses and by working with procurement agencies to set aside contracts for small business, and (2) to provide managerial and technical advice to small firms requesting assistance.

2. *Financial assistance.*—Small-business concerns and victims of natural disasters are aided through loans, which are administered so as to assure return of the Government investment. In addition, financial counseling is provided to small firms requesting assistance. Funds for administrative expenses of this activity are transferred from a revolving fund. Financial statements and a discussion of the lending activities of the agency are set forth under the revolving-fund appropriation, Small Business Administration.

3. *Liquidation of Reconstruction Finance Corporation loans.*—Disaster loans made by the Reconstruction Finance Corporation were transferred to this agency pursuant to Reorganization Plan No. 2 of 1954. As of September 30, 1957, there were 1,940 loans outstanding amounting to \$6,319,401. This represents a reduction of 1,289 loans valued at \$8,402,869 from those taken over on July 1, 1954. In addition, pursuant to Reorganization Plan No. 1 of 1957, Reconstruction Finance Corporation business loans amounting to more than \$12,000,000 were transferred to the Small Business Administration on June 30, 1957, for liquidation. Administrative expenses for this activity are also transferred from a revolving fund, made up of receipts from these loans.

This fund finances the two types of lending activities of the Small Business Administration: (1) Business loans to small-business concerns and (2) disaster loans to business firms and homeowners who have suffered damage from floods or other catastrophes, including loans to business concerns in designated areas affected by drought which have suffered substantial economic injury as a result.

Appropriations of \$320 million have been made to the revolving fund. Up to \$430 million is authorized to provide funds for these lending activities, under which not to exceed \$305 million may be outstanding at any one time for business loans and not to exceed \$125 million may be outstanding for disaster loans. The position with respect to lending authority is as follows:

[SMALL BUSINESS ADMINISTRATION]—Continued

Budget program—Loan commitments—Business loans.—Business loans may be made directly or in participation with banks or other lending institutions, and shall be of such sound value or so secured as reasonably to assure repayment. No loan may be made unless the financial assistance applied for is not otherwise available on reasonable terms. No direct loan may be made unless it is shown that participation with a bank is not available and no immediate participation loan may be made unless it is shown that a deferred participation loan is not available. The Small Business Administration's participation in a loan is limited to 90%, and the agency's maximum commitment to any one borrower under either a participation or direct loan is limited to \$250,000, except that in the case of a loan to a special corporation formed and capitalized by a group of small-business concerns, the maximum loan is \$250,000 multiplied by the number of separate small businesses involved. Business loans, except for the purpose of constructing industrial facilities, are limited to a maturity of 10 years and bear interest at a maximum of 6% per annum.

Within the legislative authorizations, it is the policy to assist reliable, capable businessmen operating small firms to secure necessary credit for constructive purposes on terms that will meet the borrower's individual requirements. From the beginning of the lending program on September 29, 1953, through June 30, 1957, a total of 7,096 loans have been approved in a total amount of \$324.8 million (including participating banks' share of \$54.8 million). Almost 70% of these loans have been on a participation basis. The average size of loans approved to date is \$45,770. In 1958, it is estimated that 3,600 loans will be approved compared to 3,536 loans in 1957.

The following tabulation reflects certain data on business loans and includes funds disbursed or collected by banks on participation loans. Accordingly, the Small Business Administration's share of disbursements, repayments, and loans outstanding will not agree with related data in the financial statements, which reflect transactions on the basis of only the Small Business Administration cash funds involved.

DATA ON BUSINESS LOANS

[In millions]

	1957 actual	1958 estimate	1959 estimate
Loan commitments during the year:

Small Business Administration share.....	95.9	141.2	40.6
Loan repayments to banks or Small Business Administration:			
Total amount (estimate).....	29.3	57.2	81.1
Small Business Administration share (estimate).....	24.3	47.6	68.0

Disaster loans.—No legislative restrictions exist on the amount which may be loaned to an individual or business suffering loss from a disaster. The maximum term for disaster loans is 20 years and the interest rate may not exceed 3% on the Small Business Administration's share of the loan. Through June 30, 1957, a total of 6,149 loans for \$66 million has been approved. In view of the unpredictable nature of this program, it is impossible to estimate the volume of new loans which may be committed in 1958. For budgetary purposes, a nominal amount of \$14.4 million in new commitments has been assumed, which would represent 1,400 loans based on the average size of loans approved through 1957; 1,597 were approved in 1957.

DATA ON DISASTER LOANS

[In millions]

	1957 actual	1958 estimate	1959 estimate
Loan commitments during the year:			
Total amount.....	\$13.0	\$14.4	-----

Loan repayments to banks or Small Business Administration:			
Total amount (estimate).....	5.8	6.2	7.0
Small Business Administration share (estimate).....	5.5	5.9	6.7

Deferred participation business loans not expected to be purchased.—This reduction in loan commitments reflects the current policy of committing funds for only 20% of the agency's share of deferred participation loans, since experience shows that only a small portion of its share of such loans will be purchased.

Administrative expenses.—Administrative expenses are financed by transfer of funds from the revolving fund to the appropriation for salaries and expenses.

Financing.—Since existing statutory authority expires on July 31, 1958, a detailed estimate for 1959 has not been included herein. If the Congress approves an extension of the basic authority of the agency, a request for funds for 1959 will be submitted at a later date. Amounts shown in the various schedules and statements for 1959 reflect the liquidation of activity attributable to prior year operations.

Operating results and financial condition.—The cumulative deficit from operations through June 30, 1958, will be greater than on June 30, 1957. Income from low interest disaster loans and from a large number of relatively small business loans is not sufficient to cover expenses of the lending program, including interest payable to the Treasury on the net amount expended from the fund.

The net investment of the Government is expected to increase \$93.8 million during 1958.

Under section 3 of Reorganization Plan No. 2 of 1954, outstanding disaster loans made by the Reconstruction Finance Corporation were transferred on July 1, 1954, to the Small Business Administration for administration and liquidation.

Under Reorganization Plan No. 1 of 1957, certain net business loan assets of the Reconstruction Finance Corporation liquidation fund, Treasury, were transferred to the Small Business Administration as follows:

Cash.....	\$2,324,053
Loans receivable, net.....	12,627,048
Working capital.....	2,143,505
Net Government investment.....	17,094,606
Undisbursed loan obligations.....	2,086,598

Budget program.—Assets to be liquidated amounted to \$20.8 million at June 30, 1957, including business loans transferred. As a result of liquidating activities, it is anticipated that the value of assets remaining will have been reduced to \$14.4 million by June 30, 1958.

Financing.—Liquidating proceeds are used for authorized administrative expenses and for repayment of the investment of the Government. Liquidation transactions in 1957 produced net budget receipts of \$1.9 million and it is estimated that transactions in 1958 will produce net budget receipts of \$6.1 million. These will be used to repay the note payable to the Treasury assumed in connection with the transfer of disaster loans.

Financing applied to program.....	298		

This fund was created to finance the taking of prime contracts by the Small Defense Plants Administration from other Government agencies and subcontracting the work to small manufacturers. Authority to use the fund expired at the end of 1955 and it is now in liquidation. During 1958 it is anticipated that collection will be made of \$107,620 of receivables from other Government agencies for goods delivered under prime contracts entered into. This amount will be paid to the Treasury as a return of capital investment, after which the remaining receivables due from subcontractors will be written off against reserves established to cover such possible losses and the fund closed out with a net loss to the Government of \$131,643.

The Smithsonian Institution maintains public exhibits representative of the arts, American history, aeronautics, anthropology, geology, technology, and zoology; preserves for reference and study purposes millions of valuable items of scientific, cultural, and historical interest; conducts research in the natural sciences and in the history of cultures, technology, and the arts; and participates in the international exchange of scientific literature. The Institution operates 2 museums, 2 scientific bureaus, 2 art galleries, the Canal Zone Biological Area, and the International Exchange Service. It is responsible also for the operation and maintenance of five main exhibition buildings and a temporary storage facility (Suitland, Md.).

During the budget year, exhibit preparation for the new Museum of History and Technology will be accelerated, 5 exhibit renovation projects and 3 building rehabilitation projects will be completed, and building services will be improved. Visitors: 1955—3,895,017; 1956—4,145,591; 1957—4,841,818.

Upon petitions being filed, the Board holds formal hearings and determines whether: (1) organizations are "Communist-action organizations," "Communist-front organizations," or "Communist-infiltrated organizations"; (2) individuals are officers or members of a "Communist-action organization" or officers of a "Communist-front organization" and required to register as such; (3) the registration of particular "Communist-action organizations" or "Communist-front organizations" or of particular individuals should be canceled; and (4) a particular "Communist-infiltrated organization" has ceased to be a "Communist-infiltrated organization." To date the Board has heard only cases involving petitions against alleged Communist organizations. The Board issues a report setting forth its findings and an appropriate order.

TARIFF COMMISSION

Current authorizations:

SALARIES AND EXPENSES

[Salaries and expenses:] For necessary expenses of the Tariff Commission, including subscriptions to newspapers (not to exceed \$200), not to exceed **[\$20,000]** \$25,000 for expenses of travel, and contract stenographic reporting services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), **[\$1,700,000]** \$1,810,000: *Provided*, That no part of this appropriation shall be used to pay the salary of any member of the Tariff Commission who shall hereafter participate in any proceedings under sections 336, 337, and 338 of the Tariff Act of 1930, wherein he or any member of his family has any special, direct, and pecuniary interest, or in which he has acted as attorney or special representative: *Provided further*, That no part of the foregoing appropriation shall be used for making any special study, investigation, or report at the request of any other agency of the executive branch of the Government unless reimbursement is made for the cost thereof: *Provided further*, That that part of the foregoing appropriation which is for expenses of travel shall be available, when specifically authorized by the Chairman of the Tariff Commission, for expenses of attendance at meetings of organizations concerned with the functions and activities of the said Commission. (Department of Commerce and Related Agencies Appropriation Act, 1958.)

The Commission is charged with determining the impact of United States tariffs and trade policies on domestic industries and providing information, reports, and recommendations to the President, Congress, or public on these matters. The activities of the Commission in connection with "escape clause" and other investigations are expected to increase during the coming year. Therefore, requirements will be at a somewhat higher level even though the activities related to the study of tariff simplification will decline during the same period.

The Tax Court hears and decides cases involving tax deficiencies and claims for refunds of excess profits taxes under the special relief sections of the Internal Revenue Code, and cases involving determinations of excessive profits on contracts renegotiated by the Federal Government.

For 1959, the Court proposes a program of 160 weeks of trial sessions, to be held in approximately 50 major cities. This schedule of trial work should result in the closing of approximately 5,200 cases.

The actual and estimated work volume of the Court is presented in the following tabulation.

The Tennessee Valley Authority was created by the Congress in 1933 for the unified development and conservation of the resources of a region comprising parts of seven States. To fulfill this responsibility, TVA merges a variety of activities into an integrated approach to the Tennessee Valley's resource-use problems. All these activities seek the proper use of land and water resources and the realization of the region's agricultural, forestry, and industrial potential.

TVA is a wholly owned Government corporation. Its programs are financed by appropriations and by proceeds from operations, principally the sale of electric power and fertilizer materials. Appropriations cover expenses of navigation and flood control operations, research on fertilizer and munitions, watershed protection and improvement activities, and a portion of capital plant additions. Proceeds (referred to in the accompanying schedules as corporate funds) are used in the business of generating,

transmitting, and distributing electric energy, including related reservoir operating expenses; and in manufacturing and distributing fertilizer and fertilizer ingredients. Section 26 of the TVA Act, as amended, provides for payments into the Treasury of the United States of such proceeds as in the opinion of the TVA Board are not required for these purposes.

Budget program.—TVA activities are grouped into four major categories: (1) navigation, flood control and power program; (2) fertilizer, agricultural, and munitions program; (3) watershed protection and improvement program; and (4) general service activities. These programs are all interrelated and are conducted to enable the people of the Tennessee Valley to make full and effective use of the area's resources. Work methods encourage the enterprise of individual farmers and businessmen, and strengthen State and local institutions and agencies.

1. *Navigation, flood control, and power program.*—A major objective of the TVA Act is the integrated development and use of the Tennessee River system for navigation, flood control, and power. TVA system facilities serving these purposes consist of 26 major dams with hydroelectric generating stations, 10 navigation locks, 12 major fuel-electric generating stations, and a power transmission network of more than 11,000 circuit miles.

NAVIGATION—SUMMARY OF ESTIMATED OPERATING COSTS

	1959 estimate
Direct expenses.....	\$220,000
Distribution of administrative and general expenses.....	25,000
Allocated from multipurpose reservoir operations.....	1,274,000
Depreciation on navigation facilities.....	664,000
Depreciation allocated from multipurpose reservoir operations.....	803,000
Total operating costs.....	2,986,000

The TVA Act assigns to TVA the primary Federal responsibility for improvement of the Tennessee River and its tributaries for navigation. The improved Tennessee River waterway provides a modern 9-foot channel from the mouth of the river to Knoxville, Tenn., a distance of 650 miles. Traffic on the Tennessee River system in 1956 was the highest of record—about 12.3 million tons and over 2 billion ton-miles. These figures were 23% greater than the record set in 1955. Transportation savings to shippers are estimated at \$20 million, the difference in freight charges actually paid and those which would have obtained if the river had not been improved for navigation. Engineering work assures that physical facilities are operated, maintained, and modified to meet the needs of modern water-borne commerce. Technical studies appraise the opportunities for and barriers to use of the waterway. Data supplied to shippers and carriers help solve transportation problems, looking to full utilization of the Federal investment in the waterway.

Capital outlay costs for navigation facilities in 1959 are estimated at \$10,274,000 and provide primarily for continuing construction of a new lock at Wilson Dam, Alabama, started in 1957, scheduled to be in service in April 1959, and to be completed by June 1960. Total estimated cost is \$35,000,000, of which \$23,035,000 will have been expended by June 30, 1958.

FLOOD CONTROL—SUMMARY OF OPERATING COSTS

	1959 estimate
Direct expenses.....	\$262,000
Distribution of administrative and general expenses.....	15,000
Allocated from multipurpose reservoir operations.....	1,285,000
Depreciation on flood control facilities.....	325,000
Depreciation allocated from multipurpose reservoir operations.....	922,000
Total operating costs.....	2,809,000

Operation of the flood control system on the Tennessee River consists principally of (1) maintaining and using storage space in upstream reservoirs for seasonal retention of excessive runoff, and (2) regulating the discharges from

reservoirs to rates of flow which can be handled safely by downstream channels and reservoirs. The dams on the Tennessee River and its tributaries provide 11,803,000 acre-feet of storage for flood control at the beginning of the flood season. The system averts damage in the Tennessee Valley and also reduces flood crests on the lower Ohio and Mississippi Rivers. Flood heights at Cairo, Ill., can be reduced from 2 to 4 feet, affording regulation on the Mississippi River as far south as the mouth of the Red River. Estimated average benefits of the TVA flood control system are about \$11 million a year in terms of flood damages prevented. As a supplement to the operation of its system of reservoirs for flood control, TVA's work includes collection and analysis of flood data; studies to improve operations of the existing system; studies of potential flood control projects; and technical advice and assistance to State and local agencies to encourage their assumption of responsibility for solution of local urban and rural flood control problems.

The 1959 estimate of capital outlay costs for flood control facilities is \$167,000 to continue purchase of scattered land and land rights in the Norris Reservoir for downstream flood protection purposes.

Multipurpose dam—Estimated capital outlay.—The estimates for 1959 include \$50,000 for preliminary design studies for the Melton Hill Dam and Reservoir on the Clinch River, near Oak Ridge, Tenn., about 57 miles downstream from Norris Dam. This project, with an estimated total cost of \$35 million, will extend the 9-foot navigation channel to Clinton, Tenn., and will provide rated power generating capacity of 72,000 kilowatts.

Power—Summary of estimated operations.—TVA power operations are confined to generation and transmission of power and sale of energy at wholesale to local distribution systems and to a small number of industries and Government agencies requiring large amounts of power. Power is distributed by 150 local public agencies and 2 small privately owned utility companies. As of June 30, 1957, the installed capacity of the system was 9,889,485 kilowatts (nameplate rating), including plants of the Department of the Army on the Cumberland River and of the Aluminum Company of America on the Little Tennessee River operated as a part of the TVA system. Total system input in 1959 is estimated to be about 66.8 billion kilowatt-hours, about 3.6 billion kilowatt-hours greater than the energy supplied to the system in 1957 and about 3.4 billion kilowatt-hours above the estimated supply in 1958. Net income from power operations, after depreciation, for 1959 is estimated to be \$58 million, representing a return on the average investment in the power program during 1959 of about 3¼%. The estimates assume average streamflow conditions for both 1958 and 1959. Under significantly subnormal streamflows, such as have been experienced in the recent past, the net income would be noticeably reduced by increases in production expense.

POWER—SUMMARY OF REVENUES AND OPERATING COSTS

	1957 actual	1958 estimate	1959 estimate
Revenues and receipts:			
Sales of electric energy (outside).....	\$232,800,910	\$236,150,000	\$249,740,000
Other income.....	1,948,506	3,893,000	3,972,000
Total revenues and receipts.....	234,749,416	240,043,000	253,712,000
Operating costs:			
Production and transmission (including allocation from multipurpose reservoir operations).....	123,386,801	126,935,000	135,738,000
Payments in lieu of taxes.....	4,744,401	5,276,000	6,160,000

POWER—SUMMARY OF ESTIMATED CAPITAL OUTLAY—PRESENTLY SCHEDULED

	Appropriated funds	Corporate funds	Total
Power supply facilities:			
Generating units under construction:			
Cleanup of construction of generating units authorized from appropriated funds.....	\$9,818,000		\$9,818,000
Gallatin units 3-4.....		\$37,509,000	37,509,000
John Sevier unit 4.....		436,000	436,000
Johnsonville units 7-10.....		20,430,000	20,430,000
Generating unit—presently scheduled:			
Widows Creek unit 7.....		33,000,000	33,000,000
Total power supply facilities—presently scheduled.....	9,818,000	91,375,000	101,193,000
Transmission system facilities.....		33,260,000	33,260,000

The 1959 estimate includes costs of \$91,375,000 financed from corporate funds for continuing construction of 8 steam-electric generating units at existing projects, including 1 unit on which construction is presently scheduled to be initiated in 1958. The corporate funds used for this purpose are to be derived from power revenues—the only source of funds presently available for financing these units. Legislation is pending to permit issuance of revenue bonds to supplement power revenues to provide funds to finance generating capacity. On enactment of such legislation, it may be desirable to issue bonds to pay for part of the costs of these units. Power supply facilities under construction and presently scheduled, including these 8 additional units at existing projects, and facilities being installed by the Department of the Army at the Cumberland River projects (Old Hickory and Cheatham) and by the Aluminum Company of America at the Chilhowee project on the Little Tennessee River will increase the system nameplate capacity to 11,245,485 kilowatts by the end of 1959 and to 11,745,485 kilowatts at the end of 1960. After allowing for such factors as machine outages and the effects of drawdown of storage reservoirs, this system could carry a load of about 11,250,000 kilowatts in the winter of 1960-61. TVA system demands at that time are estimated to be equal to the system load-carrying ability. Present estimates indicate that additional electric generating units with total capacity ranging between 600,000 and 1,200,000 kilowatts will be required to carry safely the loads in the winter of 1961-62. Since it is too early to reach firm conclusions as to the capacity which should be available 4 years hence, provision is made in the budget, under proposed legislation, for revenue bond financing to the extent of \$125 million for the construction of new electric generating units with a capacity totaling about 600,000 kilowatts. A reappraisal of requirements will be made after the Congress has acted on revenue bond financing legislation to determine whether additional new electric generating units are required.

The estimate of \$33,260,000 for transmission system facilities provides for necessary additions, improvements, and replacements in the TVA transmission system.

Topographic mapping of the Valley serves TVA's planning, construction, and operating needs and meets the standards of the Geological Survey for nationwide map coverage. The scheduled mapping carried on cooperatively with the Geological Survey covers 765 quadrangles (about 46,000 square miles). As of June 30, 1957, 613 quadrangles (about 37,000 square miles) were completed and printed. To continue work on this activity, operating costs of \$211,000 are planned in 1959.]

2. *Fertilizer, agricultural, and munitions program.*—TVA chemical facilities at Wilson Dam, Ala., form a laboratory and experimental center for developing new or improved fertilizers and processes for their manufacture. The facilities have equal importance for defense purposes. Total program operating costs, including related administrative and general expenses and depreciation on chemical facilities, are \$20,854,000. Revenue, primarily from the sale of fertilizer products, is estimated at \$17,814,000.

Research on fertilizer products and processes consists of (1) exploratory tests, background research, and applied research at the laboratory level; and (2) process development. The latter includes technical and economic evaluation of research results; design, construction, and operation of pilot plants; improvement of design features and operating procedures of demonstration plants; and preparation of engineering and economic studies to facilitate application of the findings by other agencies and industries. Knowledge gained in fertilizer research is applied also to the related field of munitions. Estimated costs for this work in 1959 are \$1,637,000.

TVA builds and operates fertilizer and munitions facilities to serve the following purposes: (1) to demonstrate the technical and commercial feasibility of new or improved fertilizer processes and to encourage their adoption by industry; (2) to supply these fertilizers for test-demonstration use on practical farms and for widespread educational purposes among farmers; and (3) to supply munitions materials for national defense. New or improved fertilizers are sold to farmers for educational purposes through cooperative and industry distributors. These distributors in turn furnish TVA data concerning distribution costs and farmer acceptance. Estimated fertilizer production in 1959 is as follows: concentrated superphosphate, 25,000 tons; calcium metaphosphate, 80,000 tons; ammonium nitrate, 110,000 tons; ammonium phosphate-nitrate, 15,000 tons; diammonium phosphate, 30,000 tons; and leached zone fertilizer, 10,000 tons. Estimated cost of fertilizer production and distribution in 1959 is \$17,414,000 and revenue is estimated at \$17,471,000.

Cooperative fertilizer tests and demonstrations are of three principal types: (1) laboratory and field plot tests to determine under controlled conditions the relative efficiency of TVA fertilizers; (2) studies and demonstrations aimed at developing more efficient and economical ways of distributing and applying fertilizer; and (3) farm test-demonstrations of fertilizer use. Major objectives of this third activity are to introduce TVA experimental fertilizers and demonstrate their uses to farmers and to improve the Valley's agriculture, forestry, and watershed-streamflow relationships. Farm test-demonstrations will be conducted on 3,570 farms in 31 States in 1959. Farmer payments for TVA fertilizer used in the test-demonstrations will total \$338,000. Costs of the 3 activities in 1959 are estimated at \$1,708,000.

Agricultural development projects encourage the full development and use of the agricultural resources of the Tennessee Valley consistent with sound conservation practices. Research and demonstrations are carried out cooperatively with the land-grant colleges on some of the more urgent agricultural problems of the region in order to utilize State personnel and facilities in regional development as widely as possible and to encourage State institutions to assume wider responsibility for regional research. The 1959 estimate for agricultural development projects is \$95,000.

Capital outlay costs for chemical facilities are estimated at \$1,048,000 in 1959. This estimate covers prospecting and acquisition of phosphate lands and construction work necessary for improvement and modification of present facilities for the production of experimental fertilizer and munitions products.

3. *Watershed protection and improvement program.*—TVA is responsible for the protection and improvement of the watershed of the Tennessee River in relation to overall development of the region's natural resources. To accomplish this, TVA makes investigations to identify problems of watershed protection and improvement under conditions of optimum use; conducts research to develop and test corrective measures; and participates in cooperative projects with State and local groups to apply these measures to regional and special problems. Operating costs estimated at \$1,021,000 in 1959 provide for two types of activities: tributary watershed projects and forestry projects.

The major purpose of TVA's participation in tributary watershed development projects is to assist in finding and demonstrating ways in which State and local agencies and private groups can assume leadership and responsibility for joint solutions to problems of watershed protection and resource development in small tributary watersheds. Work planned for 1959 consists of research on the effects of changes in land use on the quality and behavior of water in the stream; continuation of demonstrations in the Chestnut and Beech River watersheds in Tennessee; and development work in two other watersheds.

The aim of the forestry projects is to aid the States, counties, landowners, and the timber industry in developing full production and use of the Valley's forest resource consistent with the needs of watershed protection. Forestry projects include research and demonstrations in forest management, reforestation, forest protection, and forest products utilization. TVA will produce 18 million

seedlings for valleywide reforestation which will be distributed through State agencies to private landowners, who pay a part of the production cost.

4. *General service activities.*—Operating costs for the program cover primarily reimbursable services furnished at the request and expense of other agencies. The 1959 estimate of \$951,000 for mapping services consists of work performed for the Department of the Army (\$882,000), the Geological Survey (\$65,000), and others (\$4,000). Most of the \$2,635,000 estimate for other reimbursable services covers work for the Department of Defense in connection with the Muscle Shoals Phosphate Development Works.

Estimated capital outlay of \$1,779,000 for general facilities in 1959 is for purchase of equipment used throughout the TVA program, primarily the replacement of trucks and other heavy mobile equipment.

5. *Relation of costs to obligations.*—Program obligations in 1959 are estimated to total \$271,643,000. As detailed below, inventories are expected to be reduced by \$2,554,000 and appropriation financed commitments by \$10,225,000.

	1956 actual	1957 actual	1958 estimate	1959 estimate

Financing.—Amounts estimated to become available in 1959 will be derived from the requested appropriation of \$16,850,000 and from revenues and receipts (mostly from power operations) of \$277,383,000.

Operating results and financial condition.—For 1959, net income from power operations is expected to amount to \$58,004,000 and net loss of other programs is expected to total \$9,974,000, leaving \$48,030,000 to be added to accumulated program income. Total accumulated

retained earnings through 1959 is estimated at \$332,466,669. Only the power operations program is intended to be self-supporting; the net loss of other programs is covered largely by appropriations from the Treasury. Payments to the Treasury in 1959 are estimated at \$2,063,000 from nonpower proceeds.

Total investment of the Government is expected to be \$2,111,826,875 at the end of 1959. The portion of TVA's investment in power is as follows:

Under proposed legislation, 1959.—A supplemental estimate of \$125 million is anticipated for new electric generating units which would be constructed under proposed legislation providing for revenue bond financing. This

estimate is for capacity totaling about 600,000 kilowatts, but 1,200,000 kilowatts may be required to meet load requirements in 1961-62. A reappraisal of requirements will be made after the Congress has acted on the legislation to determine whether additional new electric generating units are needed.

UNITED STATES INFORMATION AGENCY

Current authorizations:

SALARIES AND EXPENSES

[Salaries and expenses:] For expenses necessary to enable the United States Information Agency, as authorized by Reorganization Plan Numbered 8 of 1953, and the United States Information and Educational Exchange Act, as amended (22 U. S. C. 1431 et seq.), to carry out international information activities, including employment, without regard to the civil-service and classification laws, of (1) persons on a temporary basis (not to exceed \$120,000), (2) aliens within the United States, and (3) aliens abroad for service in the United States relating to the translation or narration of colloquial speech in foreign languages (such aliens to be investigated for such employment in accordance with procedures established by the Secretary of State and the Attorney General); travel expenses of aliens employed abroad for service in the United States and their dependents to and from the United States; salaries, expenses, and allowances of personnel and dependents as authorized by the Foreign Service Act of 1946, as amended (22 U. S. C. 801-1158); expenses of attendance at meetings concerned with activities provided for under this appropriation (not to exceed \$6,000); entertainment within the United States not to exceed \$500; hire of passenger motor vehicles; insurance on official motor vehicles in foreign countries; purchase of space in publications abroad, without regard to the provisions of law set forth in 44 U. S. C. 322; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); payment of tort claims, in the manner authorized in the first paragraph of section 2672, as amended, of title 28 of the United States Code when such claims arise in foreign countries; advance of funds notwithstanding section 3648 of the Revised Statutes, as amended; dues for library membership in organizations which issue publications to members only, or to members at a price lower than to others; employment of aliens, by contract, for service abroad; purchase of ice and drinking water abroad; payment of excise taxes on negotiable instruments abroad; cost of transporting to and from a place of storage and the cost of storing the furniture and household and personal effects of an employee of the Foreign Service who is assigned to a post at which he is unable to use his furniture and effects, under such regulations as the Director may prescribe; actual expenses of preparing and transporting to their former homes the remains of persons, not United States Government employees, who may die away from their homes while participating in activities authorized under this appropriation; radio activities and acquisition and production of motion pictures and visual materials and purchase or rental of technical equipment and facilities therefor, narration, script-writing, translation, and engineering services, by contract or otherwise; maintenance, improvement, and repair of properties used for information activities in foreign countries; fuel and utilities for Government-owned or leased property abroad; rental or lease for periods not exceeding five years of offices, buildings, grounds, and living quarters for officers and employees engaged in informational activities abroad; travel expenses for employees attending official international conferences, without regard to the Standardized Government Travel Regulations and to the rates of per diem allowances in lieu of subsistence expenses under the Travel Expense Act of 1949, but at rates not in excess of comparable allowances approved for such conferences by the Secretary of State; and purchase of objects for presentation to foreign governments, schools, or organizations; **[\$95,100,000] \$105,000,000**, of which not less than \$9,000,000 shall be used to purchase foreign currencies or credits owed to or owned by the Treasury of the United States and of which sum not less than **[\$350,000] \$300,000** shall be available by contracts with one or more private international broadcasting licensees for the purpose of developing and broadcasting under private auspices, but under the general supervision of the United States Information Agency, radio programs to Latin America, Western Europe, Africa, as well as other areas of the free world, which programs shall be designed to cultivate friendship with the peoples of the countries in those areas, and to build improved international understanding: *Provided*, That not to exceed **[\$50,000] \$135,000** may be used for representation abroad: *Provided further*, That this appropriation shall be available for expenses in connection with travel of personnel

The United States Information Agency submits evidence to peoples of other nations that the objectives and policies of the United States are in harmony with and will advance their legitimate aspirations for freedom, progress, and peace. The intention is to encourage foreign peoples to take action consistent with United States national objectives.

The requested increase of approximately \$9.9 million in available operating funds will provide for: (1) approximately \$6.6 million for intensified programs in foreign countries including media and other support services; (2) about \$2.5 million for expansion of direct radio broadcasting programs and worldwide television; and (3) about \$823,000 for increased domestic nonmedia support activities.

1. *Overseas missions.*—The program is conducted through 202 posts in 80 countries and is known abroad

as the United States Information Service (USIS). The overseas missions carry out country programs designed to influence local attitudes and actions in support of United States foreign policy. These programs are being expanded and strengthened in critical areas, especially in the Near East, South Asia, Africa, and Eastern Europe. USIS missions prepare materials using local facilities whenever possible, but also utilizing materials provided by the media services in Washington.

2. *Media services.*—These services provide support for overseas country programs.

(a) *Press and publications service* maintains communications facilities for the transmission of daily news, editorial and feature materials for adaptation by overseas missions. It produces the monthly magazine "America Illustrated" for distribution in the Union of Soviet Socialist Republics. The service also operates two regional printing centers to service posts in the Near and Far East.

(b) *Motion picture service* supplies the missions with films, translated into 40 foreign languages. It adapts films for specific country or area use, and provides guidance in the foreign production, use, and distribution of films. The service also supplies the missions with mobile units and equipment for showing motion pictures.

(c) *Information center service* supports United States operated libraries and reading rooms and binational centers operated jointly by the United States and the host country. The service provides these centers with collections of American books and other publications, both in English and in translation, and with English teaching materials. It assists American publishers in distributing selected products overseas and supports the publication of low-priced books for sale abroad. The service also provides exhibits and visual materials to overseas missions for local display and provides books and periodicals for presentation to selected individuals and groups.

(d) *Broadcasting service* produces radio broadcasts in 42 foreign languages and in English. Programs originate from the United States and from two points overseas. It operates a total of 83 transmitters at 7 locations in the United States and at 10 overseas locations, with a combined radio frequency power output of over 8 million watts. The service will originate a total of 51 hours and 40 minutes of programming daily in 1959, compared to 47 hours and 40 minutes in 1957 and 40 hours and 55 minutes in 1958. The service supplies the USIS missions with recorded radio programs and scripts, and with supplies and equipment. This service also acquires or produces television programs for placement in outlets overseas.

3. *Cooperative programs with private organizations.*—The Agency encourages and coordinates the efforts of private organizations to utilize their resources and initiative in building an information exchange program between the people of the United States and the peoples of foreign countries. These efforts will be intensified in 1959.

4. *Program direction and appraisal.*—In addition to program and policy planning, research and intelligence data are collected and programs are analyzed for effectiveness.

5. *Administration and staff support.*—This includes physical and personnel security functions, administrative servicing, and legal counsel.

6. *Administrative support.*—This includes administrative services for the Agency's overseas operations, and certain special support services at headquarters, obtained through reimbursable arrangements with the Department of State.

Remaining unobligated balances of funds appropriated in 1950, 1951, and 1958, and the new appropriation requested for 1959, will make a total of \$7,560,809 available for obligation in 1959. These funds, available until expended, will be used for:

1. *Acquisition and construction of new facilities.*—The estimate includes \$3,300,000, primarily for the completion of a major transmitter project. Funds available from prior year balances will be used for construction of a major relay base already authorized and for completion of other projects.

2. *Maintenance and improvement of existing facilities.*—The program of repairs and improvements to existing facilities, and replacement of obsolete or worn-out equipment, will be continued.

3. *Research and development.*—Investigation and study in the fields of radio propagation techniques and problems; engineering design of equipment and antenna systems; and equipment modifications to investigate equipment and methods for generating very high frequency power will continue in 1959.

Financing applied to program.....	10,576,963	10,222,000	10,320,000

The informational media guaranty program is authorized under section 1011 of the United States Information and Educational Exchange Act of 1948, as amended (22 U. S. C. 1442). This program makes it possible for American exporters of books, periodicals, motion pictures, and other informational media to sell their materials, through regular commercial channels, in foreign countries having a shortage of United States dollar exchange. Under the program, foreign importers make payment to American exporters in foreign currency, following which exporters may exchange their foreign currency for United States dollars upon application to the United States Information Agency, in accordance with the terms of each exporter's informational media guaranty contract.

As of November 30, 1957, a total of \$55,307,524 in informational media guaranties had been issued since the inception of the program, of which \$8,142,514 were outstanding.

Legislative proposals will be submitted at a later date for authorizing an appropriate means of financing the realized impairment to the capital of the fund, resulting from the operation of the program in prior years and the transfer of \$3,525,000 equivalent in Israeli currency to the Department of State pursuant to Public Law 85-170 approved August 28, 1957.

Sources and Application of Funds (Operations)

	1957 actual	1958 estimate	1959 estimate
Gross expenditures (funds applied):

Appropriation (adjusted).....	162,302,130	161,374,000	149,582,000

This appropriation provides for all administrative expenses of the agency with the exception of those applicable to the Department of Medicine and Surgery.

The appropriation of \$149,582,000 proposed for 1959 is \$11,792,000 less than the amount appropriated for 1958. Total workloads of the various programs, with the exception of the loan guaranty and the vocational rehabilitation and education activities, are not expected to change significantly from those estimated for 1958. A decline in the vocational rehabilitation and education activities is expected as an increasing number of veterans exhaust their entitlement to benefits or become ineligible

VETERANS ADMINISTRATION—Continued

Current authorizations—Continued

GENERAL OPERATING EXPENSES—Continued

as a result of statutory time limitations. Similarly, a decline in certain loan guaranty activities is being estimated due to the expiration of authorizing legislation as of July 25, 1958. In addition to the data below certain factors in workload trends may be found under the appropriations for readjustment benefits, compensation and pensions, and insurance programs.

1. *General administration.*—The Administrator and his top staff assistants provide the executive direction of the agency, establish basic policies, interpret laws pertaining to veterans affairs and promulgate supplementary regulations, and direct and coordinate the activities of the operating departments. The board of veterans appeals, established by statutory enactment, renders appellate decisions final in all cases other than insurance cases, in appeals to the Administrator on claims involving benefits under laws administered by the Veterans Administration.

2. *Insurance.*—Approximately 6 million veterans are insured under the United States Government or national service life insurance programs. Operating costs including capital outlay for the administration of these programs have been reduced from approximately \$41.5 million in 1953 to an estimated \$22.2 million in 1959. These reductions, accompanied by only slight decreases in the number of policies maintained, have been made possible through consolidation of activities and improved operating methods and procedures.

AVERAGE NUMBER OF POLICIES IN FORCE

	1957 actual	1958 estimate	1959 estimate
United States Government life insurance.....	376,867	364,000	349,000
National service life insurance.....	6,104,633	6,103,200	5,892,640

3. *Veterans benefits.*—Veterans' and dependents' claims for compensation, pensions, or other benefits are adjudicated, and guardianship and fiduciary service is furnished helpless or incompetent veterans and minor dependents, as indicated by the following workloads:

	1957 actual	1958 estimate	1959 estimate
Rating actions (disability).....	1,037,322	1,020,000	1,085,000
Authorization actions (disability).....	742,439	730,000	735,000
Rating actions (death).....	94,785	90,000	92,000
Authorization actions (death).....	673,134	541,000	545,000
Cases involving guardianship or fiduciary relationship.....	357,861	370,000	380,000
Field examinations.....	152,208	154,000	155,000

Eligibility of trainees for vocational rehabilitation and education or educational assistance is determined, guidance is furnished to trainees, and contracts are made with training institutions for tuition and other charges. Trainees (average number) are expected as follows:

	1957 actual	1958 estimate	1959 estimate
World War II veterans.....	3,852	1,000	250
Korean conflict veterans.....	574,486	540,000	460,000
War orphans.....	1,206	4,500	7,000
Vocational rehabilitation trainees.....	16,635	14,200	12,800

Loan guaranty operations include issuance of certificates of loan guaranty or insurance, servicing of loans reported in default, payment of claims of lenders on defaulted loans, acquisition, management, and disposal of property when necessary to protect the Government's interest, making of direct loans to veterans in certain areas, and providing assistance to specified paraplegic veterans in acquiring specially adapted housing. Key workload forecasts are as follows:

	1957 actual	1958 estimate	1959 estimate
Guaranteed or insured loans closed.....	441,350	196,820	55,500
Direct loans closed and fully disbursed.....	15,380	25,000	6,606
Defaults processed.....	71,083	78,779	78,130
Claims paid.....	6,668	8,300	8,325
Loan and property acquisitions.....	5,690	7,690	7,770
Housing grants.....	444	450	430

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year (inventories and items on order): Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received).....	\$478,108	\$202,454	\$74,145	\$74,145

1. *Medical, hospital, and domiciliary administration.*—This covers the development, implementation, and administration of policies, plans, and broad program objectives.

2. *Administration of the construction program.*—This includes the general supervision over the design, construction and operation of buildings, real property management, and accident and fire protection.

3. *Medical research.*—Medical research projects are conducted in Veterans Administration laboratories or in universities or other institutions on a contract basis, whichever is more advantageous or economical.

4. *Prosthetic testing and development.*—This testing and development program for prosthetic, orthopedic and sensory aids is the only such program in the Federal Government. It improves the care and rehabilitation of disabled eligible veterans, including amputees, paraplegies, and the blind.

5. *Medical education and training.*—This covers (a) residency and internship training, (b) postgraduate and in-service training, and (c) medical illustration.

6. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

INPATIENT CARE

[Inpatient care:] For expenses necessary for the maintenance and operation of hospitals and domiciliary facilities and for the care and treatment of beneficiaries of the Veterans Administration in facilities not under the jurisdiction of the Veterans Administration as authorized by law, including the furnishing of recreational articles and facilities; maintenance and operation of farms; repairing, altering, improving or providing facilities in the several hospitals and homes under the jurisdiction of the Veterans Administration, not otherwise provided for, either by contract, or by the hire of temporary employees and purchase of materials; purchase of [fifty] one hundred and three passenger motor vehicles for replacement only; not to exceed [\$366,500] \$400,000 for expenses of travel of employees; uniforms or allowances therefor as authorized by the Act of September 1, 1954 [(68 Stat. 1114)], as amended (5 U. S. C. 2181); and aid to State or Territorial homes in conformity with the Act approved August 27, 1888, as amended (24 U. S. C. 134) for the support of veterans eligible for admission to Veterans Administration facilities for hospital or domiciliary care; [\$708,656,000, including the sum of \$6,656,000 for reimbursable services performed for other Government agencies and individuals] \$707,100,000: *Provided*, That allotments and transfers may be made from this appropriation to the Department of Health, Education, and Welfare (Public Health Service), the Army, Navy, and Air Force Departments, for disbursement by them under the various headings of their applicable appropriations, of such amounts as are necessary for the care and treatment of beneficiaries of the Veterans Administration: *Provided further*, That the foregoing appropriation is predicated on furnishing inpatient care and treatment to an average of [140,800] 139,042 beneficiaries (exclusive of those for whom the Veterans Administration is reimbursed) during the fiscal year [1958] 1959 including members in State or Territorial homes, and if a lesser number is experienced such appropriation shall be expended only in proportion to the average number of beneficiaries furnished such care and treatment. (5 U. S. C. 43, 46a-46e, 50, 58-59a, 73b-73c, 75a-75a-1, 78, 78a-1, 84-84c, 118j-1, 118p, 118q, 150, 835-840, 842, 901-957, 2091-2092, 2094, 2121-2123, 2131-2133; 33 U. S. C. 857; 38 U. S. 1. *Maintenance and operation of hospitals.*—This covers the operation of all Veterans Administration hospitals. The estimated obligations for 1959 exceed 1958 by a net amount of \$2,852,000 after giving consideration to a decrease in the number of operating beds due to modernization work in neuropsychiatric hospitals and the declining demand for care and treatment of tuberculosis patients. The net increases are required for: (1) wage increases for wage administration employees resulting from enactment of Public Law 763, 83d Congress, (2) increased prices of commodities and utility services, (3) payment of civil service retirement costs for an extra pay period, (4) the broader use of new drugs in treatment of specific conditions in which drug therapy is relatively new, (5) the continued decline in reimbursement collections, and (6) the need for additional funds for employee travel. The average employment listed below excludes the equivalent employment of consultants and terminal leave payments.

VETERANS ADMINISTRATION HOSPITALS

	1957 actual	1958 estimate	1959 estimate
Neuropsychiatric hospitals:			
Average number of operating beds.....	57,319	57,364	57,000
Average daily patient load.....	54,518	54,405	54,371
Average employment (net).....	39,150	39,229	39,534
Tuberculosis hospitals:			
Average number of operating beds.....	8,602	8,360	7,007
Average daily patient load.....	7,493	7,268	6,264
Average employment (net).....	9,147	8,970	7,842
General medical and surgical hospitals:			
Average number of operating beds.....	55,223	56,583	56,903
Average daily patient load.....	49,254	50,227	50,265
Average employment (net).....	67,741	67,895	68,458
Total, Veterans Administration hospitals:			
Average number of operating beds.....	121,144	122,307	120,910
Average daily patient load.....	111,265	111,900	110,900
Average employment (net).....	116,088	116,094	115,834

2. *Contract hospitalization.*—This covers the hospitalization in other Federal hospitals for service and non-service-connected disabilities where Veterans Administration facilities are not available. It also covers the use of non-Federal hospitals which are limited to treatment of service-connected disabilities, except that female veterans, veterans in training under Public Law 16, 78th Congress, and veterans in United States Territories and possessions may also receive treatment of non-service-connected disabilities. The net increase in the estimated obligations over 1958 of approximately \$168,000 is caused by increased costs of hospitalization.

AVERAGE DAILY PATIENT LOAD

	1957 actual	1958 estimate	1959 estimate
Civil hospitals.....	1,207	1,158	1,158
Municipal and State hospitals.....	582	521	522
Other Federal hospitals.....	1,271	1,324	1,320
Total.....	3,060	3,003	3,000

3. *Maintenance and operation of domiciliary facilities.*—This covers the cost of domiciliary care of veterans in Veterans Administration facilities and in State institutions. The net increase in the estimated costs over 1958 of approximately \$232,000 results from (1) the cost of agency contribution to the civil service retirement fund for an extra pay period, (2) wage increases for wage administration employees, and (3) increases in costs of commodities and services.

This appropriation covers the cost of outpatient medical and dental care of veterans with service-connected disabilities and those receiving vocational-rehabilitation benefits. Such care is rendered both in Veterans Administration clinics and by private physicians and dentists on a fee basis and includes examinations to ascertain the need for hospitalization, eligibility for compensation, pension, vocational rehabilitation and insurance benefits.

¹ Includes capital outlay as follows: 1957, \$26,529; 1959, \$16,300.

This appropriation finances the cost of operating a system of three supply depots through which a portion of the supplies and equipment used in Veterans Administration facilities are centrally procured and distributed. The depots are located in Hines, Ill., Somerville, N. J., and Wilmington, Calif.

The increase of \$346,000 in estimated requirements for 1959 is principally for the transfer to the supply depots of 41 marketing division employees previously paid from the general operating expenses and medical administration and miscellaneous operating expenses appropriations.

This appropriation provides for all compensation, pensions, and allowances, including officers' retirement pay and annuities, and initial burial allowances. On June 30, 1957, there were an estimated 22,633,000 living veterans of all wars and peacetime service and, as of that date, 12.4% of these veterans, or 2,796,514, were receiving benefits under this appropriation. In addition, 1,183,686 dependents of 862,955 deceased veterans were receiving benefits. The cost increase of \$125 million in 1959 is primarily attributable to the advancing age of veterans, the discharge of personnel from the Armed Forces, the deaths occurring among veterans in civil life, and the enactment of Public Law 85-168, effective October 1, 1957. This law increased rates of compensation for living veterans by 10% in cases rated 10% to 99% disabled and by 24% in cases rated 100% disabled. It also increased dependency allowances for veterans 50% or more disabled as well as in the majority of statutory award cases. The estimated cost of this law approximates \$168 million for 1959 and \$127 million during the current year, which is part of an anticipated supplemental of \$256 million for 1958 which appears below.

Forecasts of average caseloads and average annual payments per case have been based on analyses of trends in each category, with consideration given to specific conditions likely to affect the separate classes of beneficiaries. The supplemental requirements for 1958 are included in the following statement on compensation; but they are not included in the accompanying "Program and Financing" and "Object Classification" schedules.

1. *Compensation.*—Compensation is payable to living veterans for disability connected with military service and compensation or dependency and indemnity compensation is payable to eligible dependents of deceased veterans for death connected with military service.

Living veterans.—The basic rates of disability compensation provided in wartime cases under Public Law 85-168 range from \$19 for 10% disability to \$225 per month for total disability. Certain cases are compensated for specific disabilities as prescribed by law, to a maximum of \$450 a month. Payable in both types of cases is an additional allowance for dependents of veterans rated 50%

or more disabled, to a maximum of \$100 a month. All rates of peacetime disability compensation are 80% of wartime rates.

The caseload of living veterans in this category started to decrease in 1957 as expected. It is estimated to continue downward at a slightly accelerated rate in fiscal years 1958 and 1959.

LIVING VETERANS—SERVICE CONNECTED

[Average number of veterans]

	1957 actual	1958 estimate	1959 estimate
Spanish-American War.....	310	255	192
World War I.....	221, 104	208, 000	194, 100

Average payment per case per year.....	\$693.15	\$750.96	\$767.88
Total costs.....	\$1, 440, 171, 843	\$1, 553, 170, 000	\$1, 578, 288, 000

Dependents of deceased veterans.—Death compensation or dependency and indemnity compensation is paid to widows, children, and dependent parents of veterans who died in service, or as a result of service-connected disease or injury.

The caseload continues to increase steadily. The continued increase in the average annual payment per case over 1957 reflects the full year effect of Public Law 881, approved August 1, 1956, which provided increased death benefits to the majority of eligible dependents, for only 6 months of 1957. This is a new form of compensation for service-connected death with the rates for a widow partially related to military pay, increased uniform rates for children where there is no eligible widow, and a sliding scale of rates for parents based on specified annual income categories. For comparison, the accompanying table shows the actual average annual payment per case as it was in 1957 and also computed on the experience of the last 6 months of that year.

DEPENDENTS OF DECEASED VETERANS—SERVICE CONNECTED

[Average number of cases]

	1957 actual	1958 estimate	1959 estimate
Spanish-American War.....	1, 104	930	795

Average payment per case per year (based on last 6 months experience in 1957).....	\$1, 185.72	\$1, 193.95	\$1, 197.03
Total costs.....	\$435, 335, 493	\$464, 003, 000	\$469, 111, 000

2. *Pensions.*—Benefits are payable to wartime veterans and dependents of deceased veterans for non-service-connected disability and death. The rates and conditions of entitlement outlined below apply to World War I and subsequent periods of service; rates and conditions of entitlement applicable to prior periods vary somewhat and are more liberal.

Living veterans.—In general, pensions are payable to wartime veterans who are unable to secure substantially gainful employment as a result of a permanent and total non-service-connected disability. The basic rate is \$66.15 a month, increased to \$78.75 if the veteran is 65 years old, or if rated permanent total for a continuous period of 10 years. A rate of \$135.45 monthly is payable to veterans requiring regular aid and attendance. Payment of pensions is limited to veterans whose annual income is less than \$1,400 if single, or \$2,700 if married, or if the person has a minor child.

The caseload continues to increase. Over 95% of the increase is in the World War I category where large num-

VETERANS ADMINISTRATION—Continued

Current authorizations—Continued

COMPENSATION AND PENSIONS—Continued

bers of veterans are attaining age 65. The average annual payment per case increases in 1958 and 1959, primarily for the same reason.

LIVING VETERANS—NON-SERVICE-CONNECTED

[Average number of veterans]

	1957 actual	1958 estimate	1959 estimate
Yellow fever experiments.....	2	2	2
Indian wars.....	140	120	100
Spanish-American War.....	52,773	47,200	41,900
World War I.....	569,100	639,700	714,200
World War II.....	62,884	68,700	75,000
Korean conflict.....	2,716	4,040	5,800
Peacetime service.....	315	285	270
Total.....	687,930	760,047	837,272
Average payment per case per year.....	\$954.72	\$967.29	\$972.26
Total costs.....	\$656,779,836	\$735,187,800	\$814,046,800

Dependents of deceased veterans.—In World War II and Korean conflict cases, pensions are payable to dependents of deceased wartime veterans, whose death was not due to service-connected causes, but who at the time of death had a service-connected disability. This last requirement is not applicable to World War I cases. Rates vary considerably depending upon the relationship and the number of dependents, and the periods of service. Eligibility for pension is subject to an annual income limitation of \$1,400 to a widow without a child or to a child, or \$2,700 to a widow with a child or children.

The projected growth of the average caseload is proportionate to recent experience. The average annual payment per case increases somewhat in 1958 over the past fiscal year principally because of the changing distribution of the cases according to period of entitlement.

DECEASED VETERANS—NON-SERVICE-CONNECTED

[Average number of cases]

	1957 actual	1958 estimate	1959 estimate
Mexican War.....	9	7	5
Indian wars.....	1,165	1,115	1,085

Total costs.....	\$293,762,055	\$310,555,000	\$327,606,000

3. *Other—Emergency officers.*—Emergency officers of World War I retired for service-connected disability are entitled to special retirement benefits at rates substantially higher than the normal compensation payments.

Adjusted service and dependents pay.—Adjusted service credits earned by veterans of World War I are payable from this appropriation. Veterans' claims of \$50 or less and dependents' claims of less than \$50 are paid in cash. Dependents' claims of \$50 or more are paid in 10 equal quarterly installments. A bonus payment of \$60 is paid to the dependents of a World War I veteran who died while in service and before July 1, 1919, if an adjusted service credit is certified to the Administrator.

Subsistence allowance.—Subsistence allowance payments to disabled veterans enrolled in vocational rehabilitation and education programs are made from this appropriation.

Initial burial allowance.—The Veterans Administration provides an allowance of \$150 (plus transportation charges where death occurs under Veterans Administration care) for the funeral expenses of a deceased veteran. The estimated increases in obligations are based on experienced trends.

These benefits cover cost of subsistence, tuition, supplies, and equipment for the training of World War II veterans; education and training allowances for Korean conflict veterans; educational assistance allowance for eligibles under the War Orphans' Educational Assistance Act of 1956; gratuities, claims, and property acquisition costs on veterans' loans; special assistance to disabled veterans in the form of tuition and supplies and equipment for those requiring vocational rehabilitation, housing grants, and automobiles and other conveyances.

1. *Education and training.*—The number of World War II veterans receiving education and training has diminished to a negligible number. It is estimated that the number of Korean conflict veterans receiving benefits will decline gradually during the next few years. Indications point to a moderate increase in trainees benefiting from the recently enacted War Orphans' Educational Assistance Act, effective October 1, 1956. The average unit cost per trainee of World War II veterans was high in 1957 because of payments made for training received in the prior fiscal year. The unit cost also was high during this same period for war orphan trainees because of the disproportionate amount of retroactive payments which characterized the early months of the program. Load forecasts of trainees are based upon an analysis of trends in each of the major categories as follows:

	1957 actual	1958 estimate	1959 estimate
World War II education:			
Average number of trainees.....	3,852	1,000	250
Average cost per trainee.....	\$1,793.24	\$1,130	\$1,128
Total cost.....	\$6,907,571	\$1,130,000	\$282,000
Korean conflict veterans:			
Higher learning.....	304,554	297,500	254,000
Below college.....	176,656	166,500	146,000
Institutional on-farm.....	37,528	33,000	28,000
Job training.....	55,748	43,000	32,000
Total.....	574,486	540,000	460,000
Average cost per trainee.....	\$1,335.45	\$1,337	\$1,338
Total cost.....	\$767,197,066	\$721,832,000	\$615,576,000
War orphans:			
Average number of trainees.....	1,206	4,500	7,000
Average cost per trainee.....	\$1,949.80	\$1,320	\$1,320
Total cost.....	\$2,351,453	\$5,940,000	\$9,240,000

The workload and cost data shown, based on the latest analyses and projections of the number of veterans who will be in training during the current year, reflect the need for an anticipated 1958 supplemental of approximately \$30 million.

2. *Loan guaranty.*—Home, farm, and business loans are guaranteed or insured by the Veterans Administration. The payment of claims and the acquisition of loans and properties result from failure of veteran borrowers to maintain their mortgage obligations, thus creating liability on the part of the Government as guarantor or insurer. Budget forecasts are based on the relatively low default ratio experienced during the program. The number and cost of loan guaranty direct benefit payments follows:

	1957 actual	1958 estimate	1959 estimate
Interest gratuities:			
Number of gratuity payments.....	425		
Average cost per payment.....	\$155.26		
Total cost.....	\$65,984		
Claims paid:			
Number of claims paid.....	6,668	8,300	8,325
Average cost per payment.....	\$1,227.35	\$1,230	\$1,240
Total cost.....	\$8,153,945	\$10,209,000	\$10,323,000
Loans and properties acquired:			
Number of acquisitions.....	5,690	7,690	7,770
Average cost per acquisition.....	\$9,116.94	\$9,120	\$9,168
Total cost.....	\$51,875,367	\$70,131,000	\$71,232,000

The increase in average cost for claims as well as loan and property acquisitions bears a direct relationship to the steady price index rise in the housing market.

Though these expenditures are paid from appropriated funds, they do not represent full loss to the Government, since the proceeds from liquidation of assets are deposited into the general fund receipts of the Treasury as shown below:

	1957 actual	1958 estimate	1959 estimate
Expenditures from appropriated funds.....	\$60,061,343	\$80,340,000	\$81,555,000
Less returns to general fund receipts.....	17,347,270	21,000,000	24,000,000
Net appropriation expenditures.....	42,714,073	59,340,000	57,555,000

As of June 30, 1957, cumulative expenditures for claims and acquisitions totaled \$247,455,078, however, total cash receipts of \$83,892,127 had been returned to the Treasury. Against the resulting cash deficit of \$163,562,951, Veterans Administration held assets worth \$152,505,377. These assets consisted of real property, cash, and loans and accounts receivable. Actual 1957 and estimated 1958 and 1959 operations are compared in the following condensed statement of income and expense, and financial condition.

Condensed Statement of Income and Expense and Financial Condition

3. *Special assistance to disabled veterans.*—Disabled veterans requiring vocational rehabilitation are provided educational assistance for tuition, supplies, and equipment. Assistance also is available to provide grants for specially adapted housing to veterans having suffered the loss of both feet, and to paraplegic veterans. In addition, up to \$1,600 is allowed certain disabled veterans toward the purchase of automobiles or other conveyances. The separate appropriation heretofore covering this benefit is being abolished and the activity combined with this

Annual definite.....			51,100,000
Permanent indefinite.....			570,000

1. *Military and naval insurance.*—Payments are made for claims on war-risk insurance issued to servicemen and veterans of World War I. Although no policies of this insurance remain in force, payments for death and disability claims continue.

(a) *Payments to United States Government life insurance fund.*—Transfers are made to the United States Government life insurance fund to reimburse the fund for claims (1) traceable to the extra hazards of military service and (2) arising on certain policies held by personnel in active military service. The cash amount of payment made during the year is an obligation of this account. The corresponding trust fund receipt is presented on an accrued basis.

Description	1957 actual	1958 estimate	1959 estimate
Death and disability awards.....	427	451	454
Average payment per award.....	\$1,608	\$1,552	\$1,564

(b) *Direct payments to policyholders and beneficiaries.*—Payments of \$5.75 per month per \$1,000 of war-risk insurance held are made to veterans becoming permanently and totally disabled for as long as the disability shall continue. Upon the death of a veteran receiving payments for disability, the remaining value of the policy is paid to the beneficiary as a death award.

Description	1957 actual	1958 estimate	1959 estimate
Average number of disability awards.....	6,785	6,745	6,754
Average number of death awards.....	65	60	60
Annual average payment per disability award.....	\$546	\$537	\$537
Annual average payment per death award.....	\$1,354	\$167	\$183

2. *National service life insurance.*—This appropriation pays certain expenses of the national service life insurance

fund and receives premiums and pays claims on non-participating insurance policies issued to certain disabled veterans of World War II. The permanent indefinite appropriation of premium receipts is authorized.

(a) *Payments to national service life insurance fund.*—(1) For death claims traceable to extra hazard of service an amount is transferred from this appropriation, which, when added to the reserve of the policy, is equal to the actuarial value of the claim. In the event of total disability traceable to the extra hazards of service, an amount is transferred from this appropriation sufficient to meet the current payments from the fund. (2) Gratuitous insurance was issued to aviation cadets and to certain persons who were unable to make application for national service life insurance. (3) The fund is reimbursed when recovery of erroneous payments or overpayments is waived. (4) The fund is reimbursed for death claims on policies under waiver of premiums while the insured is on active military duty. The enactment of the Servicemen's and Veterans' Survivor Benefits Act has substantially reduced appropriation requirements for this purpose.

The cash amount of payment made during the year is an obligation of this account. The corresponding trust fund receipt is presented on an accrual basis.

Description	Average payment per case, 1957	Caseload		
		1957 actual	1958 estimate	1959 estimate
(1) Claims for extra hazards of service:

(b) Disability awards.....	137	24,233	23,412	22,565
(2) Gratuitous insurance.....	3,003	274	220	176
(3) Waiver of overpayments.....	2,446	48	41	41
(4) Death while under waiver of premiums.....	6,726	1,800	763	433

(b) *Direct payments to policyholders and beneficiaries.*—(1) Claims are paid on nonparticipating national service life insurance policies issued to World War II veterans with service-connected disabilities. (2) Claims may be paid in certain instances in which applicants for insurance were rejected for medical reasons and subsequently died in line of duty. (3) Claims are paid on deaths which occurred after application but before effective date of national service life insurance policies. (4) Claims may be paid in certain cases in which insurance was discontinued because the insured was discharged to accept a commission, was absent without leave, or was court-martialed.

(4) Claims on discontinued insurance.....	490	345	363	363

3. *Servicemen's indemnities.*—Beneficiaries of servicemen who died prior to January 1, 1957, while in active service or within a period of 120 days after separation from active service are entitled to receive an indemnity of \$10,000 less any national service life insurance and/or United States Government life insurance carried by the deceased. Payments are made to beneficiaries in 120 equal installments, plus interest at the rate of 2½% per annum. Although very few new awards will be authorized in 1958 and 1959, as a result of the enactment of the Servicemen's and Veterans' Survivor Benefits Act, the payments on awards to January 1, 1957, are expected to remain at the level of about \$36 million annually through 1960. Payments will decrease annually, as installments are completed, beginning in 1961. A supplemental appropriation of \$2,250,000 is anticipated for this activity in 1958, and appears below.

The Philippine Government has received \$9,400,000 for the construction and equipping of a veterans' hospital which is now in operation. It also receives a gradually decreasing amount per annum until December 31, 1959, for the medical care and treatment of certain veterans in the Philippines. For 1959, this amount will be \$1,250,000 as compared with \$1,500,000 in 1958.

Appropriation (new obligational authority).....			51,635,000	42,500,000	9,145,000				

These funds provide for the construction of new hospital and domiciliary facilities and replacement of existing hospitals, including acquisition of sites, conversion of existing facilities, modernization, improvements, and major repairs of existing facilities (including regional offices and supply depots), and for fixed and initial portable equipment at such facilities.

1. *Construction of new hospitals.*—This activity includes post-World War II new beds and conversion programs which consists of 77 new hospitals that provide approximately 38,040 new beds and 12 conversion projects. The status of the construction program for new hospital beds is as follows:

STATUS OF NEW BEDS PROVIDED

	1957 actual	1958 estimate	1959 estimate
Under construction at beginning of year.....	1,250	1,000	1,000
Put under construction during year.....	—	1,000	—
Completed during year.....	250	1,000	—
Total completed at end of year.....	33,740	34,740	34,740
Under construction at end of year.....	1,000	1,000	1,000
Not under construction at end of year.....	3,300	2,300	2,300

2. *Replacement of existing hospitals.*—This activity includes 9 projects that provide for replacement of approximately 7,296 beds (815 neuropsychiatric, 6,131 general medical and surgical, and 350 domiciliary) housed in temporary, obsolete, or hazardous structures. The following table shows the status of this program:

STATUS OF REPLACEMENT BEDS PROVIDED

	1957 actual	1958 estimate	1959 estimate
Under construction at beginning of year.....	561	561	815
Put under construction during year.....	—	815	500
Completed during year.....	—	561	—
Total completed at end of year.....	—	561	561
Under construction at end of year.....	561	815	1,315
Not under construction at end of year.....	6,735	5,920	5,420

3. *Modernization, improvements, and repairs.*—This activity provides for modernization, improvements, and major repairs principally to bring selected old hospitals, insofar as possible, up to the standards of the new hospitals. This program was undertaken in 1953 and has 508 projects including the proposed 1959 program. The status of the program is as follows:

STATUS OF MODERNIZATION, IMPROVEMENTS, AND REPAIRS PROGRAM

	Number of projects	Amount
Physically and financially completed June 30, 1957.....	239	\$22,434,000
Physically completed June 30, 1957.....	13	1,450,400
Under construction June 30, 1957.....	116	46,450,300
Scheduled to be placed under construction, 1958.....	52	15,805,100
Scheduled to be placed under construction, 1959.....	66	44,868,900
To be placed under construction, future years.....	22	23,789,300

4. *Initial portable equipment.*—This activity provides initial portable equipment for all projects approved prior to 1957.

5. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year (inventories and items on order):				
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received).....	\$40,027,783	\$22,572,205	\$51,392,930	\$62,149,514

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

NOTE.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriation, as follows:

"Operations," Federal Civil Defense Administration.
 "Emergency supplies and equipment," Federal Civil Defense Administration.
 "Salaries, expenses, and grants," National Cancer Institute, Public Health Service.
 "Payments to school districts," Office of Education.

ADMINISTRATIVE PROVISIONS

Not to exceed 5 per centum of any appropriation for the current fiscal year for "Compensation and pensions", "Readjustment benefits", ["Military and naval insurance", "National service life insurance", and "Servicemen's indemnities"] and "Veterans' insurance and indemnities" may be transferred to any other of the mentioned appropriations, but not to exceed 10 per centum of the appropriations so augmented, and not to exceed \$500,000 of the appropriation ["National service life insurance"] "Veterans' insurance and indemnities" for the current year may be transferred to "Service-disabled veterans insurance fund."

Appropriations available to the Veterans Administration for the current fiscal year for salaries and expenses shall be available for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a).

Appropriations available to the Veterans Administration for the current fiscal year for "Inpatient care" and "Outpatient care" shall be available for funeral, burial, and other expenses incidental thereto (except burial awards authorized by [Veterans Regulation Numbered 9 (a), as amended] title VIII, *Veterans' Benefits Act of 1957 (71 Stat. 117)* (38 U. S. C., chap. 12A)), for beneficiaries of the Veterans Administration receiving care under such appropriations.

No part of the appropriations in this Act for the Veterans Administration (except the appropriation for ["Hospital and domiciliary facilities"] "Construction of hospital and domiciliary facilities") shall be available for the purchase of any site for or toward the construction of any new hospital or home.

No part of the foregoing appropriations shall be available for hospitalization or examination of any persons except beneficiaries entitled under the laws bestowing such benefits to veterans, unless reimbursement of cost is made to the appropriation at such rates as may be fixed by the Administrator of Veterans Affairs. (*Independent Offices Appropriation Act, 1958.*)

The Veterans Canteen Service furnishes merchandise and services for the comfort and well-being of veterans in hospitals and domiciliaries of the Administration (60 Stat. 888).

The Congress originally appropriated \$4,965,000 for the operation of the Veterans Canteen Service of which \$4,579,614 has been returned. The amount of \$744,515 will be returned during 1958, which will liquidate the balance of the funds appropriated and, in addition, will reflect a return of excess funds of \$359,129. The 1959 estimate anticipates a further repayment of \$799,134.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

Loans are made to veterans for the purchase, construction, or improvement of homes, including farm residences, only where guaranteed private mortgages cannot be secured. The proceeds of loan repayments and loan sales are available to June 30, 1958, for making additional loans. Appraisal and foreclosure expenses are met from interest income, and administrative expenses are borne by the appropriation for general operating expenses, Veterans Administration. Authority to make loans expires June 30, 1958. However, disbursements against loan commitments made prior to that date will continue to the close of 1959, at which time outstanding loans to veterans are estimated to be \$688.1 million, an increase of \$168 million over 1957.

Borrowing authority in the amount of \$733.5 million has been exercised through June 30, 1957. No additional borrowing authority is authorized for 1958 or 1959. In 1958 principal repayments and funds derived from sale of loans are available for lending. It is estimated that a favorable cash position will permit the return of \$40.1 million to the Treasury during 1959.

As reflected in "Sources and application of funds," the purchase and resale of properties resulting from foreclosures on defaulted loans involve primarily an exchange of noncash assets (i. e., loans receivable versus real property) although cash expenditures and receipts also result.

The net budgetary expenditures were \$76.8 million in 1957. It is estimated they will total \$144.6 million in 1958, whereas in 1959, following the expiration of lending authority, it is expected that receipts will exceed expenditures by \$4.9 million. Interest earnings of \$32 million are anticipated in 1959, which is \$12.3 million over 1957. Expenses are expected to increase only \$6.8 million resulting in an improved net income for 1959 of \$5.5 million, and increasing retained earnings to \$54 million at the end of the year. The net principal of the fund as of June 30, 1959, is estimated at \$690.4 million, a decrease of \$40.1 million from June 30, 1957, reflecting the return of that

This fund receives premiums and pays claims on non-participating insurance policies issued to veterans with a service-connected disability which makes them ineligible for commercial insurance. As of June 30, 1957, there were 26,781 policies in force, representing \$234.4 million of insurance. Administrative expenses of the program, which was initiated in 1951, are paid from the appropriation for "General operating expenses."

Liabilities for death claims and refunds have exceeded premium receipts each year due to the insurance of medically substandard lives. No appropriation is requested for 1959.

The accumulated operating deficit of this fund is steadily mounting from \$7.7 million in 1957 to \$11.6 million in 1959. Appropriations will be necessary in subsequent years to make up this deficit or to provide additional funds as they are needed to pay off this liability.

This fund is used to guarantee premiums due on commercial life-insurance policies held by servicemen while they are in service and for 2 years after discharge. The Government guarantees the repayment of any indebtedness not liquidated by the insured himself. Any payment by the Government on cases approved subsequent to

amendment of the act of October 6, 1942, becomes a debt owed the Government by the insured. Administrative expenses are borne by the appropriation for "General operating expenses."

Veterans who served subsequent to April 1951 had the opportunity to purchase special nonparticipating term insurance until January 1, 1957, provided application was made within 120 days after separation from service. The Servicemen's and Veterans' Survivor Benefits Act (70 Stat. 857) prohibited further issuance of this type of insurance on or after January 1, 1957. As of June 30, 1957, there were 727,000 policies in force providing over \$6.6 billion protection. Administrative expenses of this program are borne by the appropriation for "General operating expenses."

Favorable mortality experience on insurance written against this fund indicates that earnings will reach \$46.8 million at the close of 1959. This sum, which is invested in 2½% U. S. securities, is substantially in excess of amounts needed for contingency reserve.

This fund is used to make loans up to \$100 to disabled veterans eligible for vocational rehabilitation who are without sufficient funds to meet their expenses (57 Stat. 43; 38 U. S. C., ch. 12 note). Repayments are used to make new loans.

Administrative expenses for operating the fund are borne by the appropriation "General operating expenses."

The fund finances, on a reimbursable basis, procurement of supplies and equipment, operation of the service and reclamation shops, the book and periodical activity, and the motion picture inspection, repair, and shipping activity, and effective in 1958 the publications and reproduction program including the purchase of forms from General Services Administration, Government Printing Office, and contract printers.

The fund operated at a slight loss in 1957 on a sales volume of \$133.7 million. A return of the Government's investment to Treasury of \$4 million was made in 1957 and an additional return of \$1 million is programmed for 1958. This will bring the total of capital returns to Treasury to \$16 million since the fund began operations in 1954.

The fund is expected to break even in 1959 on a total sales volume of \$136.3 million. The 1958 estimate provides for a small gain to offset the 1957 deficit.

A net increase of approximately \$300,000 in capital is reflected in 1958. This is comprised of an increase of \$1,300,000 due to capitalization of inventories of forms (\$1,126,824) and operating equipment (\$208,908) of the publications and reproduction program, less return of \$1,000,000 to Treasury.

No additional appropriation by the Congress will be required for the operation of the supply fund during 1958 and 1959.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year (inventories and items on order):

Program by activities:			
1. Maintenance and operation of hospi- tals:			
(a) Neuropsychiatric hospitals.....		\$1,312,000	
(b) Tuberculosis hospitals.....		364,000	
(c) General medical hospitals.....		2,319,000	

VETERANS ADMINISTRATION—Continued**Proposed for later transmission—Continued****INPATIENT CARE—Continued****Program and Financing—Continued**

	1957 actual	1958 estimate	1959 estimate
Program by activities—Continued			
2. Maintenance and operation of Veterans Administration domiciliary homes		\$205,000	
Total program (costs—obligations)		4,200,000	
Financing:			
Proposed supplemental appropriation		4,200,000	

Under existing legislation, 1958.—A supplemental appropriation of \$4,200,000 is anticipated to cover the cost of salary increases approved for wage-board employees, subsequent to submission of the 1958 budget.

MAINTENANCE AND OPERATION OF SUPPLY DEPOTS**Program and Financing**

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
1. Storage operations		\$26,800	
2. Utility operations		11,000	
Total program (costs—obligations)		37,800	
Financing:			
Proposed supplemental appropriation		37,800	

Under existing legislation, 1958.—A supplemental appropriation of \$37,800 is anticipated to cover the cost of salary increases approved for wage-board employees subsequent to the submission of previous estimates.

COMPENSATION AND PENSIONS**Program and Financing**

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
Compensation, living veterans, World War II (total costs—obligations)		\$256,000,000	
Financing:			
Proposed supplemental appropriation		256,000,000	

Under existing legislation, 1958.—A supplemental appropriation of \$256 million is anticipated to cover uncontrollable statutory benefit costs of the compensation and pensions program, including \$127 million attributable to recent legislation increasing veterans compensation rates (71 Stat. 424).

READJUSTMENT BENEFITS**Program and Financing**

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
Education and training, Korean conflict veterans (total costs—obligations)		\$30,000,000	
Financing:			
Proposed supplemental appropriation		30,000,000	

Under existing legislation, 1958.—A supplemental appropriation of \$30 million is anticipated to cover uncontrollable education and training benefit costs expected to exceed previous estimates.

SERVICEMEN'S INDEMNITIES**Program and Financing**

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
Servicemen's indemnities (total costs—obligations)		\$2,250,000	
Financing:			
Proposed supplemental appropriation		2,250,000	

Under existing legislation, 1958.—Since payments under this program are being made at a rate which exceeds the total appropriation, a supplemental of \$2,250,000 is proposed for later transmission.

INDEPENDENT OFFICES—GENERAL PROVISIONS

SEC. 102. Where appropriations in this title are expendable for travel expenses of employees and no specific limitation has been placed thereon, the expenditures for such travel expenses may not exceed the amounts set forth therefor in the budget estimates submitted for the appropriations: *Provided*, That this section shall not apply to travel performed by uncompensated officials of local boards and appeal boards of the Selective Service System.

SEC. 103. Where appropriations in this title are expendable for the purchase of newspapers and periodicals and no specific limitation has been placed thereon, the expenditures therefor under each such appropriation may not exceed the amount of \$50: *Provided*, That this limitation shall not apply to the purchase of scientific, technical, trade, or traffic periodicals necessary in connection with the performance of the authorized functions of the agencies for which funds are herein provided, nor to the purchase of newspapers and periodicals necessary for the care and welfare of patients and members in Veterans Administration hospitals and domiciliary facilities.

SEC. 104. No part of any appropriation contained in this title shall be available to pay the salary of any person filling a position, other than a temporary position, formerly held by an employee who has left to enter the Armed Forces of the United States and has satisfactorily completed his period of active military or naval service and has within ninety days after his release from such service or from hospitalization continuing after discharge for a period of not more than one year made application for restoration to his former position and has been certified by the Civil Service Commission as still qualified to perform the duties of his former position and has not been restored thereto.

SEC. 105. Appropriations contained in this title, available for expenses of travel shall be available, when specifically authorized by the head of the activity or establishment concerned, for expenses of attendance at meetings of organizations concerned with the function or activity for which the appropriation concerned is made.

SEC. 106. No part of any appropriations made available by the provisions of this title shall be used for the purchase or sale of real estate or for the purpose of establishing new offices outside the District of Columbia: *Provided*, That this limitation shall not apply to programs which have been approved by the Congress and appropriations made therefor.

SEC. 107. No part of any appropriation contained in this title shall be used to pay the compensation of any employee engaged in personnel work in excess of the number that would be provided by a ratio of one such employee to one hundred and thirty-five, or a part thereof, full-time, part-time, and intermittent employees of the agency concerned: *Provided*, That for purposes of this section employees shall be considered as engaged in personnel work if they spend half time or more in personnel administration consisting of direction and administration of the personnel program; employment, placement, and separation; job evaluation and classification; employee relations and services; training; wage administration; and processing, recording, and reporting.

SEC. 108. None of the sections under the head "Independent Offices, General Provisions" in this title shall apply to the Housing and Home Finance Agency.

CORPORATIONS—GENERAL PROVISIONS

SEC. 202. No part of the funds of, or available for expenditure by, any corporation or agency included in this title shall be used to pay the compensation of any employee engaged in personnel work in excess of the number that would be provided by a ratio of one such employee to one hundred and thirty-five, or a part thereof, full-time, part-time, and intermittent employees of the agency concerned: *Provided*, That for purposes of this section employees shall be considered as engaged in personnel work if they spend half-time or more in personnel administration consisting of direction and administration of the personnel program; employment, placement, and separation; job evaluation and classification; employee relations and

services; training; committees of expert examiners and boards of civil-service examiners; wage administration; and processing, recording, and reporting.

GENERAL PROVISIONS

SEC. 301. No part of any appropriation contained in this Act, or of the funds available for expenditure by any corporation or agency included in this Act, shall be used for publicity or propaganda purposes designed to support or defeat legislation pending before the Congress. (*Independent Offices Appropriation Act, 1958.*)

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1959

INDEPENDENT OFFICES

Appropriation	Motor vehicles to be purchased		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Users and public purpose
	Number	Gross cost	Number	Allowance (estimate)				
AIRWAYS MODERNIZATION BOARD								
Expenses.....							\$7,500	For transportation of the Chairman of the Board, technical director, and other employees to and from meetings in the Washington, D. C., area, and for use at the Board's test center.

Salaries and expenses.....						77	19,600	To be used by officials at State headquarters for the purpose of visiting local boards within the various States and other official travel as required.
Station wagon.....						55		Same as above and to deliver supplies and equipment if necessary.
Total, Selective Service System.						132	19,600	
SMITHSONIAN INSTITUTION								
Salaries and expenses, National Gallery of Art.						1		Official use of officers of the National Gallery of Art.
TENNESSEE VALLEY AUTHORITY								
Tennessee Valley Authority fund....	200	\$300,000	200	\$70,000	\$230,000	600	10,000	The TVA program is conducted in an area of more than 80,000 square miles, with many installations at isolated points. Travel by automobile is frequently more economical than common carrier and sometimes the only available method of transportation. TVA's 800 units are pooled in 1 fleet and are issued to employees as requested. About 419 units will be used in power operations, maintenance, and transmission construction activities; 113 in dam and steam plant construction at isolated sites not served by common carrier; 98 units in reservoir operations; and 170 in forestry, fertilizer, agricultural, administrative, and miscellaneous activities. Motor vehicles will be hired on special occasions to meet peak demands and at remote locations where the Authority does not maintain a pool of motor vehicles and personal cars are not available.

¹Includes \$200 for hire of motor vehicles from commercial sources.

Tennessee Valley Authority fund.....	1	\$5,000				7	103,000	5 helicopters will be used for transmission line patrol, malaria control spraying, reconnaissance, aerial inventories and air sampling in the vicinity of TVA steam plants for air pollution tests; 1 fixed-wing plane will be used for emergency malaria control spraying and transmission line trouble-shooting and reservoir aerial inspection; 1 airplane will be used for passenger service with some use for aerial mapping and reconnaissance; 1 plane will be used principally for the transportation of engineers to widely scattered projects and for transportation of administrative officers on official business.
Total, independent offices.....	1	5,000				19	216,656	

1 Includes 3 aircraft on loan from the military services.

2 Passenger trips only.

GENERAL SERVICES ADMINISTRATION

Expenditures of the General Services Administration will decline in 1959 to an estimated \$413 million, or \$34 million below 1958 and \$145 million below 1957. The downward trend reflects mainly decreases in acquisitions for the stockpiling of defense materials. However, the 1959 budget recommends an increase over 1957 and 1958 in new obligational authority, because, for the first time in 3 years, new funds are required to continue the stockpiling program—even at the reduced level.

Apart from the stockpiling program, new obligational authority requested for the remaining major programs of the General Services Administration is slightly below 1958. Small increases in a few activities are more than offset by decreases in others. Expenditures are estimated to increase in 1959, however, as obligations of prior years are liquidated.

General property and records management.—Management of real property activities accounts for well over half the 1959 estimates. The budget proposes to continue buildings management services at the same general level as in the current year; however, some costs of office space are being transferred from tenant agencies to the General Services Administration with corresponding reductions for those agencies. Repairs and improvements in buildings are likewise estimated to continue at the present rate, but unused balances of appropriations from prior years will permit new obligational authority to be reduced below the 1958 level.

The 1959 budget assumes that a considerable amount of construction of new buildings will be financed from private sources under lease-purchase contracts. Funds are requested for site acquisition and architectural design work to complete this phase of the program for the majority of the currently approved lease-purchase projects. Thirty-three lease-purchase buildings are expected to be completed by the end of 1959. Legislation to authorize further

contracts has been recommended. The budget also recommends funds to construct a building for the United States Mission to the United Nations in New York City, and to plan a Federal office building to provide more adequate office space for Presidential staff.

The central supply system operated by the General Services Administration is continuing to grow as Government agencies increasingly use its services. The 1959 budget recommends \$15 million of additional capital for the general supply fund, and estimates an increase in sales and expenditures for supply depot operations. Other personal property activities in 1959 are budgeted at about the 1958 level.

The budget recommends minor increases in appropriations for 1959 to take account of the added workload of the records centers and of the National Archives. A small increase is also requested to strengthen the Government's representation before regulatory bodies in transportation rate cases and to improve transportation services rendered to Government agencies.

Stockpiling.—Purchases of defense materials for the military stockpile are decreasing as more and more stockpile objectives are completed. Purchases for the stockpile from inventories accumulated under defense production expansion programs have been suspended pending a review of stockpile policies and inventory objectives. Most of the 1959 acquisitions for the stockpile will be from the inventory acquired by the Commodity Credit Corporation through barter for surplus farm products.

Other functions.—Receipts under defense production guaranties, and liquidation of the Federal Facilities Corporation and of certain assets of the former Reconstruction Finance Corporation, offset by a small net expenditure in the abaca fiber program, are estimated to result in net receipts of \$2.2 million in 1959.

REAL PROPERTY ACTIVITIES

Current authorizations:

OPERATING EXPENSES, PUBLIC BUILDINGS SERVICE

【Operating expenses, Public Buildings Service:】 For necessary expenses of real property management and related activities as provided by law; furnishings and equipment; rental of buildings in the District of Columbia; restoration of leased premises; moving Government agencies (including space adjustments) in connection with the assignment, allocation, and transfer of building space; acquisition by purchase or otherwise and disposal by sale or otherwise of real estate and interests therein; payments in lieu of taxes pursuant to the Act of August 12, 1955 (40 U. S. C. 521); and not to exceed 【\$222,000】 \$281,300 for expenses of travel; 【\$130,339,000】 \$138,500,000: *Provided*, That this appropriation shall be available, without regard to section 322 of the Act of June 30, 1932, as amended (40 U. S. C. 278a), with respect to buildings or parts thereof, heretofore leased under the appropriation for "Emergency operating expenses". (*Independent Offices Appropriation Act, 1958.*)

Appropriated 1958, **\$130,339,000** Estimate 1959, **\$138,500,000**
Appropriated (adjusted) 1958, **\$130,242,000**

* Includes \$26,700 for activities previously carried under "Salaries and expenses, Office of Administrator," and excludes \$90,000 for activities transferred in the estimates to "Operating expenses, National Archives and Records Service." The amounts obligated in 1957 and 1958 are shown in the schedule as comparative transfers.

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
1. Buildings management.....	\$110,971,912	\$122,484,000	\$130,928,000
2. Acquisition and disposal.....	1,672,795	1,961,400	1,965,400

New obligational authority:			
Appropriation.....	\$131,950,000	\$130,339,000	\$138,500,000
Transferred (71 Stat. 232) to—			
“Operating expenses, Federal Supply Service”.....		—67,000	
“Operating expenses, Transportation and Public Utilities Service”.....		—30,000	
Appropriation (adjusted).....	131,950,000	130,242,000	138,500,000

This appropriation provides for basic real property operations of the Administration including the direction of all real property programs; acquisition, operation, and utilization of general-purpose space; operation of communications facilities; management of excess real property and disposal of surpluses; central direction of all buildings design, construction, and repairs; and maintenance of a machine tool reserve.

The appropriation request for 1959 is a net increase of \$5,171,300 above a comparable amount for 1958 which includes a proposed supplemental of \$3,150,000.

1. *Buildings management.*—This activity provides for (a) rental, operation, protection, and utilization of Government-owned, leased, and purchase contract space, as indicated in the following table:

AVERAGE NET SQUARE FEET

	1956 actual	1957 actual	1958 estimate	1959 estimate
Government-owned space.....	54,852,000	54,921,000	54,958,000	54,958,000
Leased space.....	20,273,000	20,434,000	21,707,000	23,292,000
Purchase contract space.....			38,000	51,000

(b) maintenance and operation of joint-use communication facilities; (c) protection and maintenance of excess, surplus, and National Industrial Reserve properties; and

(d) payments in lieu of taxes on certain properties transferred from the Reconstruction Finance Corporation.

The net increase for 1959 of \$5,294,000 over the comparable amount for 1958 is composed of the following items:

Operation and protection of Government-owned space.....	\$300,000
Rental, operation, and protection of leased space.....	1,214,400
Cost of space supplied to other agencies, reimbursable in 1958.....	3,195,000
Operation and protection of purchase contract space.....	15,600
Emergency rapid-written communications.....	500,000
Contribution to retirement fund.....	145,000
Maintenance of reserve and surplus properties.....	—58,000
Payments in lieu of taxes.....	—18,000
Total.....	5,294,000

2. *Acquisition and disposal.*—This activity provides for (a) acquisition of real property by lease, purchase, exchange, or donation; and (b) disposal and utilization of excess, surplus, and industrial reserve property. Sales of surplus properties are estimated at \$40,000,000 in 1958 and \$26,500,000 in 1959, compared to \$25,979,000 in 1956, and \$11,560,000 in 1957.

3. *Design and construction.*—This activity provides for a small staff responsible for central technical direction of all programs involving design, construction, and remodeling of Federal buildings.

4. *Program planning.*—This activity provides centralized planning of real property programs covering immediate and long-range building needs; consultation with other agencies to resolve their general problems on space, building service or other property management matters, and to determine immediate and long-range space and services needs; development and application of occupancy standards; development and maintenance of space cost statistics and program performance reporting for managerial use; and appraisal of real property.

6. *Machine-tool reserve.*—A reserve of Government-owned machine tools and industrial equipment is maintained to supply essential needs of the Armed Forces in time of national emergency. It is estimated that an average of 10,808 tons of machine tools will require preservation, maintenance, and analytical testing in 1959, compared to an estimated 9,983 tons in 1958, and 8,756 tons in 1957.

REPAIR AND IMPROVEMENT, FEDERALLY OWNED BUILDINGS

[Repair and improvement, federally owned buildings:] For expenses necessary for the repair, alteration, preservation, renovation, improvement, extension, equipment, and demolition of federally owned buildings and buildings occupied pursuant to the Public Buildings Purchase Contract Act of 1954 (40 U. S. C. 356), not otherwise provided for, including grounds, approaches and appurtenances, wharves and piers, together with the necessary dredging adjacent thereto; acquisition of land as authorized by title III of the Act of June 16, 1949 (40 U. S. C. 297); not to exceed **[\$260,000]** \$300,000 for expenses of travel; and care and safeguarding of sites acquired for Federal buildings; **[\$65,000,000]** \$50,000,000, to remain available until expended[: *Provided*, That the unexpended balance of appropriations heretofore granted for "Repair, improvement, and equipment of federally owned buildings outside the District of Columbia" shall be merged with this appropriation]. (*Independent Offices Appropriation Act, 1958.*)

Appropriation (new obligational authority).....	42,600,550	65,000,000	50,000,000

This appropriation provides for repairs, renovations, and improvements for over 4,600 Federal buildings under the jurisdiction of the Administration for that purpose which contain more than 101.3 million net square feet of floor space and were constructed or purchased at a cost exceeding \$1.5 billion. Since the start of World War II lack of a general construction program has resulted in deterioration and obsolescence which adversely affects efficient operations of tenant agencies. Recent efforts have been made to alleviate this condition.

1. *Maintenance repairs.*—Normal recurring needs for repairs to buildings and equipment develop at approximately uniform rates each year. However, concentrated effort to accomplish repairs which had to be deferred in prior years is reflected in the heavier accrued costs shown for this activity for 1957 and 1958. About 6% of this program provides for numerous minor capitalized items too small to be considered as "renovation projects."

2. *Renovation projects.*—Elimination of major obsolescence and deterioration of buildings is provided by bringing the properties up to modern standards of use-

fulness to improve working conditions and efficiency of occupying agencies. So great is the need for such work that the total program, estimated to cost \$144 million at current prices, has been programed over a period of 7 years starting with 1958. It is estimated that over two-thirds of this work will be applied to capital improvements. The increase in accrued costs for 1959 over 1958 results from greater undelivered orders carried over from 1958.

3. *Air conditioning.*—Improvements in working conditions for occupants of buildings located in areas of high temperature and humidity are estimated to cost \$328 million at current prices. The program was initiated in 1957 by providing new obligational authority of \$18 million followed by \$21.5 million in 1958 and \$6.6 million is requested for 1959. At the initiation of this program considerable lead time was required for development of drawings and specifications before projects could be placed on the market. The relatively low accrual in 1957 reflects this lead time as contracts were awarded largely in the fourth quarter of the year. Except for a nominal sum each year for program development and supervision, all costs under this activity are considered to be capital improvements.

5. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1956, \$12,947,322; 1957, \$22,514,419; 1958, \$28,435,419; and 1959, \$27,058,341.

This program provides for planning, site acquisition, design, construction supervision, temporary provisions for agencies displaced by construction, and other program expense in connection with the acquisition of buildings by the Government through lease-purchase arrangements or otherwise.

During the 3 years prior to July 22, 1957, when the Public Buildings Purchase Contract Act of 1954 expired, except for certain projects in the District of Columbia, 98 projects had been approved for amounts totaling \$692.5 million, but now estimated at \$760.7 million at current costs. One project has been completed in 1958 and 32 are scheduled for completion in 1959.

The estimate for 1959 of \$20 million, together with amounts previously available, will provide for sites, design contracts, some to tentative stage only, and miscellaneous expense related to 92 projects and for certain preliminary planning of public buildings projects.

Funds for payment of principal, with interest, and taxes on completed projects are provided under the appropriation for payments, public buildings purchase contracts.

Under the program to acquire buildings through lease-purchase arrangements, 76 buildings costing some \$297 million are expected to be under purchase contract by the end of 1959 on which the annual payments for principal and interest during the contract period will total \$23 million. This is an increase of \$11 million over present limitations for entering into contracts, authorization for which is proposed for 1959. The estimate for 1959 for payments to contractors, and taxes, covers 33 projects scheduled for occupancy prior to June 30, 1959.

Improvements of private hospital facilities in the District of Columbia are made under legislation authorizing appropriations of \$36,710,000.

1. *Construction.*—Under authorized appropriations of \$23,410,000, a hospital center has been substantially completed. Air conditioning the nurses home, equipment, landscaping, and other features incidental to physical completion of the project will be accomplished late in 1958.

2. *Grants.*—Under authorized appropriations of \$13,300,000, grants are being made to private agencies in the District of Columbia for improving hospital facilities. Building costs are estimated at \$30.8 million, involving grants of about \$13 million. Approximately \$6.5 million, representing 50% of the grants, will be reimbursed by the District of Columbia over a period of years.

Appraisers, auctioneers, and brokers familiar with local markets are used to accelerate the disposal of surplus real and related personal property. Fees and costs of advertising and surveying are paid out of receipts, subject to a limit of 12% of the proceeds of all dispositions within each year (68 Stat. 1051). This method of disposal produced sales amounting to \$2.3 million in 1957 and is estimated to produce \$12 million in 1958 and \$15 million in 1959.

Financing applied to program.....	194,926,953	206,329,002	209,400,000

This fund finances, on a reimbursable basis, buildings management activities consisting of: management, rental, operation, and protection of Government-owned and leased space in and outside the District of Columbia for housing Federal agencies; repair and improvement including certain major renovation and air conditioning of Government-owned space managed by General Services Administration; operation of joint-use communication facilities; protection and maintenance of excess, surplus, and national industrial reserve properties; payments in lieu of taxes on certain properties transferred from the Reconstruction Finance Corporation; and other related building services (66 Stat. 594). Retained earnings resulting from operations, after making provision for prior year losses, if any, are paid into the Treasury as miscellaneous receipts.

Operating costs for 1959 are estimated at \$209 million, a net increase of \$3 million over 1958.

1. *Operation and protection of Government-owned space.*—Provides for operation and protection of 70,991,000 average square feet of space in 1959 compared to 70,403,000

square feet in 1958 and 69,525,580 in 1957. The change from 1957 reflects mainly space progressively occupied by Atomic Energy Commission and National Security Agency at their new installations.

2. *Rent, operation, and protection of leased space.*—Provides for 34,845,000 average square feet in 1959 compared to 34,500,000 in 1958 and 33,924,543 in 1957, based on currently projected programs of Federal agencies.

3. *Operation and protection of purchase contract space.*—Provides for the operation and protection of a post office and courthouse building at Rock Island, Ill., which was completed in November 1957.

4. *Moving, alterations, and furniture.*—Provides for minimum of moving, alterations, and furniture based on experience factors derived from buildings management operations.

5. *Operation of communication facilities.*—Provides for management and operation of telecommunication services and facilities for use of Federal agencies. Increase in 1959 over 1958 provides for third phase of a program for relocating and expanding facilities of General Services Administration rapid-written communications to promote continuity of Government operations in event of emergency.

6. *Maintenance of reserve and surplus properties.*—A reserve of Government-owned industrial plants is maintained and minimum maintenance is provided certain excess and surplus real properties, pending disposal action. Reserve properties totaled 5 in 1957 and 7 are programed for 1958 and 1959. Surplus properties totaled 26 in 1957 and are estimated at 23 and 12, respectively, in 1958 and 1959.

7. *Payments in lieu of taxes.*—Real property taxes on certain properties which were transferred to General Services Administration from Reconstruction Finance Corporation and which are due during the period January 1, 1955, to December 31, 1958, are paid. Payments were made on 35 properties in 1957 and, based on current disposal objectives, will be reduced to 32 properties in 1958 and 31 properties in 1959.

8. *Security guarding.*—Provides extra guarding service for other agencies where specifically authorized by law.

9. *Job order work.*—Special services and improvements to buildings are provided under this heading, including lighting, certain air conditioning, painting, repair, and modernization of work space.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year:				
Advances.....	\$17,549	\$25,649	\$25,000	\$25,000

Intragovernmental funds—Continued

CONSTRUCTION SERVICES, PUBLIC BUILDINGS—Continued

appropriated, transferred, or advanced to the General Services Administration (40 U. S. C. 296).

Budget program.—Increase in the service activity of the fund for 1958 and 1959 is to provide for expansion in connection with General Services Administration's lease-purchase and expanded repair and improvement programs and numerous large construction projects assigned to General Services Administration by other Federal agencies.

Relation of costs to obligations.—Year-end balance of advances for 1956 was \$136.

Operating results.—Retained earnings will be gradually eliminated by reducing charges to individual projects and programs during 1958, 1959, and subsequent years.

OPERATING EXPENSES, PUBLIC BUILDINGS SERVICE

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
Buildings management (total obligations).....		\$3,150,000	
Financing:			
Proposed supplemental appropriation.....		3,150,000	

Under existing legislation, 1958.—It is anticipated that an additional \$3,150,000 will be required to annualize increases in wage-board rates effected during 1957 and for such increases effected during 1958. The total cost is estimated at \$3,900,000 of which \$750,000 is to be absorbed by holding down the level of buildings management services.

PERSONAL PROPERTY ACTIVITIES

Current authorizations:

OPERATING EXPENSES, FEDERAL SUPPLY SERVICE

[Operating expenses, Federal Supply Service:] For necessary expenses of personal property management and related activities as **[provided]** authorized by law and not otherwise provided for; including not to exceed \$300 for the purchase of newspapers and periodicals; and not to exceed **[\$170,000]** \$85,700 for expenses of travel; **[\$3,360,000]** \$3,615,000: *Provided*, That not to exceed **[\$1,600,000]** \$1,865,000 of any funds received during the current or preceding fiscal year for deposit under section 204 (a) of the Federal Property and Administrative Services Act of 1949, as amended, and not otherwise disposed of by law, shall be deposited to the credit of this appropriation and shall be available for necessary expenses in carrying out the functions of the General Services Administration under the said Act, with respect to the utilization and disposal of excess and surplus personal property, including not to exceed \$145,000 for expenses of travel. (*Independent Offices Appropriation Act, 1958.*)

Appropriated 1958, \$4,960,000 Estimate 1959, \$5,480,000
Appropriated (adjusted) 1958, \$5,027,000

* Includes \$19,600 for activities previously carried under "Salaries and expenses, Office of Administrator." The amounts obligated in 1957 and 1958 are shown in the schedule as comparative transfers.

Appropriation (adjusted).....	4,180,000	5,027,000	5,480,000

This appropriation provides for establishment of efficient personal property management practices throughout the Federal Government.

1. *Utilization and sales.*—Excess usable personal property is reported to General Services Administration for screening against needs of other agencies to achieve maximum utilization by transfers and obviate new purchases. The residue, together with surpluses not screened by General Services Administration, is either donated for educational, public health, or civilian defense purposes or released for public sale. Utilization transfers of \$95 million in 1956 and \$83.2 million in 1957, are expected to increase to \$109 million in 1958, and \$122 million in

1959. Assistance furnished the Air Force in the sales of \$286.4 million of surplus in 1957, to increase sales returns is expected to increase to \$460 million in 1958, and \$495 million in 1959. Expense of these operations is provided from proceeds of sales of surplus personal property.

2. *Supply standards.*—Standards of quality and other characteristics of common-use commodities are established by specifications and qualified products lists for mandatory use by Government agencies.

3. *Federal catalog participation.*—Uniform catalog identification for each item in the civilian agencies' supply operations is provided and coordination maintained with Department of Defense in development of a single Federal catalog system. During 1958 the identification of some 138,000 items procured by other agencies through General Services Administration facilities will be completed. Funds provided for 1959 are to start cataloging some 762,000 other items procured directly by civilian agencies.

4. *Motor vehicle management.*—Governmentwide policies and procedures are developed for improving utilization of motor equipment. Interagency motor equipment pools are established where surveys at locations of high vehicle density demonstrate economies or improved efficiency will result. Progress of the pool program is as follows:

	Surveys started	Surveys completed	Pools established
1956 (cumulative).....	22	14	12
1957.....	15	15	10
1958.....	20	22	18
1959.....	16	19	16
Total.....	73	70	66

5. *Supply contracting.*—Term contracts for common-use commodities and services are established for large aggregate volume requirements against which agencies place individual orders at uniform price advantages.

6. *Supply management.*—Policies and procedures for improving supply management in Government agencies are developed and their installation coordinated through continuous on-site assistance and by special surveys as required. The increase for 1959 will provide for increased on-site assistance from 6 to 12 groups of major agencies, and increased emphasis on agencywide supply surveys.

Financing:			
Unobligated balance no longer available.....	43,037		
Appropriation (new obligational authority).....	15,070,000	17,765,000	19,500,000

This appropriation provides for expenses of operating the nationwide supply system whereby common-use commodities and services are sold to Government agencies from stocks of 12 supply depots or by direct delivery from suppliers, whichever is more economical. Cost of commodities and services is initially financed from the general supply fund, subject to reimbursement by ordering agencies. Total sales for 1959 are programed at \$292.6 million, as compared with \$256.7 million programed for 1958, and \$225.1 million for 1957. The progressive increases in the sales reflect progress toward centralizing the procurement and distribution of common-use supply items in the General Services Administration. The appropriation request for 1959 provides for increased cost of operations and staff support for \$35.9 million increase in sales.

1. *Stores operations.*—Stocks of common-use commodities are received, warehoused, and sold at cost to Federal agencies through a nationwide system of supply depots. Continuous increase in stores sales is shown in the following figures: 1954, \$52.8 million; 1955, \$75.9 million; 1956, \$96.4 million; 1957, \$116.4 million; 1958, \$130.2 million; and 1959, \$139.4 million.

2. *Buying operations.*—Commodities are procured (a) to maintain inventories at stores depots to insure availability in advance of sales orders, and (b) for direct delivery to agencies.

3. *Inspection operations.*—Delivery of commodities of specified standards is assured by inspection at contractors' plants or supply depots and by laboratory tests and analyses of samples prior to acceptance. The increase for 1959 will keep inspections in line with the buying program of activity 2.

4. *Relation of costs to obligations.*—Year-end balances of unpaid undelivered orders are as follows: 1956, \$128,604; 1957, \$125,654; 1958, \$148,100; and 1959, \$176,300.

This fund finances, on a reimbursable basis, a national supply depot system and a system of ordering supplies for direct delivery to agencies. Supplies or services are sold from the fund at cost to other agencies and the District of Columbia. Expenses for operating the fund for these purposes are provided for under the appropriation "Expenses, supply distribution" (5 U. S. C. 630g).

Also financed by the fund and reimbursed by the using agencies are operations of interagency motor equipment pools established in areas of high vehicle density.

Budget program.—The estimate for 1959 provides for continued expansion in sales of both stores items and nonstores items to the military establishments under the Administration's program for progressively expanding use of these supply facilities by Department of Defense. Activation of additional interagency motor equipment pools programed for 1959 is expected to produce substantial increase in sales of services, eliminate some 500 vehicles from agencies' fleets, and increase average miles per vehicle year.

1. **Stores program.**—Stocks of common-use commodities are purchased in volume, stored in supply depots, and issued on the basis of need to Government agencies. Sales reached an all-time high of \$128.2 million in 1957 and are estimated to increase to \$147.2 million in 1958 and \$163.4 million in 1959. An increasing portion of larger volume orders are being shipped direct from suppliers to customer agencies to reduce handling costs.

2. **Nonstores program.**—Definite quantity requirements of commodities which are not susceptible to economical stocking in the supply depots are purchased for direct shipment to customer agencies. Sales are expected to increase from \$70.1 million in 1957 to \$82.8 million in 1958 and \$102.5 million in 1959, as additional commodities are supplied through this method.

3. **Motor pools, shops and equipment rentals programs.**—Motor vehicle services are supplied to Government agencies through a system of interagency motor pools still under development to serve areas of high vehicle density; furniture and equipment repair services are provided, through commercial sources wherever feasible and economical; and operating equipment necessary to carry out the fund's activities are acquired and expensed on an accrual basis to the using activities. Combined sales, largely due to motor pools, are expected to increase from \$4.5 million in 1957 to \$7.5 million in 1958 and \$10 million in 1959.

4. **Undistributed.**—Gains or losses arising from equipment disposals, adjustments between fiscal years, or inventory writeoffs are reflected. During 1957 a profit of \$0.14 million was made on equipment disposals and adjustments of \$0.39 million were made to prior year transactions.

5. **Relation of costs to obligations.**—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year:				
Advances.....	\$4,090	\$61,442		
Inventories for sales.....	30,214,290	37,259,578	\$15,000,000	\$51,400,000
Deferred charges.....	2,945	2,603		
Unpaid undelivered orders.....	42,138,792	39,947,630	41,800,000	42,600,000
Total selected resources at end of year.....	72,360,117	77,271,253	86,800,000	94,000,000
Selected resources at start of year (—).....		—72,360,117	—77,271,253	—86,800,000
Obligations incurred for costs of other years, net.....		4,911,136	9,528,747	7,200,000

The 1959 increase of \$7.2 million in selected resources represents inventories held for future sale and undelivered orders for stock replenishment and direct delivery.

Operating results and financial condition.—Current investment of the U. S. Government in the fund is \$78.9 million, of which \$74.5 million represents direct appropriations, \$3.3 million donated assets, and retained earnings of \$1.1 million. Continued expansion in sales and improvement of service to customer agencies as programed for 1959 will require a further increase of \$15 million in capital which is provided for in this estimate.

Additional donated assets arising from transfers of motor vehicles from other agencies upon establishment of interagency motor equipment pools will be capitalized in the fund.

Retained earnings, as determined by General Accounting Office audit, must be paid to Treasury as miscellaneous receipts. Payments made in 1958 amount to \$1,080,301.

Financing applied to program	1,330,197	1,321,342	1,325,000

¹ Excludes equipment transferred to other General Services Administration general accounts without charge as follows: 1957, \$1,655; 1958, \$3,000; 1959, \$5,000.

This fund was established to account for expenses incurred rendering foreign aid procurement services to the International Cooperation Administration (22 U. S. C. 1782). Earnings credited to this fund are derived from mutually agreed upon advances based on program workload received.

Budget program.—Program workload arises from purchase authorizations received from the International Cooperation Administration. Services under this account are programmed in 1959 at the 1958 level.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year:				
Advances	\$9	\$175		
Unpaid undelivered orders	804	3,483		
Total selected resources at end of year	813	3,658		
Selected resources at start of year (—)		-813	-3,658	
Costs financed from obligations of other years, net (—)			-3,658	
Obligations incurred for costs of other years, net		3,145		

Operating results.—Net earnings are retained to insure financing of operating costs notwithstanding fluctuations in operating revenue.

Appropriation (new obligational authority).....	6,893,650	7,293,000	7,650,000

This appropriation provides for management of the Government's archives and records, including custody and administration of permanent records in the National Archives and other noncurrent records in Federal records centers, assistance to records management programs of Government agencies, operation of presidential libraries, and filing and publication of Federal laws and regulations.

1. *Records management.*—Good records management practices in all Federal agencies are promoted. Nationwide guidance in records creation, maintenance, and disposal is provided. Standards and procedures are issued and necessary technical advice, training, and assistance is furnished.

2. *Records centers.*—Records of Federal agencies which must be retained for a period of time, but are not needed for frequent reference, are brought into and administered in 10 regional records centers and 4 annexes until disposal can be effected. A national center at St. Louis administers records of former civilian employees of the Government and a locator file for currently employed personnel. The increase in 1959 is mainly to provide for increased workload shown in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Records administered (millions of cubic feet).....	3.5	3.9	4.1	4.4
Reference services, number (millions).....	1.2	1.7	1.8	1.9

3. *Archives and related services.*—The permanently valuable records of the Government are selected, arranged, cataloged, preserved, and serviced in the Archives of the United States. Related services consist of (a) publication of the Federal Register, Code of Federal Regulations, United States Government Organization Manual, the slip laws, and the United States Statutes at Large, (b) preservation and servicing of historical materials in the Franklin D. Roosevelt and Harry S. Truman Libraries, and (c) servicing the National Historical Publications Commission.

TRANSPORTATION AND UTILITIES ACTIVITIES

Current authorizations:

OPERATING EXPENSES, TRANSPORTATION AND PUBLIC UTILITIES SERVICE

[Operating expenses, Transportation and Public Utilities Service:] For necessary expenses of transportation and public utilities management and related activities, as provided by law, including not to exceed **[\$27,500]** \$70,500 for expenses of travel; **[\$1,515,000]** and services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), at rates not to exceed \$100 per diem for individuals; \$2,000,000. (Independent Offices Appropriation Act, 1958.)

Appropriated 1958, **\$1,515,000** Estimate 1959, **\$2,000,000**
Appropriated (adjusted) 1958, **\$1,565,000**

* Includes \$1,700 for activities previously carried under "Salaries and expenses, Office of Administrator." The amounts obligated in 1957 and 1958 are shown in the schedule as comparative transfers.

Appropriation (adjusted)	1,251,100	1,565,000	2,000,000

This appropriation provides for improving management of transportation and public utilities in civilian agencies, protecting the Government's interests in cases before regulatory bodies, and furnishing services to civilian agencies in these specialized fields.

1. *Transportation services.*—Plans and procedures for improving transportation practices of civilian agencies are developed; reasonable rates are negotiated with carriers; interests of the Government in cases before regulatory bodies are protected; and rates, routing, and related services are supplied to civilian agencies. The increase for 1959 will allow more adequate participation in rate negotiations and litigation, and some improvement in services to civilian agencies.

2. *Public utilities management.*—As a central management function for all agencies, equipment utilization, rate, and economic studies are made, contracts negotiated, and the Government's interests protected by participation in rate negotiations and litigations.

3. *SAGE program participation.*—Representation is provided in rate proceedings involving communications common carriers relating to the semiautomatic ground environment system (SAGE) for early defense warning, under section 303 of Public Law 968, approved August 3, 1956.

tegic and critical materials acquired for or transferred to the supplemental stockpile established pursuant to section 104 (b) of the Agricultural Trade Development and Assistance Act of 1954 (7 U. S. C. 1704 (b)), \$70,000,000, to remain available until expended: *Provided*, That any funds received as proceeds from sale or other disposition of materials on account of the rotation of stocks under said Act shall be deposited to the credit, and be available for expenditure for the purposes, of this appropriation: *Provided further*, That during the current fiscal year, there shall be no limitation on the value of surplus strategic and critical materials which, in accordance with subsection 6 (a) of the Act of July 23, 1946 (50 U. S. C. 98e (a)), may be transferred to stockpiles established in accordance with said Act: *Provided further*, That no part of funds available shall be used for construction of warehouses or tank storage facilities. (*Independent Offices Appropriation Act, 1958.*)

Estimate 1959,* \$70,000,000

* Includes \$8,400 for activities previously carried under "Salaries and expenses, Office of Administrator." The amounts obligated in 1957 and 1958 are shown in the schedule as comparative transfers.

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
1. Acquisition and rotation of materials:			
(a) Cost of new materials	\$191,168,571	\$91,700,000	\$115,000,000
(b) Cost of rotated materials	70,230,455	88,241,000	92,121,000
(c) Operating expenses	321,769	393,220	395,130
Total, acquisition and rotation of materials	261,720,795	180,334,220	207,516,130
2. Custody of materials:			
(a) Storage and handling	12,649,307	14,500,000	15,100,000
(b) Physical inventory of materials	1,927,944	8,748,246	8,155,000
(c) Operating expenses	1,321,332	1,443,480	1,425,870
Total, custody of materials	15,898,583	24,691,726	24,680,870
3. Service direction	94,949	125,900	128,000
4. Administrative operations	1,315,883	1,373,400	1,375,000
Total obligations	279,030,210	206,525,246	233,700,000
Financing:			
Comparative transfers from (—) other accounts	—29,483	—8,400	—
Unobligated balance brought forward	—389,029,618	—198,559,846	—76,663,000
Advances and reimbursements from—			
Other accounts	—88,101	—100,000	—100,000
Non-Federal sources	—60,826,750	—78,020,000	—81,937,000
Recovery of prior year obligations	—27,616,104	—6,500,000	—5,000,000
Unobligated balance carried forward	198,559,846	76,663,000	—
Appropriation (new obligational authority)			70,000,000

NOTE.—Reimbursements from non-Federal sources from sale of perishable materials under the rotation program (50 U. S. C. 98), \$60,826,487; and refund of employee terminal leave payments (5 U. S. C. 61 (b)), \$263.

The Defense Materials Service acquires and administers national stockpile inventories pursuant to the Strategic and Critical Materials Stock Piling Act of 1946, and has custody of the supplemental stockpile established by the Agricultural Trade Development and Assistance Act of 1954. Programs are administered in accordance with guidelines established by the Office of Defense Mobilization.

The requested appropriation of \$70 million, together with funds available from prior years' appropriations estimated at \$81.7 million, will finance the acquisition of \$115 million of additional materials for the national stockpile and \$36.7 million for the custody and rotation of existing inventories. The \$115 million for acquisition of materials will provide \$18.8 million for direct purchases in the open market, and \$96.2 million for transfer of materials secured by the Commodity Credit Corporation through barter of surplus agricultural products.

Transfers to the national stockpile of materials delivered under Defense Production Act expansion programs have

been halted in 1958 and are not provided for in 1959 pending the completion of a review of stockpile policies and objectives currently being made by the Office of Defense Mobilization. This will require holding in the Defense Production Act borrowing authority account \$194.9 million of material originally scheduled for reimbursable transfer to the stockpile during 1958 and 1959. Further financing will be requested for such transfers only to the extent the review indicates it is necessary.

Based on existing objectives, the status of the stockpile at June 30, 1957, prices is expected to be as follows:

[In millions]

	1957 actual	1958 estimate	1959 estimate
Value of objectives: Procurement priority level	\$3,187.8	\$3,200.0	\$3,200.0
Total objectives	9,983.5	9,845.2	9,845.2
Procurement for objectives: Inventory:			
Procurement priority level	3,035.6	3,059.4	3,073.7
Total objectives	6,068.3	6,243.2	6,405.4
On order: Procurement priority level	10.1	6.7	3.2
Total objectives	242.3	159.0	111.9
Balance to be procured: Procurement priority level	142.1	133.9	123.1
Total objectives	3,672.9	3,443.0	3,327.9

1. *Acquisition and rotation of materials*—(a) *Cost of new materials*.—Strategic materials are being acquired from the following sources:

OBLIGATIONS (IN MILLIONS)

	1957 actual	1958 estimate	1959 estimate
Open market purchases	\$80.0	\$52.1	\$18.8
Purchase of materials under Commodity Credit Corporation barter operations	54.6	32.2	96.2
Purchase of materials under Defense Production Act expansion programs	56.6	7.4	—
Total	191.2	91.7	115.0

In addition to direct procurement, materials valued at \$27.2 million are expected to be acquired by free transfer from programs of other agencies such as the International Cooperation Administration.

Based on existing stockpile objectives, and the proposed budget, status of procurement of the 76 materials now on the strategic stockpile list is as follows:

NUMBER OF MATERIALS

	1957 actual		1959 estimate	
	Priority level	Total objective	Priority level	Total objective
Percent completed:				
100	55	30	59	33
90 to 99	0	5	0	6
75 to 89	1	12	2	13
50 to 74	3	14	5	11
25 to 49	4	7	2	8
Under 25	3	8	0	5
Total	66	76	68	76

(b) *Cost of rotated materials*.—Inventories of such materials as rubber, fibers, and oils are rotated periodically to keep the inventory in prime condition. The volume of this program is expected to increase by 25 to 30% in 1958 and 1959 over 1957 as shown in the following table:

Description	1957 actual	1958 estimate	1959 estimate
Gross replacement cost of materials rotated	\$70,230,455	\$88,241,000	\$92,121,000
Receipts from sales of materials rotated	60,826,750	78,020,000	81,937,000
Net cost to appropriation	9,403,705	10,221,000	10,184,000

(c) *Operating expenses*.—An increase in workload of rotation and disposal of agricultural type strategic materials is offset by a decrease in the metals, minerals, and ores procurement activity.

2. *Custody of materials*.—This covers handling, storage, and inventorying of materials delivered or transferred to the national and supplemental stockpiles. Deliveries of materials to the national stockpile during 1958 and 1959,

including donated materials, will increase the value of materials in storage against national stockpile goals from \$6,068.3 million on June 30, 1957, to \$6,405.4 million on June 30, 1959. Transfers of \$50.2 million of materials from Commodity Credit Corporation barter inventories and Interior domestic purchase program inventories to the supplemental stockpile during 1958 and 1959 will increase the value of the supplemental stockpile to \$277.8 million as of June 30, 1959.

(a) *Storage and handling.*—As of June 30, 1957, strategic materials were stored at 224 locations including 24,262,000 square feet of closed storage, 66,388,000 square feet of open storage, and 1,875,000 barrels of tank storage. Total weight of the national and supplemental U. S. stockpiles on June 30, 1957, was approximately 25,588,000 tons. Obligations for storage and handling are expected to be:

Type of expense	1958		1959	
	Units	Total cost	Units	Total cost
Storage cost:	(Ton-years)		(Ton-years)	
Open storage.....	23,684,536	\$1,754,529	24,704,704	\$1,782,985
Closed storage.....	2,830,335	7,410,829	2,865,864	7,696,128
Tank storage.....	276,105	239,583	276,105	233,000
Miscellaneous leases.....		16,000		11,000
Nonrecurring costs.....		3,317,677		4,216,749
Total storage.....	26,790,976	12,738,618	27,846,673	13,939,862
Handling costs:	(Short tons)		(Short tons)	
New acquisitions.....	426,263	363,891	160,409	147,573
Rotation.....	274,918	677,178	284,268	682,610
Disposal.....	1,800	11,163	3,533	18,804
Relocation.....	52,000	66,250	53,064	70,671
Total handling.....	754,981	1,118,482	501,874	919,658
Relocation transportation.....		574,400		240,480
Acquisition of land.....		68,500		
Total storage and handling.....		14,500,000		15,100,000

(b) *Physical inventory of materials.*—This program was initiated in 1957 and the first cycle is scheduled for completion by the end of 1959. Since many cost elements are nonrecurring, the costs after 1959 will be sharply reduced.

(c) *Operating expenses.*—Administrative expenses in connection with handling, storage, and inventorying materials are expected to continue at the 1958 level in 1959.

Production and sale of abaca fiber is authorized by the Abaca Production Act of 1950 (50 U. S. C. 541). This fiber, otherwise known as manila hemp, is considered the best fiber available for the manufacture of ropes and cables for ships. No satisfactory substitute has been found for this fiber, and since it must be procured from foreign sources, it is included in the Government's stockpile of strategic and critical materials.

Because abaca, a vegetable fiber, cannot be stored indefinitely without deterioration, and because the quantities of abaca needed during an emergency are considerably greater than those used in peacetime by industry, the full wartime requirements of this fiber may not be stockpiled without incurring substantial financial losses periodically as the inventory requires replacement.

Under the existing program, the stockpile is maintained at that level at which surplus fiber can be consumed by industry as it is replaced with fresh fiber (rotation). The stockpile, though limited, would provide immediate needs in an emergency. Abaca cannot be propagated from actual seed; rather, it must be planted from the roots, or rhizomes, of standing cultivations. The Central American cultivations maintained under the abaca program represent the seed-bed from which to expand in time of war.

Budget program.—Highlights of past and contemplated program operations are as follows:

	1957 actual	1958 estimate	1959 estimate
Acreage authorized by Office of Defense			
Mobilization.....	15,000	15,000	15,000
Acreage in cultivation.....	10,000	10,000	8,500
Production..... pounds	8,354,300	12,730,000	7,000,000
Cash cost per pound..... cents	26.3	21.6	28.2
Sales..... pounds	8,362,650	12,730,000	7,000,000
Sales price per pound..... cents	22.5	23.9	23.5
Inventory June 30..... pounds	1,109,650	1,109,650	1,109,650

Production operations are conducted by means of a contract with United Fruit Co., under which the company is reimbursed for actual operating expenditures, plus a management fee. The operating projects are located in Costa Rica and Guatemala. Operations at the Panama project were terminated in 1955 and the factory is being maintained in standby. On March 11, 1957, the Office of Defense Mobilization (which by delegation acts for the President with respect to acreage determinations under the program) directed that the Honduras plantation be liquidated and the factory placed in standby. Upon completion of final harvesting at Honduras, the program acreage will be reduced to 8,500: 5,000 in Costa Rica and 3,500 in Guatemala. The program is under continuous review by the Office of Defense Mobilization with a view to adjustment of the acreage in accordance with current emergency plans.

Cash cost of all fiber to be produced in 1958 has been reduced from 26.3 cents to 21 cents per pound, the reduction also stemming directly from the lower cost of production in Honduras, where costs are expected to average approximately 12 cents per pound, as compared, for example, to 31.8 cents in Costa Rica and 28.8 cents in Guatemala.

Production and cost rates are estimated at substantially the same levels as in 1958 with respect to the two projects to be continued. Gross production and disbursements will be lower in 1959 primarily because of the elimination of the Honduras operation. Production in 1959 is estimated at 7,000,000 pounds, at a cost of 28.2 cents per pound. All of this production is scheduled for delivery to the stockpile, at an average price of 23.5 cents per pound. The present price for top grades is approximately 27 cents per pound. Net loss for 1959, after all charges, is estimated at \$762,033.

Present and projected program losses are attributable primarily to low production. Harvesting may be carried on only at rates which agricultural experts will certify as being consistent with the health of the cultivations; otherwise the seed-potential of the cultivations will be jeopardized. The condition of the cultivations must be kept at the highest possible level, since the primary purpose of the program at this time is to maintain a seed-bed for expansion in time of emergency.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate

Guaranties are given on loans made by public or private financing institutions, including Federal Reserve banks, to facilitate performance of defense production contracts. Upon demand of lending institutions the Government is required to purchase the guaranteed percentage of the loan or the Government may elect to make a voluntary purchase of the guaranteed percentage. Advances from appropriations available for procurement may be made to this fund for its temporary use, although such action has not been necessary to date. Net earnings are retained to meet possible future losses (50 U. S. C., App. 2091).

Refund and rebate payments due World War II contractors are made upon approval of claims presented under the Revenue Act of 1951. Of the 4,124 claims with estimated payments of some \$50 million, 3,918 had been settled through June 30, 1957, with payments of \$47.2 million. It is hoped that most of the remaining claims will have been settled by the end of 1959.

Federal Facilities Corporation was created on June 30, 1954, under the provisions of the Rubber Act of 1948 and Executive Order 10539, primarily to administer the operations of the Government-owned synthetic rubber facilities until disposal of the properties to private interests was completed. In addition, the Corporation was designated to conduct the operation of the Government-owned tin smelter at Texas City, Tex.

Administration and jurisdiction of the Federal Facilities Corporation was transferred to the Administrator of General Services, from the Secretary of the Treasury, pursuant to Executive Order 10720, dated July 11, 1957. Assets transferred to General Services Administration represented a net investment of the Government of \$29,443,475.

Budget program—Synthetic rubber program.—Except for one alcohol butadiene plant at Louisville, Ky., which is under lease to a private operator, and a small catalyst manufacturing facility in Baltimore, Md., the program to transfer the synthetic rubber-producing facilities to private ownership has been completed. In Executive Order 10678, dated September 20, 1956, the President named the Corporation as successor to the Rubber Producing Facilities Disposal Commission for the purpose of administering the contracts entered into in disposing of the synthetic rubber plants.

Tin program.—Public Law 608, approved June 22, 1956, provided for operation of the tin smelter until January 31, 1957. It also authorized and directed the Corporation to take steps immediately to sell or lease the tin-producing

Public enterprise funds—Continued

CORPORATIONS—Continued

FEDERAL FACILITIES CORPORATION FUND—continued

facilities. Sale of the facilities was completed February 15, 1957, and the Corporation's sole remaining function with respect to tin is to administer the sale contract.

Administrative expenses.—Administrative expenses consist of salaries and related costs of personnel engaged in the supervision of the Corporation's functions, together with rental costs of office space.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year:				
Inventories for sale	\$7,517,971	\$468,257		
Supplies and deferred charges	1,470,511	915,471		
Unpaid undelivered orders	9,348,900			
Total selected resources at end of year	18,337,382	1,383,728		
Selected resources at start of year (—)		—18,337,382	—\$1,383,728	
Costs financed from obligations of other years, net (—)		—16,953,654	—1,383,728	

Operating results.—During 1957, the Corporation paid into the Treasury \$25 million from liquidation proceeds, thereby reducing the equity of Treasury to \$29.4 million.

Under the provisions of Reorganization Plan No. 1 of 1957, the Reconstruction Finance Corporation was abolished as a corporate entity and the remaining functions of the Smaller War Plants Corporation and the World War II assets program were transferred to the General Services Administration for final liquidation. In addition, cash of \$9,332 was transferred from the lending program of the Reconstruction Finance Corporation to offset an equal leave liability.

Budget program.—It is anticipated that there will continue during 1959 the servicing of leases and conditional sales agreements covering 15 facilities, plus servicing of approximately 50 other miscellaneous assets and 5 loans of the Smaller War Plants Corporation. Financial and

legal servicing will also be required on approximately 25 liabilities, plus approximately 100 cases in the hands of the Department of Justice under the complex food subsidy program.

Administrative expenses are estimated to continue at about the same level through 1959.

Operating results.—Proceeds from liquidation will be paid into miscellaneous receipts of the Treasury.

Financial, administrative, legal, legislative and informational services and management supervision required to support all General Services Administration programs are provided by the integrated staff organization of General Services Administration. They are initially financed from an administrative operations fund into which the various benefiting appropriations and funds make deposits for their share of the obligations incurred. Of the amount deposited in the fund during a fiscal year, the total amount from appropriations made available to General Services Administration in the annual act for the year is subject to a specific monetary limitation and amounts from each appropriation are limited to those included in the respective program appropriations for that purpose. Deposits from other sources are not covered in the limitation as the scope of programs and supporting workload is seldom precisely known in advance.

Estimated amounts available for 1959 from the various sources and comparable data for 1957 and 1958 are:

	1957 comparable	1958 comparable	1959 estimate

GENERAL PROVISIONS,
GENERAL SERVICES ADMINISTRATION

The appropriate appropriation or fund available to the General Services Administration shall be credited with (1) cost of operation, protection, maintenance, upkeep, repair, and improvement, included as part of rentals received from Government corporations pursuant to law (40 U. S. C. 129); (2) reimbursements for services performed in respect to bonds and other obligations under the jurisdiction of the General Services Administration, issued by public authorities, States, or other public bodies, and such services in respect to such bonds or obligations as the Administrator deems necessary and in the public interest may, upon the request and at the expense of the issuing agencies, be provided from the appropriate foregoing appropriation; and (3) appropriations or funds available to other agencies, and transferred to the General Services Administration, in connection with property transferred to the General Services Administration pursuant to the Act of July 2, 1948 (50 U. S. C. 451ff), and such appropriations or funds may, with the approval of the Bureau of the Budget, be so transferred.

Funds available to the General Services Administration shall be available for the hire of passenger motor vehicles.

No part of any money appropriated by this or any other Act for any agency of the executive branch of the Government shall be used during the current fiscal year for the purchase within the continental limits of the United States of any typewriting machines except in accordance with regulations issued pursuant to the provisions of the Federal Property and Administrative Services Act of 1949, as amended.

Not to exceed 2 per centum of any appropriation made available to the General Services Administration for the current fiscal year by this Act may be transferred to any other such appropriation, but no such appropriation shall be thereby increased more than 2 per centum: *Provided*, That such transfers shall apply only to operating expenses, and shall not exceed in the aggregate the amount of \$2,000,000. (*Independent Offices Appropriation Act, 1958.*)

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1959

HOUSING AND HOME FINANCE AGENCY

Net expenditures of the Housing and Home Finance Agency in 1959 are estimated to rise substantially to \$455 million, primarily because larger purchases of mortgages and larger disbursements on college housing loans are anticipated. The new obligational authority recommended, amounting to \$638 million, however, is \$1,487 million less than enacted for 1958. The sharp decline in new obligational authority is due almost entirely to the fact that the funds provided by the Congress for the Federal National Mortgage Association in 1958 are adequate also to cover most of its 1959 requirements.

The programs administered by the Housing and Home Finance Agency consist predominantly of loans and loan insurance, mortgage purchases, and grants. A considerable share of the financial requirements each year is met by repayments of loans or other receipts from assets acquired in earlier years. Several of the most important programs have long lead-times between initial obligation or other reservation of funds and the eventual disbursements.

Under the 1959 budget, new reservations or commitments will be at or below the 1958 amounts for most programs. In addition, a considerable part of the direct loan and mortgage purchase requirements will be shifted from direct Government financing to private financing. For example, legislation is being proposed to repeal the requirement that the Federal National Mortgage Association special assistance program purchase mortgages at par, considerably above the prices private lenders are willing to pay.

Community development and facilities.—New obligational authority of \$200 million is requested for 1959 for capital grants by the Urban Renewal Administration for slum clearance and urban renewal projects. This authority, together with authority enacted in previous years which is still available, will permit reservations for new grants of \$250 million, compared to \$300 million in 1958. Under proposed legislation annual grant reservations of \$250 million would be authorized for 1960 and 1961, and \$200 million in each of the following 3 years, with progressive reductions in the ratio of Federal aid. Other legislative proposals would revise Federal aid for planning these projects from advances to participating grants and would authorize financial assistance (without grants) for non-residential urban renewal projects.

Under the budget, progress on projects now underway will be considerably more rapid than in prior years. Planning will be completed and actual work started on 100 projects in 1958 and on 120 projects in 1959, compared with 56 in 1957. In addition, an estimated 20 projects will be completed in 1958 and 25 in 1959, compared to the 3 completed in the entire prior history of the program. Disbursements of capital grants will increase to \$60 million in 1959, twice as high as in 1957.

Loan commitments by the Community Facilities Administration to help construct local public works are estimated at \$30 million in 1959, an increase of \$10 million above 1958. The available lending authority for this purpose is adequate for 1959. New appropriations of \$8.5 million are recommended to permit approval of advances for the planning of non-Federal public works

to continue at approximately the 1958 level of \$10 million.

Public housing programs.—The Public Housing Administration plans to enter into annual contributions contracts with local housing authorities for the construction and operation of 33,466 additional dwelling units of low-rent public housing in 1958, and 33,635 units in 1959. If achieved, this schedule will complete contracts on the 70,000 units authorized by the Housing Act of 1956 within the statutory expiration dates. However, in order to avoid undue pressure to place units under contract prematurely, legislation will be proposed to extend the expiration dates for another year. This housing will be used, in part, for the relocation of low-income families displaced by urban renewal projects and by other governmental action. Annual contributions to local housing authorities are estimated to increase from \$90.6 million in 1957 to \$114 million in 1959, as more projects are completed and become eligible for contributions. A supplemental appropriation of \$4.8 million is estimated for 1958 to cover contractual payments of \$99.8 million in that year.

The disposal of the remaining housing built under emergency programs during World War II and the Korean war will be completed in the current fiscal year. An estimated \$168 million in mortgages received as part of the sales price will be liquidated in 1959 and subsequent years. Substantial progress is also being made on the sale of Government-owned housing in the atomic energy communities of Oak Ridge, Tenn., and Richland, Wash.

Other aids to housing.—New obligational authority of \$200 million for 1959 is recommended under proposed legislation for the college housing loans program of the Community Facilities Administration. This will permit net new reservations of loan funds of \$225 million, slightly below the \$235 million of 1958 reservations. Legislation is being proposed (1) to amend the present interest rate formula so that rates can be charged at least sufficient to cover the cost to the Government, and (2) to establish a new program of Federal guaranties for college housing loans placed with private lenders. These proposals are designed to assure that institutions finance their housing needs privately if loans are available on reasonable terms.

The Federal Housing Administration expects to examine applications for mortgage insurance covering 600,400 units in 1958 and 635,500 units in 1959, compared to a total of 422,000 units in 1957. This sharp increase in activity represents both transfers of activity from the home loan guaranty program of the Veterans Administration and further anticipated improvement in the unusually weak mortgage market of the past 2 years. As a result of increased income from premiums and fees, receipts will exceed expenditures by \$80 million in 1959. The higher costs of the expanded operations, however, require a supplemental increase in the operating expense limitations for 1958. To meet the prospective requirements for mortgage insurance, legislation will be proposed to increase the present statutory limit on outstanding insurance by a net amount of \$3 billion for each of the next 5 years. In addition, authority will be requested to allow increases in the maximum interest rates on insured mortgages

under the rental, cooperative, and armed services family housing programs, and thus make the rates on these loans more attractive to private lenders.

For 1959, budget expenditures of the Federal National Mortgage Association are estimated to exceed receipts by \$139 million. This compares with an excess of receipts over expenditures of \$188 million in 1957 and \$61 million in 1958. The shift to sizable net expenditures results mainly from larger purchases under the special assistance program for urban renewal, armed services, and cooperative housing mortgages. Legislation is proposed to repeal the present statutory prohibition on purchases below par. This legislation, together with the proposed authority for increases in interest rates on several types of mortgages requiring extensive support, will encourage private financing and reduce future reliance on the Association. Substantial commitments, however, will be necessary to sup-

port the urban renewal program and increased commitments will be needed for the new housing program for the elderly. Nevertheless, because of the large balances remaining from the new obligational authority of \$500 million provided for the special assistance functions in 1958, the new authority recommended for 1959 is only \$90 million.

Net budget expenditures for the privately financed secondary market operations of the Federal National Mortgage Association will be limited in 1959 to an estimated \$10 million for additional Treasury purchase of capital stock. Net receipts of \$164 million are estimated for the management and liquidating activities. No new obligational authority is requested for either of these two major activities of the Association, in contrast to \$400 million provided in 1957, and \$965 million in 1958 for the secondary market operations.

OFFICE OF THE ADMINISTRATOR

Current authorizations:

SALARIES AND EXPENSES

[Salaries and expenses:] For necessary expenses of the Office of the Administrator, including rent in the District of Columbia; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); not to exceed **[\$340,000] \$472,000** for expenses of travel; and expenses of attendance at meetings of organizations concerned with the work of the Agency; **[\$6,930,000] \$8,850,000**: *Provided*, That necessary expenses of inspections and of providing representatives at the site of projects being planned or undertaken by local public agencies pursuant to title I of the Housing Act of 1949, as amended, projects financed through loans to educational institutions authorized by title IV of the Housing Act of 1950, as amended, and projects and facilities financed by loans to public agencies pursuant to title II of the Housing Amendments of 1955, as amended, shall be compensated by such agencies or institutions by the payment of fixed fees which in the aggregate will cover the costs of rendering such services, and expenses for such purpose shall be considered nonadministrative; and for the purpose of providing such inspections, the Administrator may utilize any agency and such agency may accept reimbursement or payment for such services from such institutions, or the Administrator, and shall credit such amounts to the appropriations or funds against which such charges have been made, but such nonadministrative expenses shall not exceed **[\$1,750,000] \$2,500,000**.

[For an additional amount for "Salaries and expenses", \$450,000; and the limitation under this head in the Independent Offices Appropriation Act, 1958, on the amount available for expenses of travel, is increased from "\$340,000" to "\$375,000".] (5 U. S. C. 133y-16; 42 U. S. C. 1451; 12 U. S. C. 1749; Independent Offices Appropriation Act, 1958; Supplemental Appropriation Act, 1958.)

Appropriated 1958, **\$7,380,000**Estimate 1959, **\$8,850,000**

Appropriation (new obligational authority).....	6,225,000	7,380,000	8,850,000

The Administrator supervises and coordinates the housing programs and functions of the Agency. He is also responsible for several activities which are administered by the constituents of the Agency under delegations of authority from the Administrator. These include: Slum clearance and urban renewal and urban planning assistance which have been delegated to the Urban Renewal Commissioner; the programs of public works planning, college housing loans, public facility loans, and certain liquidating activities which have been delegated to the Community Facilities Commissioner; and the servicing of a portfolio of mortgages taken in connection with the disposition of publicly financed war and veteran housing construction under the Lanham and related acts which has been delegated to the Public Housing Commissioner. The

Administrator serves as chairman of the board of directors of the Federal National Mortgage Association. He also serves as Chairman of the National Voluntary Mortgage Credit Extension Committee and provides staff assistance to the national committee and regional committees through which the voluntary home mortgage credit program operates.

The appropriation requested for 1959 is \$8,850,000. This amount is an increase of \$1,470,000 compared with the total amount available for 1958. The need for the larger appropriation stems from continuing expansion of present programs, particularly in the field of urban renewal.

2. *Consolidated compliance activities.*—Provision is made for the consolidated investigation and compliance staff to serve the entire Agency.

3. *Voluntary home mortgage credit.*—Provision is made for staff assistance to the national committee and regional committees engaged in a program to facilitate the flow of funds for FHA-insured and VA-guaranteed home mortgage loans into areas of shortage and for minority housing financing.

4. *Community disposition activities.*—For detail of this activity, see community disposal operations fund under public enterprise funds.

5. *Community facilities programs.*—(a), (b), (c), (d). For detail of activities of these programs, see public enterprise funds.

(e) *School construction.*—The Housing and Home Finance Administrator, under a working agreement with the Commissioner of Education, performs certain technical services in connection with the program of school construction. Funds appropriated to the Office of Education are transferred to the Administrator for this purpose.

(f) *Project inspection and audit.*—Provision is made for construction progress inspections and financial audits of college housing and public facility projects. The costs of these activities are recovered by the Government through fees.

6. (a) *Urban renewal activities.*—For detail of activities for this program see urban renewal fund under public enterprise funds.

(b) *Project inspection and audit.*—Provision is made for construction progress inspections and financial audits of slum clearance and urban renewal projects being planned or undertaken by local public agencies, including audit of relocation payments made to displaced families and businesses. The costs of these activities are recovered by the Government through fees.

7. *Defense planning activities.*—Provision is made for carrying out certain of the Administrator's responsibilities for the development and administration of civil defense and defense mobilization preparedness measures. These functions stem from delegations and supplementary assignments issued by the Office of Defense Mobilization and the Federal Civil Defense Administration.

The Housing Act of 1954 authorized \$5,000,000 in matching grants to State, metropolitan, or regional planning agencies to help finance surveys, land-use studies, and urban renewal plans in small cities and metropolitan or regional areas. The Housing Act of 1956 increased the authorization for appropriations to \$10,000,000. An aggregate of \$5,775,000 has been appropriated to date and the budget program contemplates the appropriation of an additional \$3,500,000.

An estimated 250 projects will be approved by the end of 1959, of which 86 will have been completed.

The college housing program provides long-term loans at low interest rates to finance housing and related facilities under the Housing Act of 1950, as amended (12 U. S. C. 1749). The program is funded by a Treasury borrowing authorization initially limited to \$300 million by the original legislation but increased by subsequent amendments to \$925 million. Not to exceed \$100 million of the total authorization is available for related facilities such as dining facilities and student unions. The Housing Act of 1957 extended eligibility to hospital-connected housing for interns, and for nursing schools at above the high school level, to the amount of \$25 million. Under the interest formula fixed by the Housing Amendments of 1955—the higher of 2.75% or 0.25% above the average rate on the outstanding public debt—the loan rate for the current year is 3%.

Budget program.—The budget program for the college housing program contemplates the enactment of proposed legislation providing additional authority to borrow from the Treasury of \$200 million. The total program for the budget year, in terms of net new reservations of loan funds, will accordingly total \$225 million, \$25 million of which will be financed from the unreserved balance brought forward from 1958 and the remainder from the proposed new authority. The budget schedules for the authority to be provided by proposed legislation are shown at the end of this section.

Proposed legislation will also include provision for (a) higher and more flexible interest rates and (b) Federal

guaranties of private loans to educational institutions. Guaranties are expected to increase aggregate funds available for college housing by enabling a significant number of colleges and universities to market their housing bonds privately at reasonable interest rates.

It is estimated that reservations in the current year will fully utilize the funds available under the \$100 million limitation for loans for self-liquidating college service facilities and the \$25 million limitation for loans for housing for student nurses and interns. No increase in these limitations is proposed. This will permit a substantial increase in 1959 in the amounts available for student and faculty housing.

Preliminary applications under all three activities are filed to determine eligibility and feasibility before the costly process of detailed physical and financial planning is undertaken. If approved, a fund reservation is issued effectively committing funds to assure availability on satisfactory completion of a full application. The net amounts of program reservations issued are used to control the volume of applications processed within limitations. Applications have been averaging about \$1 million, and in terms of workload, the reservation level shown will involve the following activity:

	1957 actual	1958 estimate	1959 estimate
Preliminary applications received.....	318	386	320
Withdrawn or rejected.....	49	55	45
Reservations issued.....	270	277	240
On hand, close of year.....	63	117	152

The bulge in activity during the current year is caused by the forecast receipt of 60 applications averaging \$0.5 million under the hospital dormitory limitation and approval of 50 of these smaller reservations.

Reservations are converted into loan contracts after detailed planning, filing of a full loan application, and Agency review. Program policies are designed to assure the soundness of loans without interfering with the applicant's operations as an educational institution. Loan contracts are estimated at \$264 million in the budget year. In terms of caseload, the following activity is involved:

	1957 actual	1958 estimate	1959 estimate
Withdrawn or rejected.....	32	36	20
Loans approved.....	201	270	260
Reservations outstanding and applications on hand, close of year.....	224	195	155

Loans approved include an estimated 30 hospital-connected cases in 1958 and 20 in 1959.

After execution of the loan contracts, the institutions proceed with final plans and specifications, award of construction contracts, and preparation of bond indentures.

Financing.—Actual borrowings from Treasury are expected to aggregate \$222 million to fund an equal amount of loan disbursements. Borrowers generally are able to finance much of the construction period with bank loans or other available funds, and the purchase of bonds is delayed until construction is well advanced. In terms of projects, the following activity is projected:

	1957 actual	1958 estimate	1959 estimate
Construction starts.....	142	221	296
Substantial completions.....	70	154	227
Bond issues awarded to Government.....	108	182	250

The purchase of bonds is the principal factor in the \$219.3 million of budget expenditures.

Operating results and financial condition.—Administrative and other costs continue to outrun revenue from interest earnings during the period. In 1959, the interest earnings are estimated to net about \$1.3 million from an average bond portfolio of \$480 million, while administrative costs must cover the initiation of \$225 million in new project reservations, loan commitments amounting to

OFFICE OF THE ADMINISTRATOR—Continued

Public enterprise funds—Continued

COLLEGE HOUSING—Continued

OPERATIONS, COLLEGE HOUSING LOANS FUND—continued

\$263 million, and activity in connection with an average of some \$300 million of projects under construction. The net operating loss of \$450,000 is increased to \$924,000 by an allowance for losses at the rate of 0.25% of loan disbursements.

The cumulative deficit, including an allowance for losses totaling \$1.4 million, is expected to reach \$3 million at the close of 1959. This condition is not considered to warrant concern at this time in view of the heavy program expansion in recent years and the rapidly expanding portfolio earnings base.

Loans to local governmental units for essential public works or facilities are made under the \$100 million authorization provided by the Housing Amendments of 1955 (65 Stat. 635, 642). Statutory priority is extended to loans (1) to communities of less than 10,000 population and (2) for water, sewage, and gas-distribution systems. Loans are restricted to a maximum 40-year term and to applicants unable to obtain funds from other sources at reasonable rates.

Budget program.—Over 85% of the applications approved to date have been to finance water and sewer facilities. Excluding a few utility districts and newly created public bodies for which census data is not available, over 90% of the applicants have been governmental units of less than 5,000 population. In general, these com-

munities have little or no technical staff or experience in planning, construction and operating public facilities, and many have never before sold a bond issue or acquired any performance rating on such undertakings. Loans made under the program average \$200,000 to \$250,000. Subsequent to applying for a Federal loan, some applicants obtain private financing, thereby reducing the total loan commitment.

The number of cases involved in the loan commitments shown on the program and financing schedule is as follows:

	1957 actual	1958 estimate	1959 estimate
Applications received.....	151	170	225
Attrition before approval.....	23	40	55
Approvals (gross).....	58	90	140
Applications on hand at year end.....	95	135	165

Interest rates on loans have been changed from time to time to meet the changes in a number of long-term municipal bond indices and in U. S. Government bonds. Initially established at 3.75% for general obligation bonds, and 4.25% for revenue issues, the rates have been increased with the general rise in interest rates to the most recent level for 30-year maturities of 4.5% for general obligations and 5% for revenue securities.

Financing.—The program is financed by Treasury borrowing authority of \$100 million. Since the net interest margin on the comparatively small loan portfolio is inadequate to cover administrative costs at this stage in the program, obligations against the borrowing authorization slightly exceed total loan commitments in each of these years. By the close of 1959, \$62 million out of the total authorization is expected to be committed.

Operating results.—Expenses include a \$120,000 increase in the allowance for losses at the rate of 0.5% on loans disbursed, administrative costs of \$550,000, and loan servicing costs amounting to \$6,500. Net interest earnings of \$245,000 accrue from the approximate 1% margin between the average loan rates and the rates paid on Treasury borrowings. The cumulative deficit of \$1.2 million at the close of the year is not considered to be disturbing at this early stage in the program. Budget expenditures, principally determined by loan disbursements, lag behind commitments and amount to an estimated \$24.3 million for the budget year.

A program of interest-free advances to State and local public agencies for the planning of local public works was authorized by the Housing Act of 1954, and revisions were made by the Housing Amendments of 1955.

Budget program.—The program is intended to further a constant high level of public works construction by financing a reserve of well-planned projects. Almost all communities today face increasing demands for new public works to cope with the needs of the growing population, or to renew and enlarge existing facilities to provide adequate services. A construction potential of \$460 million has been made ready by the \$7 million in advances approved up to the beginning of the current year, and the advances contemplated in 1958 and 1959 would raise the cumulative total of planned projects to nearly \$1.8 billion.

In 1956, 194 applications were received. The number of applications more than doubled in 1957. Further increases in demand and program progress are expected as shown in the following caseload tabulation:

	1957 actual	1958 estimate	1959 estimate
Applications.....	416	550	650
Approvals (net).....	237	340	350
Applications on hand at end of year.....	181	238	368
Plans completed.....	118	200	340
Advances repaid.....	7	30	60

Advances are made only to State and local governing units having the authority to conduct planning and to finance and construct the specific facility to be planned. In accordance with the statutory requirement that the proposed projects must be ones to be built within a reasonable period of time, assurance is required that the applicant expects to start construction within a maximum of 5 years. Over 70% of the applications to date have come from local governmental units of less than 50,000 population, and nearly 80% of the applications are for water, sewer, and educational facilities.

Financing.—The program is financed by a revolving fund to which appropriations are authorized by steps totaling \$48 million by the beginning of 1959, the fund to be subsequently maintained at this level in undisbursed balances and outstanding active advances. A total of \$17 million has been appropriated through the beginning of the current fiscal year. Repayment of advances is required when construction begins.

Repayments in a steeply rising trend are expected, but will not within this 3-year period provide a substantial source of financing for new commitments. An appro-

priation of \$8.5 million is requested for 1959, bringing cumulative appropriations to \$25.5 million of the \$48 million authorized fund level.

Operating results.—Since the planning advances are interest-free (except as to repayments which become delinquent), the program has no revenue. Losses will occur when it becomes evident that projects will not be constructed due to alterations in local objectives, and accordingly that advances will not be repaid. After experience indicates the probable proportion of such cases, reserves will be established in anticipation of such losses.

In the budget year, the \$9.6 million of estimated disbursements, less \$1.5 million in repayments, result in the \$8.1 million forecast of expenditures. The disbursements generally occur after the completion of plans and review to ascertain that the specified planning project has been accomplished.

The revolving fund for liquidating programs was established by provisions of the Independent Offices Appropriation Act, 1955, to provide for the orderly liquidation of a number of Housing and Home Finance Agency programs. Pursuant to Reorganization Plan No. 1 of 1957 the remaining functions of the Reconstruction Finance Corporation with respect to loans made to States, counties, municipalities, and other public agencies for needed public facilities were transferred to the Housing and Home Finance Administrator for administration and final liquidation. Net assets, liabilities, and commitments relating to the functions transferred are as follows:

Cash (to cover loan obligations and claim under litigation).....	\$2,733,106
Accounts and interest receivable (net).....	26,141
Loans and judgments (net).....	3,131,520

Accountability to Treasury..... 5,890,767

1 Undisbursed loan obligations amount to \$1,500,000.

Budget program.—The program exhibits the costs incidental to the management and disposal of property—costs which drop sharply as real estate disposal is virtually completed by the end of 1958.

Some 10,700 emergency housing units, scattered lots and acreages of residential land, and a number of emergency public facility properties remained on hand as of June 30, 1957. Housing disposal is expected to be complete by the end of the current year. By the close of 1959, the \$5.8 million in real property will be composed largely of some \$2 million in public facility properties under lease-purchase contracts and a \$2.4 million water system operated by a local government under a long-term agreement providing certain advantages to military installations receiving service. The principal program assets at the close of 1959 will be a \$180 million portfolio of mortgages and loans.

Financing.—Actual and estimated receipts from the collections of interest and principal on mortgages and loans, sales and rental income from real property, and so on, gradually decline from \$37.9 million in 1957 to \$27.5 million in 1958 and to \$21.9 million in the budget year. In addition, mortgages written on real estate sold total \$46.3 million in 1957 and \$16.9 million in the current year. Approximately the 1959 level of receipts should be maintained for some years from principal repayments and interest earnings on mortgages and loans held.

Operating results and financial condition.—The large book losses attributable to the disposal of real property

come to an end in 1958. In view of the recognized liquidating character of the fund, no action is required with respect to the estimated \$430 million cumulative deficit at the close of 1959.

The original investment in these programs totaled almost \$2.5 billion. By the close of 1959 it is estimated that about \$700 million will have been recovered by operations and disposition and returned to the Treasury; \$378 million will have been transferred to other agencies and programs; and funds and property aggregating \$771 million will have been donated to local governments in accordance with various statutes. Repayments to Treasury of \$32 million and \$25 million are estimated for 1958 and 1959, respectively. There will remain on hand about \$220 million in assets, most of which will be recovered as mortgages and loans are repaid.

URBAN RENEWAL

The Housing Act of 1949, as amended by the Housing Act of 1954, authorizes Federal assistance to local governments for acquisition, clearance, and redevelopment of slums and blighted areas, and for conservation and rehabilitation where deterioration of properties has not reached the point where clearance is necessary. Project financing is assisted by Federal capital grants approximating two-thirds of net project costs; i. e., the difference between the cost of acquiring and preparing the land, including costs of planning and site improvements, and the amount realized by selling or leasing the land at its fair value for its new uses. Capital grants are also used to pay for certain limited costs of relocating displaced residents and small businesses. The initial contract authority of \$500 million has been increased by later acts to \$1.25 billion, plus an additional \$100 million available at the discretion of the President. Legislation is proposed to increase the authorization by an additional \$200 million in 1959. Budget schedules for this amount are shown at the end of the chapter.

In addition to the Federal capital grants, temporary financial assistance during the project planning and execution stages may be provided from a \$1 billion Treasury borrowing authorization used for direct Federal advances

and loans, or more importantly for guaranteeing private loans to the local planning and redevelopment agencies.

As a prerequisite to financial assistance under this program (as well as Federal Housing Administration urban renewal mortgage insurance programs or annual contributions contracts for public low-rent housing under the United States Housing Act of 1937), the statute requires that a community develop a workable program for employing local resources for the elimination of blight and achievement of a stable well-planned community. The Administrator's certification of such a workable program is made for 1 year, and annual recertification for continued eligibility is based on demonstrated satisfactory progress in carrying out the workable program. The actual and estimated numbers of localities undertaking and maintaining workable programs are as follows:

	1957 actual	1958 estimate	1959 estimate
Workable program certifications.....	162	250	215
Recertifications.....	71	165	285

Since capital grants are nearly a complete measure of Government program costs, the program and financing schedule for grants and outline of associated activities is presented first. This is followed by the similar schedule and discussion of the loan assistance portion of the program, and the combined financial statements for the entire program.

CAPITAL GRANTS FOR SLUM CLEARANCE AND URBAN RENEWAL

For an additional amount for payment of capital grants as authorized by title I of the Housing Act of 1949, as amended (42 U. S. C. 1453, 1456), \$50,000,000.

Estimate 1959, \$50,000,000

Financing applied to program.....	58,715,331	201,500,000	241,600,000

Status of Unfunded Contract Authorization

	1957 actual	1958 estimate	1959 estimate
Unfunded balance at beginning of year....	\$583,000,000	\$743,000,000	\$1,093,000,000
Contract authorization (new).....	200,000,000	350,000,000	-----
Unfunded balance at end of year.....	—743,000,000	—1,093,000,000	—1,043,000,000
Appropriation to liquidate contract authorization.....	40,000,000	-----	50,000,000

Budget program.—Before a capital grant contract is executed, a community must complete an extensive planning operation. Surveys and detailed studies of blighted areas lead to demarcation of project areas and preparation of detailed plans for acquisition and clearance of slum pockets, rehabilitation of less acutely affected areas, improvement of public facilities, relocation of displaced occupants, and disposition of cleared land at its fair value for best new uses. To give assurance that capital grant authority will be available when local agreement on plans

and local financing is reached, reservations or earmarkings against the aggregate grant authority are made at the time planning is approved. These grant reservations have been employed as the point for controlling forward program activity. In terms of numbers of projects (including both the preparation of general neighborhood renewal plans and the planning of specific urban renewal projects), the capital grant reservations shown on the program and financing schedule in each year (planning approved), the commitments made (planning completed), and reservations outstanding (planning in process) at the close of each year, are as follows:

	1957 actual	1958 estimate	1959 estimate
Planning approved.....	88	130	125
Planning terminated.....	31	20	10
Planning completed.....	54	100	125
Planning in process at year end.....	254	264	229

The project plans provide the basis for entering into the Federal grant contract, after which the execution of the plans is undertaken. The execution phase occurs usually over a period of several years, with progress payments not in excess of 75% of the total contract permitted as substantial action is completed both with respect to the project itself and the provision of the local share of project costs. With the payment of an estimated \$60 million in Federal grants during the budget year, cumulative grant disbursements will reach \$207 million. The numbers of projects entering, completing, and remaining in the execution stage, are as follows:

	1957 actual	1958 estimate	1959 estimate
Projects entering execution.....	56	100	120
Projects completed.....	2	20	25
Projects in execution at year end.....	178	258	353

In addition to capital grants for part of the write-down or net project costs, two other types of grants are made from this appropriation. Federal funds pay the full cost of relocating displaced families from urban renewal areas up to a maximum of \$100 per family, and of relocating small businesses up to \$2,500 per establishment. Grants are also made up to two-thirds of the cost of certain demonstration projects designed to develop, test and report new techniques for preventing or eliminating blight.

Financing.—Some 264 cities were actively engaged in planning and development operations as of June 30, 1957. About 50 new localities entered the program in 1957, and an equal or larger number of new applicants is in prospect during each of the current and budget years. To finance a vigorous forward program with due regard for budgetary levels, legislation is proposed to provide \$200 million in new capital grant contract authority. This amount, together with some \$50 million estimated to be carried over from current authorizations, can finance new projects and provide essential adjustments in existing projects to the extent of \$250 million—or about the same level as in the past year. Capital grant disbursements and budget expenditures do not occur until after the period required for planning and execution.

Budget program.—Loan assistance in financing the planning and execution of urban renewal projects is furnished in the following forms:

1. Federal planning advances currently are used to finance the planning costs directly associated with the project. These advances are repayable with interest from project funds.

2. On reaching the contract stage, a loan commitment is issued covering borrowing requirements for the project expenditures to be paid by the redevelopment agency. The loan commitment is reduced when repayments are received from project funds; i. e., the proceeds of land sales and local and Federal cash grants. Typically initial financing requirements are met with Federal loans. Such loans are generally refunded and further needs met from private loans secured by a pledge of the Federal loan commitment.

3. When redeveloped land is to be leased rather than sold, a definitive loan commitment may be issued in the amount of the net value of the land. Private financing secured by the Federal loan commitment is also relied upon in these cases.

The program and financing schedule shows these three classes of loan commitments as items 1, 2 and 3.

Financing.—The financing section of the schedule contains entries to account for the guaranteed non-Federal loan transactions. The sources and application of funds statement following this narrative shows substantial repayments of Federal loans. However, Federal loan commitments are retired in smaller amounts because a large proportion of repayments come from the substitution of guaranteed private financing. The detail is as follows:

[In thousands]

	1957 actual	1958 estimate	1959 estimate
Total temporary loans repaid (statement of sources and application of funds).....	\$20,509	\$60,000	\$85,000
Less refundings from private guaranteed loans secured by the Federal loan commitment.....	13,560	20,000	40,000
Temporary loans repaid from project settlement funds.....	6,949	40,000	45,000

Repayments of private guaranteed loans from the project settlement account also extinguish the loan commitment and are accordingly listed in the Financing section.

The degree of reliance on non-Federal guaranteed financing is shown in the following tabulation of loans outstanding at the end of the various years:

[In thousands]

	1957 actual	1958 estimate	1959 estimate
Total Federal advances and loans (gross)....	\$48,943	\$56,038	\$49,137
Non-Federal loans.....	107,709	167,709	262,534

Operating results and financial condition.—While the loan portion of the program has had some interest earnings in past years, the increase in Treasury borrowing rates as compared with the volume of loan commitments made several years back in a period of lower interest rates has now all but eliminated this margin, and a continuation of this situation is projected. The assumed static level of operating deficit excludes cumulative expenditures of \$207 million for capital grants and \$27.2 million for administrative costs paid from appropriated funds through the end of the budget year.

The Atomic Energy Community Act of 1955, as amended, provides for the disposal of federally owned properties at the communities of Oak Ridge, Tenn., and Richland, Wash. Under Executive Order 10657, the Administrator of the Housing and Home Finance Agency was delegated the functions, duties, and responsibilities in connection with the sale and financing of these properties as provided by the act.

Budget program.—It is estimated that all properties at both communities, consisting of some 11,800 parcels of residential and nonresidential property with an appraised value of \$80.2 million, can be disposed of by 1960. The estimated rate of disposition by type of property and by community is shown below:

[Dollars in millions]

Total.....	11,800	80.2	3,990	19.8	5,014	36.1	2,474	21.1

Based on sales experience during 1957, the budget assumes that the properties will be sold in 46% of the cases for cash (including private financing), 49% with purchase money mortgages accepted by the Housing and Home Finance Agency and the remaining 5% under 3-year purchase contracts. In sales financed by purchase-money mortgages, supplemental loans will be made in an estimated 60 cases to cover proposed repairs and improvements.

Sales proceeds in 1959 under these assumptions are estimated at \$9.2 million in cash and \$8.8 million in mortgages and contracts.

Statutory credits granted to purchasers are allowed to the occupants of single-family and duplex houses who received priority rights to purchase. These statutory credits are expected to total \$3.3 million in 1959, composed of (a) \$1.7 million in automatic 15% credits given to occupant-priority purchasers, (b) \$1.1 million for the 10% granted on waiver of an indemnity provision protecting against resale hazards in a one-industry town, and (c) \$0.5 million in allowances attributable to improvements made by or paid for by priority holders.

Financing.—Accountability is assumed for properties at their appraised value at the time a sale is concluded.

The collections of amortization payments on mortgages and purchase contracts are expected to reach \$1.2 million in 1959 and interest and other revenue to rise to virtually an equal amount. The projected sale of \$5 million in mortgages at prevailing discounts produces an additional \$4.9 million.

With the declaration of a \$15 million liquidating dividend in 1959, cumulative payments to Treasury will reach \$35 million.

Operating results.—There will remain on hand at the end of 1959 an estimated \$24.9 million in assets, of which \$22.9 million represents a portfolio of 3,750 purchase-money mortgages and nearly 200 3-year purchase contracts. The cumulative loss of \$17.6 million is largely attributable to \$16.9 million in statutory credits to priority purchasers. A substantial reduction in this deficit should be achieved from net earnings in the years following the active sales program.

FEDERAL NATIONAL MORTGAGE ASSOCIATION

The Association, operating under the Federal National Mortgage Association Charter Act (12 U. S. C. 1716, et seq.) purchases, manages, and sells residential mortgages that are insured by the Federal Housing Administration or guaranteed by the Veterans Administration. Under amendments made to the original enactment by the Housing Act of 1954, the Association's functions are carried out through three programs for which separate accountability is required by statute. These programs—secondary market operations, special assistance functions, and management and liquidating functions—are described in the following sections:

Public enterprise funds:

The secondary market operations were authorized by the Housing Act of 1954 in order to provide limited liquidity for Government insured and guaranteed mortgages and to improve the distribution of investment capital available for home financing. Assistance is provided by the purchase and sale of mortgages insured by the Federal Housing Administration or guaranteed by the Veterans Administration on or after August 2, 1954, of such quality, type, and class as meet generally the purchase standards imposed by private investors. Purchases and sales may be made only at such prices as will prevent excessive use of the Association's facilities and permit the Association to operate on a fully self-supporting basis.

The authorizing statute contemplates that the secondary market operations will ultimately be completely owned and financed by private program participants. Accordingly, these operations are treated in the budget as a trust enterprise and the financial statements relating thereto appear in part III of this document.

Federal National Mortgage Association secondary market operations were initially capitalized through the purchase of \$92.8 million of preferred stock by the Secretary of the Treasury. Subsequently, increased preferred stock subscriptions by the Secretary of the Treasury amounting to \$50 million (Public Law 85-10) and \$65 million (12 U. S. C. 1718d) were authorized, of which \$50 million was subscribed in 1957 and an additional \$10 million is contemplated in 1959. This preferred stock will be retired as rapidly as feasible and in the meantime the Association will pay dividends on it to the Treasury at rates determined by the Secretary of the Treasury. Private capitalization for these operations is accumulated through a statutory requirement that private subscriptions to common stock must be made which equal 2% of the unpaid principal amount of mortgages sold to the Federal National Mortgage Association; but this percentage may be fixed at a lesser percentage than 2%, but not less than 1%, as determined by the Association from time to time, taking into consideration conditions in the mortgage market and the general economy.

Recommendations for legislation to transfer ownership of the Association to private owners of capital stock must be submitted to the Congress as promptly as practical after all the Treasury's preferred stock has been retired.

The Association is authorized to finance secondary market operations through borrowing from the public on the security of nonguaranteed debentures. Such obligations may not exceed the lesser of: (a) ten times the sum of the fund's capital and surplus, or (b) the sum of assets free of liens or incumbrances, representing cash, mortgages, United States Government securities, and securities

FEDERAL NATIONAL MORTGAGE ASSOCIATION—Continued

Public enterprise funds—Continued

LOANS FOR SECONDARY MARKET OPERATIONS—Continued

guaranteed by the United States. The Secretary of the Treasury, so long as the preferred stock is outstanding, is authorized to purchase such debentures in an amount not exceeding \$2.25 billion outstanding at any one time.

Budget program.—The secondary market operations, established in 1955, are now fully recognized by the home mortgage market and have reached significant levels. This is borne out by the following table setting forth the principal activities of the secondary market operations:

	[In millions]		
	1957 actual	1958 estimate	1959 estimate
Mortgage purchases (net of discount).....	\$993.4	\$684.8	\$489.8
Mortgage sales (net of discount).....	4.6	23.9	48.5
Repayments and other credits.....	17.2	39.7	69.0
Balance in portfolio at year end (cost).....	1,197.7	1,818.9	2,191.2

The prices at which mortgages are purchased are established by the Federal National Mortgage Association within the range of market prices for the particular class of mortgages involved. In establishing prices, the Association follows the policies of private institutions and varies the price depending upon geographic location, interest rate of the loan, and ratio of equity to value of the subject property. The budget assumes that mortgages will be purchased during 1958 and 1959 at average discounts of 4.9 and 2.1 points, respectively, below their face value and that sales will be made at an average price one-half point above the purchase price. The difference in average discount between 1958 and 1959 is attributable to the higher average interest rates on mortgages purchased in 1959.

Financing.—Substantial interim Treasury borrowings will be necessary in 1958 and 1959, but borrowings from the public through the sale of debentures are estimated to provide the funds necessary to repay Treasury borrowings in the year in which made. Additional financing will be obtained from utilization of Treasury subscription to preferred stock; from subscriptions of common stock by program participants; and from repayments of mortgage principal. No retirements of preferred stock are estimated for the period covered in this budget because of the heavy demand for money in the mortgage market. The amounts of the principal financing balances outstanding at year end are summarized in the following table:

	[In millions]		
	1957 actual	1958 estimate	1959 estimate
Private financing:			
Nonguaranteed debentures.....	\$1,050.1	\$1,630.0	\$1,965.0
Common stock subscribed.....	24.8	39.4	49.7
Treasury financing:			
Borrowing from Treasury.....	3.2	2.0	2.0
Preferred stock.....	142.8	142.8	152.8

Operating results.—Operations are reflected in budget expenditures only to the extent of Treasury financing.

Federal National Mortgage Association is authorized to provide special assistance to the extent that the President has determined that it is in the public interest for the financing of (1) selected types of home mortgages (pending establishment of their marketability) originated under special housing programs designed to provide housing of acceptable standards at full economic cost for segments of the national population which are unable to obtain adequate housing under established home-financing programs, and (2) home mortgages generally as a means of retarding or stopping a decline in mortgage lending and home building which threatens materially the stability of high level national economy. The Association is authorized, for these purposes, to make commitments and to purchase mortgages up to \$450 million outstanding at any one time. Legislation will be proposed to increase to \$540 million (an increase of \$90 million) the amount authorized for these purposes during the period covered by these estimates.

In addition, by amendments to the Charter Act, the Association is authorized to enter into commitments to purchase and to purchase mortgages on cooperative housing insured under section 213 of the National Housing Act, as amended, up to a limit of \$200 million outstanding at any one time; and to make commitments to purchase and to purchase mortgages on armed services housing insured under title VIII of that act, up to a limit of \$450 million outstanding at any one time.

Federal National Mortgage Association special assistance functions are financed exclusively by Treasury borrowings, and all benefits and burdens of the program inure solely to the Secretary of the Treasury.

Budget program.—During 1958 and 1959, Federal National Mortgage Association will provide special assistance, under Presidential determination, to (1) mortgages on housing in or supporting urban renewal areas of the types to be insured under sections 220 and 221 of the National Housing Act; (2) mortgages on housing for the elderly; (3) mortgages on housing in Alaska and Guam;

and (4) mortgages on programed defense, disaster, and military housing. In addition, cooperative and armed services housing will be assisted under the special authority cited above.

The following table shows estimated commitments and purchases during the period covered by this budget:

[In millions]			
	1957 actual	1958 estimate	1959 estimate
New commitments:			
1. Urban renewal.....	\$44.0	\$180.0	\$249.5
2. Housing for the elderly.....	3.2	20.0	40.0
3. Alaska, Guam, and disaster.....	1.9	12.5	11.0
5. Armed services housing.....	199.9	250.0	---
6. Cooperative housing.....	94.3	60.0	15.0
Total commitments.....	343.3	522.5	315.5
Less proposed legislation.....	---	---	88.4
Existing authorization.....	343.3	522.5	227.1
Purchases:			
1. Urban renewal.....	3.4	41.4	140.0
2. Housing for the elderly.....	1.0	15.0	25.0
3. Alaska, Guam, and disaster.....	1.2	3.1	7.5
4. Defense and military.....	3.1	7.7	---
5. Armed services housing.....	1.6	16.8	100.0
6. Cooperative housing.....	14.0	50.0	49.0
Total purchases.....	24.3	134.0	321.5

The achievement of this program depends upon enactment of legislation to increase the authority cited above. Purchases until August 7, 1957, were at a price not less than 99% of par under provisions of Public Law 1020, 84th Congress. Public Law 85-104 further amended the Charter Act to require the Federal National Mortgage Association to purchase mortgages at par pursuant to commitments entered into through August 7, 1958. No mortgage sales are projected pending the growth of the portfolio to levels for which an effective sales program is practical.

Financing.—Net borrowings from the Treasury are estimated at \$125 million in 1958 and \$298 million in 1959, thereby increasing the interest-bearing investment of the Government to \$444.9 million at the end of 1959.

Operating results.—Earnings are not retained but are declared as dividends and paid into miscellaneous receipts of Treasury following the year earned. A payment of \$188,822 was made in 1957, another payment of \$2,444,739 will be made in 1958 and it is estimated \$5,125,000 will be paid in 1959.

The Association, under this function, is directed by statute to manage and liquidate its existing portfolio (acquired pursuant to commitments entered into prior to November 1, 1954) in an orderly manner, with a minimum of adverse effect upon the home mortgage market and a minimum loss to the Federal Government. Liquidation is accomplished through regular repayments of mortgages according to their amortization schedules, sales of mortgages to private investors as rapidly as they can be absorbed without serious disruption of normal market conditions, and other credits arising from prepayments and foreclosures. The Association is not authorized to make additional mortgage purchase commitments under these functions.

Budget program.—Mortgage purchases and cancellation of previous commitments in the current year have completely liquidated the advance contracts and commitments entered into by the Association prior to enactment of the Federal National Mortgage Association Charter Act of 1954. No mortgage sales are contemplated in the budget program.

Financing.—Funds in the amount of \$570 million were borrowed in 1955 from the public on the security of non-guaranteed debentures; in addition, funds in the amount of \$802 million were borrowed in 1958; the first issue will be refinanced in 1958 and the second will be repaid. All borrowings on the security of non-guaranteed debentures have been used to reduce the Federal National Mortgage Association's indebtedness to the Treasury. Net repayments of Treasury borrowings during the period covered by this budget were \$143.4 million in 1957, and are estimated at \$153 million and \$154 million for 1958 and 1959, respectively.

Operating results.—Net income will decline sharply in 1958 and 1959 from the 1957 level. This reflects appreciably higher interest costs resulting from the sale of debentures and the refunding of notes with Treasury in 1958. All benefits and burdens of the management and liquidating function inure solely to the Secretary of the Treasury. Retained earnings reserved for losses and contingencies at the end of 1957 amounted to \$93.7 million and are estimated at \$108.1 million and \$116.0 million at the end of 1958 and 1959, respectively.

POSITION WITH RESPECT TO MORTGAGE PURCHASE AUTHORITY

	1957 actual	1958 estimate	1959 estimate
Mortgage purchase authority ¹	\$2,332,910,161	\$2,182,835,761	\$2,032,785,761
Charges against authority:			
Mortgages outstanding at end of year.....	2,332,635,761	2,182,835,761	2,032,785,761
Undisbursed commitments at end of year.....	274,400	-----	-----
Total charges against authority.....	2,332,910,161	2,182,835,761	2,032,785,761
Unused authority.....	-----	-----	-----

¹ On and after Nov. 1, 1954, pursuant to Public Law 560, the Federal National Mortgage Association's mortgage purchase authority is the total of its mortgage portfolio and its outstanding commitment contracts in the management and liquidating functions.

The Federal Housing Administration, created by the National Housing Act of 1934, is a noncorporate business-type agency made subject to the Government Corporation Control Act by the Housing Act of 1948. The principal purposes of the Administration are to stabilize the mortgage market and to improve home financing practices, housing standards and conditions through the insurance of loans and investments to finance the production, purchase, repair, and improvement of residential structures. As of June 30, 1957, a total of \$45 billion of insurance had been written, of which \$21 billion was outstanding.

The Administration conducts a wide variety of programs through 11 separate insurance funds, the most important of which is the mutual mortgage insurance fund for the insurance of mortgages on 1- to 4-family dwellings under sec. 203 of the National Housing Act. Other funds cover the insurance of home repair and improvement loans, insurance of mortgages on multifamily housing including cooperative housing, insurance of mortgages on housing for urban renewal, armed services, and other special purposes, and insurance of equity investments in rental housing.

The mutual mortgage insurance fund differs from other insurance funds in that mortgagors receive participation payments from any excess of fees and premiums paid over losses and expenses allocable to the fund. Through June 30, 1957, these participation payments to home owners have amounted to \$74.8 million.

The Housing Act of 1957 provided for lower downpayments on family housing insured under sec. 203, and for extension of authority to insure mortgages on armed services housing (title VIII) until June 30, 1959. Revised regulations have been issued to authorize interest rates up to 5½% in the basic 1- to 4-family housing mortgage insurance programs.

All of the Administration's insurance programs are revenue producing. Revenue is derived from insurance premiums, appraisal and miscellaneous fees, and interest on investments in Government securities.

Budget program.—The Federal Housing Administration budget for 1959 is designed to carry out the Administration's part of the President's housing program, with present emphasis on the correction and prevention of slums and urban blight, the encouragement of more suitable housing for the elderly, the stimulation of cost reduction in housing built for low- and middle-income groups, the improvement of existing homes, and the provision of housing needed by employees at military and research installations.

Summary of individual insurance programs.—A summary statement, with estimated workload, is provided below for each of the major mortgage insurance programs.

1. Home modernization and repair insurance program (title I, sec. 2).—Financial institutions insured against losses are required to provide 10% coinsurance on loans for the alteration, repair, and improvement of residential properties. Loans insured are characteristically short-term, unsecured notes currently averaging around \$650. Estimates are set forth below:

	1957 actual	1958 estimate	1959 estimate
Initiation: Loans insured.....	1,048,069	1,200,000	1,200,000
Servicing: Insurance in force (number of notes), end of year.....	2,615,493	2,896,353	2,876,988
Liquidation—Acquired security or collateral on hand:			
Defaulted loans.....	137,884	119,800	106,193
Amount (in millions).....	\$53.4	\$46.5	\$41.2

2. Basic 1-4 family mortgage insurance programs (secs. 8 and 203).—Mortgages may be insured on 1- to 4-family structures up to statutory limits of 97% of the first \$10,000 of appraised value, 85% of the next \$6,000 of value, and 70% of value in excess of \$16,000. Under these provisions, insured loans bear a higher ratio to the value of the mortgaged property in the lower price range to aid in construction of homes for families of low and moderate income. Mortgages on disaster housing can be insured by Federal Housing Administration up to a maximum of \$12,000 on the basis of 100% of loan to value. Insured mortgages may cover new and existing properties both for rent and for sale.

A new program to bring the advantages of Federal Housing Administration mortgage insurance to communities remote from Federal Housing Administration insuring offices has been launched in 1958 on an experimental basis. Local lenders approved by the Federal Housing Commissioner are authorized to process applications for section 203 mortgage insurance, securing necessary appraisals and inspection through Federal Housing Administration-approved fee appraisers and inspectors.

Servicemen's housing mortgage insurance (sec. 222).—Section 222 authorizes the insurance of mortgages to fi-

nance the purchase of homes by servicemen who have been in the Armed Forces for a minimum of 2 years. Under this section, mortgages may be insured on single-family structures up to 95% of appraised value, with a maximum mortgage limitation of \$17,100.

Estimates in the basic 1- to 4-family mortgage insurance programs are as follows:

	1957 actual	1958 estimate	1959 estimate
Initiation:			
Unit applications examined:

Section 8.....	102	38	57

3. Basic multifamily mortgage insurance program (secs. 207 and 213).—Mortgages may be insured on new or existing multifamily housing projects up to statutory limits of 90% or 95% of appraised value (or in the case of cooperative housing, estimated replacement cost). Special provision is made for mortgage insurance on projects undertaken by nonprofit corporations for occupancy by elderly persons. Estimates are as follows:

	1957 actual	1958 estimate	1959 estimate
Initiation:			
Unit applications examined:			
Section 207.....	7,063	19,000	19,000

Section 213.....	194	158	149

4. Urban renewal, rehabilitation and relocation mortgage insurance program (secs. 220 and 221).—Section 220 provides insurance of mortgage financing for the construction or rehabilitation of housing in designated urban renewal areas. Section 221 provides mortgage insurance for housing built or rehabilitated for persons displaced by governmental action in communities having approved urban renewal plans.

Actual and estimated operating volume is as follows:

FEDERAL HOUSING ADMINISTRATION—Continued

Public enterprise funds—Continued

FEDERAL HOUSING ADMINISTRATION FUND—Continued

5. *Armed services mortgage insurance program (title VIII).*—Rental housing is provided under title VIII, through the use of private capital under insured mortgages, for civilian and military personnel of the armed services and for personnel at atomic energy, and research and development installations. Mortgages may be insured for not to exceed an average of \$16,500 per dwelling unit in any one project. During the last half of 1957 advance statements of appraisal and eligibility involving more than 50,000 units were requested by the military. Estimates are as follows:

	1957 actual	1958 estimate	1959 estimate
Initiation:			
Unit applications examined.....	30,751	22,900	42,800
Units insured.....	20,433	14,800	27,100

Properties sold (units).....	199	555	555
Properties on hand end of year (units).....	2,496	2,617	2,302

6. *Emergency and other special incentive programs.*—The special war housing mortgage insurance provisions of title VI (secs. 603, 608, 609, 610, and 611), were continued until April 1948 for home mortgages and until March of 1950 for rental project mortgages to provide veterans' emergency housing. Other special incentive programs were added later. These included insurance of (a) loans for the manufacture of housing by industrial processes and short-term notes incident to the sale of such housing; (b) mortgages executed in connection with the sale by the Government of certain federally owned housing; and (c) short-term loans to finance the construction, by modern site-fabrication methods, of groups of 25 or more single family dwellings, as well as for insured long-term financing of properties so constructed. Insurance authority under title VI has terminated. The Housing Act of 1954 transferred to title II the authority to insure mortgages to finance the sale of Government-owned housing.

Title VII provides for yield insurance for rental housing equity investments. There is insured an annual return of 2½% and a minimum annual amortization of 2% on equity investments in rental housing for families of moderate income.

Title IX provided mortgage insurance for programed defense housing, covering both 1- to 4-family and multi-family housing within the limits of programed housing needs in defense areas designated by the President. The authorization to insure under this title has terminated except for commitments outstanding.

Summary of operating expense estimates.—FHA operating expenses (administrative and nonadministrative) are paid out of operating income, subject to limitation.

It is expected that a total operating expense authorization of \$46,400,000 will be necessary for 1959, of which \$7,400,000 will be administrative and \$39,000,000 non-administrative, representing an increase of \$1,140,000 over the latest estimate for 1958. The 1958 estimate is \$45,260,000, \$7,260,000 administrative and \$38,000,000 nonadministrative. It should be noted that this estimate for 1958 is \$2,000,000 over the present limitation, based upon the increased workload shown here, and will be the subject of a supplemental nonadministrative budget estimate to be submitted separately.

Relation of costs to obligations.—The relationship is derived by year-end balances of unpaid undelivered orders as follows: 1956, \$200,032; 1957, \$366,838; 1958, \$366,838; and 1959, \$366,838.

Financing.—All Federal Housing Administration operations are financed out of revenue. Mortgage insurance claims are met by the issuance of debentures which are subsequently redeemed out of insurance revenue and the proceeds of the sale of acquired properties and mortgages. In 1957, \$72,376,900 of debentures were issued. Debentures to be issued are estimated at \$54,810,900 in 1958 and \$45,115,000 in 1959. Debentures were retired in 1957 in the amount of \$39,043,650. Retirement of debentures in 1958 and 1959, respectively, are estimated at \$45,716,250 and \$54,211,700.

Operating results and financial condition.—Operations in 1957 resulted in a net income of \$76,709,695. This income was distributed as follows: \$26,390,900 was placed in the general surplus account, \$32,500,000 in the participating reserve account of the Mutual Mortgage Insurance Fund (which was established pursuant to Public Law 560, approved Aug. 2, 1954), and \$17,818,795 in the general insurance reserves under the nonmutual insurance programs.

Net income is expected to be \$104,999,316 in 1958 and \$125,013,900 in 1959. In the two-year period it is estimated that income totaling \$85,952,195 will be added to the participating statutory reserve account and \$144,061,021 to general surplus accounts.

Insurance reserves which totaled \$460,897,568 on June 30, 1956, increased to \$531,177,737 during 1957 and are expected to reach \$628,035,553 by June 30, 1958, and \$744,599,453 by June 30, 1959. These reserves are required to meet future insurance losses and expenses.

On June 30, 1956, the total of Federal Housing Administration capital and insurance reserves stood at \$481,207,568. During 1957 the capital and reserves increased to \$551,487,737, and it is estimated that they will reach \$648,345,553 by June 30, 1958, and \$764,909,453 by June 30, 1959.

Insurance authority.—Public Law 1020, approved August 7, 1956, amended the general mortgage insurance authorization under section 217. This amendment provides that the aggregate amount of principal obligations of all mortgages which may be insured and outstanding at any one time under insurance contracts or commitments to insure pursuant to any section or title (except sec. 2 and sec. 803) shall not exceed the sum of (a) the outstanding principal balances, as of July 1, 1956, of all

insured mortgages (without taking into account prepayments or delinquencies), (b) the principal amount of all outstanding commitments to insure as of July 1, 1956, and (c) \$3,000,000,000. This general insurance authorization applies to all mortgage insurance programs except new insurance written under title VIII pursuant to commitments issued on or after August 11, 1955, and provides adequate amounts to carry such mortgage insurance programs through 1958. The legislative proposal will include a request for an authorization of \$3,000,000,000 over the June 30, 1958 charges of \$25,039,566,335, making a total of \$28,039,566,335 available in 1959.

Section 803 (a) of the act as amended by Public Law 345, approved August 11, 1955, and Public Law 1020, approved August 7, 1956, created a separate mortgage insurance authorization with regard to all new insurance written under title VIII pursuant to commitments issued on or after August 11, 1955, including both the new armed services housing program and the extended military housing program. This insurance authorization provides that the aggregate amount of principal obligations of all mortgages insured under this program shall not exceed \$2,300,000,000 and that the limitation in section 217 shall not apply to this program. This amount will be adequate to carry the program through both 1958 and 1959.

The title I, section 2, authorization of \$1,750,000,000 for repair and improvement insurance will be sufficient to carry this program through both 1958 and 1959.

Proposed for later transmission:

LIMITATION ON NONADMINISTRATIVE EXPENSES, FEDERAL HOUSING ADMINISTRATION

Under existing legislation, 1958.—An increase in the limitation for nonadministrative expenses for 1958 in the amount of \$2,000,000 is anticipated to provide funds for increased workload in connection with mortgage insurance programs.

PUBLIC HOUSING ADMINISTRATION

The Public Housing Administration is responsible for administering the low-rent public housing program under the United States Housing Act of 1937 (42 U. S. C. 1401 et seq.), as amended. This act provided for a program of locally owned and operated low-rent public housing by authorizing loans and annual contributions to local housing authorities to assist in financing the construction of housing projects for low-income families and to maintain their low-rent character after completion and occupancy. In addition, the Public Housing Commissioner has directed, on behalf of the Housing and Home Finance Administrator, the liquidation of the public war, the defense, and the veterans reuse housing programs which are included in the revolving fund for liquidating programs (see Office of the Administrator). The budget program anticipates disposition of all housing units and related properties in the public war, defense, and veterans reuse housing programs by the end of 1958. Only a portfolio of mortgages received in partial payment from the sale of these properties will then remain.

Public enterprise funds:

ADMINISTRATIVE EXPENSES

[Administrative expenses:] For administrative expenses of the Public Housing Administration, **[\$11,440,000]** \$12,200,000, to be **[merged with and]** expended under the authorization for such expenses contained in title II of this Act. (*Independent Offices Appropriation Act, 1958.*)

Appropriated 1958, \$11,440,000

Estimate 1959, \$12,200,000

ANNUAL CONTRIBUTIONS

[Annual contributions:] For the payment of annual contributions to public housing agencies in accordance with section 10 of the United States Housing Act of 1937, as amended (42 U. S. C. 1410), **[\$95,000,000]** \$114,000,000. (*Independent Offices Appropriation Act, 1958.*)

Appropriated 1958, \$95,000,000

Estimate 1959, \$114,000,000

The United States Housing Act of 1937 has subsequently been modified by amendments or by other related legislation. Public Law 671, approved June 28, 1940 (42 U. S. C. 1501), permitted the construction of permanent housing for war workers, subject to conversion to low-rent use after the emergency. The Housing Act of 1949, Public Law 171, approved July 15, 1949 (42 U. S. C. 1401 et seq.), increased the borrowing power of the Administration to \$1.5 billion and increased the annual contributions authorization to \$336 million. The Housing Act of 1957, Public Law 85-104, approved July 12, 1957, modified the income limits, by increasing the exemptions for certain members of families, for admission to and continued occupancy in low-rent housing projects administered under the Housing Act of 1937, as amended. The increased exemptions are not mandatory, but may be applied at the option of local authorities. The Housing Act of 1957 also increased the maximum cost per room of regular

low-rent dwelling units from \$1,750 to \$2,000 and for dwellings designed for elderly families from \$2,250 to \$2,500.

Budget program.—A low-rent public housing project is initiated by a preliminary loan contract under which the Public Housing Administration advances planning funds to the local housing authority. The Public Housing Administration does not, however, incur a legal obligation to provide the financial assistance necessary to construct and maintain the low-rent character of the project until an annual contributions contract is entered into by the Public Housing Administration and the local housing authority. The annual contributions contract is consequently treated as the point of program initiation and control. The contract provides for (1) the payment of annual contributions over a 40-year period in an amount not to exceed the interest and amortization on the bonds required to finance the project, and (2) temporary financing of development costs pending completion and permanent financing of the project.

The Housing Act of 1956 authorized the execution of new contracts for loans and annual contributions after July 31, 1956, for a total of 70,000 units. The authorization is for two consecutive annual programs of 35,000 units and each program may be executed during a period of 2 years after it becomes available. The first program of 35,000 units was authorized to begin August 1, 1956, and will terminate on July 31, 1958. The second program of 35,000 units became available July 1, 1957, and will terminate on June 30, 1959. The Housing Act of 1956 also continued the uncompleted authorization to execute contracts for loans and annual contributions contained in the housing amendments of 1955. It is anticipated that the authorized program will be placed under annual contributions contracts by the termination dates. During 1957, 3,477 units of the current authorization were placed under annual contributions contracts. The budget program plans for the execution of annual contributions contracts for a total of 33,466 units during 1958 and the remaining 33,635 units, authorized by the Housing Act of 1956, will be placed under contract in 1959.

Development progress.—At any one time, the development phase of the low-rent program constitutes a pattern of construction progress. The pattern can be divided into separate sections, each of which represents a stage in the development process. This status-by-stage analysis at respective fiscal year ends is presented in the following tabulation:

Development stage:	NUMBER OF DWELLING UNITS		
	1957 actual	1958 estimate	1959 estimate
1. Preliminary loan contract executed but site not selected.....	50,857	25,698	12,563
2. Site selected but annual contributions contract not executed.....	2,307	-----	-----
3. Annual contributions contract executed but construction not started.....	90,016	90,856	88,709
4. Construction started but not available for occupancy.....	15,554	36,580	57,586

This analysis indicates the development stages over the 3-year period will decrease considerably in those stages prior to the annual contributions contracts but will increase materially in the construction stage. The Public Housing Administration plans to concentrate its efforts toward the construction of units already under annual contributions contracts or authorized by the Housing Act of 1956. On June 30, 1959, only 12,563 units will remain in the preliminary loan stage. Preliminary loans and sites selected for other projects and units can only be made after the Congress authorizes the execution of new contracts for loans and annual contributions for the low-rent public housing program.

A further review is afforded by the passing of housing units through the various development stages. The number of units passing each of the five critical stages in the development process during a fiscal year is an indication of program accomplishments. A 3-year comparison is presented in the following tabulation:

NUMBER OF DWELLING UNITS

	1957 actual	1958 estimate	1959 estimate
Development action:			
1. Preliminary loan contract executed.....	4,519	6,000	20,500
2. Site selected.....	10,198	31,159	33,635
3. Annual contributions contract executed.....	44,718	33,466	33,635
4. Construction started.....	9,994	32,626	35,782
5. Completed for occupancy.....	13,276	11,600	14,776

The activity shown for 1957 and 1958 reflects an increase in preliminary loan contracts executed, sites selected, and construction starts. The time lag in completing the first three stages of the development process gives a substantial workload in the construction stage of the program. As the housing units leave the construction stage, the workload in the management stage will increase correspondingly.

Loans.—The Housing Act of 1949 authorized the Public Housing Administration to have, at any one time, outstanding borrowings of \$1.5 billion from Treasury. These borrowings and certain working capital funds available to the corporation are used for loans to local housing authorities. Pursuant to the annual contributions contract, Public Housing Administration makes a loan commitment to cover initial project development costs. The commitment is gradually increased over the development period, as progress warrants, up to a maximum of 90% of development costs. During the current and budget years, new loan commitments consequently reflect its new annual contributions contracts and the increase in the number of units under construction. The dollar volume of new loan commitments is estimated to increase, because of these factors, from \$250 million in 1957 to \$394 million in 1958 and \$499 million in 1959.

The Public Housing Administration finances initial planning work and the first 3 months of construction through direct short-term development loans to local housing authorities. As soon as loans to the local authorities are of sufficient amount to make private financing practical, the local authority sells short-term temporary notes to private investors and utilizes the proceeds to repay the advance and interim notes held by the Public Housing Administration and for immediately forthcoming construction requirements. These notes are guaranteed by Public Housing Administration through the pledge by the local authority of the Public Housing Administration loan commitment. Because of this guaranty, the notes have excellent security and sold at average interest rates of slightly over 2% in 1957. These notes are issued for short periods, usually 5 months, and may be reissued several times, and in increasing amounts, before the project is completed and ready for occupancy. Consequently, during any fiscal period a considerable turnover of short-term funds takes place, with the result that the volume of loan activity by the Public Housing Administration during a fiscal year greatly exceeds the amount of loans outstanding at the fiscal year end. The anticipated increase in project construction activity during 1958 and 1959 accounts for the greatly increased volume of estimated lending operations by the Administration for both years.

The following table shows the actual financing and refinancing of development loans by Public Housing Administration and private investors during 1957 and estimated transactions during 1958 and 1959.

[In millions]

	1957 actual	1958 estimate	1959 estimate
Loans and investments made by Public Housing Administration to local housing authorities and others:			
Balance at beginning of year.....	\$90	\$94	\$93
Acquisitions during the year.....	250	394	499
Repayments during the year.....	246	395	500
Balance at end of year.....	94	93	92
Loans by private investors to local housing authorities—guaranteed by Public Housing Administration:			
Balance at beginning of year.....	708	667	861
Acquisitions during the year.....	1,410	1,584	1,964
Repayments during the year.....	1,451	1,390	1,940
Balance at end of year.....	667	861	885

All short-term financing, both direct and guaranteed, is retired when the local housing authority permanently finances the project. Refunding operations affect only the distribution between direct and guaranteed loans and not the total outstanding.

Permanent financing is obtained through the sale of the local housing authority's long-term bonds to the public. These are usually 40-year serial bonds and are secured by the Government's pledge to pay annual contributions. They were sold in 1957 at interest rates ranging from 2.4867 to 2.8847%. It is estimated that \$120.3 million in new local housing authority bonds will be issued in 1958 and \$448 million in 1959, compared to \$156.5 million in 1957.

Management.—The maximum annual contribution, which is equal to the interest and amortization on the bonds issued to permanently finance the project, is reduced to the extent that project operations provide net receipts which can be used for this purpose. Consequently a limited Public Housing Administration review of project management is not only necessary to assure that the objectives of national housing legislation are being achieved and that the obligations of the annual contributions contract are being fulfilled, but also bears directly on the cost of the program to the Federal Government. The management workload at each fiscal year end, classified according to major category and program, is shown in the table that follows:

NUMBER OF DWELLING UNITS

	1957 actual	1958 estimate	1959 estimate
Locally owned projects eligible for annual contributions.....	376,946	390,917	405,693
Locally owned projects paying residual receipts to the Federal Government.....	48,551	40,622	40,622
Federally owned and operated projects.....	1,936	1,462	1,462
Federally owned projects leased to local housing authorities.....	2,450	2,374	2,374
Total all projects.....	429,883	435,375	450,151

Projects not eligible for annual contributions.—Projects not eligible for annual contributions account for less than 10% of the total in 1959 and Federal funds are not required for their support.

One category is the group of locally owned projects paying residual receipts to the Federal Government. Except for a single Public Law 412 project, all of these projects originated in programs where construction costs were financed out of appropriated funds. Consequently, in the absence of interest and amortization charges, no need exists for annual contributions which otherwise would be required to pay such charges. Residual receipts, instead of being applied to reduce annual contributions, as is the case for all other locally owned projects, are paid for a period of 40 years to the Federal Government. Deficits, however, are not paid by the Federal Government. Chiefly because of the transfer of farm-labor camps, as directed by the Housing Act of 1956, and the conveyance of 3 Public Works Administration projects to local housing authorities for low-rent use, the number of dwelling units in this category will decline from 48,551 on June 30, 1957, to 40,622 on June 30, 1959.

PUBLIC HOUSING ADMINISTRATION—Continued

Public enterprise funds—Continued

LOW-RENT PUBLIC HOUSING PROGRAM FUND—Continued

Another category consists of federally owned projects leased to local housing authorities. Leasing arrangements are merely temporary expedients until such time as projects are either sold to local housing authorities and financed by sale of local housing authority bonds under annual contributions contracts or transferred to local housing authorities under conditional conveyance contracts providing for payment of residual receipts to the Federal Government. These leased projects are scheduled for disposition by conveyance or sale as rapidly as possible.

Nonadministrative expenses.—The Administration utilizes program receipts to meet certain expenses of the low-rent public housing program, and the use of these funds correspondingly reduces the need for appropriated funds. The Congress, in order to maintain control over use of these program receipts, established a nonadministrative expense limitation. The limitation has consisted of two separate parts: (1) expenses incurred in the operation and maintenance of federally owned and operated projects, and (2) expenses incurred in the inspection of projects under construction.

Federally owned and operated projects under the low-rent public housing program represent projects that have not been sold, conveyed, or leased to local housing authorities for various reasons, such as absence of State-enabling legislation, local conditions, and the lack of congressional authority to dispose of the projects for other than low-rent use. Program receipts fluctuate from year to year, as projects are removed from the program. The estimated expenses for 1959 are based upon the disposition of 1 project during 1958 and the continued operation of 4 projects by the Public Housing Administration.

The Public Housing Administration assigns engineers and other necessary inspection staff to projects under construction for the purpose of providing continuous inspection and advice until the project is completed and ready for occupancy. The local housing authority pays a fixed fee for this service, based upon a total development cost schedule, and the receipts are used to pay the cost of inspection. The estimated cost of this inspection service for 1959 is based upon a higher number of units in the construction stage.

The category of federally owned and operated projects is declining, and by June 30, 1959, it is expected that only 1,462 dwelling units will remain.

Annual contributions.—The following table summarizes the annual contributions required to assure the low-rent character of all locally owned projects eligible for annual contributions:

	1957 actual	1958 estimate	1959 estimate
Fixed annual contributions.....	\$116,685,509	\$118,000,000	\$139,000,000
Deduct: Fixed annual contributions in excess of debt service requirements for Public Law 671 projects in temporary financing.....	312,948	300,895	300,841
Net fixed annual contributions.....	116,372,561	117,699,105	138,699,159
Deduct: Amounts available to reduce annual contributions:			
Accrued interest.....	945,533	151,326	5,226,278
Capitalized interest.....	1,786,462	697,829	758,629
Residual receipts, end of initial operating period.....	782,323	245,789	217,505
Residual receipts, current period.....	22,223,430	16,804,161	18,496,747
Total amount available to reduce annual contributions.....	25,737,748	17,899,105	24,699,159
Annual contributions requirements.....	190,634,813	299,800,000	114,000,000
Number of units on which annual contributions accrue.....	365,896	367,911	401,214

¹ \$93 million was appropriated. Refinancing operations and other factors decreased annual contributions requirements.

² Includes a proposed supplemental appropriation of \$4,800,000 to be submitted for consideration at a later date.

Increased annual contributions requirements in 1959 are occasioned largely by the increased number of units eligible for contributions resulting from the completion and permanent financing of new and reactivated projects.

Another factor responsible for the increase in revised estimates for 1958 and estimates for 1959 is the increased operating costs, particularly for repairs, maintenance, replacements, and operating improvements.

Under the present statutory authorization, the Public Housing Administration may pay annual contributions up to \$336 million per annum. The maximum amount of annual contributions which the Public Housing Administration is committed to pay, on the basis of annual contributions contracts executed through June 30, 1957, is estimated at \$197 million, leaving \$139 million of uncommitted authority to pay annual contributions.

Administrative expenses.—Administrative expenses for the low-rent public housing program amounted to \$9,997,266 in 1957 and are estimated at \$11,440,000 for 1958 and \$12,200,000 for 1959.

The large number of units remaining in the various development stages during 1959, is the chief reason for the rise in administrative expenses. The average number of units in the construction stage will increase from 30,596 in 1958 to 52,256 during 1959. Dwelling units completed and reaching the management stage at year end will increase from 429,883 units in 1957 to 435,375 units in 1958 and 450,151 units in 1959 and will expand the management workload. This will require additions to certain management staff organizations, such as, audit staffs in the central and regional offices, and project fiscal management groups.

In prior years the administrative expense appropriation for the low-rent public housing program was merged with administrative expense funds of the liquidating emergency housing program. 1958 represents the last year in which administrative expense funds for both programs will be merged into a single fund.

Operating results and financial condition.—Operating revenue is not intended to be sufficient to cover all program costs. Net losses, in the budget year, are approximately equal to the appropriations for administrative expenses and annual contributions plus the losses on transfers of Public Works Administration projects to local housing authorities.

Net obligations outstanding, as shown in the schedule of certain fund balances, increase sharply from 1957 to 1959. This is due to the fact that new loan commitments exceed retirements through permanent financing of Public Housing Administration loan commitments during this period. The undisbursed loan commitment is composed of the Public Housing Administration agreement to advance planning and preliminary construction funds and the guaranty of outstanding advance and permanent loan notes held by private investors. These commitments can be met from the authority to borrow up to \$1.5 billion from Treasury.

Budget program.—The Public Housing Administration is responsible for administering the low-rent public housing program. Under the program, administrative expenses are incurred in the performance of development and management functions.

1. **Development.**—Development expenses in 1959 will be incurred in the course of assisting local housing authorities in project planning, working out architectural, engineering, and construction problems, analyzing proposed sites, helping in land acquisition, preparing cost estimates, and rendering similar advisory services.

2. **Management.**—The Administration incurs expenses in the performance of management functions, such as, conducting management reviews of projects, analyzing and reviewing budgets submitted by local housing authorities, making fiscal and occupancy audits, undertaking inspections to insure proper maintenance of properties, and providing consulting engineering services.

The management workload for the low-rent public housing program is reflected in the number of dwelling units in management at year end as follows: 1957, 429,883; 1958, 435,375; 1959, 450,151.

DEPARTMENT OF AGRICULTURE

Of the \$5 billion of estimated expenditures in the fiscal year 1959 by the Department of Agriculture, 92% is for activities classified as agriculture and agricultural resources, including 65% for stabilization of farm prices and farm income and 27% for loans, conservation, research and other services.

The remaining 8% of the Department's expenditures are for grants of agricultural commodities to peoples in other countries, classified under international affairs and finance; cash contributions for school lunches, classified under labor and welfare; Forest Service programs, classified under natural resources; and farm housing loans, classified under commerce and housing.

Stabilization of farm prices and income—Commodity Credit Corporation.—Net expenditures of the Commodity Credit Corporation for price support operations and related programs are estimated to be \$2.4 billion in the fiscal year 1959, compared with \$2.7 billion in 1958 and \$2.7 billion in 1957. These expenditures consist largely of gross outlays for loans, commodity purchases, payments to producers, storage and transportation costs, and operating expenses; less applicable receipts, which are principally from commodity sales and collections on loans. The expenditure figure for 1957 has been made comparable to the figures for 1958 and 1959 by excluding from 1957 the costs of the soil bank programs which were financed in that year from Corporation funds. The Corporation also finances certain other programs of the Department, not related to price support, which it is estimated will result in budget expenditures of \$105 million in 1959.

During the fiscal year 1959, it is estimated that the Corporation will acquire agricultural commodities costing \$3 billion. This is a \$548 million reduction from the current year and a still greater reduction from the two preceding years. Commodities are acquired by direct purchase or by taking over commodities pledged as security for price support loans.

The budget also estimates that in the fiscal year 1959 the Corporation will dispose of agricultural commodities representing an investment of \$3.4 billion, principally through sales and donations. Thus commodity dispositions are expected to exceed commodity acquisitions by \$360 million in 1959, compared with an excess of commodity dispositions of \$102 million in 1958 and \$612 million in 1957. For the 3-year period, this estimated reduction of almost \$1.1 billion in the commodity inventory, combined with an estimated reduction of \$865 million in outstanding loans, will reduce the estimated investment of the Corporation at the end of fiscal year 1959 by more than \$1.9 billion below that reached in the peak year 1956.

TABLE 1. COMMODITY CREDIT CORPORATION: COMMODITY INVENTORY OPERATIONS AND INVESTMENT IN COMMODITIES AND LOANS, 1953-59

Year	Commodity acquisitions (fiscal year)	Commodity dispositions (fiscal year)	Investment (end of fiscal year)		
			Commodity inventory	Loans	Total
1953.....	\$1,886	\$604	\$2,413	\$1,177	\$3,590
1954.....	3,026	1,712	3,728	2,394	6,122
1955.....	3,435	2,173	4,989	2,145	7,134
1956.....	3,741	2,747	5,984	2,333	8,317
1957.....	3,715	4,327	5,372	1,994	7,366
1958 estimate.....	3,573	3,675	5,269	1,525	6,794
1959 estimate.....	3,025	3,385	4,910	1,468	6,378

Realized costs and losses from all operations financed by the Corporation last year amounted to almost \$4.2 billion and are expected to continue at a high level in 1958 and 1959 (see table 2). Disposition of price-supported commodities usually involves losses, since the commodities are generally sold for less than the Corporation's investment. Realized costs and losses also include such items as payments under the International Wheat Agreement and the National Wool Act, and the investment in commodities donated to friendly peoples abroad or sold for foreign currencies. The costs and losses from sales of surplus commodities for foreign currencies consist of the Corporation's investment in the commodities and the shipping expenses borne by the Corporation, less the dollar value of the relatively small portion of the foreign currencies sold to other Government agencies.

Other.....	2	6	14	19	20	22	6
Total.....	247	\$40	1,265	2,066	4,159	3,280	3,056

Although the realized costs and losses of the Commodity Credit Corporation approximate net budget expenditures over an extended period of years, they may diverge sharply for any short period, and tend to be large in years of heavy inventory disposition. Since receipts of the Corporation also tend to be large in years of heavy inventory dispositions, net budget expenditures could be very small or even negative for the same years that realized losses are large. In 1957, a year of heavy inventory disposition, realized costs and losses were \$4.2 billion and net budget expenditures of the Corporation were \$3.4 billion, including expenditures for the soil bank in that year.

The costs and losses of the Corporation incurred in its operations necessitate appropriations to reimburse the Corporation and to restore its capital. The budget includes an anticipated 1958 supplemental appropriation of \$2.3 billion and a recommended 1959 appropriation of \$1.8 billion for these purposes.

The budget provides for the President's recommendation for a 1-year extension of title I of the Agricultural Trade Development and Assistance Act of 1954 (Public Law 480), under which commodities are sold for foreign currencies. It is proposed that this extension of title I also increase the total authority for reimbursement of the Commodity Credit Corporation for costs and losses under this program from the present limit of \$4 billion to \$5.5 billion.

Allocations to Federal agencies of the foreign currencies received from sales under title I of Public Law 480 are shown in this document in a separate schedule under Funds Appropriated to the President, miscellaneous accounts. The uses made by the agencies (i. e., obligations and expenditures) are reported with other budget schedules of the using agencies. Permitted uses are specified in Public Law 480 and intended uses are further specified in each sales agreement. Table 3 shows the principal programs using these currencies and estimates of the dollar equivalent of the foreign currency expenditures.

Total.....		185.5	556.1	568.7

Other programs to stabilize farm prices and income.—The budget includes an estimated \$873 million of expenditures in 1959 for stabilization of farm prices and income in addition to the operations of the Commodity Credit Corporation. The largest of these other programs is the acreage reserve part of the soil bank, for which expenditures of \$405 million are estimated. Rental payments under the conservation reserve of the soil bank are estimated to be \$199 million (this excludes soil bank payments for conservation practices which are classified under

conservation of agricultural land and water resources). Payments to sugar growers are estimated to be \$75 million. Expenditures for removal from the market of perishable commodities in temporary surplus are expected to be \$150 million; the major portion of the commodities purchased are donated to schools and welfare agencies.

Financing rural electrification and telephones.—The budget includes new lending authority of \$150 million to finance rural electrification and \$56 million to finance rural telephone systems for the fiscal year 1959. This is less than the amounts for 1957 and 1958 as legislation will be proposed to assist borrowers to obtain funds from private lenders. Expenditures in 1959 are estimated to rise, mainly because of the disbursements to borrowers under lending authority enacted for previous years.

Financing farm ownership and operation.—The budget provides \$208 million of new obligational authority for the Farmers' Home Administration in 1959, a reduction from the amounts for 1957 and 1958. The budget recommendation takes into account legislation to be proposed to facilitate expansion of insured real estate loans, which is expected to reduce the amount of direct loan authority needed.

Conservation of agricultural land and water resources.—Expenditures for soil conservation are increasing, chiefly because soil bank payments to farmers to share the cost of conservation practices on cropland shifted into grass or trees are estimated to rise from \$86 million in 1958 to \$152 million in 1959. Other payments for conservation practices under the Agricultural Conservation Program are estimated to be \$227 million. These payments for 1959 were authorized in the 1958 appropriation act. The budget proposes reducing the advance authorization for payments for the 1959 crop year, which would be made primarily in the fiscal year 1960, to \$125 million. Technical guidance by the Soil Conservation Service in 1959 will be continued at about the 1958 level, as will the watershed protection and flood prevention programs.

Research and other agricultural services.—Expenditures on research to promote industrial uses of agricultural commodities will be increased from approximately \$14 million in 1958 to \$19 million in 1959. In addition, arrangements are being made to use up to \$5 million of foreign currencies received from the sale of surplus agricultural commodities for research contracts abroad.

Other functions.—Cash contributions to States and local governments for school lunches are continued at the same amount in 1959 as in 1957 and 1958. The Forest Service will continue its research, management, and maintenance work at existing levels. Expenditures of \$106 million in 1959 for emergency grants of commodities to other countries will be reimbursed to the Commodity Credit Corporation in subsequent years from appropriated funds. Loan disbursements for farm housing under the program authorized in 1957 are expected to decline from \$30 million in 1958 to \$12 million in 1959.

RECAPITULATION OF BUDGET AUTHORIZATIONS AND EXPENDITURES

Obligations incurred, net.....	\$4, 934, 400	\$5, 247, 513	\$4, 643, 900

¹ Most of the appropriations proposed for later transmission (shown above) are to reimburse the Commodity Credit Corporation for past expenditures and therefore have no effect on budget expenditures.

AGRICULTURAL RESEARCH SERVICE

Current authorizations:

SALARIES AND EXPENSES

For expenses necessary to perform agricultural research relating to production and utilization, to control and eradicate pests and plant and animal diseases, and to perform related inspection, quarantine and regulatory work, and meat inspection: *Provided*, That not to exceed \$75,000 of the appropriations hereunder shall be available for employment pursuant to the second sentence of section 706 (a) of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a): *Provided further*, That appropriations hereunder shall be available for the operation and maintenance of aircraft and the purchase of not to exceed **[one]** two, of which one shall be for replacement only: *Provided further*, That appropriations hereunder shall be available pursuant to title 5, United States Code, section 565a, for the construction, alteration, and repair of buildings and improvements, but unless otherwise provided, the cost of constructing any one building (except greenhouses connecting greenhouses) shall not exceed \$10,000, except for five buildings to be constructed or improved at a cost not to exceed \$20,000 each, and the cost of altering any one building during the fiscal year shall not exceed \$3,750 or 4 per centum of the cost of the building, whichever is greater:

Research: For research and demonstrations on the production and utilization of agricultural products, and related research and services, including administration of payments to State agricultural experiment stations; **[\$57,794,890]** **\$60,744,890**, including not to exceed \$50,000 for the acquisition of land for soil and water conservation research facilities: *Provided*, That the limitations contained herein shall not apply to **[\$1,955,000]** for the construction, alteration, and repair of buildings, and acquisition of necessary land therefor by donation or exchange, or at a cost not to exceed \$5,000 for each facility; replacement of buildings needed to carry out the Act of April 24, 1948 (21 U. S. C. 113a);

Plant and animal disease and pest control: For operations and measures to control and eradicate pests and plant and animal diseases and for carrying out assigned inspection, quarantine and regulatory activities, as authorized by law; **[\$26,082,000]** **\$42,132,000**, of which \$1,000,000 shall be apportioned for use pursuant to section 3679 of the Revised Statutes, as amended, for the control of outbreaks of insects and plant diseases [under the joint resolution approved May 9, 1938 (7 U. S. C. 148-148e), and the Act of August 13, 1954 (7 U. S. C. 148)], to the extent necessary to meet emergency conditions: *Provided*, That no part of this appropriation shall be used to pay the cost or value of trees, farm animals, farm crops, or other property injured or destroyed as a result of plant insect and disease control activities except potatoes and tomatoes as authorized under the Golden Nematode Act: *Provided further*, That, in the discretion of the Secretary, no part of this appropriation shall be expended for the control of sweetpotato weevil in any State until such State has provided cooperation necessary to accomplish this purpose, or for barberry eradication until a sum or sums at least equal to such expenditures shall have been made available by States, counties, or local authorities, or by individuals or organizations for the accomplishment of this purpose, or with respect to the golden nematode except as prescribed in section 4 of the Golden Nematode Act;]

Meat inspection: For carrying out the provisions of laws relating to Federal inspection of meat and meat-food products and the applicable provisions of the laws relating to process or renovated butter; **[\$16,826,000]** **\$17,326,000**. (5 U. S. C. 511-512, 524, 541c-541e, 563-564, 565a, 576, 2131; 7 U. S. C. 135-135k, 145-164a, 166-167, 281-283, 361a-361i, 391, 394-396, 397, 401-404, 421-422a, 424-425, 427, 427i, 428a, 429-431, 433-434, 436-437, 851-855, 1292, 1651-1656; 15 U. S. C. 69e; 16 U. S. C. 581-581a, 581f, 590a-590b, 590f, 590k; 19 U. S. C. 1201, 1306; 20 U. S. C. 191-194; 21 U. S. C. 71-96, 101-105, 111-123, 130-131, 151-153, 346; 26 U. S. C. 2325, 2326c; 31 U. S. C. 725a; 45 U. S. C. 71-74; 46 U. S. C. 466a-466b; 48 U. S. C. 198, 1409m-1409o; 49 U. S. C. 177e, 181b; 46 Stat. 67; 71 Stat. 31-35; Department of Agriculture and Farm Credit Administration Appropriation Act, 1958.)

Appropriated 1958, **\$104,702,890** Estimate 1959, **\$120,202,890**

* Includes \$4,000,000 appropriated in Supplemental Appropriation Act, 1958.

The Agricultural Research Service conducts fundamental and applied research relating to the production and utilization of agricultural products, home economics research, and those control and regulatory programs which involve enforcement of plant and animal quarantines, meat inspection, the control of diseases and insect pests of animals and plants, and related work.

1. *Research—(a) Farm research.*—Improved breeding, feeding, and management practices are developed for farm livestock, poultry, and domestic fur animals. Practical methods are sought for control of diseases and parasites affecting them. Research on foot-and-mouth disease of livestock is conducted at Plum Island, N. Y.

Investigations are conducted to improve varieties of food, feed, fiber, and other plants and to develop new crops; to improve crop-production practices, including methods to control plant diseases; to improve methods for control of harmful and utilization of beneficial insects affecting farm production; and to develop and test new chemical formulations for the control of crop pests.

Research is conducted to improve fertilizers, soil management, irrigation, and conservation practices; to study hydrologic problems of agricultural watersheds; to determine the relation of soils to plant, animal, and human nutrition; and to apply engineering principles to improve efficiency and reduce costs of agricultural production. Farm economics research is conducted on profitable adjustments in farming by type and size of farm; on efficiency in use of labor, equipment, land, and water; and on related economic problems.

Continuous review of the research work is made in order to emphasize work which will meet the problems of agricultural surpluses. To find increased outlets for agricul-

AGRICULTURAL RESEARCH SERVICE—Continued

Current authorizations—Continued

SALARIES AND EXPENSES—Continued

tural products, research has been expanded on the breeding and development of long staple cotton for better quality fabrics, corn with waxy starch for glues and adhesives, corn with high amylose content for industrial use, milk with high solids and lowered fat content for changing dietary requirements, the meat-type hog to reduce fats in surplus, etc. More than \$1 million of farm research funds are now used for the introduction and development of new crops. Most of the production research is now oriented to meet market demands. For example, it includes current research on the development of peaches with good shipping quality, vegetables suitable for freezing, cottons with greater strength, and beef that is tender with less back and belly fat. In addition to these adjustments, the proportion of the Department's research funds going into basic research has been steadily increased—from about 7% in 1947 to 18% today. This basic research undergirds the other research efforts.

The estimates for 1959 propose a decrease of \$2,250,000 below the estimated obligations for 1958, of which \$1,445,000 represents the nonrecurring portion of funds provided in 1958 for construction of 4 soils research laboratories. The remaining \$805,000 is being made available for utilization research in 1959.

(b) *Utilization research and development.*—Chemical, physical, and biological studies are conducted to develop new and improved foods, feeds, drugs, fabrics, industrial chemicals, and other products from agricultural commodities, to improve commodity processing methods, and to increase the use of byproducts. Such research is aimed at increasing the total market demand for farm products, especially for their increased use for industrial purposes. The increase for 1959 is for expansion of utilization research on grains, cotton, oilseeds, fruits and vegetables, new crops, milk, hides and skins, and animal fats. The increase is partially offset by elimination of \$105,000 for a nonrecurring item for constructing a small laboratory.

(c) *Home economics research.*—Studies are made of human nutrition, household economics, and clothing and housing.

(d) *Administration of payments to States, and Territorial research.*—Research under Federal grant funds at each State agricultural experiment station is coordinated with the research conducted by other States and by agencies of the Department. The Secretary's responsibilities for the proper administration of these funds are financed by a direct appropriation (\$272,100 for 1958) and 3% of the grant funds. Agricultural experiment stations are operated in Alaska, Puerto Rico, and the Virgin Islands.

2. *Plant and animal disease and pest control.*—(a) *Plant disease and pest control.*—Provision is made (1) through port-of-entry inspection to exclude from this country destructive insects, plant diseases and nematodes that cause great damage to agricultural crops in other parts of the world; (2) to cooperate with States in eradicating or preventing spread of crop pests that become established in this country; and (3) to assist States in suppressing incipient and emergency outbreaks of crop pests when and where they occur. The Federal Insecticide, Fungicide, and Rodenticide Act and related provisions of the Federal Food, Drug, and Cosmetic Act are administered. Increases are requested for 1959 for strengthening plant

quarantine inspection service and regulatory work on pesticides. The volume of inspections, interceptions of unauthorized plant materials, export certificates issued, and other protective activities is indicated in the following table:

[In thousands]			
	1955 actual	1956 actual	1957 actual
Inspections at ports of entry:			
Airplanes.....	89	97	111
Vessels.....	48	55	53
Interceptions of unauthorized plant material.....	216	245	291
Export certificates issued.....	35	45	49
Plant containers certified for export.....	12, 688	23, 460	25, 411

(b) *Animal disease and pest control.*—Programs are devised to exclude communicable diseases of foreign origin from this country; to prevent the spread of diseases through interstate shipments of livestock or distribution of impure or impotent veterinary biologics; to control and eradicate livestock diseases and to maintain, through a marketing agreement with manufacturers and handlers, adequate supplies of hog cholera virus and serum for protection of swine. Increases requested for 1959 provide for (1) maintaining the gains accomplished by the accelerated brucellosis program, for which authorization to transfer funds from Commodity Credit Corporation expires June 30, 1958, and (2) meeting the requirements of the screwworm eradication program in the Southeast.

The volume of inspections and other protective activities is indicated by selected examples in the following table:

[In thousands]			
	1955 actual	1956 actual	1957 actual
Animal import-export inspection:			
All animals.....	427	314	346

Cattle tested for brucellosis:			
Blood tests.....	14, 186	16, 754	15, 913
Ring tests.....	20, 445	28, 362	31, 481
Brucellosis reactors found.....	365	367	280
Animals inspected at public stockyards.....	66, 278	70, 540	68, 039
Diseased animals received or found.....	181	221	347
Supervision of production of veterinary biologics:			
Hog-cholera virus and anticholera serum.....doses.....	54, 727	50, 441	46, 164
Hog-cholera vaccine.....do.....	26, 451	32, 325	34, 563
Other vaccines.....do.....	1, 761, 096	2, 274, 657	2, 644, 260
Total bacterins.....do.....	85, 145	87, 373	91, 223
Diagnostic agents.....do.....	67, 215	57, 056	66, 694
Other serums.....do.....	14, 309	13, 363	9, 281

3. *Meat inspection.*—Federal meat inspection is required for all meat in interstate commerce and is conducted to assure a wholesome meat supply for human consumption, free from adulteration and truthfully labeled. The work includes inspection of animals, carcasses and meat, and meat-food products at various stages of handling and processing. Measures are enforced to insure informative labeling and meats imported or exported are inspected. The increase requested for 1959 would provide inspectors needed for existing meat-packing plants and new plants in additional locations, and would make possible some reduction in excessively long and burdensome tours of duty of meat inspectors.

The volume of inspections and examinations is indicated by examples given in the following table:

	1955 actual	1956 actual	1957 actual
Number of establishments covered.....	1, 120	1, 184	1, 244

STATE EXPERIMENT STATIONS

Payments to States, Hawaii, Alaska, and Puerto Rico: For payments to agricultural experiment stations to carry into effect the provisions of the Hatch Act, approved March 2, 1887 [(7 U. S. C. 362, 363, 365, 368, 377-379)], as amended by the Act approved August 11, 1955 [(69 Stat. 671) 7 U. S. C. 361a-361i], including administration by the United States Department of Agriculture, \$29,853,708; and payments authorized under section 204 (b) of the Agricultural Marketing Act, the Act approved August 14, 1946 (7 U. S. C. 1623), \$500,000; in all, \$30,353,708.

Penalty mail: For penalty mail costs of agricultural experiment stations, under section 6 of the Hatch Act of 1887, as amended, \$250,000. (39 U. S. C. 321q; Department of Agriculture and Farm Credit Administration Appropriation Act, 1958.)

Appropriated 1958, \$30,603,708

Estimate 1959, \$30,603,708

DISEASES OF ANIMALS AND POULTRY

Eradication activities: For expenses necessary in the arrest and eradication of foot-and-mouth disease, rinderpest, contagious pleuropneumonia, or other contagious or infectious diseases of animals, or European fowl pest and similar diseases in poultry, and for foot-and-mouth disease and rinderpest programs undertaken pursuant to the provisions of the Act of February 28, 1947, and the Act of May 29, 1884, as amended (7 U. S. C. 391; 21 U. S. C. 111-122), including expenses in accordance with section 2 of said Act of February 28, 1947, the Secretary may transfer from other appropriations or funds available to the bureaus, corporations, or agencies of the Department such sums as he may deem necessary, but not to exceed \$1,000,000 for eradication of vesicular exanthema of swine, to be available only in an emergency which threatens the livestock or poultry industry of the country, and any unexpended balances of funds transferred under this head in the next preceding fiscal year shall be merged with such transferred amounts: *Provided*, That this appropriation shall be subject to applicable provisions contained in the item "Salaries and expenses, Agricultural Research Service". (5 U. S. C. 541c-541e, 2131; 7 U. S. C. 428a; Department of Agriculture and Farm Credit Administration Appropriation Act, 1958.)

Appropriation (adjusted).....	3,129,000		
Reappropriation.....	50,000	\$44,261	

Eradication activities.—On August 1, 1952, an emergency was declared as the result of the spread of vesicular exanthema of swine. Chief means of spread of the disease is through feeding of unecooked garbage. Cooperative measures have been undertaken to eradicate the disease. To further eradication efforts, 47 States now have laws or regulations requiring the cooking of garbage fed to swine.

Funds for carrying out this eradication program have been transferred from other funds available to the Department. Corporate funds so used are subsequently repaid from specific appropriations for that purpose.

EXTENSION SERVICE

Current authorizations:

COOPERATIVE EXTENSION WORK, PAYMENTS AND EXPENSES

Payments to States, Hawaii, Alaska, and Puerto Rico: For payments for cooperative agricultural extension work under the Smith-Lever Act, as amended by the Act of June 26, 1953 (7 U. S. C. 341-348), and the Act of August 11, 1955 [(69 Stat. 683-4)] (7 U. S. C. 347a), \$49,220,000; and payments and contracts for such work under section 204 (b)—205 of the Agricultural Marketing Act of 1946 (7 U. S. C. 1623-1624), \$1,495,000; in all, \$50,715,000: *Provided*, That funds hereby appropriated pursuant to section 3 (c) of the Act of June 26, 1953, shall not be paid to any State, Hawaii, Alaska, or Puerto Rico prior to availability of an equal sum from non-Federal sources for expenditure during the current fiscal year.

Retirement costs for extension agents: For cost of employer's share of Federal retirement for cooperative extension employees, [\$5,260,000] \$5,479,375.

Penalty mail: For costs of penalty mail for cooperative extension agents and State extension directors, [\$2,164,000] \$1,868,480.

Federal Extension Service: For administration of the Smith-Lever Act, as amended by the Act of June 26, 1953 (7 U. S. C. 341-348), and the Act of August 11, 1955 [(69 Stat. 683-4)] (7 U. S. C. 347a), and extension aspects of the Agricultural Marketing Act of 1946 (7 U. S. C. 1621-1627), and to coordinate and provide program leadership for the extension work of the Department and the several States, Territories, and insular possessions, \$2,096,540. (39 U. S. C. 321i, 321n, 321p-g; Department of Agriculture and Farm Credit Administration Appropriation Act, 1958.)

The primary function of the nationwide system of cooperative extension work is out-of-school applied education in agriculture and home economics and related subjects. This educational activity takes research results, technological advancements, and situation and program facts of the Department of Agriculture, the State agricultural colleges, and experiment stations, and incorporates them into a national educational program. Its objective is to help people develop their abilities to attain greater efficiency in farming, marketing, and homemaking.

1. *Payments to States, Hawaii, Alaska, and Puerto Rico.*—Funds appropriated under the Smith-Lever Act for payment to States, Hawaii, Alaska, and Puerto Rico are distributed primarily on the basis of farm and rural population and to a limited degree on the basis of special problems and needs. Funds appropriated under the Agricultural Marketing Act for educational work in marketing are distributed on a matching basis under approved projects and on the basis of contracts. Funds are used primarily for the employment of county extension workers who work with rural families, marketing concerns, and others by providing counsel and assistance in the application of improved methods of production, marketing, and family living. They assist local leadership to determine extension programs of work. Work with youth is largely through 4-H clubs.

2. *Retirement costs for extension agents.*—The amount proposed is required to meet retirement costs of cooperative extension agents as authorized under Public Law 854, approved July 31, 1956.

3. *Penalty mail.*—Funds to cover the cost of penalty mailings for State extension directors and cooperative extension agents in the States are provided under this appropriation.

4. *Federal Extension Service.*—The Federal Extension Service provides leadership to the States, Hawaii, Alaska, and Puerto Rico in developing extension programs, improved teaching methods, efficient use of available

The Farmer Cooperative Service provides research, advisory, and educational assistance to farmers' marketing, purchasing, and service cooperatives. Problems of organization, financing, policies, management, merchandising, costs, efficiency, and membership are involved. Much of this work is carried on in cooperation with land-grant colleges, the Extension Service, and other Federal and State agencies.

SOIL CONSERVATION SERVICE

The Service is responsible for various soil and water conservation activities to aid farmers and ranchers in making physical adjustments in land use to conserve soil, water, and plant resources, establish a permanent and balanced agriculture, and reduce the hazards of floods and sedimentation. These activities are carried out in cooperation with Federal and State agencies and local organizations. The Service also has responsibility for administering the Great Plains conservation program and provides technical services in connection with the agricultural conservation program, the conservation reserve program, and for soil and water conservation loans made by the Farmers' Home Administration.

Current authorizations:

CONSERVATION OPERATIONS

For necessary expenses for carrying out the provisions of the Act of April 27, 1935 (16 U. S. C. 590a-590f), including preparation of conservation plans and establishment of measures to conserve soil and water (including farm irrigation and land drainage and such special measures as may be necessary to prevent floods and the siltation of reservoirs); operation of conservation nurseries; classification and mapping of soils; dissemination of information; purchase and erection or alteration of permanent buildings; and operation and maintenance of aircraft; **[\$72,545,000] \$72,280,000: Provided,** That the cost of any permanent building purchased, erected, or as

improved, exclusive of the cost of constructing a water supply or sanitary system and connecting the same to any such building and with the exception of buildings acquired in conjunction with land being purchased for other purposes, shall not exceed \$2,500, except for eight buildings to be constructed or improved at a cost not to exceed \$15,000 per building and except that alterations or improvements to other existing permanent buildings costing \$2,500 or more may be made in any fiscal year in an amount not to exceed \$500 per building: *Provided further,* That no part of this appropriation shall be available for the construction of any such building on land not owned by the Government: *Provided further,* That in the State of Missouri, where the State has established a central State agency authorized to enter into agreements with the United States or any of its agencies on policies and general programs for the saving of its soil by the extension of Federal aid to any soil conservation district in such State, the agreements made by or on behalf of the United States with any such soil conservation district shall have the prior approval of such central State agency before they shall become effective as to such district: *Provided further,* That no part of this appropriation may be expended for soil and water conservation operations under the Act of April 27, 1935 (16 U. S. C. 590a-590f), in demonstration projects: *Provided further,* That not to exceed \$5,000 may be used for employment pursuant to the second sentence of section 706 (a) of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a): *Provided further,* That qualified local engineers may be temporarily employed at per diem rates to perform the technical planning work of the service. (5 U. S. C. 1331, 511-512, 565a; 7 U. S. C. 1387, 1807, 1821; 16 U. S. C. 590q-1; Department of Agriculture and Farm Credit Administration Appropriation Act, 1958.)

WATERSHED PROTECTION

For expenses necessary to conduct surveys, investigations, and research and to carry out preventive measures, including, but not limited to, engineering operations, methods of cultivation, the growing of vegetation, and changes in use of land, in accordance with the Watershed Protection and Flood Prevention Act, approved August 4, 1954, as amended (16 U. S. C. 1001-1007), and the provisions of the Act of April 27, 1935 (16 U. S. C. 590a-590f), to remain available until expended, **[\$25,500,000]** \$14,000,000, with which shall be merged the unexpended balances of funds heretofore appropriated or transferred to the Department for watershed protection purposes: *Provided, That not to exceed \$100,000 may be used for employment pursuant to the second sentence of section 706 (a) of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a). (5 U. S. C. 511-512; Department of Agriculture and Farm Credit Administration Appropriation Act, 1958.)*

Appropriated 1958, \$25,500,000

Estimate 1959, \$14,000,000

Unobligated balance carried forward.....	7,149,782	10,839,000	---
Appropriation (new obligational authority).....	17,500,000	25,500,000	14,000,000

The Department cooperates with the States and other agencies in planning and installing works of improvement

in small watersheds to reduce damage from floodwater, sediment, and erosion and for the conservation, development, utilization and disposal of water. It provides loans to local organizations to help them finance their share of the cost of certain works of improvement. The Department also cooperates in making surveys and investigations of watersheds of rivers and other waterways as the basis for the development of coordinated inter-agency programs.

Although a decrease in appropriation is proposed, the level of program operations will be increased by \$3,028,218 in 1959 because available prior year balances will provide sufficient funds to carry on planned operations.

1. *Investigations and planning.*—Surveys are made by the Department of proposed small watershed projects and work plans are prepared in cooperation with the local sponsors. These plans outline the proposed works of improvement and include the estimated costs, a cost-benefit analysis, cost-sharing and maintenance arrangements, a proposed schedule of operations, and other facts necessary to determine whether Federal participation in project development should be approved.

MAIN WORKLOAD FACTORS

[Cumulative]

Item	1955 actual	1956 actual	1957 actual	1958 estimate	1959 estimate
Applications for watershed projects:					
Received current year.....	353	194	165	150	160
Cumulative total.....	353	547	712	862	1,012
Watersheds approved for planning.....	68	172	268	358	438
Field work completed and plans under review before final approval.....	---	19	49	60	70
Watersheds approved for installation of works of improvement.....	---	13	42	102	162
Planning suspended.....	---	10	39	58	66
Planning in process.....	68	130	138	138	140
Balance:					
To be planned.....	---	175	164	204	264
Not now suitable for development of plans.....	---	200	280	300	310

2. *Installation of works of improvement.*—After approval of the projects, detailed construction plans and specifications for specific flood prevention or water management structures are prepared. The local sponsoring organizations contract for the construction work on other than Federal lands. Engineering supervision is provided for this construction work or advances of funds made to the local organizations to employ engineers to supervise it. Provision is also made for land treatment measures to prevent erosion and protect the structural works from flood and sediment damage.

It is estimated that installation of works of improvement will be completed in 2 watersheds and 100 projects will be in operation by the end of 1958. About 60 new projects are estimated to be approved for operation during 1959. The Federal Government's commitments for Public Law 566 projects are estimated as follows:

[Dollars in thousands]

	1957 actual		1958 estimate		1959 estimate	
Explanation	Number	Amount	Number	Amount	Number	Amount
Projects continued from prior years and estimated cost of completion at beginning of year.....	13	\$12,479	42	\$17,589	100	\$41,139
Projects initiated during the year and estimated cost of completion.....	29	8,570	60	30,300	60	30,300
Total approved projects and estimated cost of completion.....	42	21,049	102	47,889	160	71,439
Deduct: Amounts obligated during year for works of improvement on:						
(a) Projects initiated during the year.....	---	1,816	---	1,878	---	3,140
(b) Projects completed during the year.....	---	---	2	50	1	10
(c) Other projects.....	---	1,644	---	4,822	---	11,600
Total.....	---	3,460	2	6,750	1	14,750
Total projects in progress at end of year and estimated cost of completion.....	42	17,589	100	41,139	159	56,689

It is planned to complete installation of improvement measures in 35 of the 54 currently active "pilot" demonstration watersheds by the end of 1959. The Federal Government's commitments for these projects are estimated as follows:

(Dollars in thousands)

Explanation	1957 actual		1958 estimate		1959 estimate	
	Number	Amount	Number	Amount	Number	Amount
Approved active projects and estimated cost of completion at beginning of year.....	57	\$18,511	54	\$13,301	22	\$5,440
Discontinued projects and estimated cost of completion.....	3	417	---	---	---	---
Deduct amounts obligated during the year for -						
(a) Projects completed during the year.....	29	29	32	2,355	3	210
(b) Other projects.....	4,764	4,764	---	5,506	---	3,479
Total.....	4,793	4,793	32	7,861	3	3,689
Total projects in progress at end of year and estimated cost of completion.....	54	13,301	22	5,440	19	1,751

3. *Loans and related expenses.*—Loans are made to local organizations to finance the local share of the cost of works of improvement installed in the small watersheds. Repayment with interest is required within 50 years after the principal benefits of improvements first become available.

4. *Surveys and investigations of water resources programs.*—Current work includes participation with the Corps of Engineers in the Lower Mississippi River and tributaries project, the Upper Mississippi River area, the Delaware River area, and the Cape Fear watershed in North Carolina, and the Department of the Interior, in reappraising agricultural benefits anticipated from the Upper Colorado River storage project. A survey is also being made of part of the Kansas River watershed in cooperation with the Kansas State Water Board.

The Department cooperates with soil conservation districts and other local organizations in planning and installing works of improvement in the various subwatersheds of the 11 watersheds authorized by the Flood Control Act of 1944. Measures primarily for flood prevention such as floodwater retarding and sediment control structures, debris barriers and basins, deflectors, diversion ditches and dikes, stream bank protection and other improvements are being installed on a cost-sharing basis. Work is generally done by local contractors. Land-treatment

WATER CONSERVATION AND UTILIZATION PROJECTS

For expenses necessary to carry out the functions of the Department under the Acts of [May 10, 1939 (53 Stat. 685, 719),] August 11, 1939, and October 14, 1940 (16 U. S. C. 590y-z-10), as amended and supplemented, June 28, 1949 (63 Stat. 277), and September 6, 1950 (7 U. S. C. 1033-39), relating to water conservation and utilization projects, to remain available until expended, [\$350,000] \$335,000, which sum shall be merged with the unexpended balances of funds heretofore appropriated to said Department for the purpose of said Acts. (5 U. S. C. 511-512; Department of Agriculture and Farm Credit Administration Appropriation Act, 1958.)

The Service is developing efficient irrigation farming units for sale on the Eden Valley project in Wyoming where the Bureau of Reclamation has constructed the water storage facility and is constructing principal canals. Land classification and topographic surveys are made, and project lands are subdivided into farm units of economic size. The land is cleared and leveled, and farm ditches, drains, and other water-control structures are built. Pending sale to qualified farm families, the developed farm units are planted to cover crops to prevent wind erosion. Technical guidance on irrigation and conservation is being furnished to farm operators.

The Eden Valley project is the only remaining active project. The first sale of farms on this project was made in December 1956. It is expected that work on this project will be completed and the farms sold by 1962.

GREAT PLAINS CONSERVATION PROGRAM

For necessary expenses to carry into effect a program of conservation in the Great Plains area, pursuant to section 16 (b) of the Soil Conservation and Domestic Allotment Act, as added by the Act of August 7, 1956 [(70 Stat. 1115-1117).] (16 U. S. C. 590p), \$10,000,000, to remain available until expended. (5 U. S. C. 511-512; Department of Agriculture and Farm Credit Administration Appropriation Act, 1958.)

Appropriated 1958, \$10,000,000

Cost-sharing contracts and technical assistance are offered by the Department under authority of Public Law 1021, approved August 7, 1956, to aid farmers and ranchers to develop and carry out long-range conservation plans designed to minimize climatic hazards and protect their lands from erosion and deterioration by natural causes. This is a voluntary program which supplements other conservation programs and activities in designated wind erosion counties of the 10 Great Plains States. Cost-sharing contracts extend from 3 to 10 years and include a plan of operations for the farm or ranch and a time schedule for installing eligible conservation practices. All contracts must terminate by December 31, 1971. The maximum cost-share rate offered in any contract does not exceed 80% of the average cost of installing each eligible practice. A limitation of \$2,500 for cost shares for improving dams or ponds for irrigation is the only limitation on the cost-share amount an individual may earn. The law provides that total cost shares paid shall not exceed \$25 million for any one program year or \$150 million in total.

The producer who signs a Great Plains program contract is responsible for accomplishing his plan of operations as scheduled, and is encouraged to use all available sources of assistance under other local, State or Federal programs that contribute to achieving conservation land treatment and economic stability of the farm or ranch unit.

The 1959 estimate includes \$8,240,000 for cost-sharing assistance to producers and \$1,760,000 for technical assistance and administrative costs of the program.

AGRICULTURAL CONSERVATION PROGRAM SERVICE

Current authorizations:

AGRICULTURAL CONSERVATION PROGRAM

For necessary expenses to carry into effect the program authorized in sections 7 to 15, 16 (a), and 17 of the Soil Conservation and Domestic Allotment Act, approved February 29, 1936, as amended (16 U. S. C. 590g-590 (o), 590p [(a)-(j)(a), and 590q], including not to exceed \$6,000 for the preparation and display of exhibits, including such displays at State, interstate, and international fairs within the United States; **[\$212,000,000] \$235,000,000**, to remain available until December 31 of the next succeeding fiscal year for compliance with the program of soil-building and soil- and water-conserving practices authorized under this head in the Department of Agriculture and Farm Credit Administration Appropriation Act, [1957] 1958, carried out during the period July 1, [1956] 1957, to December 31, [1957] 1958, inclusive: *Provided*, That not to exceed \$24,698,000 of the total sum provided under this head shall be available during the current fiscal year for administrative expenses for carrying out such program, the cost of aerial photographs, however, not to be charged to such limitation; but not more than \$5,025,800 shall be transferred to the appropriation account "Administrative expenses, section 392, Agricultural Adjustment Act of 1938": *Provided further*, That none of the funds herein appropriated shall be used to pay the salaries or expenses of any regional information employees or any State information employees, but this shall not preclude the answering of inquiries or supplying of information at the county level to individual farmers: *Provided further*, That such amounts shall be available for administrative expenses in connection with the formulation and administration of the [1958] 1959 program of soil-building and soil- and water-conserving practices, under the Act of February 29, 1936, as amended (amounting to **[\$250,000,000] \$125,000,000**, including administration, and no participant shall receive more than \$2,500, except where the participants from two or more farms or ranches join to carry out approved practices designed to conserve or improve the agricultural resources of the community): *Provided further*, That not to exceed 5 per centum of the allocation for the [1958] 1959 agricultural conservation program for any county may, on the recommendation of such county committee and approval of the State committee, be withheld and allotted to the Soil Conservation Service for services of its technicians in formulating and carrying out the agricultural conservation program in the participating counties, and shall not be utilized by the Soil Conservation Service for any purpose other than technical and other assistance in such counties, and in addition, on the recommendation of such county committee and approval of the State committee, not to exceed 1 per centum may be made available to any other Federal, State, or local public agency for the same purpose and under the same conditions: *Provided further*, That for the [1958] 1959 program \$2,500,000 shall be available for technical assistance in formulating and carrying out agricultural conservation practices and \$1,000,000 shall be available for conservation practices related directly to flood prevention work in approved watersheds: *Provided further*, That such amounts shall be available for the purchase of seeds, fertilizers, lime, trees, or any other farming material, or any soil-terracing services, and making grants thereof to agricultural producers to aid them in carrying out farming practices approved by the Secretary under programs provided for herein: *Provided further*, That no part of any funds available to the Department, or any bureau, office, corporation, or other agency constituting a part of such Department, shall be used in the current fiscal year for the payment of salary or travel expenses of any person who has been convicted of violating the Act entitled "An Act to prevent pernicious political activities", approved August 2, 1939, as amended, or who has been found in accordance with the provisions of title 18, United States Code, section 1913, to have violated or attempted to violate such section which prohibits the use of Federal appropriations for the payment of personal services or other expenses designed to influence in any manner a Member of Congress to favor or oppose any legislation or appropriation by Congress except upon request of any Member or through the proper official channels. (*Department of Agriculture and Farm Credit Administration Appropriation Act, 1958.*)

Appropriation (new obligational authority).....	227,500,000	212,000,000	235,000,000

The program is designed to encourage conservation by sharing with farmers and ranchers the cost of carrying out approved soil-building and soil- and water-conserving practices which farmers generally would not perform to the needed extent with their own resources. The rate of cost-sharing, which may be given in the form of conservation materials and services or a payment after completion of the practice, averages approximately 50% of the cost.

Conservation measures for which cost-sharing is offered include those which are primarily for (1) establishment of permanent protective cover, (2) improvement and protection of established vegetative cover, (3) conservation and disposal of water, (4) establishment of temporary vegetative cover, and (5) temporary protection of soil from wind and water erosion.

It is estimated that under the 1956 program, new or additional practices will be established on 1,210,000 farms and ranches, consisting of 39% of the cropland and 36% of all farm land in the United States. The following practices were installed under the 1956 program:

Dams and reservoirs.....	number.....	76,925
Drainage.....	acre.....	1,335,855
Leveling land to conserve irrigation water and prevent erosion.....	acre.....	403,757
Standard terraces.....	acre.....	926,050
Diversion and spreader terraces.....	mile.....	5,107
Contour stripcropping.....	acre.....	270,570
Stripcropping not on contour.....	acre.....	940,204
Control of undesirable shrubs on range or pasture.....	acre.....	1,552,255
Tree planting.....	acre.....	195,348
Liming materials applied.....	ton.....	16,522,673
Permanent sod waterways.....	acre.....	45,170
All vegetative cover.....	acre.....	14,636,227

Funds are distributed among the States on the basis of conservation needs. They are, in turn, distributed by the agricultural stabilization and conservation State committees to counties, and the agricultural stabilization and conservation county committees make commitments of conservation practice cost-sharing to eligible farmers and ranchers.

Loans from Commodity Credit Corporation are used to make advance payments to vendors for conservation materials and services furnished to farmers and ranchers prior to the time funds are appropriated each year.

Repayment is made from balances of prior appropriations or from new funds appropriated.

The status of the loan account is:

SCHEDULE OF LOANS AND REPAYMENTS

	1956	1957	1958	Total
Received by loan from Commodity Credit Corporation.....	\$43,450,000	\$36,500,000	\$39,000,000	\$118,950,000
Interest.....	12,029	143,778	15,939	171,746
Total loans.....	43,462,029	36,643,778	39,015,939	119,121,746
Repaid or to be repaid from appropriations for fiscal years:				
1953.....	104,316			104,316
1954.....	1,400,000	451,796		1,851,796
1955.....	28,007,713	1,572,597		29,580,310
1956.....		33,619,385	700,000	34,319,385
1957.....	13,950,000		13,515,939	27,465,939
1958.....		1,000,000		1,000,000
1959.....			24,800,000	24,800,000
Total repayments.....	43,462,029	36,643,778	39,015,939	119,121,746

A program level of \$125 million for the 1959 crop year is proposed, a reduction of \$125 million below the 1958 program. Emphasis under such a reduced program would be on conservation practices with enduring benefits. Payments for the 1959 program will be made from 1960 appropriations.

Program by activities:			
Emergency cost-sharing assistance to farmers (total obligations).....	\$930,800	\$7,000,000	-----
Financing:			
Unobligated balance brought forward.....		—3,069,200	-----
Unobligated balance carried forward.....	3,069,200	-----	-----
Unobligated balance no longer available.....		16,069,200	-----
Appropriation (new obligatory authority).....	4,000,000	20,000,000	-----

Cost-sharing assistance (up to 80% of the cost of carrying out approved practices) is offered to assist and encourage farmers to rehabilitate farm lands damaged by natural disasters. Assistance is available only, when as a result of wind erosion, floods, hurricanes, or other natural disasters, new conservation problems have been created which, (1) if not treated, will impair or endanger the land; (2) materially affect the productive capacity of the land; (3) represent damage which is unusual in character and, except for wind erosion, is not the type which would recur frequently in the same area; and (4) will be so costly to rehabilitate that Federal assistance is required to return the land to productive agricultural use.

Funds for emergency cost-sharing assistance are distributed among States on the basis of needs for restoration of damaged lands.

ALLOTMENTS RECEIVED FROM OTHER ACCOUNTS

NOTE.—Obligations incurred under allotments from other accounts are included in the schedules of the parent appropriations as follows:
"Conservation reserve program," soil bank programs.
"Great Plains conservation program."

AGRICULTURAL MARKETING SERVICE

Current authorizations:

MARKETING RESEARCH AND SERVICE

For expenses necessary to carry on research and service to improve and develop marketing and distribution relating to agriculture as authorized by the Agricultural Marketing Act of 1946 (7 U. S. C. 1621-1627) and other laws, including the administration of marketing regulatory acts connected therewith: *Provided*, That appropriations hereunder shall be available pursuant to 5 U. S. C. 565a for the construction, alteration, and repair of buildings and improvements, but unless otherwise provided, the cost of erecting any one building shall not exceed \$10,000, except for two buildings to be constructed or improved at a cost not to exceed \$20,000 each, and the cost of altering any one building during the fiscal year shall not exceed \$3,750 or 3 per centum of the cost of the building, whichever is greater:

Marketing research and agricultural estimates: For research and development relating to agricultural marketing and distribution, for analyses relating to farm prices, income and population, and demand for farm products, and for crop and livestock estimates, [and for acquisition of land, \$14,116,700] \$14,095,000: *Provided*, That not less than \$350,000 of the funds contained in this appropriation shall be available to continue to gather statistics and conduct a special study on the price spread between the farmer and the consumer: *Provided further*, That no part of the funds herein appropriated shall be available for any expense incident to ascertaining, collating, or publishing a report stating the intention of farmers as to the acreage to be planted in cotton, or for estimates of apple production for other than the commercial crop;

Marketing services: For services relating to agricultural marketing and distribution, for carrying out regulatory acts connected therewith, and for administration and coordination of payments to States, [\$14,274,900] \$21,197,000, including not to exceed \$25,000 for employment at rates not to exceed \$50 per diem, except for employment in rate cases at not to exceed \$100 per diem pursuant to the second sentence of section 706 (a) of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), in carrying out section 201 (a) to 201 (d), inclusive, of title II of the Agricultural Adjustment Act of 1938 (7 U. S. C. 1291) and section 203 (j) of the Agricultural Marketing Act of 1946.

[For an additional amount for "Marketing Research and Service", for Marketing Services, \$1,300,000: *Provided*, That this paragraph shall be effective only upon enactment into law of S. 1747 of the Eighty-fifth Congress.] (5 U. S. C. 511-512, 541a, 556b, 563-564, 575; 7 U. S. The domestic agricultural marketing and distribution functions of the Department are concentrated primarily in the Agricultural Marketing Service. The marketing job has become more complex with growth and shift in population, technological developments in production and marketing, and as more and more functions have been transferred from the farm and home to various segments of the marketing system. The work under this appropriation on marketing research and service, aimed at aiding in the orderly and efficient marketing and effective distribution of agricultural products from the Nation's farms to the consumers, is organized on a functional basis.

1. *Marketing research and agricultural estimates*—(a) *Marketing research*.—This work is aimed at developing practical answers to problems encountered in moving products from the farm to the consumer. In cooperation with public and private agencies and trade groups, efforts are made to expand markets, reduce losses from waste and spoilage, and reduce marketing costs through improved marketing efficiency and organization. The work includes research at each stage of marketing, such as at assembly points, terminal or central markets, and retail markets.

(b) *Economic and statistical analysis*.—This work involves the collection, analysis and interpretation of data affecting agricultural prices, farm income, supply and consumption of farm products, trends in farm population, and changes in the level of living of farm people. The results of these studies are made available to farmers through research bulletins and Situation and Outlook Reports disseminated by the Extension Service and farm organizations. Farmers and others rely on these reports in planning the most profitable adjustments in their operations and marketing programs.

(c) *Crop and livestock estimates*.—This service provides the official estimates on agriculture, including acreage, yield, and production of crops, stocks and value of farm commodities, number and production value of livestock items, and prices paid and received by farmers. These data also are basic to computation of parity prices. Data on approximately 150 crop and livestock products are covered in more than 500 reports issued each year. The activity is conducted through 41 State and 1 Territorial offices, most of which are operated as joint State and Federal services. Cooperative arrangements permit the States to obtain a great deal of data which could not be collected or made available from Federal funds. During

1957, States expended an estimated \$1.3 million of their State funds on these cooperative programs.

2. *Marketing services*—(a) *Market news service*.—This service provides current information on supply, movement, and prices at specific markets for practically all agricultural commodities. This day-to-day market information enables American farmers to determine where and when to sell and at what price. The information is collected and disseminated at year-round and seasonal offices maintained in more than 100 cities and towns, often with financial support and cooperation of the States. Every available means of dissemination is used—mail, press, radio, television, telephone, telegraph, bulletin boards, and trade and farm publications.

(b) *Inspection, grading and classing, and standardization*.—Uniform standards of quality for agricultural products are established and applied to specific lots of produce to promote confidence between buyers and sellers; reduce hazards in marketing due to misunderstandings and disputes arising from the use of nonstandard descriptions; encourage better preparation of products for market; and furnish consumers with more definite information on the quality of products they buy. The standards are applied directly by or under the supervision of Federal employees at the request of any interested party, and generally for a fee. Approximately 85% of the total cost of the work under the project was offset by fees and other revenue in 1957, which are shown principally under "Agricultural Marketing Service trust funds" in part III of the budget.

The proposed increase for 1959 would be used for work required under the amendment to the Grain Standards Act, Public Law 861, approved August 1, 1956, and to provide inspection to poultry processing plants as required by the Poultry Products Inspection Act, Public Law 85-172, approved August 28, 1957.

(c) *Freight rate services*.—Assistance is provided to farmers and others in obtaining and maintaining equitable and reasonable transportation rates and services on farm products and supplies. The Department in 1957 participated in 77 formal litigation actions before the Interstate Commerce Commission and other regulatory bodies and carried on 38 informal negotiations with carriers and groups of carriers.

(d) *Regulatory activities*.—These include the administration of regulatory laws, such as packers and stockyards, standard container, United States warehouse, and Federal seed, to assure fair play in the market place and protect producers and handlers of agricultural commodities from financial loss due to deceptive, careless, or fraudulent marketing practices. The continued growth of facilities and means for storing, buying, and selling results in more demand and need for protection and benefits of regulatory laws. The increase in 1959 would be used to strengthen overall administration of the Packers and Stockyards Act.

	1957 actual	1958 estimate	1959 estimate

(e) *Administration and coordination of State payments*.—This covers the work of administering and coordinating the marketing service work performed by the States matched with funds provided by the appropriation "Pay-

ments to States, Territories, and possessions." In 1957, this work was carried on in 39 States and 3 Territories.

Payments are made on a matched fund basis to State and Territorial marketing agencies for programs designed to get into practical use in the marketing of farm products, improved methods and practices developed in the expanding marketing research program.

This program covers such projects as methods of maintaining and improving the quality of products; ways of reducing marketing costs; and use of special local market information to move abundant supplies to the most profitable market. Through this cooperative research,

AGRICULTURAL MARKETING SERVICE—Continued**Current authorizations—Continued****PAYMENTS TO STATES, TERRITORIES, AND POSSESSIONS—Continued**

the Federal Government's leadership and funds are coupled with State resources and experience to aid in the solution of the most urgent local and area marketing problems, such as alleviating the current problems of surpluses and lowered farm income.

In 1958, with 43 States and Territories conducting about 122 projects, the program is being carried on at the same level as in 1957. A similar program is proposed for 1959.

Assistance, in the form of both funds and food, is provided to States and Territories in serving lunches to school children. Each State's portion of the funds available is determined by a statutory formula which takes into account the number of school-age children in the State and the relationship between the per capita income of the State and the average United States per capita income.

The program is operated under an agreement entered into by the State educational agency (which administers the program within the State) and the Department of Agriculture. Schools make application to the State agency and if accepted are reimbursed for a part of the food cost of each meal served.

In 1957 the States contributed to this program \$562 million, most of which came from payments by children. This was far in excess of the \$211 million necessary to meet the statutory matching requirement of \$3 for each Federal dollar of cash payment.

In addition to providing cash assistance, this appropriation is used to purchase food under section 6 of the School Lunch Act for distribution to the schools. This program also provides one of the major outlets for surplus commodities purchased under section 32 of the Agricultural Adjustment Act of 1935, as amended. Further, commodities acquired under price support programs and assistance

through the special milk program (a price-support activity) are available to the schools. The volume of surplus commodities distributed to schools, however, is dependent upon market conditions and the need for the Federal Government to remove surpluses.

The program in 1957 during the peak month provided lunches to nearly 30% of the approximately 37 million school children in the country. The number of types A and B lunches served, which must meet established nutritional requirements, increased approximately 10% over 1956. Participation in the program in December reached 10.8 million children in 57,555 schools and an appreciable increase is expected in 1958 and 1959.

During 1957 about \$561.5 million worth of agricultural commodities were used in the program. About 23% of this amount represented commodities contributed under Federal surplus removal and price support programs.

Participation in the program from 1956 through 1959 is as follows:

	1956 actual	1957 preliminary	1958 estimate	1959 estimate
Average number of schools.....	51,382	52,657	53,000	53,800
Average number school children (millions).....	9.353	9.587	10.5	11.5
Number of meals served (billions).....	1.726	1.774	2.0	2.2

Financing of the program in the last 3 years was as follows:

	1955	1956	1957

Appropriation (new obligational authority).....	367,740	80,449	-----

The Commodity Credit Corporation makes advances to the Agricultural Marketing Service for the classing and grading of agricultural commodities without charge to producers. Such advances must be repaid from subsequent appropriations.

The advances received in 1957 for classing cotton and grading tobacco not placed under commodity loan are expected to be repaid through a supplemental appropriation in 1958. Therefore, no funds will be needed in 1959 under this item.

License fees are deposited in this special fund and are used to meet costs of administering the Perishable Agricultural Commodities, Produce Agency, and Export Apple and Pear Acts (7 U. S. C. 491–497, 499a–499s, 581–589).

These acts are aimed at assuring equitable treatment to farmers and others in the marketing of fresh and frozen fruits and vegetables. Commission merchants, dealers, and brokers handling these products in interstate and foreign commerce are licensed. Complaints of violations are investigated and violations dealt with by (1) informal settlements agreeable to both parties, (2) formal decisions involving payments of reparation awards between parties, and (3) suspension or revocation of license and/or publication of the facts. Approximately 26,000 licenses were in effect on June 30, 1957, and this is expected to increase by about 1,000 by the close of 1959. Formal complaints are expected to continue to average around 2,000 a year. Under the amendment to the act in 1956, aggressive steps are being taken to assist growers and shippers to correct or prevent misbranding of produce which will tend to hold down the number of potential complaints. The increase in 1959 will place on a full-year basis the expansion made in 1958.

Under section 32 of the act of August 24, 1935 (7 U. S. C. 612c) an amount equal to 30% of customs receipts during each calendar year and unused balances up to \$300 million are available for expanding domestic and foreign market outlets for farm commodities. These funds are also authorized for the administration of marketing agreements and orders, and the section 22 import-control programs. The basic legislation provides that not more than 25% of funds available shall be devoted to any one commodity or product thereof. It also provides that the funds shall be devoted principally to perishable agricultural commodities other than those receiving price support under title II of the Agricultural Act of 1949, as amended. These title II commodities are: tung nuts, honey, milk, butterfat, and the products of milk and butterfat.

An amount equal to 30% of receipts collected on fishery products is transferred to the Department of the Interior to encourage distribution of fishery products. The act of May 28, 1956 (7 U. S. C. 1855), authorizes the appropriation of an additional \$500 million annually to carry out the purposes of section 32 of which not to exceed 50% may be devoted to any one commodity.

1. *Commodity program payments include*—(a) *Direct purchases* which are donated to the school lunch program, charitable institutions serving needy persons and persons certified by welfare agencies as eligible for relief; (b) *Export payments* which enable exporters to purchase surplus commodities on the domestic market and sell them on the world market at competitive world prices; (c) *Diversion payments* which enable processors to purchase surplus commodities, divert them to byproducts and new uses, and sell them at prices comparable to competing products, thus creating new markets for surplus commodities.

The use of section 32 program funds is contingent upon economic conditions at the time. The estimates for both

1958 and 1959 reflect in total the requirements based on the situation as now foreseen. Distribution of this total in advance would be highly tentative since the type of program to be used is dependent upon a determination at the time of the kind of action which will best meet the particular need which had developed. If troublesome surpluses not now foreseen should develop, steps would be taken to use additional funds for their removal or diversion as conditions might warrant. During the past 2 years assistance under these programs was given to the following commodity groups:

[In millions]		
	1956	1957
Cottonseed oils.....	\$8.1	
Dairy products.....	78.1	\$55.4
Eggs and poultry.....		26.3
Fruits.....	4.3	1.6
Grain.....	12.5	13.1
Livestock products.....	101.2	33.4
Vegetables.....	9.5	7.7
Total.....	213.7	137.5

2. *Surplus removal operating expenses.*—These expenses are mainly in connection with purchasing, exporting, and diverting surplus commodities and in distributing section 32 and Commodity Credit Corporation commodities to eligible outlets. Approximately 2,789 million pounds of these commodities were distributed in 1957. Supervisory assistance is furnished local and State groups to encourage the preservation of surpluses for year-round use. In cooperation with the food trade, press and radio, greater consumption of abundant foods is encouraged. In 1957, the monthly plentiful foods list contained an average of 12 foods, and 10 national and 23 area, State, and local drives were conducted.

3. *Marketing agreements and orders.*—These are put into effect upon request of producers or handlers after hearings, investigations, and approved by producers (and handlers in case of marketing agreements). They help stabilize prices and benefit producers and consumers by establishing and maintaining orderly marketing conditions. Administration at the local level is financed by assessments upon handlers. On June 30, 1957, there were 67 orders in effect for milk, and 34 covering tree fruits, tree nuts, and vegetables.

4. *Foreign market promotion.*—Maintenance and expansion of foreign markets for surplus agricultural products are promoted by (a) obtaining and analyzing information on foreign-market requirements and making such information available to farm and trade groups; (b) developing market programs for use by producers, exporters, and Government officials to maintain and expand the market abroad of United States farm products; (c) assisting domestic trade representatives in negotiations with foreign government officials, importers, and consumers, and bringing together American exporters and foreign importers under conditions favorable to trade; (d) developing agreements with foreign countries for sales of U. S. agricultural commodities under title I of Public Law 480, and followup on the shipments of those commodities; and (e) preparing and supervising the operation of, or operating directly, market development projects to further expand foreign markets for agricultural products with foreign currencies generated under title I of Public Law 480.

5. *Import controls.*—Importation of articles, which interfere with programs carried out by the Department of Agriculture, is investigated and the information is developed in accordance with section 22 of the Agricultural Adjustment Act, as amended. During 1957, investigations were conducted on 16 commodities and 6 recommendations were submitted to the President or the

Tariff Commission. Under import controls for dairy products a total of 2,021 licenses for imports of cheese were issued and 106 for manufactured dairy products other than cheese.
